Wanted- Old Police Motorcycle Radios and parts
I am looking for ANY and ALL vintage police motorcycle radios and parts of same. Anything pre 1965 is of inteers and the older the better. Most of these units were motorola's but others were RCA, Avia, Link Vetric. You got it, and I want it. Also interested in old police motorcycle sirens. Email me at mark@linkcycles.com
Thanks
Mark

6. Trade webspace for HF rig

Newsgroup: rec.radio.amateur.swap
Date: 2002-01-01 08:42:45 UTC
From: Bear <n6rej@hotmail.com>
Message-ID: <7EeY7.293$4i6.18429@newsfeed.slurp.net>
Source record: 4009

Hello, I'm in need of a good HF rig. Full coverage would be nice especially in the reciever. She does'nt have to be pretty just functional. I would be willing to trade space on my server for a legitimate purpose. Mine was stolen sometime ago, and I just don't have the money to replace it.
Thanks in advance

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
TCXO
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I can provide digital pictures upon request.
I am asking $120.00 shipped ground UPS CONUS

Yaesu 767GX multi-mode transciever plus accessories for sale as
package.

Transceiver is solid state, multi-mode, with all of Yaesu's bells and
whistles: built in digital freq display, auto antenna tuner, digital
swr meter, digital rf power meter, am and cw filters, built-in digital
key pad for freq entry, and optional TSU-8 CTCSS tone board. Freq
coverage is 1.5 to 29.99999MHz, and also has the three optional boards
for 2mtrs, 70cm (440MHZ option) and 6mtrs, all multi mode. Comes with
Operator's Manual and "Technical" (Service Manual) Supplement. Clean
(non-smoking environment) and sharp looking.

The following accessories are included in the package for sale as a
package deal, and will not be split out:

Yaesu matching external speaker and phone patch, SP-767P.
Heil Headset (dual muffs) with HC-4 element.
Heil Dual element (Switchable on mic) cardoid microphone, HM-10, with
the HC-4 and HC-5 elements.
VibroPlex "Bug" (brass base, chrome and 'red' keyer)

All components are in excellent working and cosmetic condition. The
Heil headset needs new muffs, however the old ones are still
servicable and clean.

Asking $1225 plus shipping and insurance from 92083
(Southern CA).
Certified Check, USPS Money Order.

I have a PK-232 in good condition, for sale. It is the heathkit version of the PK-232. It works fine but, is not something I am using in my shack. I use Kantronics gear.

It comes with two TNC to radio cables as well as the scope cable and the power cable connector, as well as another cable who's purpose is unknown. The roms say 1988 though I have no idea the significance of that. I also have the 'Y' data cable somewhere and I'll throw that in if I can find it (cost me $35.00 just for the cable!)

I'd like $80.00 plus shipping. Email with questions and I'll try to answer though I really know very little about this unit beyond what is mentioned here as I got it as a part of a collection of gear (a packet station) from another ham and was interested in the other parts, not the tnc but it was a package deal. I was going to use the TNC but decided to stick with gear I know (Kantronics)

Another shack cleaning special!

I have way too many 2M radios and so the Yeasu FT-270RH must go! The radio is about an 8.5 cosmetically. The radio has given flawless service. The LCD is clear. It has the DTMF mic and does ctcss tones. It comes with the radio, mic, power cord, and the mobile mount with quick release.

A few specs for those interested. 2 meter FM mobile radio, 45 watts output. 10 memories, and scan. It does not have the optional tone board.

I would like $95 plus shipping for the radio. If you need a picture, I can take one and upload it to my webspace for your viewing.

I am going to try to save myself the headache of selling these on eBay where they will surely command a higher price than I expect (I am constantly suprised by what stuff sells for there.)

I have two Motorolla remote handset/monitors in fair to good condition. They show wear but are not damaged. That is why only fair to good. They are black bakelite and very heavy construction. There is a red transmit light on the side and volume and PL controls on the front.

Both units were working when removed from service several years ago.

A picture of one unit (they are pretty much the same) is located at http://www.eskimo.com/~ghopper/mphone1.jpg The photo shows the unit in all it's dusty glory! It was manufactured in 1963 but still looks like the height of Motorolla technology. Actually the units are pretty cool and I was going to use them for a remote in my office for a 2m rig I keep in our wiring closet but I ended up buying a rig with a remote head that uses a 4 wire interface and decided I liked that option better.

I consider offers but I'm inclined not to let them go for any less than $25.00 each since I had an antique dealer offer me that much.

I have a PK-232 in good condition, for sale. It is the heathkit version of the PK-232. It works fine but, is not something I am using in my shack. I use Kantronics gear.

It comes with two TNC to radio cables as well as the scope cable and the power cable connector, as well as another cable who's purpose is unknown. The roms say 1988 though I have no idea the significance of that. I also have the 'Y' data cable somewhere and I'll throw that in if I can find it (cost me $35.00 just for the cable!)

I'd like $80.00 plus shipping. Email with questions and I'll try to answer though I really know very little about this unit beyond what is mentioned here as I got it as a part of a collection of gear (a packet station) from another ham and was interested in the other parts, not the tnc but it was a package deal. I was going to use the TNC but decided to stick with gear I know (Kantronics).

Another shack cleaning special!

I have way too many 2M radios and so the Yeasu FT-270RH must go! The radio is about an 8.5 cosmetically. The radio has given flawless service. The LCD is clear. It has the DTMF mic and does ctcss tones. It comes with the radio, mic, power cord, and the mobile mount with quick release.

A few specs for those interested. 2 meter FM mobile radio, 45 watts output. 10 memories, and scan. It does not have the optional tone board.

I would like $95 plus shipping for the radio. If you need a picture, I can take one and upload it to my webspace for your viewing.

I have a Kenwood TS 530S HF Transceiver. With the service and operating manual. I have owned this radio for 13 years and it was worked fine. It had a intermittent display problem where the display would not turn on 100% of the time. It has since failed. So I am selling the radio as a tech special. The radio does turn on but the display is not on. It comes with the manuals and 2 ssb filters YK88S and SN.

I used a professional Beyer Dynamic DT 108 headset with this radio and a RTS broadcast intercom box modified to interface with this radio. THIS is not included. If you want the headset and box the price is $100.

The radio and a NEW Radio Shack hand mic (not interfaced to the radio) and a used Shure Desk Mick (also not interfaced to the radio) $250 shipped free in the CONUS.

I missed the original, and happen to need a few.
What's the length, and how much per?

I'm using these in a window-box, so I need about half an inch or better wall thickness.

MARC-----

The Michigan Antique Radio Club, one of the nation's largest,
announces:

HUGE ANTIQUE RADIO SWAP/SALE,
FEB 2 2002 (Saturday) 9AM-3PM

ARMENIAN COMMUNITY CENTER 19319 FORD RD,
ON NORTH SIDE WEST OF SOUTHFIELD FWY (M-39).

This show has over 70 tables of antique radios, tv's, phonos and related items. Tubes, misc parts, literature and misc also may appear here for sale! Items will date from the beginning of radio (1920) to about 1980. There will be a "silent" auction and a "donation" auction, and a display contest. If you have a radio you want evaluated, bring it to our "RADIO RESCUE"! We can also help you find service for your item if needed.

THIS IS THE "ROADSHOW FOR RADIOS"!!!!!!!!!

Admission only $5 per adult, kids under 12 free.
Seller tables are only $10, and usually sell out.

for more info, contact Don Colbert, 313-274-1948 or email him at
donsradio@aol.com ------seller tables $10.00 ------

chairman of the board ---- Mark Oppat

PS-----
If you have an antique or collectable radio, bring it in for a FREE EVALUATION at our "RADIO RESCUE"!!! Or, you can place your radio up for sale on the silent auction table, or donate it to the club for the "donation auction" held at the end of each show.

Yep. Two versions..A transister version, and a "deluxe" version using
the MAX232 chip. You could make a "psuedo" SM-20 mike from a rat shack
electret condensor element and save more big $$$. After looking at the
healthy prices they want for a simple cable for the faceplates, I'm
thinking of making one of those myself also if I can find some usable
end connectors. MK

********** Old Radio Books & Catalogs **********

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of wear at the corners. $10 (2 books)

RF Circuit Design by Bowick, Howard W Sams, 1982 first edition, first printing. Softbound, good condition, owner's name tag on frontleaf, a few pencil notes inside. 175 pages. $20

Applied ECM, Vol. 2 by Van Brunt, EW Engineering, cpy 1982, 2nd printing 1985. Hardbound, excellent condition, 630 pages. $25

Engineer's Notebook 2 by Mims, Archer, First editon, first printing 1982. Softbound large format, good condition $20.

Introduction to Computers & Data Processing by Shelly & Cashman, Anaheim Publishing 1980. Softbound, excellent condition, approx. 300 pages. My have we come a long way in 20 years!! $10

Handbook of Electronic Communication by Gary Miller, Prentice Hall 1979. Hardbound, very good condition, owner's name written on frontleaf, 339 pages. $7

Advanced Micro Devices "Build a Microcomputer" application note series in 7 parts, 1978. Excellent condition, about 200 pages total. $25

Lines, Waves & Antennas by Brown, Sharpe, Hughes & Post, Ronald Press 1973. Hardbound, excellent condition, 470 pages. $10

101 Ways to Use your VOM & VTVM by Middleton -- Howard W Sams. Good condition 144 pages. $5

Electronmagentic Waves & Radiating Systems 2nd Edition by Jordan & Balmain 1968. Hardbound, excellent condition with original paper jacket, owner's name marked out on inside front cover, 750 pages. $25

Handbook of Military Infrared Technology by Wolfe, US Navy, 1965. Hardbound, very good condition, except previous owners name written large on front edge. 900 pages. $30

Altec Landsing 1965 Home Hi-Fi catalog. Check the clothes on those old models! 15 pages, $10

Altec Lansing 1965 Recording & Broadcast Equipment catalog w/price list. Mostly individual data sheets in a 3 tab folder. About 100 pages. $25

Radio Amateur Callbook V41 #2 -- DX listings only, 1963. Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $4

RCA Transistor Manual SC-13, 1967. Paperback. Good condition 540 pages. $10

Having Fun with Transistors by Buckwalter -- Howard W Sams. Good condition 127 pages. $5

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owner's name in ink on p.106. 143 pages. $60

Allied Electronics Data Handbook. Lots of formulas. Water damage on cover and about 1/2" into edges, no pages stuck. 1962. $2

International Crystal Mfg. Catalog 1962 $20

Understanding Transistors by Allied Radio. 1962 First Edition, first printing. Good condition 96 pages. $10

Varactor Applications by Penfield & Rafuse, MIT Press 1962. Hardbound, good condition with original paper jacket under plastic cover, owners name on frontleaf and on two edges, 620 pages. $30

Semiconductor Diode Parametric Amplifiers by Blackwell & Kotzebue, Prentice-Hall 1961. Hardbound, very good condition with original paper jacket under plastic cover, 190 pages. $25

Hycon Crystal Filter Catalog, 1957 $10

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 & Winter '58, Fall-Winter '62-63,
Xmas '89 + Winter, Spring, Summer '90 $120 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $25

Measurements at Centimeter Wavelength by King, Van Nostrand 1951. Hardbound, very good condition, owner's name marked out on inside front cover, 320 pages. $20

40 Uses for Germanium Diodes by Sylvania Electric Products. First edition, first printing, 1951. Cover separated, some writing on cover & frontspiece, otherwise good condition. 47 pages. $7

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $7

Alternating Current Circuits by Kerchner & Corcoran, Wiley 1951. Hardbound, very good condition, owner's name marked out on inside front cover, 600 pages. $20

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $7

Circuit Analysis of AC Power Systems Vol. 1 by Clarke, Wiley cpy 1943 fourth printing 1950. 1951. Hardbound, very good condition, owner's name marked on inside front cover, 540 pages. $20

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $15

Jensen Technical Monographs No. 1, Loud Speaker Frequency Response Measurments and No. 2 Impedance Matching and Power Distribution in Loud Speaker Systems. Copyright 1944, these are both Fifth Printing, 1945. 16 & 20 pages respectively, very good condition, some wear around cover edges. $30 both.

Fields & Waves in Modern Radio by Ramo & Whinnery, Wiley 1944. Hardbound, very good condition, owner's name written inside front cover, a few pencil marks in text. 500 pages. $25

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $15

Reference Data for Radio Engineers by Federal Telephone & Radio Corp. Lots of reallly useful info about tubes & formulas in this small format hardbound book -- Good condition small part of frontspiece, probably where owner's was stamped, missing. 200 pages. $25

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $7

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio. 240 pages, solid schematics! Like new, $15

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $15

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $15

ARRL Pacific & Southwestern Division convention program, San Francisco, CA, September 1939. Water damaged but, no pages stuck & quite readable otherwise. 16 pages. $10

Amphenol Bulletin No. 59-J, September 1939. Good condition, 6 pages, $10.

Hadley Transformer catalog No. T6, no date but, looks pre-WW2. Good condition, 15 pages. $20

Kenyon Transformer catalog 1939. Good condition, 15 pages. $20

Cornell-Dubilier Capacitor catalog #161, 1938-39. Very good condition, 39 pages. $30

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $20

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $10

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $15

Advanced Laboratory Practice in Electricity and Magnetism by Terry & Wahlin, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $7

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles)
-- a little smudging on the back cover and two middle pages torn on the
edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are
receiving and transmitter tube data from the era. $15

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $4

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment, tools, machinery, and construction projects.
128 pages $4

Inca Transformer catalog No. L-31 (1931?). Good condition, 8 pages. $25

Radio Amateur's Handbook Ninth Edition by the ARRL, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $7

Radio Amateur's Handbook Sixth Edition by the ARRL, November 1929.
Cover a little worn at edges and on spine otherwise excellent, no
writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $4

Official Radio Service Manual 1930, originally published by Gernsback
Publications. This is a REPRINT by Vestal Press, 1984. Schematics &
some service info. 352 pages, like new $15

All of the above plus shipping, if necessary, naturally.

Hi all. I'm looking for a functional M57726 RF Amplifier module,
doesn't have to be new. Yes, I know I can get them for $60 plus
shipping from RF Parts, but I'd like to find one a lot less expensive.
(It doesn't make sense to put a $60 module in a radio only worth about
$90 on a good day.)

So, what have you? Maybe you've got a junker with a known good
module?

I look forward to your email or call; cosmetics DON'T matter to me on
this one.

Thanks;

Neil, K1VY

re: P-200, HT-600 & MT-1000 radios for sale.

Hello there,

I was surprised and quite pleased to sell one of my MT-1000 rigs on this News Group last week, so now comes the rest.

I have a small collection of hand held radios for sale. Just the HT-600, P-200 & MT-1000 types, no others for sale yet.

I have been using them for ham and commercial radio work. I have only VHF-High (138-174 band) & UHF band units left. I figure I have at least 4 or 5 on each band left, maybe more...

As some of you might already know, the HT-600, P-200 and MT-1000 are pretty much the same unit. Some were offered with only 2 channels, some 6, 12 and on up to the 99 channel models.

All or most of my radios are at least six channels, some are 12 and I have no 99 channel units. Some of the 6 channel radios started life as two channel units, but were expanded to the full six.

I will test and verify each unit sold for normal operation (transmit and receive). After that, I have some non working radios that I will sell as a batch of repair parts and/or ebay them out later.

I have fast and standard chargers to be sold along with them. Batteries for some/most are just ok, nothing brand new... some need reconditioning and I don't have the proper charger to do that.

So, I have at least an MT-1000 and an HT-600/P-200 on high band, the MT-1000 has scan. Some of each model I have the dtmf pad.

I have a batch of various HT-600/P-200 radios on the 460 commercial band, one or two were used down on the local ham repeater for a time. The work there just fine thanks...

I have one low split 409-438 HT-600 that works great and is killer to test UHF repeater links and sub bands, just program in what you want.

If you Email me what you want, I'll be happy to tell you what I have specific to your needs. I have some standard antennas, some stubby's and some without. I can pack a battery on any radio that goes out, but I think you might want to buy a fresh one to use in commercial services.

Chargers go first come first serve. yeah, I know there are no prices mentioned yet. If you look on Ebay, you will see these radios go from

about $75 to $225 dollars on average. If you want one or more... or all of them, I'll provide a list of exactly what I have here and you can make an offer for the batch. Otherwise I expect to keep selling off single units like I have.

I'm realistic about selling them off cheap enough.

thanks, remove the NOSPAMPLEASE from my Email header to contact me.

thanks
skipp

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
TCXO
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I can provide digital pictures upon request.
I am asking $120.00 shipped ground UPS CONUS

I am looking for opinions on what would be the best microphone for this HF rig. I was
thinking of getting a electrovoice RE-20 has anyone used this professional broadcast microphone on a HF rig. How would or how did it perform. Please let me know which microphone
you think is best for this application.

Why would you want to use a broadcast microphone on a ham radio rig?

Go see a demonstration by Bob Heil, K9EID, to understand that
question. Then buy a Heil mike.

LRod

Showtime,
Try a Heil HC-5. Turn on the compression but run it at
a very low level, (a sharp whistle should only produce one
'dot' on the scale). Mic gain set about 9 o'clock. It doesn't
get any better than that. DON'T use a 'studio' mic. DON'T
use wide (or no) filtering. DON'T believe all the 'bull' about
'broadcast quality'...
'Doc

76. FS: Panel Meters, RF Ammeters, Time Meters

Newsgroup: rec.radio.amateur.swap
Date: 2002-01-09 19:09:36 UTC

******* Panel Meters ********

Alps Keiki SU-55 series
3A DC 3.4" x 2.4" rectangular NIB -- $20
100uA DC 3.4" x 2.4" rectangular NIB -- $20
15 V DC 3.4" x 2.4" rectangular NIB -- $20

Analog Devices AD2004 4ï¿½ Digit LED 2 (1.9999) volt Panel Meter; NOS
w/ data sheet $40

Calrad 1mA DC 1.7" square new -- $10

Datel DM-3100L-7089 3ï¿½ Digit LED Panel meter; range & condition
unknown. $10

FLW Model 204B2, ER2 & model 204B-2D1,ER2,01 digital panel meters
w/internal 120VAC power supply. 4 digit display plus a minus sign; 3ï¿½
or full 4 digits ?? Full scale unknown-- $25 pair

GE 50-283013MTMT1 3" thin edgewise panel meter 10V scale NOS in old
box -- $15

GE DW-44 2" round 8A RF Ammeters w/ internal thermocouple $15 ea

GE 50-240001AAAA1 2" round 100000 Hour Running Time meters 120VAC
60Hz NOS $20 ea

A.W. Haydon miniature 10000 Hour running time meter. Case is about
1/2" square (exclsive of mounting flange) by 1" deep. 115VAC 400Hz
NOS $15

Hobbs 120 VAC 60Hz 99999.99 (Yes, displays down to 100th's!) Hour
running time meter about 1" high by 2" wide rectangular with
triangular shaped mounting ears. New $20 ea
See the top meter displayed on the link below except that the only
screening on the front of the units I have is the 1/10 hour pointer:
http://www.hobbs-corp.com/cat1_hr7.html

Japanese meters -- unknown mfgrs
50uA DC 2.3 x 2.6 rectangular NIB -- $15 ea (2 available)
MRA-38 500uA DC 1.7" square used -- $6 ea (2 available)
MRA-38 500uA DC 1.7" square new -- $10 ea (2 available)
407-160 Red/Green half & half scale (100uA movement) less than 1"
not square NIB -- $5

KEW Electric dual scale 32V / 1.5A meter (1mA movement) 1.9 x 1.6
rectangular -- $5

Lambda (made by GE) 40VDC 1.75" square new -- $20
Lambda (made by Honeywell) 10 A scale 1.75" square new -- $20

Motorola 52B892096 3ï¿½" Square Meter (movement actually made by
Simpson).
This is some kind of tuning (or deviation?) meter with a 12 pin
connector
(like a 9 pin miniature tube outline plus 3 extra pins in the center)
wired to the meter. $15

Simpson Model 45 3" round VU meter $20
Simpson 1327 100uA 3ï¿½" square meter $15
Simpson 3" sq modern plastic 500-0-500ua movement w/ 50-0-50 scale --
$10

Triplett 220G 50 Volts DC 2-3/4" rectangular -- $15
Triplett 320-G 50-0-50 ua DC 3ï¿½" rectangular -- $15
Triplett 327T 50 uA DC 3" Square meter -- $15 ea (3 available)
Triplett 321T 1 Amp DC 3.5" Round meter NIB -- $20
Triplett 327T 10 Volt DC 3" Square meter NIB -- $20

Westinghouse 3ï¿½" Square RX-35 series meters, used -- $10 each

15 VDC 20 VAC 35KV (2mA full scale on this last unit)

Westinghouse 2" round 9A RF Ammeters w/ internal thermocouple $15 ea
Westinghouse 3" round 50mA RF Ammeter w/ internal thermocouple $20

Weston 301 3" square 3A RF Ammeter (requires external thermocouple
that I don't have) $7

All of the above plus shipping, if necessary, naturally.

***** Used Coax Connectors ****

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF F-M-F Tees -- $2 ea

UG-57B/U N Male-Male connector -- $4 ea
UG-131/U N Female to ?? (maybe a BN?) -- $3 ea
UG-635/U C Female - BNC Male adapter -- $5 ea
UG-636A/U BNC Female - C Male adapter -- $5 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

N Female Chassis Mount connectors with gold (plated/flashed) PC style
center pin (extends about 1/8" back from the insulator) -- $1ea

***** New Coax Connectors *****

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in
individual plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
KC-59-642-M06 BNC Cable Male -- $1 ea
KA-59-385-M06 TNC Cable Male -- $1 ea
KA-19-43 TNC Bulkhead Female -- $1 ea

All of the above plus shipping, if necessary, naturally.

********** Old Radio Books & Catalogs **********

JBL professional products binder, late 1980's. Consists of
individual data sheets plus about 20 technical notes in a 3-1/2"
thick,
Orange JBL 3 post binder -- in excellent condition, weighs abt 6 lbs.
$75

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of
wear at the corners. $10 (2 books)

RF Circuit Design by Bowick, Howard W Sams, 1982 first edition, first
printing. Softbound, good condition, owner's name tag on frontleaf, a
few pencil notes inside. 175 pages. $20

Applied ECM, Vol. 2 by Van Brunt, EW Engineering, cpy 1982, 2nd
printing 1985. Hardbound, excellent condition, 630 pages. $25

Engineer's Notebook 2 by Mims, Archer, First editon, first printing
1982. Softbound large format, good condition $20.

The Practical Handbook of Amateur Radio FM & Repeaters by Pasternak.
Tab books, cpy 1980 2nd prntg 1981. Very good condition, 538 pages.
$15

Introduction to Computers & Data Processing by Shelly & Cashman,
Anaheim Publishing 1980. Softbound, excellent condition, approx. 300
pages. My have we come a long way in 20 years!! $10

Handbook of Electronic Communication by Gary Miller, Prentice Hall
1979. Hardbound, very good condition, owner's name written on
frontleaf, 339 pages. $7

Advanced Micro Devices "Build a Microcomputer" application note series
in 7 parts, 1978. Excellent condition, about 200 pages total. $25

Ham Radio Humor by Johnson, Johnson 1977. Very good condtion, 92
pages. $7

Understanding Television by Kennedy, Sams, 1st ed, 1st prnt 1976.
This was a library ook and the cover is damaged where a hard jacket
was removed. Insides are very good, 128 pages, $5

360 Assembly Programming by Weiss, McGraw Hill 1970. Hardbound, good
condition, owner's name whited out on titlepage, 420 pages. $25

Elements of IBM 1130 Programming by Price, Rineheart Press, 1968. Hardbound, very good condition, 484 pages. $25

Programming the IBM 1401 by Saxon & Plette, Prenice Hall, 1962. Hardbound with original dust jacket in very good condtion. 208 pages. $25

101 Ways to Use your VOM & VTVM by Middleton -- Howard W Sams 2nd ed, 2nd prntg 1967. Good condition 144 pages. $5

Handbook of Military Infrared Technology by Wolfe, US Navy, 1965. Hardbound, very good condition, except previous owners name written large on front edge. 900 pages. $30

Radio Amateur Callbook V41 #2 -- DX listings only, 1963. Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $4

RCA Transistor Manual SC-13, 1967. Paperback. Good condition 540 pages. $10

Having Fun with Transistors by Buckwalter -- Howard W Sams. Good condition 127 pages. $5

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owner's name in ink on p.106. 143 pages. $60

Allied Electronics Data Handbook. Lots of formulas. Water damage on cover and about 1/2" into edges, no pages stuck. 1962. $2

International Crystal Mfg. Catalog 1962 $20

Understanding Transistors by Allied Radio. 1962 First Edition, first printing. Good condition 96 pages. $10

Varactor Applications by Penfield & Rafuse, MIT Press 1962. Hardbound, good condition with original paper jacket under plastic cover, owners name on frontleaf and on two edges, 620 pages. $30

Semiconductor Diode Parametric Amplifiers by Blackwell & Kotzebue, Prentice-Hall 1961. Hardbound, very good condition with original paper jacket under plastic cover, 190 pages. $25

Hycon Crystal Filter Catalog, 1957 $10

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 & Winter '58, Fall-Winter '62-63,
Xmas '89 + Winter, Spring, Summer '90 $120 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $25

Television by Zworykin and Morton, McGraw Hill 1954. Hardbound, some wear at the top and bottom of spine, insides in very good condition,

1037 pages. $85

40 Uses for Germanium Diodes by Sylvania Electric Products. First edition, first printing, 1951. Cover separated, some writing on cover & frontspiece, otherwise good condition. 47 pages. $7

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $7

Alternating Current Circuits by Kerchner & Corcoran, Wiley 1951. Hardbound, very good condition, owner's name marked out on inside front cover, 600 pages. $20

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $7

Very High Frequency Techniques by Radio Research Lab Harvard University, McGraw Hill, 1947. Hardbound, cover a little worn, insides in very good condition, owner's name on inside front cover & frontspiece, 550 pages. $50

Circuit Analysis of AC Power Systems Vol. 1 by Clarke, Wiley cpy 1943 fourth printing 1950. Hardbound, very good condition, owner's name marked on inside front cover, 540 pages. $20

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $15

Fields & Waves in Modern Radio by Ramo & Whinnery, Wiley 1944. Hardbound, very good condition, owner's name written inside front cover, a few pencil marks in text. 500 pages. $25

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $15

Radio Fundamentals TM11-455 US ARMY Technical manual. 22 May 1944. Good Condition except for owner's sticker inside front cover and a little writing on title page. 333 pages. $30

Reference Data for Radio Engineers by Federal Telephone & Radio Corp, cpy 1943, 4th printing 1944. Lots of reallly useful info about tubes & formulas in this small format hardbound book -- Good condition small part of frontspiece, probably where owner's was stamped, missing. 200 pages. $25

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $7

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio.

240 pages, solid schematics! Like new, $15

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $15

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $15

ARRL Pacific & Southwestern Division convention program, San Francisco, CA, September 1939. Water damaged but, no pages stuck & quite readable otherwise. 16 pages. $10

Amphenol Bulletin No. 59-J, September 1939. Good condition, 6 pages, $10.

Hadley Transformer catalog No. T6, no date but, looks pre-WW2. Good condition, 15 pages. $20

Kenyon Transformer catalog 1939. Good condition, 15 pages. $20

Cornell-Dubilier Capacitor catalog #161, 1938-39. Very good condition, 39 pages. $30

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of spine & first 20 pages of lower right corner. 192 pages -- $20

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $10

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $15

Television by RCA, Vol. 1, RCA Institutes, 1936. A collection of papers concerning the genesis of television. Softbound, a couple small tears at the bottom of the cover, insides in very good condition, 452 pages. $250

Advanced Laboratory Practice in Electricity and Magnetism by Terry & Wahlin, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $7

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles)
-- a little smudging on the back cover and two middle pages torn on the
edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are
receiving and transmitter tube data from the era. $15

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $4

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment, tools, machinery, and construction projects.
128 pages $4

Inca (Phelps-Dodge) Transformer catalog No. L-31 (1931?). Good condition, 8 pages. $25

Radio Amateur's Handbook Ninth Edition by the ARRL, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $7

Radio Amateur's Handbook Sixth Edition by the ARRL, November 1929. Cover a little worn at edges and on spine otherwise excellent, no writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $4

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $15

All of the above plus shipping, if necessary, naturally.

And, if properly modified, the MC-50/60 does pretty
good. If I'm not mistaken, the Heil Pro-Line uses the
HC-5 element (or the HC-4 very tinny).

I have a like new computer monitor. Its a 15 inch CTX SVGA monitor. It has very very low hours on it if any at all. It was on a server and the monitor was off. Great for packet and surfing the newsgroups for ham stuff. AND other things.

$65 plus shipping

Mike WB2GLW

Obsolete callbooks for four and ten bucks? I guess that you never know when
you might wanna locate some silent keys and send them a posthumous QSL card,
particularly the foreign ones from thirty nine years ago..

Such a deal..

Always used D-104's with my TS450S till I monitored myself through my W2IHY noise gate / EQ box. Although I could easily tailor the D-104 audio with it I have switched to the Astatic Silver Sidebander which EQ's much better and can deliver a wider range of audio profiles than the D-104's.

Now I can transform the transmitted audio from ear-piercing pile-up busting high frequency content all the way through 'normal' and on to the warm, friendly, sexy so-called hi-fi audio many folks like to hear.

lol

You duplicated the theory behind the Heil Dual mic without spending all that money.

I agree, the D104 standard mic is crappy for most of todays rigs, unless you want
nothing more than ear splitting pile up busting high pitched audio.

Hello Skipp,

Explain to me again why a website regarding vintage 10-meter ham radio
transceivers must be promoted continually in a CB newsgroup?

I know you had some lame excuses like "the 1011 has a receive-only
option on CB" or "many hams read the CB newsgroup" but I've forgotten
most of them.

A bit of advice, if you are trying to reach "hams" you might try --

rec.radio.amateur.misc,
rec.radio.amateur.boatanchors
rec.radio.amateur.equipment

-- or any of the dozens of other ham-specific newsgroups rather than
confine your postings to generic radio swap and cb groups.

-Aaron-

108. Antenna tuner for Sale

Newsgroup: rec.radio.amateur.swap
Date: 2002-01-13 06:28:10 UTC
From: Kevin Nathan <k7rx@attbi.com>
Message-ID: <_N908.17412$uA.136940@rwcrnsc51.ops.asp.att.net>
Source record: 4111

Hi Everyone,

I have for sale a Viewstar VS1500A, high power antenna tuner. It will handle 800 to 900 watts out with no problem except on 160 where voltages may get quite high. However, into a fairly resonant antenna on that band it will work very well. It has outputs for two coaxial antennas, long wire and balanced line outputs. The two coax outputs can be bypassed directly to the antenna. It also has connections for an antenna to completely ignore the tuner at all times and for a dummy load. Metering is available for reflected and two ranges of forward power.

I am asking $250 for this tuner shipped in the continental US.

Thanks and 73.
Kevin, K7RX

Hi,

Because to moving, I have following equipment for sale in the Toronto area. Preferably you will pickup equipment yourself. Shipping outside of Toronto if you pay shipping costs.

I would also prefer that everything listed be bough in bulk. I have no time to split it up.

Here is my list. All equipment is in working condition:

1. Heathkit SB401/303 combo (10-80m TX/RX)
2. Heathkit HHM-102 VHF Wattmeter
3. Heathkit HD-19 VU meter
4. Vibroplex deluxe side swiping keyer
5. Shure 444 table mike
5. Collins 51-J3 receiver, 0-30MHz
6. H.P. 400D Voltmeter
7. Beatcat 300 scanner
8. VHF Engineering model PA140/10, 150 W VHF 2M FM Power Amp, (10W in, 140 out)
9. Daven DP-182 Audio decade attenuator box
10. 1000ft of RG-223 (50 ohm teflon coax similar in diameter to RG-58)
11. 500ft of twisted shielded pair cable
12. Assorted box of cables and electronic parts

To enquire, click on the link below and fill out the form. I will get back to you as soon as possible:
http://www.croatianmall.com/email_form.html

I have a potential audience of a little over 300 people I will be doing a presentation to, to promote amateur radio, and will be hopefully setting up classes for those that may be interested.

In order to help encourage them, I am looking for donations of text books such as "Now Your Talking" and other similar books to help get some more people lincensed in my area.
If you have a recent text you could spare and help put to good use, please contact me at kc8pmx@tm.net or cc: to kc8pmx@hotmail.com

I will keep you informed of my activities as to responses to the presentation, how many are involved in classes and so. This way you can know that your donated texts are going to good use. My intent is to loan these out to people and get them back when they are done, so that another person may also benefit from them.

Thanks in advance!

Ryan KC8PMX

I cross posted the below information on the comp.sys.tandy news group and the computers were quickly spoken for. Many Radio Shaft (Shack), Tandy and vintage TRS-80 computers users frequent the news group. I'm an original trs-80 model one/three fan myself. Some of us can never seem to get it out of our blood. Hope to see some of you over there when you can make it.

Aydin GaAs Fet 14.0-14.5 amplifier. AMA 140145A24..

I tried this unit at 10 ghz and it raised the noise floor of my equipment
but did not pass a signal

The voltage is 15 vdc and the amp has SMA female connectors...

$75 shipped in the US.

Yaesu 767GX multi-mode transceiver plus accessories for sale as
package.

100 watt Transceiver is solid state, multi-mode, with all of Yaesu's
bells and
whistles: built in digital freq display, auto antenna tuner, digital
swr meter, digital rf power meter, am and cw filters, built-in digital
key pad for freq entry, and optional TSU-8 CTCSS tone board. Freq
coverage is 1.5 to 29.99999MHz, and also has the three optional boards
for 2mtrs, 70cm (440MHZ option) and 6mtrs, all multi mode. Comes with
Operator's Manual and "Technical" (Service Manual) Supplement. Clean
(non-smoking environment) and sharp looking.

The following accessories are included in the package for sale as a
package deal, and will not be split out:

Yaesu matching external speaker and phone patch, SP-767P.
Heil Headset (dual muffs) with HC-4 element.
Heil Dual element (Switchable on mic) cardoid microphone, HM-10, with
the HC-4 and HC-5 elements.
VibroPlex "Bug" (brass base, chrome and 'red' keyer)

All components are in excellent working and cosmetic condition. The
Heil headset needs new muffs, however the old ones are still
servicable and clean.

Asking $1225 plus shipping and insurance from 92083
(Southern CA).
Certified Check, USPS Money Order.

Hi,

Due to moving, I have following equipment for sale in the Toronto area. Preferably you will pickup equipment yourself. You pay shipping costs if you live outside the Toronto area.

I would also prefer that everything listed be bought in bulk. I have no time to split it up.

Here is my list. All equipment is in excellent working condition:

1. Anadex Frequency Counter CF-700A, 5Hz-1GHz
2. Heathkit HM-102/1KW, 1.8-30 Mhz Watt/SWR meter
3. Heathkit HM-2102, VHF Watt/SWR meter
3. Heathkit HD-19 Phone Patch
5. Collins 51-J3 receiver, 0-30MHz (mint with manual, owned by ex-Collins employee)
6. David Clark H7010 noise cancelling headset/microphone http://www.davidclark.com/h7010.htm
7. H.P. 400D Voltmeter
8. Bearcat 300 scanner
9. VHF Engineering model PA140/10, 150 W VHF 2M FM Power Amp,(10W in, 140 out)
10. Daven DP-182 Audio Decade Attenuator box
11. 1000ft of RG-223 (50 ohm teflon coax similar in diameter to RG-58)
12. 500ft of 22awg twisted shielded pair cable
13. Assorted box of cables and electronic parts

To enquire, click on the link below and fill out the form. I will get back to you as soon as possible:
http://www.croatianmall.com/email_form.html

Hi all, I have a Yaesu VX-5, 2 meters, 6 meters and 440MHz handi
talkie.
It is 99% mint shape both working and looking. I have the
fast charger, 2 batteries (good condition) and the soft case for it.
I can send you pictures if you like.
I am looking for an Alinco DJ-G5 dual band handi talkie.
Your DJ-G5 must be in mint shape, both working and looking as
the VX-5 is.
PLEASE send me e-mail direct at: mrrusso@optonline.net
I don't check out these groups often.
By the way, the reason for the trade is because the VX-5 is too
small for me. I like something bigger like my old DJ-580T was.
THANKS for reading.

Mark

Well my W2A bit the big one. I have what has been described in the groups as "the red light of death." I sent it to Icom they said sorry, blown CPU and they don't make them anymore.

Would anyone like a sweet deal on some very clean accessories: batt packs, charger, 12v cig, headset, mic/spker, manuals, case, etc, etc, plus I'll even include what is now a nice anchor for a very, very small boat!?

I just ordered a Yaesu VX-5r, I really want 6m anyway. I don't think any of the Icom stuff will be compatible.

153. FS: New Kenwood Dual Slot Rapid Rate Desktop Charger

Source record: 4056

BRAND NEW in box: Kenwood Model KSC-14 Dual Slot Rapid Rate Charger!
Will charge two batteries simultaneously at trickle or sequentially at
rapid rate. Mfg. Suggested List is $102

The KSC-14 comes with removable battery pocket inserts and will charge
batteries from Kenwood model TH-22, TH-42, TH-77, and I believe the
TH-79 series radios as well as some older models.

The KSC-14 is compatible with the following batteries: PB-30, PB-32,
PB-33, PB-34, PB-6, PB-7, PB-8, PB-9, PB-11, and also Land Mobile
model batteries KNB-5, KNB-6, KNB-7 and KNB-9A.

Price is $48 and includes shipping (ground) in the 48 states.

Please respond to jkinsley@raex.com

Not so fast. There's a mic/headset adapter for the VX 1/5 that adapts
older Yaesu (eg, 470) dual plug stuff - and hence Icom stuff - to the
new one-plug configuration. so ....

Skipp,
I think he's busy trying to find _any_ evidence that would validate his
assertion that "clipping" a final is standard, Key Clown behaviour.
I'm sure he has little time for anything else. Certainly not enough time
to practice code so he can pass that 5 word per minute thingy. :-)

For there to be a "high and mighty road" there must also be a
"low-down dirty road". Is that the road you wish to identify yourself
with? Sure looks like it to me.

Greetings ...
A long time ham chum of mine has a Kenwood TS-680s transceiver. In order to utilize rig control with his PC and logging program, he apparently he needs to
get a small device, an interface kit, manufactured by Kenwood called the IF-10c.
It appears that the product is now out of production.
Any clues on where to find one and how much they cost?

Thanks and regards,

Sandy

Hallicrafters HT-37 Transmitter For Sale.

A Classic! This transmitter is a 18-tube AM-CW-SSB 80 through 10 meter transmitter/exciter. It was manufactured to have a power output of 70 to 100 watts CW or SSB, and 17 to 25 watts AM. This radio's features include phasing-type side band generator, output meter, VOX, full band switching, and VFO. The driver tube is a 12BY7 and the final amplifer is a pair of 6146s. (Companion units to this would be the HT-41 linear amplifer and the SX-111 receiver). Production Year 1959-62.

Excellent shape. Needs a new power cord.
Was in operating condition when taken out of service some
12 years ago.
Clean condition. Front panel is immaculate and case has only a few very minor marks. No modifications.
Will sell for $125.00 plus shipping

Picture and details at:

http://ccfradio.topcities.com/radios.htm

The range of a pair of ICOM T81A's are easily half a mile with stock antenna. The range improves with an aftermarket antenna (Comet SMA703). At 0.6 miles in our test the signal increased about 75%. The output is one watt.If you are not familiar with the T81, it is a quad band HT. Covers 6M, 2M, 70cm and 1.2 GHz. I am also able to use a repeater that is several miles away.

Your comment about range may have some truth from HT to HT but in populated areas such as the SF Bay area where the person requesting this is located, there are LOTS of 1.2 GHz repeaters, some inter linked and coverage is very good. I have worked through repeaters dozens of miles away with my 220/1.2GHz HT on 1.2 GHz with full quieting.

You must be in an area with few people and few mountains or tall buildings or towers.

Hi,

Due to moving, I have following equipment for sale in the Toronto
area. Preferably you will pickup equipment yourself. You pay shipping
costs if you live outside the Toronto area.

Here is my list. All equipment is in excellent working condition:

1. Heathkit SB401/303 combo (10-80m TX/RX) with Shure 400 microphone
2. Heathkit HM-102/1KW, 1.8-30 Mhz Watt/SWR meter
3. Heathkit HM-2102/1KW, VHF Watt/SWR meter
4. Heathkit HD-19 Phone Patch
5. Collins 51-J3 receiver, 0-30MHz (mint with manual, owned by ex-Collins
employee)
6. Anadex Frequency Counter CF-700A, 5Hz-1GHz
7. David Clark H7010 noise cancelling headset/microphone
http://www.davidclark.com/h7010.htm
8. David Clark H-133C/A1C noise cancelling headset/microphone
9. H.P. 400D Voltmeter
10. Bearcat 300 scanner
11. VHF Engineering model PA140/10, 150 W VHF 2M FM Power Amp,(10W in,
140
out)
12. Daven DP-182 Audio Decade Attenuator box

To enquire, click on the link below and fill out the form. I will get
back to you as soon as possible:

From: w4th@hotmail.com
Message-ID: <dc97c428.0201280703.77b4326a@posting.google.com>
Source record: 3902

I have new factory fresh 3-500zg tubes for sale. These tubes are
fully tested before they are shipped. I stand behind every tube i
sell. If you would like to see some references about my tubes and
service, just go to my web site http://www.tomstubes.com
and look for the reference section near the bottom of the page.
My 3-500zg tubes are really great. I have sold dozens of these, and I
have never had to replace a single tube! As I said, each tube is fully
tested and that is the only time the tubes have been removed from
their factory shipping boxes.
The price of my 3-500zg tubes is $110.00 plus shipping. I will
warranty each tube for 6 months.....no ouestions asked....If you are
not completely satisfied with any tube you buy from me, send it back
for an exchange or refund....your choice.....no hassle.
I also have 4cx800a tubes new in the box for $190.00 per PAIR!
Thanks for your time and 73.
Tom.......W4TH

204. WTB: Card Extenders and Manuals for Commercial HF RXen

Newsgroup: rec.radio.amateur.swap
Date: 2002-01-29 16:57:39 UTC
From: mikea@mikea.ath.cx
Message-ID: <7wA58.16553$cA5.2342339738@newssvr16.news.prodigy.com>
Source record: 3907
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.boatanchors,rec.radio.swap,rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.swap

I just got three HF receivers "as-is", with service manuals,
which will make things _MUCH_ easier. They're:
o Debeg E2000,
o ITT-Mackay 3020A, and
o Racal 6217E.

I want to buy operator's manuals for all three, and would like
to buy card extenders for all three, as well. Buying them will
be _much_ nicer than making my own.

All are "as-is" and need work, and the only way to do useful
troubleshooting is with card extenders. I _might_ be talked
into swapping the ITT-Mackay and its manuals for operator
manuals and card extenders for the other two, plus a bit. It
depends on what the extra bit is. A "10" 75A4 or 51J3 would
certainly do. ;=)

I'll be happy to hear from anyone else who has one or more of
these receivers, or experience working on or with them.

Yes, boatanchor folks, these don't have glowbottles, but they're
of the same general era, and you folks know me, and I know you
might have some of these things ratholed.

205. FS: JRC NRD-535

Newsgroup: rec.radio.amateur.swap
Date: 2002-01-29 17:18:06 UTC
From: Michael <michaelt@flash.net>
Message-ID: <iPA58.16569$iY5.2343858238@newssvr16.news.prodigy.com>
Source record: 3908

I have for sale a very nice condition JRC NRD-535 receiver with stock filters. The NRD-535 tunes 100 - 30,000 kHz in modes AM, SSB, CW, FAX, FM and RTTY.This receiver has 200 memory locations which store frequency, mode, AGC, ATT and IF filter selection for scanning. With appropriate software the RS-232 interface allows computer control of the radio and memory functions. It is not a "D" model.

$600.00 plus shipping and insurance from zip 76001.

Thanks!

I have a Radio Shack Model PRO 2025 16 channel programmable mobile scanner.
Covers
29-54, 136-174, 406-512 mhz

One of my buddies messed with the DC input so it would be powered all the
time. And now it doesn't work.

I just have the scanner no mounting bracket..

$25 shipped free in the CONUS

This is not entirely true! We have a 1.2 system in Los Angeles that covers the entire Los Angeles area with only 2 repeaters linked together. We have HT coverage in the entire LA area. Of course some areas are a bit scratchy but mostly very good coverage.

Any HT (Handy Scratchy) will always be limited in range but when designed right, it could go a long way. 1.2ghz is a relatively quiet band.

For Sale. This is an Icom IC-737 transceiver covering 160 - 10 meters.
Built-In Antenna Tuner. No Mic is included with Rig. I'm using a GOLDLINE
mic and use it with my other rigs. I Do have Copy Of Owners Manual. Works
perfectly in all modes and on all bands. This is a 12 volt DC rig, and would
require a 12 volt DC / 20 amp power supply for base operation. I do have the
wiring harness for the rig. Payment is Cashier's Check, Postal Money Order,
or Paypal! Rig will be send out after funds are received the NEXT business
day. I try to personally check out each item I list for sell/trade, and to
describe each item completely & carefully. However, since most of these
items are used electronic pieces all items are sold "as is". Please contact
me for any further information. Pictures can be email as requested.
Feel free to call with any questions 678-227-2661.

I have for sale a nice condition Yaesu FT-101ZD. This particular
transceiver is the version with AM mode included. This transceiver uses a
pair of 6146W's as the power amps. The cooling fan option is also
installed in this rig. Cosmetically it is in nice shape with one small
hairline scratch next to the clarifier control. Electrically it is in fully
functioning condition with full output on all bands (~100 watts).
$400.00 plus shipping and insurance from zip code 76001.

244. Trade VHF GP350 or UHF GP300 for VHF Visor...

Howdy,

I have one (24) channel aucion as well, but I just posted this (4) chnl radio as a 5 day auction:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1331191200

Adam / kc7ljq

nukingcats (at) cox.net

246. FA: (2) Motorola SysTel SE UHF Repeater / Interconnect

Newsgroup: rec.radio.amateur.swap
Date: 2002-02-07 05:18:29 UTC
From: Feline Technologies <nukingcats@_DELETE_THIS_cox.net>
Message-ID: <F6o88.2357$S%.241073@news2.east.cox.net>
Source record: 3949
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

Howdy,

Look, it's the "monty special"...I have (2) auctions for Systel SE
repeaters. One needs a little help, the other works just fine.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1331214535 #1

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1331218196 #2

Also, I have some other radio up this week, so here is "my auctions":
http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?MfcISAPICommand=ViewListedItems&us
erid=nukingcats@home.com+&include=0&since=-1&sort=3&rows=25

As you see there is no "buy-it-now" price. Instead you can "buy-it-later"
by bidding. These are only 5 day auctions.

Thanks,
Adam /kc7ljq

GE MPA VHF Aegis encrypted model. 146 - 174, 160 channels encrypted and 192 clear. I have been using this as my personal radio until I picked up a VX5 and the size and weight difference are big so out with old and in with the new. Great radio with full system keypad for DTMF and so many options you can't believe it.
With good battery, Rapid charger, and belt clip. $325.00
GE MPD UHF standard model 48 channel alpha-numeric display. Nice with little wear. Good battery. $100.00
GE MPD Scan UHF This is a 4 button scan model in good shape with a new battery and rapid charger. 48 channel alphanumeric display, 440 - 460. $125.00
GE MPD voice guard VHF system model with full keypad. DES I think. I converted this from a 403-419 radio with a VHF VG PA deck and tuned it to spec. The radio puts out 7 watts and receives as well as My VX5. With battery and charger. $145.00. Rapid charger add $10.00
GE MPS VHF 10 channel Like new with new battery, new antenna, and charger. $55.00
GE MPS VHF 12 channel Set of 4 that talk to each other and all have new batteries and antennas. All in a rapid rack charger. $200.00
GE PCS VHF 136.-150. 2 channel. I have this on ham frequencies now with battery and rapid charger. $65.00
GE PCS UHF 440 - 470. 8 channel, This is working on the ham bands now with battery and rapid charger. $75.00
GE Monogram UHF portables 3 with 1 dual slot charger. 10 channel $225.00 for all.
GE phoenix sx VHF 16 channel priority scan. With all accessories including a power plug. Tested working. $75.00
Midland 70-336B VHF 8 channel 35 watt mobiles with mics. I have 3 of these. $75.00 each
Marconi UHF portable 16 channel scan made by midland $75.00
Mastr II 75 watt mobile has uhs pre-amp. Painted handle. $75.00
Mastr II Control cable, 8 channel. $8.00 each less the more you want.
Mastr II control head. for mobile repeater operation. $5.00 each.
Mastr II mic. $5.00 each less the more you take.
Mastr II tone boards. These boards will hold 8 different tones or 1 for each channel in the radio. $5.00 each
Mastr Exec II VHF 75 watt mobile. With all accessories. $60.00
Mastr Exec II Mobile extender VHF for UHF Mastr II $20.00 each. I have a large number of these so make an offer on 10 or 20.
Mastr Exec II Mobile extender VHF for UHF Ranger (Ericsson marked) $75.00
Mobile Repeater cable for Mastr II $10.00 each.
Mobile Repeater cable for Delta or Ranger. $30.00 each
GE Voter in special rack with 9 rec. cards and test cable. $300.00
GE MPA, MPD Public safety Mics. $35.00 each

GE PCS Universal Rapid chargers. $35.00 each
GE MPA Standard chargers. $20.00
GE MPA Rapid chargers. $30.00
GE MPI chargers with wall transformer. $8.00 each
GE MPI Rack chargers. 8 position $25.00 each
GE MPI Mobile battery charger. Only one I have seen. For 2 watt battery. $20.00
GE white Versatones 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5. $4.00 each I need 88.5 and 151.4
GE Mastr II Icoms EC $5.00 each and 2c $12.00 each I do not have many left.
GE Delta down loading cables. Will work with S825 heads. $40.00
GE Delta mounting plates. $10.00 each
GE Ranger mounting plate $15.00
GE s-550 and s-500 mounting brackets. $5.00 each
GE little seen shoulder strap for any GE radio with rear accessory point (where the belt clip is attached) Leather strap like new. $15.00
GE Belt clips $10.00 each
Motorola S1350C wattmeter with 10 watt 500-1000 MHz element. $75.00
Motorola GP300 VHF 2 channel with charger and OK battery. $175.00
Motorola Saber Speaker Mic. $35.00
S-Com 100 repeater controller. Rack mount with manuals. $125.00
GE VHF Ranger 19C852150P4 110 watt. With cable, Base plate, Mic, 825 scan head, and speaker. 228 channels with Alpha-numeric display Ready to program and install. $275.00
Motorola Mitrek VHF high drawer only with 1 set elements. $45.00
Motorola UHF converta-com Amp. 2 watts in 40 watts out. $50.00
Motorola adapter for 1801 suitcase programmer. Fits MX radio A & B proms. $175.00
Assorted GE portables. PE' MPR, MPI, have several in unknown condition. Sold for parts only $5.00 each
EF Johnson 242-8600 800 MHz with desk mic. $25.00
Maxon Rack charger for the 0520/0510 radio. I think the SP2550 will work, Rapid $35.00
Voter from IMTS phone system. I do not know much about this one. $40.00
Antenna Specialists glass mount UHF antenna. New in the package but package is a little worn due to the Hamfests it has traveled to. $22.00
Antenna Specialists glass mount 220 MHz antenna. New in the package but also worn due to me packing it around to Hamfests. $22.00

Want list not FS
Programming cable for Johnson Scorpion portable. Extra Data module for GE suitcase programmer. Any cables that go to the TQ 2310. Dual band Ham mobiles. UHF mobiles that will go in the ham band. Original IC706
Terms
All prices are plus shipping from 40201. All Items are used unless noted and only have a no DOA warranty. I take cash, USPS Money Orders, and Paypal. E-mail for any questions.

I have for sale a nice condition Yaesu FT-101ZD. This particular
transceiver is the version with AM mode included.
The cooling fan option is also installed in this rig.
Cosmetically it is in nice shape with one small hairline scratch
next to the clarifier control. Electrically it is in fully
functioning condition with full output 80-10.
$375.00 plus shipping and insurance from zip code 76001

Sell/trade Noritake China for Ham Gear

Please your lady on St Valentine's Day.

I have 95 pieces of Noritake Dresala 3033 and no lady to please -- just me and the two Rott boys.

mschina.com sez it's a popular, discontinued pattern, that the replacement value is around $1500, and the sell value is around $700.

I'm interested in amps, antennas, towers, TS-850s, rotators, masts, etc., and, naturally, money ;o)).

73, Dave, K3BHJ

I am looking for the Keyer 'B' module for my FT-736R. If anybody has one of these that they are willing to sell, please contact me via email direct if possible (w2rds@arrl.net).

Thanks,
Rick

264. FA: Flexar Motorola UHF Repeater 450 w/ duplexer $152.50

Newsgroup: rec.radio.amateur.swap
Date: 2002-02-10 21:01:11 UTC
From: Feline Technologies <nukingcats@_REMOVETHIS_home.com>
Message-ID: <rcB98.45251$vc.7360222@news1.rdc1.az.home.com>
Source record: 3969
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

Howdy,

Just a reminder that today is the last day! currently ~ $150

Comes w/ "cans" as well. The flexar can also be interfaced with a MRTI Phone Patch, (for sale in another auction)
and all the parts are interchangeable with the Maxar/Maxar 80 Series mobile radio. Hence the upkeep, and maintenance is a breeze. Unit is powered by 110V

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1330435012

Closes today, eMail w/ questions.

FOR SALE:

Central Electronics Model 20-A Transmitter.
Phasing type SSB transmitter from the
earliest days of SSB. This rare example of a
complete and near-immaculate 20A is in
collector-quality condition and includes all of
the original knobs etc.
A great candidate for the addition to any serious
Boatanchor collection. Picture available.
Will sell for $140.00 plus shipping

Swan 250C 6 meter SSB transceiver, in near mint
condition, with original microphone, original
manual and excellent 117XC power supply.
Pictures available.
Will sell for $275.00 plus shipping.

COMMAND SETS
R-26/ARC-5 Receiver - Covers 3.0 to 6.0 Mc. Black
case, complete with all covers.
Four of the tubes are missing. Otherwise looks to
be in very good condition.
Unmodified. Will sell for $30.00

BC-459A Transmitter covers 7.0 - 9.1 Mc. Black
case. Dial is missing
Rotary coil etc. are in good shape. One small
cover is missing -
Bottom cover and case are both present and in
good condition.
Otherwise looks to be complete and in very good
condition.
Will sell for $30.00

BC-457A Transmitter by Western Electric. Covers
4.0 - 5.3 MC.
Silver case. Small cover missing from above RF
finals.
Otherwise looks to be in very good condition.
Unmodified. Will sell for $30.00

BC-465B Receiver Western Electric - covers 6.0 to
9.1 MC. Silver case - comes complete
with all covers. Missing 5 octal tubes. Otherwise

looks to be in very good condition.
Unmodified. Will sell for $25.00

ARC-5 Transmitter by Stromberg-Carlson - covers
3.0 to 4.0 MC.
Black case. Complete with all covers and all
tubes.
Otherwise looks to be in very good condition.
Unmodified. Will sell for $30.00

BC-733F Receiver with dynamotor DM-53A for 28 V
DC operation.
Black case, complete and in good shape. Has
service and inspection tag from 1959.
Comes with the connector and the original
shockmounts.
Looks to be in very good condition.
Unmodified. Will sell for $30.00

R-268/ARN-5B Receiver - Black case, similar to BC-
733F, but marked for 24V DC
and no dynamotor. It's all there including the
shock mounts and special
bayonet connectors. Looks to be in very good
condition.
Unmodified. Will sell for $30.00

Electrovoice HIGH IMPEDANCE mobile microphone
model EV-600H, new in box with warranty card and
instruction sheet.
Nice unused coil cord. Never used mobile (grin)
Picture available.
Will sell for $30.00 plus shipping

Radio Handbook by W6SAI, 19th Edition in
excellent shape. Hardbound volume.
The essential reference for amateur radio.
Will sell for $15.00 plus $2.00 postage.

Hallicrafters S-40A communications receiver
Serial number HA-90221
Nice receiver - All original, with a fine looking
front panel.
Original knobs, dial etc. Covers 540 kc. to 54
MHz in four bands,
with sensitivity control, AVC on-off, tone
control, noise limiter,
BFO and send-receive switch and rear terminals.
Also has front panel headphone jack.
Built in speaker. The set lights up and appears
to be working but has a loud hum. Likely just
needs a capacitor replaced.

Will sell for $75.00 plus shipping

Hallicrafters SX-25 Defiant
communications receiver
Serial number H-101192. Main tuning plus
bandspread for the amateur bands.
Covers 540 kc. to 32 Mc.
in five bands. Has AVC, BFO, Sharp & broad
filters, crystal selectivity
and phasing controls, RF and AF gain controls,
tone control, send-receive switch and
rear terminals. Also has front panel headphone
jack.
Will sell for $140.00 plus shipping

National NC-190 Receiver
This is nifty old receiver with that classic
space age blue finish.
Front panel looks very nice, but some of the
knobs look crusty and need cleaning.
Appears to be all original with no modifications.
Receiver is non working but it is all there, and
will clean up nicely. Picture available.
Will sell for $125.00 plus shipping

Shipping additional on all of the above rigs etc.

I have a website for the antenna I have developed for AO-40. This is NOT a BBQ grill dish, this is the real thing! Watertight HELICAL feed, NO aperture blockage,2' dish is 20.5 dBi gain, 3' dish is 25 dBi gain. 2" crossboom mount.A true performer. Signals from AO-40 at unbelievable squint angles. You should hear what you have missed! I have also posted tips you may find interesting. AMSAT has expressed intrest in my antenna to be sold at Dayton, but I have a limited supply. Drop by my site and just tell me what you think if you like.

Hi folks. I've got a D104 that's not perfect looking by any stretch,
but it seems to work fine. It's missing the sliding PTT lock ring ,
has a couple of holes in the base, and the base has been repainted
badly. No connector on the wire. The head actually looks decent, no
visible damage.

You get the picture.

The good news is that it's yours for $15, you ship.

Source record: 3986

I have for sale a nice old Knight TR-106 with the matching V-107 VFO unit and cables. This is a 6m AM rig with built-in speaker. Silver and blue with a great styled case.

Front panel looks really good. Has all original knobs. It is NOT in mint condition, but shows less than normal wear. No bad dents or dings.

The power cable to the TR-106 is missing but you can easily make one. I have not tested it but it is all there. No modifications or damage has occurred.
Will sell for $135.00 plus shipping

To all,

I have recently acquired thousands of new 3.5mm mono and stereo adapters.
These are Audio Accessories model PA103, and are available for .25 cents
each, or $2.00 for a box of 10.

Great for using stereo headphones with most mono scanners.

Check out http://www.qsl.net/w8mmq/adapters.html for additional information.
Email me with any comments or questions. Detailed pictures are available at
the web site.

TS-440SAT needs a new home, to make room for new (to me) rig.

Extensive mobile/FD, as well as main-station, use. Some bounce on some
number keys. 9-plus electrically, 6.5 appearance.

Has 270-Hz c-w filter, MFJ Econo-keyer, hand mic, pwr cord, unblocked xmit,
frt-pnl notch-only mod to notch-peak, agc-on-only mod to agc-on-off (for you
c-w fans),
pwr-control mod for ssb using frt-pnl CAR pot (SSB power can be varied like
c-w power).

With user's and service manuals.

$450 ONO shipped UPS grd insured CONUS.

FOR SALE:

Blitz Bug lightning protector for PL-259 to
PL-259 coaxial lines. New in box. Will sell for $7.00

National NC-190 Receiver
This is nifty old receiver with that classic
space age blue finish.
Front panel looks very nice, but some of the
knobs look crusty and need cleaning.
Appears to be all original with no modifications.
Receiver lights up but is not working properly.
However, it is all there, and will clean up
nicely.
Will sell for $125.00 plus shipping

Realistic DX-160 Receiver with Realistic speaker
Excellent condition general coverage shortwave
receiver set.
Will sell for $75.00 plus shipping.

Heathkit Audio Generator model AG-9A
Unit is in excellent condition and comes with the
original manual.
Heath gray finish with immaculate front panel,
all original knobs etc.
Good working condition. Picture available via e-
mail on request.
Will sell for $35.00 plus shipping

813 Transmitting Tubes by JAN / KEN-RAD
Both appear to be new - one is in the original
box, one is not.
Will sell the pair for $40.00
or for $25.00 each plus shipping.

For sale:

I still have a variety of cool ARC-5 Command Set receivers and
transmitters etc. available at sensible prices.

BC-459A Transmitter covers 7.0 - 9.1 Mc. Black
case. Dial is missing
Rotary coil etc. are in good shape. One small
cover is missing -
Bottom cover and case are both present and in
good condition.
Otherwise looks to be complete and in very good
condition.
Will sell for $30.00

BC-457A Transmitter by Western Electric. Covers
4.0 - 5.3 MC.
Silver case. Small cover missing from above RF
finals.
Otherwise looks to be in very good condition.
Unmodified. Will sell for $30.00

BC-465B Receiver Western Electric - covers 6.0 to
9.1 MC. Silver case - comes complete
with all covers. Missing 5 octal tubes. Otherwise
looks to be in very good condition.
Unmodified. Will sell for $25.00

BC-733F Receiver with dynamotor DM-53A for 28 V
DC operation.
Black case, complete and in good shape. Has
service and inspection tag from 1959.
Comes with the connector and the original
shockmounts.
Looks to be in very good condition.
Unmodified. Will sell for $30.00

R-268/ARN-5B Receiver - Black case, similar to BC-
733F, but marked for 24V DC
and no dynamotor. It's all there including the
shock mounts and special
bayonet connectors. Looks to be in very good
condition.
Unmodified. Will sell for $30.00

I have for sale a nice old Knight TR-106 with the matching V-107 VFO unit and cables. This is a 6m AM rig with built-in speaker. Silver and blue with a great styled case.

Front panel looks really good. Has all original knobs. It is NOT in mint condition, but shows less than normal wear. No bad dents or dings.

The power cable to the TR-106 is missing but you can easily make one. I have not tested it but it is all there. No modifications or damage has occurred.
Will sell for $135.00 plus shipping

I've got an Icom PCR-100 computer-controlled receiver for sale or trade.

Details and specs:
http://www.icomamerica.com/receivers/pc/icpcr100main.html

Would prefer to trade (possibly + money) for a non-computer-controlled
HF receiver (all solid-state) or other amateur radio equipment. I just
dont have the room for another computer to dedicate to this radio.

Works great, comes with all original components in original box.

Email if interested.

I have for sale a nice condition Yaesu FT-101ZD. This particular
transceiver is the version with AM mode included.
The cooling fan option is also installed in this rig.
Cosmetically it is in nice shape with one small hairline scratch
next to the clarifier control. Electrically it is in fully
functioning condition with full output 80-10.
$350.00 plus shipping and insurance from zip code 76001

Thanks!

Source record: 3810

I have two ht1000s they are as follows:

1. Model # HO1SDC9AA3CN
2. Model # HO1SDC9AA3DN
16 Channel
470-520mhz
4.0-5.0 watts
Standard Control No Display
Variable/Programmable Channel Spacing
Conventional/Simplex Operation
Conventional System Type
Limited Plus Feature Level
Scale of 1 to 10 I would rate them at 8.
I have 4 batteries and one brand new Charger in the Box.
Also have one used charger.
Don’t know the actual condition of each battery other than they charge
up ok and have worked for several hours on occasion…
Use these radios to communicate at the Drag Races…
I can program them for any frequency you want in the 470-520 range.

I will sell the radios outright for 300.00 each or
I will trade one radio for an Icom pcr1000 unblocked or
I will trade both radios for a Winradio WR-1550e

Date: 2002-02-19 02:55:28 UTC
From: kc1ua@scancapecod.net
Message-ID: <9b093b3c.0202181855.28a2a453@posting.google.com>
Source record: 3817
Cross-posted to: rec.radio.scanner,alt.radio.scanner,rec.radio.amateur.equipment,rec.radio.amateur.swap

I have for sale one Optoelectronics Xplorer Nearfield Receiver. Unit is in excellent condition and has seen little use. Will include Opto DB32 "stub" antenna. With original box, manual, telescoping whip antenna, PC download cable, software, and AC adapter. This is the newer Xplorer that also decodes LTR trunking ID's. It is cellular blocked. Battery pack is in excellent condition.

Reason for selling: Seeing virtually no use, liquidating for other radio purchases.

Price: $600.00 shipped UPS ground US only.

Payment Method: Pre-pay with U.S. POSTAL SERVICE MONEY ORDER ONLY!!! No substitutions, please!

Upon receipt of US Postal Service money order I will ship unit to you and will contact you with UPS tracking number.

For more information about this device, please check this link:

http://www.optoelectronics.com/xplorer.htm

Please contact me via e-mail if interested.

Thanks for reading.

315. For Sale: PRO-2004 with HB-232 Interface/many modifications $300 shipped

Newsgroup: rec.radio.amateur.swap
Date: 2002-02-19 02:58:38 UTC
From: kc1ua@scancapecod.net
Message-ID: <9b093b3c.0202181858.43985624@posting.google.com>
Source record: 3818
Cross-posted to: rec.radio.scanner,alt.radio.scanner,rec.radio.amateur.equipment,rec.radio.amateur.swap

Greetings,

I have a Realistic PRO-2004 scanner for sale. The following info describes it's condition, modifications, accompanying HB232 Interface, included items, and payment method. Photos of the package are available through the link at the bottom of this message. If you are interested after reading this long-winded message, please contact me at kc1ua@scancapecod.net. Thanks.

Condition
---
1. Case is in good condition. Some minor scratches.
2. Display is in good shape. Not as bright as day #1 but doing well.
3. An analog signal meter has been mounted on the lower left front of the radio. This eliminates the earphone jack.
4. A blue keypad overlay has been placed over the original yellow keypad. This overlay shows a 400 channel plan instead of the 300 on the original yellow.
5. Radio does use a 9 volt battery as memory backup. Care must be taken to replace this battery. I would recommend twice a year.

Modifications
---
1. Full coverage restoration.
2. Removal of power transformer to reduce heat issues, facilitate HB-232 interface components, as well as toggle switches mentioned in #4 mod below.
3. 300 to 400 channel modification.
4. Modification that creates 64 independent "banks" of 400 channels each. Controlled by toggle switches on rear of radio. Diagram for operation is included. It is not possible to scan across these banks, but 64 different configurations are possible.
5. Pushbutton switch on back of radio defeats keypad beep.
6. Discriminator tap (RCA jack).
7. Analog S-Meter mounted on front lower left. Eliminates earphone jack.
8. Radio did have problems with cold solder joints, which is common in this radio. They have been repaired.

HB-232 (a.k.a CE-232) Interface
---
1. Allows for computer control of PRO-2004 through supplied DOS software. Demo of Windows software is available for download from www.steaksandwich.com.

2. HB-232 Interface is mounted in a project box, 8" wide, 6" deep, and 3" high. Short DB25 connection from box to rear of PRO-2004. DB-9 connection from interface box to computer.
3. Supplied software is able to program radio and will display a "virtual" panel that controls radio's functions. Again, it is DOS based software. I would primarily recommend using it for programming/backup of memory banks. Many scripts that can make the HB-232 perform various functions are included.
4. It IS NOT imperative that you use this interface. The radio operates just fine standalone. However, it is included as part of the package for obvious reasons.

Included Items
---
1. Original manual.
2. Service manual.
3. Power supply is NOT included. You will need a 12V positive tip wall wort type supply. I would recommend one that handles about 1 AMP just to be on the safe side. I was powering the radio from a 12V power system in my shack. Transformer was removed as outlined above, so this radio DOES NOT have 120 VAC capability. Radio did not come with a wall wort type supply.
4. HB232 software and scripts burned on CD.
5. My support for your first days of operating this radio! I won't disappear on you.

Payment Method
---
1. $300. Will ship UPS Ground USA only on receipt of US POSTAL MONEY ORDER ONLY!
2. Shipping and insurance included in asking price.
3. I will provide you with a UPS tracking number when the radio is enroute.
4. Reason for selling - I am simply not using this setup any longer. It is sitting here doing nothing.

This is a unique setup. I would not recommend this setup for anyone looking for their first scanner, but the radio works fine as a standalone unit and/or with the HB-232 interface. Please contact me if you have any questions. Photos of the package are available at this link:

Has anyone actually taken the time to look and see what radios sell for new
when they post here? I mean I saw a single band (2 meter) 50 channel icom
that sold at HRO for 89$ new the other day.

I have 3 radios, 2 must go
one of the dualband icoms and the clegg 220 rockbound

both icoms are:
high power 50/35 (2m/440)rx AM airbands and well into the 170's
rx down to 420's and up into the 470's will do gmrs or frs recieve
(not t-a for xmit here) have manual, power and mic cords with dtmf
mike
the 2710h has dual recieve and crossband, the 207h is single recieve

the clegg is 220 rockbound (crystal) 10 watts with the calling
frequency installed (used for packet) have mic, manual, and power cord
(is attached)
dtmf pad on radio is nonfunctional aftermarket, but no problems with
the rig.

207h $200 shipped
2710h $275 shipped
clegg fm 76 $70 shipped

I can be reaced via email OR by phone ONLY
email is kevtis@hotmail.com
phone is 8176773078 (after 7pm)

thanks for your interest

Kenwood TS-930S(e)/AT: SN 404XXXX, PIEXX digital board installed for
PC rig control, extra memories(99), +additional features. YK88C and
YK88S filters installed. MC-60 and service manual are included.
The rig is in excellent shape, the mic ain't pretty, but it works.
Killer contesting/DX receiver, superb xmit audio. This setup is the
same one used by some of the big M/M DXpeditions.... I'm asking $900
for the package, but I would really like to trade -plus cash- for a
pre-MarkV 1000MP. Drop me a note, or I can meet you on-air for a test.

I have for sale a nice condition Yaesu FT-101ZD. This particular
transceiver is the version with AM mode included.
The cooling fan option is also installed in this rig.
Cosmetically it is in nice shape with one small hairline scratch
next to the clarifier control. Electrically it is in fully
functioning condition with full output 80-10.
$325.00 plus shipping and insurance from zip code 76001

Here is a one month old Radio Shack PRO-2067 500 channel MULTI-SYSTEM trnking mobile scanner. I took it out of the box plugged it into power for a few hours and returned it to its box. This is a moble scanner, and comes complete with all the mounting hardware, box manual, mounting bracket. Never been installed. Looks 100% works the same. Sells new at Radio Shack for $249.99. My price is $175.00 shipped. Thanks Patrick K8CMA. k8cma@arrl.net

This is a very neat looking radio and a bit on the Rare side. I am looking for the best offer over $200.00 It is a STONER PR-10 transceiver that works on 10 meters. I was amazed how sensitive this radio was. The stations just boomed in. It has been checked out on both receive and transmit and is fully operational. AM-USB-LSB multi speed scan, RIT control and a neat looking digital display. I don't have any DC power cord or operating instructions for this radio. The wood case is in good condition. Each side has a small screw hole from a mobile mount. The up-down microphone works great! I would rate this radio an 8 on a scale of 1-10. Please look at the pictures below. Questions can be sent to roblonn@cox.net.

FS: VHF Power amp

Late '70's vintage likely Military, probably airborne, VHF power amplifier
assembly. It consists of 7 almost identical amplifier assemblies clustered around a
central housing that has splitter combiner networks which are plugged
onto each end with a bunch of SMB connectors. There are TNC's for the
main in's & outs. I think it was originally configured as one amp,
driving two, driving four boards. The complete assembly measures 7.5" x 5"
x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer covers
are mostly missing. Each amplifier is a push pull design -- they appear to be
50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would
guess this unit operates on 28VDC. I don't know what frequency range it
covers nor the power level though, just guessing, it probably puts out at
least 100W. And there is no manufacturer name -- probably went with
the outer cover. Six of the stages are marked OK and one, the input
stage I think, is marked NO Good. The individual amps have integral
heat sink plates so, they could be removed from the assembly and used
separately. Think of it as 7 amplifier boards @ $10 ea --
Bare PCB's would cost as much! -- $70 May be seen at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=RFamp1.jpg&.src=ph&.view=t&.hires=t

Knight TR-106 with the matching V-107 VFO unit
and cables. This is a 6m AM rig with built-in speaker. Silver and blue
with a
great styled case.
Front panel looks really good. Has all original knobs. It is NOT in
mint
condition, but shows less than normal wear. No bad dents or dings.

The power cable to the TR-106 is missing but you can easily make one.
I
have not tested it but it is all there. No modifications or damage has
occurred.
Will sell for $135.00 plus shipping

341. FS: Several old rigs, Collins etc.

FOR SALE:

Collins 75A-1 Receiver with filer. No case. Needs work but very much
restorable. No case. All original knobs.
Picture available on request.
Will sell for $275.00 plus shipping

Hallicrafters S-38D receiver, silver case and front panel.
Has all original knobs. Bandspread dial is slipping. Needs new
output transformer, but is otherwis ein good shape. Case has some
wear and scratches, but no bad dents etc. A very restorable
receiver. Will sell for $45.00 plus shipping

Hallicrafters S-40A communications receiver
Serial number HA-90221
Nice receiver - All original, with a fine looking
front panel. Original knobs, dial etc. Covers 540 kc. to 54
MHz in four bands, with sensitivity control, AVC on-off, tone
control, noise limiter, BFO and send-receive switch and rear
terminals.
Also has front panel headphone jack. Built in speaker. The set lights
up and appears to be working but has a loud hum. Likely just
needs a capacitor replaced. Will sell for $75.00 plus shipping

Realistic DX-160 Receiver with Realistic speaker
Excellent condition general coverage shortwave
receiver set. Will sell for $75.00 plus shipping.
Pictures available on request

Knight TR-106 transceiver with the matching V-107 VFO unit
and cables. This is a 6m AM rig with built-in speaker. Silver and blue
with a great looking case.
Front panel looks really good. Has all original knobs. It is NOT in
mint
condition, but shows less than normal wear. No bad dents or dings.
The power cable to the TR-106 is missing but you can easily make one.
I have not tested it but it is all there. No mods or damage.
Will sell for $135.00 plus shipping

BC-733F Receiver with dynamotor DM-53A for 28 V
DC operation.
Black case, complete and in good shape. Has
service and inspection tag from 1959.
Comes with the connector and the original
shockmounts.

Looks to be in very good condition. Unmodified. Will sell for $30.00
Picture available on request

R-268/ARN-5B Receiver - Black case, similar to BC-
733F, but marked for 24V DC
and no dynamotor. It's all there including the
shock mounts and special
bayonet connectors. Looks to be in very good
condition. Unmodified. Will sell for $30.00
Picture available on request

I am looking for someone who could scan a few pages from a Radio Shack HTX-212 manual. I need the schematics for the radio and microphone and they are no longer available through Radio Shack customer service. I bought a used HTX-242 but it came with the microphone from an HTX-212, and there is a slight difference between the two mics because none of the scan or direct entry functions will work. I did some substitution troubleshooting and have determined that my radio and mic are both ok, they just donï¿½t match each other. Radio Shack was able to provide the pinout identification for the connector and the only obvious difference is that the radios provide different voltages to the mic, so I am hoping to be able to compare schematics and find the internal difference and make my mic work on my radio. I have only been able to find two HTX-212s locally, and neither ham has the manual, so if anyone could help me out I would really appreciate it.

Please contact me directly at sparkyXmantoo@yahoo.com (remove the X)

Thanks, Steve

Just go www.radioshack.com and click on the manuals link at the top of the
page.

Just to let you know... The HTX-242 uses COMMANDS that are sent
serially from the processor in the mic to the radio to almost all functions
other than PTT. I don't know how the 212 works. Or if the commands
are the same.

rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap,sci.electronics.components

********** Air Variable Capacitors ********

Cardwell enclosed 7 section variable capacitor assembly for/from some receiver? -- The sections measure: 210, 210, 105, 105, 105, 100 & 75 pF. The unit is about 12" long and 3" square with a right angle drive mounted in the center and a 30 turn scale. This looks to be NOS (nothing ever soldered to...) but, it is a mite tarnished on the outside from being stored forever. There is also a (Mil?) number on the unit: SC3188A. $30
See at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=cardwell.jpg&.src=ph&.view=t

Johnson T9-5 miniature vertical PC mount trimmers 1.9-15.7 pF, Silver Plated machined plates -- NOS 2/$1

G.I. Corp 70 pF, .080" air spacing, about 3.5"x3.5"x3" overall, ï¿½" shaft $2ea (2 available)

National Type DX 500pF variable capacitors, approx. 3" X 3" x 3" overall fairly good condition. $10 ea. May be seen at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=National.jpg&.src=ph&.view=t&.hires=t

Remler "scissors" variables. Type 630 350pF $25
Type 631 500pF $25

General Instrument type NNC153 3 Section large receiving style capacitor 13-420 pF per section, $15

4 Section capacitor 20-550 pF section large receiving style capacitor, $25

See the previous two units at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=loadcaps.jpg&.src=ph&.view=t&.hires=t

See the next four units at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=aircaps.jpg&.src=ph&.view=t&.hires=t

Johnson 154-1, 12-244pF, .05" air gap, about 3" x 3" x 3" overall. Rear shaft has been cut flush with bushing and the rear mounting tab has been shortened a mite. Otherwise, excellent condition, $25.

Johnson 154-34-3, 20-400pF, looks like .03" air gap, about 3" x 3" x 3" overall not including 1/4" shaft which is about 2-1/2" long. Excellent

condition, $25.

Johnson 500E20 (modern equivalent 154-3), 500pF/2KV, looks like .05" air gap, about 3" x 3" x 4.5" overall not including 1/4" shaft which is about 1-1/2" long. Good condition except the rear mounting tab has been removed and it looks like a couple of the plates arced at one time and were subsequently filed down a mite. $25.

Similar to the part above but, NOT a Johnson, another 500pF/2KV, looks like .05" air gap, about 3" x 3" x 4.5" overall not including 1/4" shaft which is about 1-1/2" long. Good condition except the front mounting tab has been removed. $25.

See the previous four units at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=aircaps.jpg&.src=ph&.view=t&.hires=t

Hammarlund SM-50-X, 7.5-50pF, .064 air gap, Just under 2" x 2" x 2" overall not including 1/4" shaft. Good condition. $10.

National SEU-15, 15pF 270 degree rotation, straight line frequency, variable cap. Shiny and new in beaten-up old box (SNIBOB) $25.

All of the above plus shipping, if necessary, naturally.

******** Microphones ***********

ICOM IC-HM12 Handheld Mike. I don't know what rig(s) this fits but, it has a Japanese "standard" round 8 pin connector. The mike also has Up & Down buttons on top. Looks unused. $30

Astatic Dynamic Mike -- This is either a Cardioid or noise cancelling as it has some small holes in one side. It is black about 5-1/2" long with a Cannon connector (M) in the bottom end. The model number is either invisible or rubbed off. The finish is well worn but, I plugged it into a Shure mixer and it seems to work fine. $20

University Model 70 Omnidirectional Dyamic mikes. They are black & light gray finish, have seen a lot of use and there are a pair of these. One has a Cannon connector (F) on the end of a cable and the other is missing its cable so I couldn't easily test either one. Asking $20 for the pair.

******* Mike connectors & cables ***********

Motorola 4-pin Microphone connectors 28-16730 (similar to Amphenol MC4M) -- NIB $5ea

Motorola 0180700T14, 4-wire coily cord mike cable assembly with a mike connector as above on one end and a spring strain relief on the other. There are some flat pins on the free wire ends -- NIB $15

NOS coily cable for a Yaesu MH-27 mike (may fit others). Later version with the RJ connector at the radio end. $10.

All of the above plus shipping, if necessary, naturally.

Hello all,

I'm looking for a complete control head assembly for an Alinco DR-599
or DR-590 transceiver. I have acquired the body of the transceiver,
but am after the control head.

Does anyone out there have one or know of where/how to get one??

My email is: vk2gjt@winnet.com.au

Thanks for any assistance,

Greg Towells

I've heard there were some slight differences in units and not all bodies
are
compatible with all heads. I think by the time the 599 came out the
firmware
was pretty 'locked down' and they were swappable though.

Judging by what I've seen around the 'net I originally overpriced
this, so I'm re-issuing it at a reduced rate.

I have for sale one Optoelectronics Xplorer Nearfield Receiver. Unit
is in excellent condition and has seen little use. Will include Opto
DB32 "stub" antenna. With original box, manual, telescoping whip
antenna, PC download cable, software, and AC adapter. This is the
newer Xplorer that also decodes LTR trunking ID's. It is cellular
blocked. Battery pack is in excellent condition.

Reason for selling: Seeing virtually no use, liquidating for other
radio purchases.

Price: $520.00 shipped UPS ground US only.

Payment Method: Pre-pay with U.S. POSTAL SERVICE MONEY ORDER ONLY!!!
No substitutions, please!

Upon receipt of US Postal Service money order I will ship unit to you
and will contact you with UPS tracking number.

For more information about this device, please click on the link
below. Please contact me via e-mail if interested.

http://www.optoelectronics.com/xplorer.htm

Greetings,

I can't move this package, so I've reduced the price to $260 shipped.

I have a Realistic PRO-2004 scanner for sale. The following info describes it's condition, modifications, accompanying HB232 Interface, included items, and payment method. Photos of the package are available through the link at the bottom of this message. If you are interested after reading this long-winded message, please contact me at kc1ua@scancapecod.net. Thanks.

Condition
---
1. Case is in good condition. Some minor scratches. Top of case has tape marks from a
2. Display is in good shape. Not as bright as day #1 but doing well.
3. An analog signal meter has been mounted on the lower left front of the radio. This eliminates the earphone jack.
4. A blue keypad overlay has been placed over the original yellow keypad. This overlay shows a 400 channel plan instead of the 300 on the original yellow.
5. Radio does use a 9 volt battery as memory backup. Care must be taken to replace this battery. I would recommend twice a year.

Modifications
---
1. Full coverage restoration.
2. Removal of power transformer to reduce heat issues, facilitate HB-232 interface components, as well as toggle switches mentioned in #4 mod below.
3. 300 to 400 channel modification.
4. Modification that creates 64 independent "banks" of 400 channels each. Controlled by toggle switches on rear of radio. Diagram for operation is included. It is not possible to scan across these banks, but 64 different configurations are possible.
5. Pushbutton switch on back of radio defeats keypad beep.
6. Discriminator tap (RCA jack).
7. Analog S-Meter mounted on front lower left. Eliminates earphone jack.
8. Radio did have problems with cold solder joints, which is common in this radio. They have been repaired.

HB-232 (a.k.a CE-232) Interface
---
1. Allows for computer control of PRO-2004 through supplied DOS

software. Demo of Windows software is available for download from www.steaksandwich.com.
2. HB-232 Interface is mounted in a project box, 8" wide, 6" deep, and 3" high. Short DB25 connection from box to rear of PRO-2004. DB-9 connection from interface box to computer.
3. Supplied software is able to program radio and will display a "virtual" panel that controls radio's functions. Again, it is DOS based software. I would primarily recommend using it for programming/backup of memory banks. Many scripts that can make the HB-232 perform various functions are included.
4. It IS NOT imperative that you use this interface. The radio operates just fine standalone. However, it is included as part of the package for obvious reasons.

Included Items
---
1. Original manual.
2. Service manual.
3. Power supply is NOT included. You will need a 12V positive tip wall wort type supply. I would recommend one that handles about 1 AMP just to be on the safe side. I was powering the radio from a 12V power system in my shack. Transformer was removed as outlined above, so this radio DOES NOT have 120 VAC capability. Radio did not come with a wall wort type supply.
4. HB232 software and scripts on disk.
5. My e-mail support for your first days of operating this radio! I won't disappear on you.

Payment Method
---
1. $260. Will ship UPS Ground USA only on receipt of US POSTAL MONEY ORDER ONLY!
2. Shipping and insurance included in asking price.
3. I will provide you with a UPS tracking number when the radio is enroute.
4. Reason for selling - I am simply not using this setup any longer. It is sitting here doing nothing.

This is a unique setup. I would not recommend this setup for anyone looking for their first scanner, but the radio works fine as a standalone unit and/or with the HB-232 interface. Please contact me if you have any questions. Photos of the package are available at the link below.

Hi,

Due to moving, I have following equipment for sale in the Toronto
area. Preferably you will pickup equipment yourself. You pay shipping
costs if you live outside the Toronto area.

Here is my list. All equipment is in excellent working condition:

1. Heathkit SB401/303 combo (10-80m TX/RX) + manuals with Shure 400
microphone
2. Heathkit HM-102/1KW, 1.8-30 Mhz Watt/SWR meter
3. Heathkit HM-2102/1KW, VHF Watt/SWR meter
4. Heathkit HD-19 Phone Patch
5. Anadex Frequency Counter CF-700A, 5Hz-1GHz
6. David Clark H7010 noise cancelling headset/microphone
http://www.davidclark.com/h7010.htm
7. David Clark H-133C/A1C noise cancelling headset/microphone
8. H.P. 400D Voltmeter
9. Bearcat 300 scanner
10. Daven DP-182 Audio Decade Attenuator box
To enquire, click on the link below and fill out the form. I will get
back to you as soon as possible:
http://www.croatianmall.com/email_form.html

That division of Motorola has been purchased by General Dynamics and I got a flyer today from a local distributor about a R2590 Plus unit they have.

Up to a gig, high stab osc, tracking gen, etc etc for $10,950. Might be worth looking into...

I am an electronics technology student at the local tech center and am looking to buy some broken gear for repair or for parts to get some hands-on practical experience. (Radio, Power Supply, Test Equipment, etc.) Email me with anything you might want to sell and maybe we can come to an agreement on price. (Don’t offer anything very expensive because I have very limited funds here, HI HI) Reply to Xrecho@eminem2000.com TNX. Respectfully, Justin

Right, Dick, after all when FCC incorporates CB into the ARS we will have to consolidate all the newsgroups, also. Cecil has a point.

Knight TR-106 transceiver with the matching V-107 VFO unit
and cables.

This is a 6m AM rig with built-in speaker. Silver and blue
with a great styled case.

Front panel looks really good. Has all original knobs.
It is NOT in mint condition, but shows less than normal wear.
No bad dents or dings.

The power cable to the TR-106 is missing but you can easily make one.
I have not tested it but it is all there. No modifications or damage
has occurred.

Will sell for $135.00 plus shipping

The original post was a forge...
"Twistedhed" <twistedhed_webtvnet@subdimension.com>

That is not the real "Twistedhed", just some asswipe "Anti-Keyclown" trying
to justify their existance. Nothing to moan about, so they make
something themselves and cross post it.

Collins KWM-2, winged emblem, works well, very good condition. Includes Shure 444 mic. Includes manual copy. $675 plus shipping.

Collins 516-F2 120VAC power supply for KWM-2. Very good condition, works well. Has speaker installed, but easily returned to original condition if desired (no holes drilled, etc.). $300 plus shipping.

Collins 30L-1 amplifier, works very well, very goood condition except top cover doesn't fit perfectly (does not affect operation, and only slightly noticeable looking at amp from above). Currently wired for 120VAC operation, easily changed for 240VAC operation. Includes manual copy. $650 plus shipping.

Drake MN-2000 tuner, works well, very good condition. Includes original manual. $200 plus shipping.

Vibroplex Original semiautomatic key, serial number 60767, purchased new in 1987. Very good condition, no dings or discoloration in chrome parts or grey base, nameplate attached and in excellent condition. Works very well. $100 plus shipping.

Electro-Voice 641 dynamic microphone with desk stand. Very good condition, works fine, currently wired for Heathkit HW/SB series rigs. $100 plus shipping.

Kenwood TH-215A 2-meter FM HT. Good condition, works fine. Includes WWW high-capacity battery and desktop charger, hand mic, original battery (dead, cells can be replaced if desired), original manual. $150 plus shipping.

I might be interested in a trade--let me know what you have. I can supply pictures of all of these items on request.

73,
Jeff Kilgore, KC1MK

I have for sale a nice condition Yaesu FT-101ZD. This particular
transceiver is the version with AM mode included.
The cooling fan option is also installed in this rig.
Cosmetically it is in nice shape with one small hairline scratch
next to the clarifier control. Electrically it is in fully
functioning condition with full output 80-10.
$325.00 plus shipping and insurance from zip code 76001

Thanks!

392. Schematic wanted for UT-36 Voice synthesizer unit/ I have schematic for CT-17 level converter

393. Yaesu FT-290R 2-meter all mode for $225

Newsgroup: rec.radio.amateur.swap
Date: 2002-03-06 00:32:20 UTC
From: widowmaker@huntcentral.net
Message-ID: <d8ac2b3b.0203051632.7b1b923c@posting.google.com>
Source record: 3896

Please reply to: wn1z@winlink.org

Do not reply to the e-mail associated with this post; I access that infrequently.

FOR SALE: Yaesu FT-290R 2-meter all mode transceiver. Bought new in 1994. Has standard power amp on it; also has the C-cell battery pack, DTMF mike, mobile mount (screws missing), PL tone encode module.

When new i paid $700 for it.

It looks used; i took it backpacking a lot. Also, when it was new it would put out 25 watts on high, 10W on low. Now i'm getting 14-19 watts on high, 3-5W on low. That could be an adjustment needed.

Also i might be able to find the vinyl case & shoulder strap for it.

Asking $225 plus shipping. Price so low because of the low power output and the somewhat scratched and dusty appearance. Other than that it's a great radio. Most recently used it on FM for split-VFO operation -- packet thru ISS.

Contact me by e-mail at wn1z@winlink.org, NOT the e-mail i sent this posting with.

One way we could do the transaction is you send me $25 for shipping & then I mail it to you, U.S. Mail only, C.O.D. for the balance. (The balance being $225 minus the difference between $25 and my actual cost of shipping.)

The 2BQ kind of scarce these days... I'm not positive, but I think a
2CQ will also work if looks don't matter. But it doesn't exactly match
the 2B's black paint. I'm pretty sure a friend of mine who once had a
2C, used a 2BQ as the speaker. So I think either one will work. I've
got a 2C and 2CQ. MK

Cross-posted to: austin.forsale,rec.radio.amateur.equipment,rec.radio.amateur.swap

I've got an Icom PCR-100 computer-controlled radio scanner (1Khz to 1.3Ghz, minus cellular frequencies), plus an IBM Thinkpad 365XD (P120, 1.4G, 40M, floppy & cd-rom, 800x600 color screen) laptop setup to control it.

Would like to trade for a "stand-alone" scanner that covers the same range. Would prefer something like a Radio Shack Pro-2005/6, or a newer trunking-capable scanner. Will also consider trading for other ham radio equipment (HF receiver, etc).

Can deliver in Austin, TX and surrounding area, or will ship if the offer is right.

Info on the PCR-100:
http://www.icomamerica.com/receivers/pc/icpcr100main.html

Greetings,
I have for sale a "used once" Radio Shack DX-398 (Sangean ATS-909 clone) portable shortwave receiver. Unit is in mint condition with original box, case, owners manual, and an ATS-909 fact sheet printed from internet information. Sells new for $239.95 and up.

Reason for selling: I purchased it at the end of September, 2001 but have only used it once. Liquidating for other radio purchases.

Price: $175.00 shipped UPS ground USA only upon receipt of US POSTAL MONEY ORDER ONLY! I will provide you with a UPS tracking number when the shipment is enroute.

Please contact me via e-mail if interested. Thanks for reading.

Greetings,

I have for sale an original Optoelectronics Optolinx interface. This is the interface that will allow computer control of the AOR-8000 portable scanner (with proper cabling - not included) as well as just about every computer controllable Icom receiver. It also has a built-in dataslicing circuit that allows it to decode various HF/VHF/UHF/800/900 digital modes including ACARS, Trunker, etc. Unit is in very good physical and excellent operating condition.

Reason for selling: No longer in use.

Price: $85.00 shipped UPS Ground US only on receipt of US POSTAL MONEY ORDER ONLY! I will provide you with the UPS tracking number when the package is enroute.

More info on the Optolinx and its capabilities can be found by clicking this link:

http://www.optoelectronics.com/optolinx.htm

Please respond to my e-mail address if interested. Thanks for reading.

Source record: 3764

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1337162020

This auction is for a Radio Shack Pro-90 300 channel handheld trunking scanner. It is a 9.5 out of 10 physically due to a few very minor scratches. It has been used only in my shack, a non-smoking environment. I am selling it to get money for a dual-trunking base scanner. It has never been opened and comes with the charger and orignal antenna. You can view complete details on this scanner at http://www.radioshack.com/searchplus.asp?type=ALL&find=pro-90#. The manual is also available there in PDF format.

This item is NOT sold "as-is". It is guarenteed to work when shipped and will arrive in that condition, unless damaged or abused by the shipping company. Insurance is REQUIRED to ensure that the buyer does not lose any money.

Collins KWM-2, winged emblem, works well, very good condition. Includes Shure 444 mic. Includes manual copy. $600 plus shipping.

Collins 516-F2 120VAC power supply for KWM-2. Very good condition, works well. Has speaker installed, but easily returned to original condition if desired (no holes drilled, etc.). $250 plus shipping.

Collins 30L-1 amplifier, works very well, very goood condition except top cover doesn't fit perfectly (does not affect operation, and only slightly noticeable looking at amp from above). Currently wired for 120VAC operation, easily changed for 240VAC operation. Includes manual copy. $600 plus shipping.

Drake MN-2000 tuner, works well, very good condition. Includes original manual. $175 plus shipping.

Vibroplex Original semiautomatic key, serial number 60767, purchased new in 1987. Very good condition, no dings or discoloration in chrome parts or grey base, nameplate attached and in excellent condition. Works very well. $90 plus shipping.

Electro-Voice 641 dynamic microphone with desk stand. Very good condition, works fine, currently wired for Heathkit HW/SB series rigs. $80 plus shipping.

Kenwood TH-215A 2-meter FM HT. Good condition, works fine. Includes WWW high-capacity battery and desktop charger, hand mic, original battery (dead, cells can be replaced if desired), original manual. $120 plus shipping.

I might be interested in a trade--let me know what you have. I can supply pictures of all of these items on request.

Hi there,

Thanks for looking... my first real ham radio was an original gold faced Galaxy III "3" and I'd like to buy another one (the first is long gone).

If you have one in most any condition you'd consider selling me, please drop me an Email (remove the NOSPAMPLEASE from my return address).

A few months ago... someone sent me a reply, they had a bare unit (no power supply) and I've lost your Email. Please contact me again if you are said person.

The radio can be non working, in most any condition.

thanks much

441. MC145162D chip needed

Newsgroup: rec.radio.amateur.swap
Date: 2002-03-15 18:52:57 UTC
From: Fred Gemmell <fred@fred-g.com>
Message-ID: <a6tfu9$8jv$1@knossos.btinternet.com>
Source record: 3794

I need a Motorola MC145162 dual synthesizer chip (preferably two) to complete a prototype. Motorola have discontinued them, and although I can find them (thousands of them) at obsolete component suppliers, the have large minimum orders, and only want to deal with companies. If I could even get them from one of the major suppliers we use at work, but no....

If anyone has an example of this chip I am prepared to pay any reasonable amount to have it shipped to me. I beleive many were used in cordless phones...

Fred

Interesting - on the faceplate, it says "Submersible"!

I once let my young daughter, a semi-experienced sailor, go out in our little sailboat. She carried a VX-1R in case of problems, and I monitored the frequency from shore. Of course, the trouble she encountered was gusty winds that dumped the boat, and the ziplock bag containing the radio had a leak. No problem for her - she swims well, and I saw her problem from shore right away. The radio, however, took me many months to put back in working shape.

I'd love to have a handheld that could stand up to a quick immersion or a heavy spray off the bow. Nice feature!

Bob, KI8AB

Message-ID: <a7dsu3nij1@woodrow.ucdavis.edu>
Source record: 3722
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

Hello there,

If you know a source of Kenwood TK-880/780 programming cables, please post the location as a follow up here or Email me direct by removing the NOSPAMPLEASE from my Email address header. I picked up a couple of radios that I'd like to program, stage one is finding the pc to radio programming adapter. Motorola uses a "rib" box and seperate cables for each radio on much of their stuff. I'm told the Kenwood adapters are made per model series of radio. I'd also like to find the software, but that will come after I find the programmer.

thanks
skipp@pilotNOSPAMPLEASE.ucdavis.edu

470. FA: Astatic 575 M6 Amplified Microphone, Handheld

Newsgroup: rec.radio.amateur.swap
Date: 2002-03-22 23:40:15 UTC

This auction is for an Astatic 575 M6 handheld amplified microphone (AKA "Power Mike"). This mike is in great shape and is less than 1 year old. It looks and sounds great. I decided to buy a base microphone for my RCI-5054 6m radio and will not need this anymore. It will not come with a microphone plug, so you will have to supply that or take it to your local "tech" to have it wired up.

471. FS: Icom 746 station

Hi All;

I have a 3 month old Icom 746; used about 10 hours total, maybe a bit longer. Original box, manual, mic, etc. Also have an Astron RS35A power supply, also a few months old, a Heil Goldline microphone with the Icom cable, a pair of JRC headphones, a rascal soundcard interface (for PSK31), and two antennas: a cuschcraft MA5V vertical antenna, and an MA5B beam. I spent over $2000 on this, and I will sell the whole package for $1500 plus shipping (although I'd prefer a local sale, as shipping all of this will be expensive). May be willing to split the package.

Contact me at: K6JBT@attbi.com

73,

James
K6JBT, ex-N6TTD

FOR SALE:

Hallicrafters SX-25 Defiant Receiver
Get that awesome push-pull 6V6es sound with this vintage beauty!
General Coverage Communications Receiver Made 1940-1946
Voltages: 100-125 VAC 50-60 Hz
Coverage: 540 - 42000 kHz
Modes: AM/CW Selectivity: 6 positions
Single Conversion Superheterodyne. 12 Tubes.
Size: 19.5x9.5x11.125" = 495x241x283mm
46 lbs. = 21 kg.
Tubes: 6SK7 1st RF Amp, 6SK7 2nd RF Amp, 6K8 1st Detector-Mixer,
6SK7 1st IF ANL, 6SK7 2nd IF Amp, 6SQ7 2nd Detector/AVC/1st Audio
Amp, 6SQ7 Phase Inverter, (2) 6F6 or 6V6 Audio Amp, 6H6 ANL, 6J5GT
BFO and 80 Rectifier.
Features: ï¿½" Headphone Jack S-Meter Tone (2 Pos.) Bandspread, RF
Gain, Mute Line, Standby, ANL, AVC, Dial Lamp, Hinged Top Cover,
BFO, Flywheel Tuning etc. Picture available on request.
Will sell for $140.00 plus shipping

Realistic DX-160 Receiver with Realistic speaker
Excellent condition general coverage shortwave receiver set. Excellent
working condition with repro manual. Picture available on request.
Will sell for $79.00 plus shipping.

National NC-190 Receiver
This is a nifty-looking old receiver with that classic space age blue
finish.
Front panel looks very nice, but some of the knobs look crusty and
need
cleaning. Appears to be all original with no modifications.
Receiver is non working but it is all there, and will clean up nicely.
Picture available on request.
Will sell for $125.00 plus shipping

Knight TR-106 6 meter AM transceiver with V-17 VFO
Excellent looking Allied-Knight 6m AM rig with the matching VFO.
Comes with the microphone and has built-in speaker. Hook up 120V AC
and an antenna and you are on the air. Needs one cable. Otherwise
complete and has very nice appearance. Picture available on request.
Will sell for $125.00 plus shipping

Hammarlund Speaker. I believe this one matches the HQ-110 and other
similar radios. Extra nice condition. Picture available on request.
Will sell for $50.00

Atlas 210 HF transceiver. Includes DC power cable. Needs work.
Cosmetically very good. A couple of extra side holes where a genius
mobile-mounted it. Picture available on request.
Will sell for $115.00 plus shipping

R-268/ARN-5B Command series rare VHF Receiver - Black case, similar
to BC- 733F, but marked for 24V DC and no dynamotor. It's all there
including the shock mounts and special bayonet connectors. Looks to be
in very good condition. Unmodified. Picture available on request.
Will sell for $30.00

Command Set transmitters:

BC-459A complete - have two available. One is black crinkle paint
finish. The other is the silver case. Both are made by Western
Electric and are complete, unmodified, missing one very small cover on
top. Will sell for $40.00 each plus shipping

Boonton Crystal Calibrator Model 111
Excellent condition
Will sell for $25.00

Boonton Crystal Calibrator Model 111-B
Excellent condition
Will sell for $25.00

Shipping is additional on all items.

That's daft it's been FCC type approved

Under US freedom of information act, new radios submitted for type approval
are public information on the FCC website / database
That's how to keep abreast of new radios,
watch the FCC type approval site

Although of course that doesn't mean Yaesu will put into production
Just they now can, for use in the US

With the Kenwood TH-F6/7 selling like hotcakes,
Yaesu will have to bring out something new to replace the VX5

waters and standon are now selling the TH-F7 for 249quid

Steve Terry

I think Yaesu might be trying to avoid the same situation that Icom went through last year with their T-82A. Remember, it was all hyped up, but was pulled from production at the last minute due to issues with the wideband FM recieve. Just my 2kHz worth.

Check out this item for auction.

ONE NEW, ANTENEX brand, Phantom model, 3db gain, 450-470 MHz,
“Transit” style, UHF Antenna. Antenex part number TRA4503.
It is NEW in the bag. This antenna mounts to a standard MOTOROLA style
mount (NOT INCLUDED IN THIS AUCTION). I have been using this style
antenna for my personal equipment and I am very happy with the
results. Great for low-profile or unmarked vehicles!

516. For Barter: ICF-2010

Newsgroup: rec.radio.amateur.swap
Date: 2002-03-31 03:04:06 UTC
From: at_the_helms@yahoo.com
Message-ID: <621d1b6e.0203301904.56b6bfdc@posting.google.com>
Source record: 3569

I have a Sony ICF-2010 for barter.

It was purchased new in 9/97 from Grove Enterprises, and comes with original packaging, related materials and receipt. I keep it covered when it's not in use and even oil the antenna periodically. It's in perfect, unaltered factory condition, but I simply don't have the time to devote to the radio much any more.

I'd like to trade it for a decent 800MHz handheld scanner (preferably unblocked), transceivers of any type, or a base CB unit in similar condition. Mods are OK as long as long as it improved performance and was done professionally.

I paid $364 for the 2010, but I'm not expecting a dollar-for-dollar exchange here - just a fair swap for respectfully handled gear that I have a realistic use for. I'll consider anything you've got, except for junk and stolen property.

I think it's only fair that we each pay our own insured shipping. If you're interested, please contact me directly. I'm in no hurry and Thank You.

For sale or trade:

Collins 30L-1 amplifier, works very well, very goood condition except top cover doesn't fit perfectly (does not affect operation, and only slightly noticeable looking at amp from above). Currently wired for 120VAC operation, easily changed for 240VAC operation. Includes manual copy. $550 plus shipping.

Drake MN-2000 tuner, works well, very good condition. Includes original manual. $160 plus shipping.

Vibroplex Original semiautomatic key, serial number 60767, purchased new in 1987. Very good condition, no dings or discoloration in chrome parts or grey base, nameplate attached and in excellent condition. Works very well. $75 plus shipping.

Electro-Voice 641 dynamic microphone with desk stand. Very good condition, works fine, currently wired for Heathkit HW/SB series rigs. $65 plus shipping.

Kenwood TH-215A 2-meter FM HT. Good condition, works fine. Includes WWW high-capacity battery and desktop charger, hand mic, original battery (dead, cells can be replaced if desired), original manual. $100 plus shipping.

Heil HC5 DX mic element. Very good condition. $15 plus shipping.

I can supply pictures of these items on request.

73,
Jeff Kilgore, KC1MK

These two fine matching ham radio components have just reached their modest reserve. If you have been looking for a nice pair that won't bankrupt you, take a peek at this pair:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1343046348

and

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1343133153

Open to offers on the pair (with the interconnecting cable to allow transceive operation) prior to auction end if you just have to have them.

Paul NS6V

Gentlemen,
The subject items are currently up for auction and can be seen at:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1343007267

Both antennae are about 10-12 years old, were working great when last used about a year ago.

The downside: you have to remove them, and do so during normal business hours M-Th. They are located in Simi Valley, CA. Simi Valley is just to the west of the San Fernando Valley, approximately 10 miles WNW of the intersection of I405 and Hwy 101. Easy to find and the weather's getting better.

The sale includes the Mosley 10-40M beam, the KLM VHF 11 element beam, three sections of what I think is Rohn 20 tower including two straight and one top section, the flat roof base, all guys, all coax, and the mast. The rotator is not included in the sale. The reserve is set at $250. I am willing to take offers from someone who can and will remove this antenna structure as soon as possible. Please contact me directly if you are interested. This is fairly priced and would look great over your QTH. Paul NS6V

Hello,
I found some more Yaesu FT-101 series parts in my bunch of radio
parts.I have these part numbers and all parts are used,

PB-1180
PB-1315A
PB-1166
PB-1083A
PB-1092
PB-1187A
PB-1188b
These are used and have not been tested.So with that I am selling them
as is and
no warranty is implied or expressed.I will sell them for $25.00 U.S.
Postal Money Order only.This price include shipping.Also if any
questions or you want to buy these items please E-mail me at

kc8fwd@hotmail.com

Thanks for looking and 73's de KC8FWD Mike

Hi there!

A fellow amateur is looking for 2 (two) FTS17 tone boards for the Yaesu FT-23 and FT-411 handheld radios.

If you have any surplus to requirements, please email Andrew at zr1sbm@freemail.absa.co.za

Thanks in advance!

Regards.

I could do with one for my FT411

I think the PMR version of the FT23 uses them ?
many surplus now

Has anyone received there Hamvention Tickets Yet ?
My check was cashed last month, and have yet to receive my tickets in the mail.

I have also written 2 emails to the ticket information email address from the hamvention.com website, and have yet to get a response.

Any comments ?

Hi,

I have a Kenwood AT-120 antenna tuner for sale. It is in great shape.
It will handle 150 watts and is small enough to put in a car. This is
not an automatic tuner. You need to tune it for the best match.

I could send a jpeg pic if for those that are seriously interested.

$65.00 plus shipping.

Thanks,

Doug W3IIY

Hi,

I recently bought this filter and it turns out it is not the correct
filter for my rig. So, it is up for sale.
The filter measures about 1/2" x 1 3/4" x 7/8". This is the type that
would get soldered in place.

Asking $50.00 plus shipping.

Thank you,

Doug W3IIY

ICOM IC-735 HF TRANSCEIVER

This is one of ICOM's best transceivers of its time, a real workhorse that is capable of 100 watts continues duty. I used one in Africa on RTTY for a number of years. Is small sized and very easy to use.

This radio is stock, no mods and no extras. Cosmetically it rates an 8 and electronically a 9.5. Every function works. The radio is clean and has not been used by a smoker. Comes with SM-6 desk mic, used but working, a new copy of the manual and schematics, and a power cord. Has plastic door.

Will be properly packaged for shipment. Price is $445 plus shipping costs from 29609.

Thanks for reading.

I have a number of ex-AT&T tower sites available, in Missouri and Arkansas.

If you have ever looked at one of these sites, with the concrete buildings a foot thick, the back up generators, the HVAC, electric toilets, etc, you got to know that these are wonderful facilities for HAM radio, survivalists, or just someone that wants to live through the nearby tornado.

The towers are awesome. Ranging from 75 feet to 300 feet, talk about a platform for just about any antenna you could want, as well as potential revenue from rentals.

They start at 20k, and go up, depending on the building, the tower, how much land, etc.

Contact me via email, bbowers@townsqr.com for more information. I may have some adjoining states available also, as well as some of the underground bunkers.

Hi All

I have a 1998 Ford Expedition that I would like to put a 2 meter radio in.
Can someone tell me the best position to mount the radio an antenna so that
I dont damage the SUV?

Thanks Carl

carl
i dont know the lay out of the SUV but i would suggest mounting it where the
ashtray is unless you smoke then you can go with one of those radios that has
a removable face plate then mount the radio under the seat and the faceplate on
the dash somewhere
as for an antenna a 5/8 wave on a magmount on the roof would be good

One nice idea I saw with the Icom-207H (a dual-band rig) was to mount the head up by the mirror. They have a long cable available and the wire is easily hidden in the molding, plus the 207's head is quite small. There's a picture at http://www.qsl.net/w8kea. The guy who did it made a bracket so the molding screws could hold it in place.

..

I agree....If you want to make the antenna work the best just drill the dang hole like a real man and live with it...Magmounts suck and they damage the paint. And glass mount antennas are even worse...

IMHO YMMV

Dan

Motorola MCS2000 Model 2 - FLASHport - 806-870 MHz - NO RESERVE!

You are bidding on ONE Motorola MCS 2000, Model 2, FLASHport, 800 MHz, 35Watt, Privacy Plus Radio. This radio has the H38/G51 (Smartzone Operation) Flashcode installed. It operates in the 806-870 MHz range on Type I, II, IIi Systems and in conventional modes. It is capable of up to 160 Talkgroups and Conventional Channels combined -- on up to 20 Systems. The model number is M01UJM6PW6AN. Included in this auction is a palm mic, speaker adapter, and speaker (with speaker bracket). No other cables or parts are offered. This unit works great. I currently have it programmed on City Police, but will have to blank it for security reasons. There are NO scratches in the display. This unit is a 9.99 out of 10. It has small scratches near the rear of the unit where the unit was opened and checked out by an authorized MSS. This model is a dash mount, but it is capable of being converted to a remote mount with the purchase of a remote mount kit (about $160 new). Please refer to Motorola's web site for more details and features of this radio. This model lists for $2500 new and possibly more for the H38/G51 Flash options.

I don't deal with the sub-compacts much, I have an Excursion. ;^) Anyway, on the bottom of the dash is a small indentation. Just below the pocket in the dash to the right of the steering wheel. Brake controllers are often mounted there. I mounted my radio there and mounted the brake controller to another bracket connected to the radio bracket. I then use a 2m magmount that looks like a cell phone antenna. I can hit all the repeaters I need in about a 50 mile radius. The newer magmounts have a layer of mylar over the magnet, so it does not damage the vehicle. My has worked quite well, and I enjoy it quite a bit. Good luck.

ONE, NEW, ANTENEX brand, Phantom model, 3db gain, 450-470 MHz, "Transit" style, UHF Antenna. Antenex part number TRA4503. It is NEW in the bag. This antenna mounts to a standard MOTOROLA style mount (NOT INCLUDED IN THIS AUCTION). I have been using this style antenna for my personal equipment and I am very happy with the results. Great for low-profile or unmarked vehicles!

Comet and Diamond Antenna make mounts that attach nicely to the side lip of the hatch door. I've got two mounted near the top, on either side, and they work nicely. This area is black trim on my '97 so there is no paint to mar. Also, this mounting location is fine when you open the hatch, because the antenna lays out horizontally along the roof line, a bit outboard so it clears the roof.

back in the early 80's, we were putting radios in new LTD squad cars

the city insisted on having the antennas mounted ON the light
bars.............well, there was about 3 extra feet of light bar cable left
over, so the install guy made a loop around the 'computer' (actually, the
ignition module) on the left inner fender

all was well until a car was going balls-to-the-wall to an accident one day,
the driver hit the button on the mike, and the ignition died, just like
you'd turned the key off

only on one channel of the radio, and only at wide-open throttle

but boy, did we have fun 'diagnosing' the trouble.....we must have
used 5 tanks of gas 'trying to duplicate the problem'.....

Harris Alpha 2000 UHF or VHF Synth Duplx Transceivers/PARTS/Boards

All board assemblies also available, working or repairable as is.
Working assemblies are $25.00 to $50.00 ea., Shipping included in
price.
Repairable as is boards are $10.00 to $20.00 ea, Shipping included in
price
Schematics/prints/pts list for each board assembly..
Buy individual boards or a complete UNIT of all the boards (11
working) plus chassis. Great Savings over single boards $

Inquiries Welcome

COMPLETE UNITS ARE:
Alpha 2000 (originally IMTS mobile telephones by Harris R.F.Comm)
Needs an addition of a external Controller , Antenna(2) or duplexer
(1ant) for full repeater operation
UHF freq. Range 405 to 512 mhz
VHF freq. Range 130 to 174 mhz
Separate Rx and Tx ports connectors
Full duplex FM
Separate Rx,Tx phased locked VCOs
Freq. Tol. 5ppm or 2ppm
Receiver sensitivity .25 to .5 uv for 12 db sinad
UHF rf power output 30 to 45 watts (w/o duplexer)(Duplexer not
supplied)
VHF rf power output 50 to 70 watts (w/o duplexer)(Duplexer not
supplied)
Requires 13.8 vDC at 15amps max VHF , 8 amps max UHF
Upgraded with ULIB board (universal logic interface board)
ULIB is capable of 128 chan. binary selection by internal dip switch
or externally with bcd lines or 16 chan selection by 16 lines, plus Rx
Tx audio interfacing, COR line, PTT line and TCS adaptable.

Weight of unit is 24 lbs plus cables and manuals equals total of
approx 32 lbs shipping.

Each radio includes: Shipping included
All schematics/prints of each board assembly and main
interconnections, power cable, connector/pins for control cable, and
10 channels programmd (your choice)

Carl:
You might consider something innovative as I had to do on a lease vehicle. I have a 99 Explorer (Limited) and there is NO spare space , so I made up two inverted "J"
brackets; bolted them to the mobile mount bracket, mounted the bracket to the bottom of the radio and hung it from the center console(open the console, hang it on and close the cover). No holes to drill, easily reachable/readable and when I leave the vehicle for an extended period, I open the console; raise the radio up and slide it under the seat. Works for me! If you're interested, e-mail me direct and I'll tell you about the "no holes visible" roof mount I made! G.I. ingenuity!

I drive a 4-Runner.

The control head is mounded on the console with double sided tape for the
bracket.
The RF deck, which is mounted on an Aluminum plate goes under the seat.
I was going to put some velcro on the bottom to keep it from sliding, but
never found a need.

Motorola MCS2000 Model 2 - FLASHport - 806-870 MHz - NO RESERVE!

You are bidding on ONE Motorola MCS 2000, Model 2, FLASHport, 800 MHz, 35Watt, Privacy Plus Radio. This radio has the H38/G51 (Smartzone Operation) Flashcode installed. It operates in the 806-870 MHz range on Type I, II, IIi Systems and in conventional modes. It is capable of up to 160 Talkgroups and Conventional Channels combined -- on up to 20 Systems. The model number is M01UJM6PW6AN. Included in this auction is a palm mic, speaker adapter, and speaker (with speaker bracket). No other cables or parts are offered. This unit works great. I currently have it programmed on City Police, but will have to blank it for security reasons. There are NO scratches in the display. This unit is a 9.99 out of 10. It has small scratches near the rear of the unit where the unit was opened and checked out by an authorized MSS. This model is a dash mount, but it is capable of being converted to a remote mount with the purchase of a remote mount kit (about $160 new). Please refer to Motorola's web site for more details and features of this radio. This model lists for $2500 new and possibly more for the H38/G51 Flash options.

Gimme a break! The auction is the method of sale. The sale takes place
at the end of the auction, between the seller and the highest bidder.
"Auction" = "A public sale in which property or goods are sold to the
highest bidder".

Rod

628. FS: NEW GE MPR and MPS Batteries

Newsgroup: rec.radio.amateur.swap
Date: 2002-04-22 04:31:46 UTC
From: radiotek@mailcity.com
Message-ID: <1e16cd96.0204212031.437d9469@posting.google.com>
Source record: 3531

FS: NEW old stock CENTURION AL2000 alkaline (NON-RECHARGABLE) batteries(4200 MAH, 9 volts). These batteries fit GE MPR and MPS radios. I also believe they fit the MPX series. These batteries have the original factory seal on the metal connectors. I have not tested every battery, but they all appear in unused condition. I have several hundred of these batteries to sell. COST is $1.00 EA !!!! You pay shipping.

629. FA: ANTENEX 800 Low Profile Phantom Antenna - NIB - No Reserve - Motorola Style Mount

Source record: 3532

ONE, NEW, ANTENEX brand, Phantom model, 3db gain, 806-866 MHz, “Transit” style, low visibility, 800 MHz Antenna. Antenex part number TRA8063. It is NEW in the bag. This antenna mounts to a standard MOTOROLA style mount (NOT INCLUDED IN THIS AUCTION). I have been using this style antenna for my personal equipment and I am very happy with the results. Great for low-profile or unmarked vehicles!

Thanks for looking!

Source record: 3539

Hello,
I have one Yaesu FT-757GX and one Yaesu FP-757HD power supply left.I am selling this as a set One Yaesu FT-757GX and One FP-757HD.This set has a few scratches where it was used for field day and has been mobile prior to me getting it.This unit has the mobile mounting bracket.I am asking $500 plus shipping for this set.Shipping and insurance is fixed at $20 dollars.This unit works but with all old equpment it is as is.
I do have a Automatic tuner which matches these that has a intermittant problem the antenna tuner gets stuck in the wait mode.Sometimes here lately it seems to work when moved so I think it is a ground problem.$100 dollars plus $15 for shipping.If you buy a radio above I will not charge the Shipping on this.Will Trade for a TS-50 s with no mods done to it for one of the radios.Thanks for Looking Mike KC8FWD
if interested or any questions e-mail me at

638. Model 19 Teletype & sundries available in Dartmouth, MA

Newsgroup: rec.radio.amateur.swap
Date: 2002-04-24 18:23:00 UTC
From: shortcircuit@attbi.com
Message-ID: <4f79f4a8.0204241023.229395d3@posting.google.com>
Source record: 3541

Would you consider driving to New Bedford, actually, S. Dartmouth Mass. for a clean model 19?

It is a model 19 that was purchased as a spare some 15 years ago. It has sync motors and the MASSIVE, thyratron regulated, loop power supply.

There is also a typing, keyboardless, reperforator less the base with sync motor. A poorly built ST-5 TU, two rolls of paper, two rolls of tape, a spare ribbon, a decent copy of "RTTY A-Z" and a calibrated polar relay for the teleprinter.

This mini museum of communications technology is YOURS for the paltry sum of a mere $75.

Come and get it before the needs of time and space lay claim to the scrap heap.

Regards,

Charles A. Days

From: Sidevalve <Sabbatai_zvi@hotmail.com>
Message-ID: <nhhicuskn8j6khdg72705mglkb8ikcuka4@4ax.com>
Source record: 3547

FOR SALE:

Nice MFJ-941D Versatuner II antenna tuner in excellent shape. Matches about
any antenna to your HF rig. 300 Watt antenna tuner that covers everything from 1.8 - 30 MHz and includes meter, antenna switch and a 4:1 balun. Meter shows SWR, forward and reflected power - antenna switch lets you select 2 coax lines, random wire/balanced line or dummy load (direct or through). Efficient 12 position airwound inductor gives lower losses and more power out. Has 4:1 balun, 1000 Volt capacitors, and a beautiful aluminum cabinet. Will sell for $59.00 plus shipping

Picture available on request

New, never used, still in the Toshiba box. I bought 12 of these for an amplifier project that never happened. Got the transistors, power supply and heatsink. That is as far as I got. These are the same devices used in the Icom 2k solid state amp. The MRF448 is a replacement for these I am told. RF parts has the MRF448 for $79 each. I would like to get $800 for all 12, or will trade for an Amateur HF tube amp. I have seen these things for as high as $165 each.

Body handling: HTML body converted to readable text

FOR SALE - Prices reduced:

Pictures available on request.

National NC-190 Receiver
This is nifty old receiver with that classic space age blue finish.
Front panel looks very nice, but some of the knobs look crusty and
need cleaning. Appears to be all original with no modifications.
Receiver is non working but it is all there, and will clean up nicely.
Will sell for $99.00 plus shipping

Harvey Wells Bandmaster Senior TBS-50C all band AM-CW transmitter In
very good condition, complete and untested. Reported to be working
when last used. No VFO or power supply. Front panel shows really
nicely. Will sell for $109.00 plus shipping

Heath HD-15 Phone Patch. Unit is in excellent condition with all
original knobs etc. Will sell for $16.00 plus shipping

Yaesu SP-901P Phone patch / Speaker Accessory
Perfect to round out your FT-901 line. Unit is in excellent shape but
needs two scratches touched up on the top. Front looks great,
including the original knobs, meter etc. Will sell for $40.00 plus
shipping

WW2 British Mark 2 straight key. Missing two screws, but otherwise
clean and in nice shape. Contacts are still in very good shape. A few
imperfections, but will polish up and restore nicely. Will sell it for
$39.00 plus shipping

Straight Key - for the CW buff who wants to be ready for straight key
night. Also useful for beginners learning the code. This has locking
bar for tuning and is an adjustable key with nickel silver finish.
Will sell for $24.00 plus shipping

TS-175 Frequency Counter - exceptionally nice military unit in near
mint condition with original chart. covers 125 kHz to 20 MHz.
Will
sell for $75.00 plus shipping

LM-10 frequency counter - 'Type CRR-7402B crystal calibrated
frequency indicating equipment' with original chart book, in very good
condition. Will sell for $49.00 plus shipping

MFJ 204B Antenna noise bridge with original manual.
Will sell for $45.00 plus shipping

MFJ-941D Versatuner II antenna tuner in excellent shape. Matches about any antenna to your HF rig. 300 Watt antenna tuner that covers everything from 1.8 - 30 MHz and includes meter, antenna switch and a 4:1 balun. Meter shows SWR, forward and reflected power - antenna switch lets you select 2 coax lines, random wire/balanced line or dummy load (direct or through). Efficient 12 position airwound inductor gives lower losses and more power out. Has 4:1 balun, 1000 Volt capacitors, and a beautiful aluminum cabinet. Will sell for $59.00 plus shipping

Knight TR-106 with V-107 VFO
Excellent looking Knight 6m AM transceiver with the matching VFO. Also comes with the original, blue 'Knight' labelled Shure hand microphone. This radio can operate on either 12V DC or 115V AC. Comes with 115V AC cable. Otherwise complete and has very nice appearance. Sold as-is. Comes with a copy of the manual.
$125.0 plus shipping

657. FS: Yaesu FT-1000MP Mark V - Dayton Delivery

Newsgroup: rec.radio.amateur.swap

From: George Sereikas <sereik@bellsouth.net>
Message-ID: <QJYy8.83607$tt4.4896768@e3500-atl2.usenetserver.com>
Source record: 3610

I have for sale a mint Yaesu FT-1000MP Mark V. I am the original owner and I am a non-smoker. This radio looks and works great. It comes with the following options installed: Both Yaesu 2.0 SSB Filters(2nd/3rd IF) and the 500HZ Collins CW Filter. It comes with the original boxes, FP-29 PS, Manual, hand mike, etc. I will deliver this radio to Dayton. I prefer not to ship it. If you have been looking for a Mark V, this is your chance to get one that looks and works great.

I am asking $2325, including delivery to the Dayton Hamvention next month. Check out my profile at eBay, userid: kc2mf. If interested, please send me an email at: k2wo@arrl.net

Thanks for reading this message!

From: Sidevalve <Sabbatai_zvi@hotmail.com>
Message-ID: <s2tocu804bmms5gakeco6dsdu57mjrcp21@4ax.com>
Source record: 3611
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.swap,rec.radio.amateur.equipment

FOR SALE - a few more boatanchors.
Pictures of all available on line (See below)

Clegg 22'er classic 2m AM transceiver with mobile microphone
and manual. Looks very good. sold as-is untested.
Will sell for $55.00 plus shipping

Heathkit HW-17 classic 2m AM transceiver with microphone.
Meter is missing but otherwise very clean.
Will sell for $45.00 plus shipping

Command Sets - ARC5 Receivers
A pair of BC-455 receivers - missing some parts, most tubes are gone.
Tuning dials and i.f.t. cans etc. are present as are most components
underneath the chassis.
These would need some major work, or use them as spare parts for your
repairs.
Will sell the pair for $10.00 each = $20.00 total plus shipping

CLASSIC 1940s-50s HOMEBREW TUNER
What a beauty! This jewel has all heavy duty components including a
dandy of a roller inductor with turns counter, The variable capacitors
are pretty
large and looks like it would handle a kilowatt with ease.
The versatile circuit is configurable for either series or parallel
'T' configuration.
Has jumpers in front to change set-up easily.
Has built-in SWR bridge utilizing an E.F. Johnson meter with controls
for FWD, REV and gain.
Case is made of hammertone finish steel with a removable
lid. There is a small chip out of one of the knobs.
Will sell this gem for $175.00 firm plus shipping

Rare Heathkit CB-1 Lunchbox rig.
Here is a Heath CB transceiver that could be used on either 10m or 11m
AM. Very rare nowadays. Most are hacked to pieces or in the
dump long ago. As you will see from the picture this rig is in very
clean condition. Looks like someone added a switch in the front
which could be very easily removed and the hole
filled and painted over to restore to like-new condition.
Will sell for $45.00 plus shipping

Heath Mobile Speaker
These are getting hard to find. Excellent condition. Has not been
beaten up and repainted like some you see. The perfect companion to

any HW series Heath rig.
Often used mobile with the HW-12, HW-22 and HW-32 radios, but also a fine mate to the HW-17 for sale above.
Offered for only $22.00 plus shipping

Heath HW-202
Classic Heath 2m FM mobile transceiver with plenty of chrome.
Condition unknown, sold as-is. Looks like it's all there. Comes with the microphone. Will clean up nicely.
Comes with the ORIGINAL (thick!) manual, original Heath microphone, cables etc.
Untested and will be sold as-is for $39.00 plus shipping

Also original Heath HA-202 amplifier manual $8.00
Original Heath Micoder HD-1984 Manual for $8.00

Heath HD-15 Phone Patch. Unit is in excellent condition with all original knobs etc.
Will sell for $22.00

Lafayette Capacitance Substitution box
Model 99-50205 in excellent condition with test leads.
Will sell for $20.00 plus shipping

Yaesu SP-901P Phone patch / Speaker Accessory
Perfect to round out your FT-901 line. Unit is in excellent shape but needs two scratches touched up on the top. Front looks great, including the original knobs, meter etc.
Will sell for $45.00 plus shipping

MFJ 204B Antenna noise bridge with original manual.
Will sell for $45.00 plus shipping

Palomar Noise Bridge with manual $45.00 plus shipping

Source record: 3619
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

For Sale: Yaesu FT-817 QRP HF/VHF multimode transceiver with the following options:
TCXO-9 temperature controlled crystal oscillator.
CT-62 CAT data cable.
W4RT One Board Filter (BOTH SSB and CW Collins mechanical filters installed).
Two E-DC-6 cables.
CSC83 soft case.
EDC-5-B DC adaptor with noise filter.

Over $400 in options...

And of course, the original box, manual, mic. and BNC antenna.

The filters make this radio an outstanding performer and corrects the one obvious deficiency the stock radio has for those who like both SSB and CW operation! The radio was purchased last Christmas and was built in August 2001. $650 shipped/insured CONUS. Terms, USPS MO.

Lynn, N8AJ

Hi All,

I have three KLM antennas for sale. They are:

KT34XA - 6-element tribander. Most popular contest/DX antenna ever made... $750

KT34A - 4-element tribander. Just like it's big brother, but half-size boom (16')... $500

40M4 - "World Class" 4-element 40-mtr monobander. Open and close the band. Has no peer... $1200

All antennas have 3-inch booms, are in excellent condition, still in the air (expected to be taken down by 5/11/02).

Located in Northport, NY, on the north shore of Long Island, in western Suffolk County.

Pics and more details at http://reallybig.com/tower. Tower is sold, sorry.

Pickup only, as I will not ship.

Thanks for reading,

73 de Jeff K2KV

Still nothing on Yaesu's website. I get the feeling the radio's a
hoax. A few doctored up pictures.. why wouldn't Yaesu have information
on it on their website? Who's ever heard of a modern HT with 6m AM?
And .3 watts for 220mhz? Has anyone at Yaesu admited that this radio
is in production or will be?

8 ohms 100 watts for $15.00 each plus shipping

16 ohms 100 watts for $15.00 each plus shipping

4 ohm 50 watts for $8.00 each plus shipping

2 ohms 100 watts for $15.00 each plus shipping

I can supply you with 200 Watt loads - either 4 ohm, 8 ohm, or
16 ohm resistive loads as follows:

Each set-up would consist of FOUR 50 Watt resistors wired for the
correct load impedence. These are brand new DALE Gold Series
(the best precision load resistors you can get!)
and each set-up rated for 200 Watts sell for $24.00 plus shipping.

I can also supply these as 100 watt loads in either 8 ohms
or 16 ohms, for $15.00 each, plus shipping

E-mail me for details

If the rig was a hoax then I doubt Yaesu would go to all the trouble of
getting FCC acceptance. Look here:

I have a handheld microwave transmitter make by Innotek. This is about the size of a garage door opener and runs on a 9 v battery. The power output is 10 Mw and it has a built-in antenna with a gain of 7db. Center freq is 10.525 ghz . I have the schematic and circuit board diagram of the unit. The unit was purchased assembled from the factory and I used it to test microwave propagation.

$45

I also have a Cobra Trapshooter Radar detector that I used with this transmitter to receive the signal.

$35

Hi All,

I have an Icom 207H (with detachable face) and the faceplate was stolen. I ended up buying a new 207H and I'm swapping the one faceplate between 2 cars. This is now getting old.

I'm looking to sell the base portion (with mike) or buy a used faceplate. A new faceplate costs almost as much as a new radio.

So, if you are in the same boat or know where I can get my hands on a faceplate, please let me know.

Please be sure to remove the 'DIESPAMMERS' before responding or send mail to me at my call sign at: ARRL.NET.

Thanks.

David

Thanks for reading...

I have FOR SALE, a nice little Alinco DJ-190 HT that's served me well over the past couple of years.(Although I really didn't use it too much since it was used for my packet set-up and packet has all but died around these parts. So its time to part with the HT.)

I've got some special higher gain "duckie" that I bought, and I'll throw that in with the deal. AA Nicads are in the unit. Very nice shape. Manuals included.

$49 takes it...along with $7 for insured U.S. Postal Service shipping and insurance.

First e-mail gets it. If you want to use Visa or Mastercard to get it to you quicker, we can do that through the little ham radio antenna business that I own.

You should go and look the Vertex Standard Japan website. It takes a while always that the product information is updated to the US / UK Yaesu website.

http://www.standard-comm.co.jp/Products/amateur/vu_handie.html#

I don't understand japan but there it is. The newest products are usually published at the Japan website, as they are a japanese company...

Maxon CP-0520 UHF FM Portable - 6 channel, synthesized - 440-460Mhz operation w/5 Watt output. Radio has a clear plastic outside case - see all the internal parts.

Comes complete with 3 batteries (CA-1450A), whip antenna, black vinyl case, CA-1100A Drop-in Charger (fast and trickle rates), SMP-4000 programmer (with manual), speaker/microphone, & radio service manual. Radio has been retuned for amateur radio frequencies, but can work fine in commercial band by re-tuning. Very loud audio, room in radio for PL encode/decode module (not included), small size (5.5" x 2.375" x 1.785"). Radio collectors? -- add this clear plastic radio one
to your collection!

I have two Motorolla desk sets. They are wired remote sets for a
motorolla base station. Wire them up and have the ability to monitor and
transmit from where your radio is not!

They worked when pulled from service (by me) five or six years ago. Sat
in a box, waiting for a project that I never got to. They are in fair to
good physical condition.

http://www.eskimo.com/~ghopper/mphone1.jpg

I'll take $15 each or $25 for the pair plus shipping.

Questions? email ghopper@eskimo.comm

ONE NEW, ANTENEX brand, Phantom model, 3db gain, 450-470 MHz, "Transit" style, UHF Antenna. Antenex part number TRA4503. It is NEW in the bag. This antenna mounts to a standard MOTOROLA style mount (NOT INCLUDED IN THIS AUCTION). I have been using this style antenna for my personal equipment and I am very happy with the results. Great for low-profile or unmarked vehicles! Buyer to pay fixed shipping amount of $6. Thanks for looking!

712. FS: Mirage 2M Amp

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-09 02:32:13 UTC
From: Dan Vanderplough <davander@home.com>
Message-ID: <NclC8.1458$L76.331@rwcrnsc53>
Source record: 3465

I have for sale a Mirage B-34-G 2 meter amplifier, 2-8 watts in gives 35 watts out. Has GaAsFET receive preamp and will work both FM and SSB at the push of a button. Perfect for your two meter handheld, I used it on my older Icom 706 with power turned down to 5 watts to drive the amp. Now excess to my needs.

Excellent condition, both physically and electrically.

$75 shipped CONUS

Dan K9RQ

FOR SALE:

Knight TR-106 with V-107 VFO
Excellent looking Knight 6m AM transceiver with the matching VFO.
Comes with the original, blue 'Knight' labelled Shure hand
microphone. Pictures at web site below.
This radio can operate on either 12V DC or 115V AC.
Comes with 115V AC cable.
Otherwise complete and has very nice appearance.
Sold as-is. Comes with a copy of the manual.
Available for $125.0 plus shipping

Harvey Wells Bandmaster Senior TBS-50C all band AM-CW transmitter In
very good condition, complete and untested. Reported to be working
when last used. No VFO or power supply. Front panel shows really
nicely. Will sell for $125.00 plus shipping

Heath HW-17 with mic - $45.00

Heath HW-202 with mic - $35.00

Heath DX-35 - $85.00

Heath VF-1 - $75.00

Heath HD-15 Phone Patch. Unit is in excellent condition with all
original knobs etc. Will sell for $16.00 plus shipping

Yaesu SP-901P Phone patch / Speaker Accessory
Perfect to round out your FT-901 line. Unit is in excellent shape but
needs two scratches touched up on the top. Front looks great,
including the original knobs, meter etc.
Will sell for $45.00 plus shipping

SpeedX straight key in excellent shape with the 'two stage' navy
knob. Sell for $35.00 plus shipping

WW2 British Mark 2 straight key. Missing two screws, but otherwise
clean and in nice shape. Contacts are still in very good shape. A few
imperfections, but will polish up and restore nicely.
Will sell it for $39.00 plus shipping

Straight Key - for the CW buff who wants to be ready for straight key
night. Also useful for beginners learning the code. This has locking
bar for tuning and is an adjustable key with nickel silver finish.
Available for $24.00 plus shipping

TS-175 Frequency Counter - exceptionally nice military unit in near mint condition with original chart. covers 125 kHz to 20 MHz. Will sell for $75.00 plus shipping

LM-10 frequency counter - 'Type CRR-7402B crystal calibrated frequency indicating equipment' with original chart book, in very good condition. Has connector for power supply on the side. Will sell for $49.00 plus shipping

Pictures available on web site below.

I still have a project for sale. It is the 6 meter AM transceiver put out by the IA QRP club. I have the board, the pots, a used CB modulation transformer, the modulator chip, the crystal filter (the good one), and the coil form. Make me a decent offer.

I have a Ten-Tec model 250 power supply. It puts out 12 VDC @ 8 amps (non-regulated), and 12 VDC @ 1.5 amps (regulated). I don't know what rig it is for. It has a lot of "wear" scratches on it but seems to work fine. I don't know what it is worth. Make me a decent offer.

I have three NOS Dow Key Coaxial Relays, DK60-G2C. They are 52 ohm, rated for 1000 watts. The coil is 6060 ohm, 110 VDC(?). They have a set of DPDT auxiliary contacts. This is the internally shielded model. Make me a decent offer.

I'm a motivated seller. I have a Timewave DSP9+ that needs $60 worth of repairs. XYL is not too thrilled about getting it fixed since I paid $40 at a hamfest and it didn't work. Ouch.

717. 200W RF Power Mosfet for sale !!

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-10 17:19:18 UTC
From: Technician <technician@shaw.ca>
Message-ID: <qiTC8.56529$xS2.4059893@news1.calgary.shaw.ca>
Source record: 3470

I have a brand new, never touched straight from the factory (Macom) DU28200M 200W RF mosfet power transistor for sale. 2-175MHz, perfect for a simple home brew amp of your design! These are the best that money can buy.
I purchased 3 to build a push pull amp in case I toasted one, the third will not be used. It is in it's original factory packaging and has not been touched by human hands (The box was opened to remove the other 2 devices) since it left the factory. These are so hard to find they must be special ordered through Ma-com
The spec sheet for it is below, as well as a screenshot to online pricing from Richardson electronics.
This item costed me $232.98 USD, I will accept any reasonable offer for this device.
I guarentee this not to be DOA, but of course all sales final since I cannot guarentee that you have not damaged it by misuse or mishandling.
Please reply to technician@shaw.ca.

Technician :)

721. Pre-Estate Sale!

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-11 00:45:54 UTC
From: Lynn Stolz <lstolz@columbus.rr.com>
Message-ID: <6RZC8.35756$G%3.13848646@typhoon.columbus.rr.com>
Source record: 3473
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

NO, I'm not dead yet! Hence the pre-estate sale!!!

1. One year old Drake R8B Communications Receiver / VHF option / MS8
speaker.
Like new. Low hours. Perfect in every way. Asking $1100.00.

2. Ten-Tec Model 540 Triton IV SSB/CW Transceiver (later version with the
AMP Mate-N-Lok
power connector) with optional CW filter and 10M crystals. 80-10M 100W
output, no WARC.
PTO was rebuilt and the radio calibrated by the factory last year. Includes
model 252M matching
power supply, which has a H/B over-voltage protection circuit added in
(based on the TT circuit).
Asking $425.00.

3. Excellent condition Realistic DX-160 Communications receiver with
matching SP-150 speaker
and original owner's manual. This is one of the nicest I've ever seen. I am
the second owner.
Asking $100.00.

4. Ten-Tec model 701 electret hand microphone. New, never used. Bought it
by mistake when
the rig had one included with it. Asking $18.00.

5. Bird 50B wattmeter slug. Fifty watt 50-125 MHz range. $35.00.

6. Kenwood KPS-15 Switching power supply. 13.8 VDC at 23 amps. Current
model. Asking
$65.00.

7. Kenwood TS-520S SSB/CW transceiver. 160-10M, no WARC. 100W output using
6146B's in
the final. The transceiver is extremely clean, and has an excellent front
panel. The clam-shell
cabinets have been repainted. This is a great starter rig, lake house, RV
or Field Day rig. It is
nice to have a built-in power supply. No original manual, but a complete
copy comes with it.
Asking $225.00.

8. Ten-Tec model 937 13.8 VDC power supply. Current model. Asking $60.00.

Note: All the above items include shipping/insurance anywhere in the
Continental US (CONUS).

The prices reflect an estimated shipping cost in order to make them simpler for all concerned.
Unlike most eBay sellers, I refuse to stiff buyers with exaggerated costs for handling.

Terms: USPS Money Orders or PayPal. I prefer payment through PayPal, which lets me receive
your payment at the speed of email, and ship your item sooner.

Reply via email or phone 614-885-5428. Thanks, Lynn, N8AJ

GE Portables

GE MPA VHF 146-162 full system keypad. Radio is as new and is almost perfect. The only flaw is the grip tape under the PTT button is peeling at the edges. Otherwise perfect. The next feature is, The radio is Key pad programmable. 16 channel scan and front face programmable. Has a like new battery and a good rapid charger. Also a belt clip. $500.00

GE MPA VHF Select 157 - 174 split. Nice radio 9 condition with battery and
standard charger. I have it programmed down to 154 MHz with no trouble but
will go no lower. $200.00

GE MPA UHF Scan 440 - 470 192 channel scan. Radio works great. A little
paint wear on the edges but I have seen worse. With charger and battery.
$225.00

GE MPD select model 470.- 488 MHz. 48 channel Alpha-Numeric display. With battery and standard charger. 7-7.5 $90.00

GE MPD scan VHF 150.8 174. 48 channel alphanumeric display. These look good
and come with a battery and standard charger. 125.00 each.

MPD Voice Guard VHF system model with full keypad. 48 channel alpha display.
with battery and standard charger. $135.00

GE PCS UHF 8 channel. I have this radio on the uhf ham band for testing and
it works the local repeaters. With battery and charger. $90.00

GE PCS VHF 2 channel. Like new 9.5-10 condition. 150 -170 MHz.
With battery, antenna, leather case, and pocket charger. $100.00 each.
Five available.

GE MPS VHF Like new 10 channel. With new battery, new antenna, and a
standard charger. $65.00

GE MPS VHF 12 channel. Set of 4 that talk to each other with all new
batteries and antennas. All in a rack charger. $225.00

GE Monogram UHF 10 channel portables. 3 radios 2 new batteries and 1
good
battery. With 1 dual slot charger. $200.00 all 3 radios.

GE Monogram VHF 10 channel portable. 157-179 split. ex CSX radio. I
sold
this radio a year ago but have taken it on trade. Condition 8 with
belt clip
and charger. I had this radio run for stolen from CSX by a local CSX
Special
Agent when I first bought these in a lot and was told that it had
been sold
at salvage. Perfect for a RR Museum or shortline on a budget. This
could
also be programmed for marine frequencies. Like new tall
Battery. $100.00

GE Mobiles

GE Phoenix SX VHF 128 channel scan. No accessories. Has all 8 proms.
$100.00

GE MLS UHF 8 channel. With Mic, power cord and hang up box. MLSU240
450. - 470 Looks good. $125.00

GE MVS UHF 16 channel scan. With Mic, Bracket, and power cord. $125.00

GE Mastr exec II VHF 75-watt mobile complete with accessories. $60.00
each

GE Mastr exec II VHF Mobile extender (repeater like Pac rt) for Mastr
II or
Delta. $20.00 each

GE Mastr exec II VHF Mobile extender for GE Ranger (only Exec II that
I have
seen marked Ericsson) $65.00

.GE Ranger VHF 150.-162 100 watt mobile. Complete with cable, Mic,
speaker,
and S550 control head. This is a great public safety mobile or can be
tuned
to the 2-meter ham band. $155.00

GE S990 head. Looks new but I have not had time to test this yet.
$75.00

GE S550 head 16 channel looks good but not tested. $35.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit
charges your
battery and turns your portable into a mobile radio. (Convert a Com)
With
mic, speaker, and power cable. $100.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice
Guard,
MPS, and Ranger. Printer is not working but I tried and it programs
radios
without the printer. Has manual for the programmer and the computer.
Has Phoenix cable and Voice guard cable. All in the original GE case
tested
and working. (except printer) $850.00

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $30.00. I have seen
programming
cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5.
$4.00
each. I have a large amount of 203.5,186.2, 179.9, 173.8, and 162.2.
If you
buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50 each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820
heads.
And all other heads $40.00 each

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a rapid
rack charger with a DB 15 cable and uses a MPD body to attach a battery to.
Has LED readout in display area of MPD body to tell discharge rate. Another
rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card and
power supply / speaker. $300.00

Other Radios and Accessories

Motorola Saber III VHF 146-174 split. 120 channel Alpha-Numeric display with
secure - net module. (no out of country sales) des I think. I have been
using this all week and talking on the ham band to test this radio. Battery
has lasted all week during drive time so it seems good. With rapid charger
and big battery. $500.00 or trade for a VHF MRK II

Icom 3200 a Dual band ham radio. Has box and manual but no mounting bracket.
Has tone squelch board installed. $200.00

Icom IC 24-at Dual band Portable. In good shape, Display has no scratches
and only 1 small patch of the paint is peeled off of the back of this radio.
With manual and wall charger. $165.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery
charger but I will split up the pair if someone wants 1 radio only. 6
channels programmed for 10 meter ham band on 2 repeater pair and 4 simplex

frequencies. 2 radios and 1 charger $195.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by Midland.
$75.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$75.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition and
charger I had to re-list due to a deadbeat buyer. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of crystals
for each radio. Also have a working battery and charger for each. I have 4
of these. $50.00 all

Uniden SMS 825 ts, 800 MHz Dash mount radio. $55.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work with the
sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know

"Motorola" They are good people and I will pass along any trades you may
wish to make.

Motorola X9000 VHF 50 watt, Alpha-Numeric head, Siren complete.
$425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

Motorola HT1000 UHF Intrinsically safe, Re-cased looks new. 16 channel scan
with charger. $425.00

Motorola P200 UHF high power. 6 channel. $150.00

EF Johnson Challenger UHF 80 watt trunk mount, 99 channel Alpha-Numeric
head.$225.00

This mike has part # 19-1125 printed on the back.
It has the keypad on the front and has the 8-pin
connector that looks lile a computer network connector.

I don't really want one that works poorly or has the
letters worn off.

Reply to marz@t4x.com, but you must change the
letter 'z' to a 'k', and change the letter 'x' to a 'p'.
The email has been deliberately written wrong
in order to prevent filthy scumbag spammers
from getting my real email address.

Packet pretty much died here in the back woods of Michigan. So I've
been selling pieces of my packet set-up. I have FOR SALE, a
KANTRONICS PacketCommunicator 3 in beautiful shape. I have the AC
adapter, terminal to rig jumper and your standard TNC to computer
interface cable. Now since I used a dumb terminal, I never used a
computer/software set-up. And I can't tell you where I put the
original disk. BUT...there are TONS of packet software programs
available, some you can even download for free right off the internet.
I also have ALL the manuals for the little unit.

Anyway...enough rambling. ONLY $49 postpaid Priority U.S. Mail and
insurance to your front door. GREAT DEAL and FIRST e-mail gets it!

MOTOROLA GP300 VHF W/ EXTRAS - NO RESERVE

You are bidding on one, Motorola, GP300, 8 channel, 5 Watt, VHF portable radio. It is model # P93YPC20D2AA. The radio is used, but has been re-housed and checked by a local Motorola Authorized Service Center to meet all factory specs. Included in the auction is one Motorola Speaker Mic, HMN9030A, in perfect condition. Also included, but not pictured, is one, single-unit, 10-hour charger. The battery is in excellent condition with a year 2000 date code.

744. For sale or trade - new power transformers

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-14 02:47:46 UTC
From: Terry Perdue <k8tp@home.com>
Message-ID: <mV_D8.1541$Bw6.11@rwcrnsc51.ops.asp.att.net>
Source record: 3497

I have three new power transformers that would be ideal for a solid state kilowatt RF amp, high power audio amp or monster bench supply. These are real beauties, but very heavy - so you probably wouldn't want to pay for shipping.
Located in Seattle area. Specs are as follows:

(Primaries are the same on all three - dual 100/115V (200/230V), 50/60Hz.)

Xfmr #1:

One 55V secondary, tapped at 4V, 40V, 45V and 50V. Rated at 250A peak (6% duty cycle), using a bridge and 150,000 uF cap.

Xfmr #2:

Secondary #1: 50V, tapped at 30V, 40V and 45V. Current rating not known, but substantial.
Secondary #2: 28V center-tapped at 8A continuous, 50A peak (20% duty cycle), using a bridge and 50,000 uF cap.

Xfmr #3:

One 55V secondary, tapped at 4V, 36V, 40V, 45V and 50V. Rated at 100A peak (20% duty cycle) using bridge and 50,000 uF cap.

If interested in any of these, and able to pick up or willing to pay shipping, contact me, and we'll work an easy deal. Interested in trades. Can email pictures.

This is the 6 M AM transceiver spotlighted by the IA QRP club a year or so ago. This is a rig designed by Rick Littlefield originally called the Nor'easter and published in Communications Quarterly. I have the board, the pots, a used CB modulation transformer, the modulator chip, the crystal filter (the good one), and the coil form. I am also including all documentation, addendums (some items in color), and a copy of the original article. I'll sell it for $20 shipped priority mail (lower 48). This is a really neat project. I've just never had the gumption to get it finished.

I have the two chip set that allows Kenwood TS440, TS-940, TS-811 and TS-711 transceivers and the R-5000 receiver (I believe). I bought them because they were advertised as a IF-10C interface kit and these are NOT an IF-10C interface (that's a board). I'm asking $40 (what I paid) but I'll take best offers. (BTW, the installtion instructions are in the owners manual - not included) Or if you had an IF-10C that you wanted to trade me I'd sure take that!

I got tired of straining to hear signals from AO-40 with my barbecue grill dish and developed a circular polarized antenna that WORKS! I talked a manufacturer into producing a small amount of specialized waterproof helical feeds and I am now making this antenna available to the amateur radio community. Available in two sizes, 2 foot and 3 foot with TRUE circular gain. Easily connected to a crossboom, it is an offset parabolic and there is NO aperture blockage of the incoming signal. Plus, you can connect your downconverter or preamp directly to the feed with no signal loss. I have current stock and have mastered my shipping methods. Please visit my web site and look my antenna over. These antennas may be available only for a limited time due to the difficulty in ordering small quantities, international shipping, and the limited time I have to spend on this project. Any comments are welcomed.

751. Model 19 Teletype and extras

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-15 15:46:38 UTC
From: shortcircuit@attbi.com
Message-ID: <4f79f4a8.0205150746.7917f831@posting.google.com>
Source record: 3404

Model 19 has sync motors and the MASSIVE, thyratron regulated, loop power supply.

There is also a typing, keyboardless, reperforator less the base with sync motor. A poorly built ST-5 TU, two rolls of paper, two rolls of tape, a spare ribbon, a decent copy of "RTTY A-Z" and a calibrated polar relay for the teleprinter.

This mini museum of communications technology is YOURS for the paltry sum of a mere $75.

Come and get it before the needs of time and space lay claim to the scrap heap.

Regards,

Charles A. Days

I am going to Dayton on the 18th. I am going on a bus with the radio club. I can bring small items with me. Also I would like to raise some cash before Dayton so make an offer on anything on the list.

Please if you have questions or want to make a trade contact me off list at my e-mail address. gundoc@insightbb.com... Some of these lists are not swap lists and only tolerate my post because it is only once a week. To the group owners thank you for letting me continue to post to the group.
Dean

GE Portables

GE MPA VHF 146-162 full system keypad. Radio is as new and is almost perfect. The only flaw is the grip tape under the PTT button is peeling at the edges. Otherwise perfect. The next feature is, The radio is Key pad programmable. 16 channel scan and front face programmable. Has a like new battery and a good rapid charger. Also a belt clip. $500.00

GE MPA VHF Select 157 - 174 split. Nice radio 9 condition with battery and standard charger. I have it programmed down to 154 MHz with no trouble but will go no lower. $200.00

GE MPA UHF Scan 440 - 470 192 channel scan. Radio works great. A little paint wear on the edges but I have seen worse. With charger and battery. $225.00

GE MPD select model 470.- 488 MHz. 48 channel Alpha-Numeric display. With battery and standard charger. 7-7.5 $85.00

GE MPD scan VHF 150.8 174. 48 channel alphanumeric display. These look good and come with a battery and standard charger. 125.00 each.

MPD Voice Guard VHF system model with full keypad. 48 channel alpha display. With battery and standard charger. $135.00

GE PCS VHF 2 channel. Like new 9.5-10 condition. 150 -170 MHz. With battery, antenna, leather case, and pocket charger. $100.00 each. 2 available.

GE MPS VHF Like new 10 channel. With new battery, new antenna, and a standard charger. $65.00

GE MPS VHF 12 channel. Set of 4 that talk to each other with all new batteries and antennas. All in a rack charger. $225.00

GE Monogram UHF 10 channel portables. 3 radios 2 new batteries and 1 good battery. With 1 dual slot charger. $200.00 all 3 radios.

GE Monogram VHF 10 channel portable. 157-179 split. ex CSX radio. I sold this radio a year ago but have taken it on trade. Condition 8 with belt clip and charger. I had this radio run for stolen from CSX by a local CSX
Special Agent when I first bought these in a lot and was told that it had been sold at salvage. Perfect for a RR Museum or shortline on a budget. This could also be programmed for marine frequencies. Like new tall Battery. $100.00

GE Mobiles

GE Phoenix SX VHF 128 channel scan. With Mic, Has all 8 proms. $100.00

GE MLS UHF 8 channel. With Mic, power cord and hang up box. MLSU240 450. - 470 Looks good. $125.00

GE Mastr exec II VHF 75-watt mobile complete with accessories. $60.00 each

GE Mastr exec II VHF Mobile extender (repeater like Pac rt) for Mastr II or Delta. $20.00 each

GE Mastr exec II VHF Mobile extender for GE Ranger (only Exec II that I have seen marked Ericsson) $65.00

.GE S550 head 16 channel looks good but not tested. $35.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit charges your battery and turns your portable into a mobile radio. (Convert a Com)
With mic, speaker, and power cable. $100.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice Guard, MPS, and Ranger. Printer is not working but I tried and it programs radios without the printer. Has manual for the programmer and the computer. Has Phoenix cable and Voice guard cable. All in the original GE case tested and working. (except printer) $850.00

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $30.00. I have seen programming cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5. $4.00 each. I have a large amount of 203.5,186.2, 179.9, 173.8, and 162.2. If you buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50 each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820 heads.
And all other heads $40.00 each

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a rapid rack charger with a DB 15 cable and uses a MPD body to attach a battery to. Has LED readout in display area of MPD body to tell discharge rate.
Another rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card and power supply / speaker. $300.00

Other Radios and Accessories

Motorola Saber III VHF 146-174 split. 120 channel Alpha-Numeric display with secure - net module. (no out of country sales) des I think. I have been using this all week and talking on the ham band to test this radio.
Battery has lasted all week during drive time so it seems good. With rapid charger and big battery. $500.00 or trade for a VHF MRK II

Icom 3200 a Dual band ham radio. Has box and manual but no mounting bracket. Has tone squelch board installed. $200.00

Icom IC 24-at Dual band Portable. In good shape, Display has no scratches and only 1 small patch of the paint is peeled off of the back of this radio. With manual and wall charger. $165.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery charger but I will split up the pair if someone wants 1 radio only. 6 channels programmed for 10 meter ham band on 2 repeater pair and 4 simplex frequencies. 2 radios and 1 charger $195.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by Midland.
$75.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$75.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition and charger I had to re-list due to a deadbeat buyer. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of crystals for each radio. Also have a working battery and charger for each. I have 4 of these. $50.00 all

Uniden SMS 825 ts, 800 MHz Dash mount radio. $55.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work with the sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know

"Motorola" They are good people and I will pass along any trades you may wish to make.

Motorola X9000 VHF 50 watt, Alpha-Numeric head, Siren complete.
$425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

Motorola HT1000 UHF Intrinsically safe, Re-cased looks new. 16 channel scan with charger. $425.00

Motorola P200 UHF high power. 6 channel. $150.00

EF Johnson Challenger UHF 80 watt trunk mount, 99 channel Alpha-Numeric head.$225.00

Want List not FS
Extra parts for suitcase programmers. Data modules, Printers, cables, proms, Anything you have extra. MPA or MPD portables what do you have and what do you want for them? Johnson scorpion program cable.

767. FS: Icom IC-730 with Parts Radio and Service Manual

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-17 12:09:04 UTC
From: Markoradio <markoradio@yahoo.com>
Message-ID: <Ue6F8.14093$3U6.14198062@e3500-atl1.usenetserver.com>
Source record: 3420

FS on eBay: Icom IC-730 with Parts Radio and Service Manual.
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1352103612&r=0&t=0&showTutorial=0&ed=1021647661&indexURL=0&rd=1

Auction ends in 3 hours at 11:01 AM this morning EDT, or 1501Z.

This all-band SSB/AM radio has:
*All Solid State PLL operation
*10m, 12m, 15m, 17m, 20m, 30m, 40m and 80m bands
*Digital Frequency Display
*Dual VFO's for split operation
*IF Shift
*Receive Preamp
*Speech Processor
*No optional filters installed

Radio works, but has some problems. Radio receives great on all bands. Transmits with full power (100W) on all bands except 10m, 12m and 30m. Something failed internally causing the final stage to go into oscillation with a destructive full 100W carrier on these bands. Do not attempt to transmit on 10, 12 or 30m until radio has been repaired. Radio works fine otherwise, and may be used on 80, 40, 20, 17 and 15m with no problems. The radio is obviously repairable. I just don't know what failed and needs to be replaced. I was operating on 10m when the failure occurred. After cooking the finals, I replaced the final board with one out of a parts radio. I am including the IC-730 parts radio (in pieces) along with the working IC-730 radio. I am also including an IC-730 Service Manual and the Operating Manual, in addition to the power cord and handheld Icom mic. The only other minor problem is that the frequency display is off somewhat from the operating frequency in LSB mode (40 and 80m). The frequency display on USB (10, 12, 15, 17 and 20m) appears to be accurate.

I received an e-mail yesterday from a ham with an IC-730 which set me on the right track to finding the oscillation problem on 10, 12 and 30 meters. The problem seems to be on the RF board. I tried swapping the RF board from the parts radio into the working IC-730. The oscillation problem was gone. However, the power output went down to 40W from 100W. With the auction about to end, I decided not to try anything else. I put the original RF board back into the radio, and I put the other RF board back into the parts radio. Output is back up to 100W again, and the oscillation of the final stage on 10, 12 and 30m also returned. The winner of this auction will have the parts radio along with the service manual. A ham that's good at troubleshooting down to component level should be able to find the problem and get this rig transmitting on 10, 12 and 30m again. If not, the radio is still good on all bands other than 10, 12 and 30. The failure occurred last July. I've been

using the radio regularly on the other bands since then with no problems. After my experiment with the RF board last night, I am convinced that this rig is fixable. I wanted to add this informaton to my auction, but eBay will not accept any revisions within the last 12 hours of an auction.

770. FS/FT: Kenwood TM-V7A dual bander, IC-271A 2m all mode, IC-820H dual band all mode

Date: 2002-05-17 20:50:56 UTC
From: Jeff Camp <jcamp2@cox.net>
Message-ID: <Q2eF8.916$Md6.68533@news1.east.cox.net>
Source record: 3423

I have for sale a Kenwood TM-V7A 2m/440 transceiver with the 3 meter separation kit. I bought this new from AES a little over a year ago. It has the original box, manual and packaging. I love the radio, but my interests are in digital modes right now and I just turned it on yesterday for the first time in several months, so I don't need it right now. Asking $375 plus half of shipping.

Also have an Icom IC-820H dual band allmode with hand mic. This is a fairly recent radio and is designed for satellite use, either voice or data. It has the original box and manual and is in excellent condition. Working satellites is very easy with this radio because of all the automated tuning and satellite memories. Asking $625 cash or would prefer a trade toward a Kenwood TS-940 or 950.

I also have an Icom IC-271A all mode 2 meter radio with the tone board and original manual. It is in excellent shape and has an additional fan mounted on the back to increase the duty cycle. The only thing wrong with it is that the S-meter occasionally sticks about half way. I have used this on the FM repeaters here in Omaha and also on sideband for working the RS satellites. Asking $340 plus half of shipping.

I am looking for 10 GHz microwave equipment, a Kenwood TS-940 or 950, a 440 or 1.2 GHz repeater, and an Icom 706 or equivalent for mobile HF. Let me know if you would like to work out a swap or have these items to sell outright.

Please reply to jcamp2@cox.net or
N0WJP@N0WJP.#ENE.NE.USA.NOAM.

Thanks and 73,
Jeff

From: Wayne and Louise <the-irwins@cox.net>
Message-ID: <sHVF8.30948$Md6.738948@news1.east.cox.net>
Source record: 3438

Hi Tom,

Many years ago I built my own DC supply for my TS-520-S. I used a couple 60 amp germanium transistors, a Radio Shack Heat sink, a Jones plug, 2 5 watt resistors and a capacitor. I don't know if you could find surplus germanium transistors today, but you could probably get by with silicone. The voltage drop across silicone is higher than it is across germanium and that might translate into a bit more heat to be dissipated, and possibly slightly less RF output. Ask around a bit and you will very likely be able to round up the parts. Kenwood wanted something like $70.00 for the DC supply option. I think I spent something like $15.00! The schematic is available from anyone who has the original TS-520 owner's manual, since the two power supplies are identical. (Kenwood just made the DC supply an option for the "S" model.) If you can't locate someone with a manual, I might be able to find the schematic to scan and e-mail to you.

I ran my '520-S mobile for several years off and on, and it still runs just fine, though today, I use an Icom 706 (more efficient, more bands and much smaller). If you are successful in getting the project going, I would recommend that you perform the noise blanker alignment procedure in the owner's manual. It made a world of difference in my rig.

I bought my '520-S new in 1977, and though I don't use it all that much any more, I still have it and it works great.

73,

Wayne, W1KI

PS. You can either reply to this message if you want more information, or e-mail me at work - w1ki@arrl.org (I work at ARRL HQ.)

Hi there,

If you've programmed a Motorola People Finder in the past and can remember some of the basics, I'd like to pick your brain with some questions.

I have an NOS unit here (purchased second hand), with most of the information. The internal radio is a modified GP-300 rf package on a board. I'd like to ask some programming questions about it.

I'd also like to know if you've used an Alpha Mate with it and or the external VDT or smart term. I'm setting up a basic paging system and hope this unit will work for my needs.

I have what I think is all the proper software and connections... I might have a question or two about the various programs you might have used.

thanks much

Hey Hams,

On my ham page I added a really slick message board that some of you may enjoy. If anything, it's fun to look at the really neat interface.

Anyway, I tossed a couple of messages on it. It's there for all to enjoy.

http://n6www.cjb.net

Click on Message Board near the top.

Let me know if there are any other discussion sections you'd like me to add to the page.

I also have liks to ULS, IRLP, Homebrew, QRP, and ham training sites for those interested in seeing some of the fun places I've found along the way.

Also, I'm hanging out on IRLP node 396 for anyone looking to say hi! It's about 10:30pm Pacific time on Tuesday May 21st... I'll probably be on for another hour or two. It would be fun to hear anyone's take on my new pages. I'm not a webmaster, so I'm learning.as I go...

WANTED: DEAD OR ALIVE - Still need battery for Kenwood TH-21AT Handi.

I have a working TH-21AT handi but it has no battery. None are available from the various battery venders but they say that they can insert new batteries in the old shell. I am searching for an old battery (PB-21H or PB-21) that fits the TH-21AT and has a good shell for refill purposes.

Please let me know by email if you have one that is available.

Thanks for reading,

AL

Al....you might try here too http://abatterystore.hypermart.net/index.html
I've found batteries there, I couldn't locate anywhere else. Its right there
in Greenville, so maybe you already tried. 73

I have a dead PB21 battery. I'd trade it for the receive xtal for a TH21AT.
OR a dead radio "with a good xtal".

I'm still lookin' to buy a used hf transceiver or transmitter/receiver combo.

Something like the Pixie2 by H.S.C. or the GM40, WM-20 by Small Wonder Labs, the 49er by Norcal QRP Club, or the SP-750 from Lectrokit.

With my limited finances I thought it would be a great way to experience different modes (I've only used VHF/UHF FM), and I would love to find something that can help me learn how to homebrew while giving me a working example and some radio fun!

Thanks!

Re: Swan and Siltronix Radio replacement power cables.
"The current 12 pin "Cinch-Jones" power cable socket part number."

Cinch-Jones no longer makes this connector "socket." I do a lot of Swan and Siltronix radio work, so I've done the home work for you. Molex sells the same type connector.

Just for your mental notes...

The Siltronix and Swan power connector 12 pin socket is available from Newark as part number 14F2451

This is a current Molex 3300 Series Socket with Cable Clamp S-3312-CCT

OK you Swan and Siltronix guys... have at. If you haven't been by the Swan Siltronix web page yet, you can find it on the

http://sonic.ucdavis.edu Amateur Radio Page, about half way down.

cheers
skipp@pilotNOSPAMPLEASE.ucdavis.edu (take the NOSPAMPLEASE out)

http://sonic.ucdavis.edu
http://sonic.ucdavis.edu/siltronix (direct to the Swan Siltronix pages)

[Enjoyed the Dayton Hamfest this year, caught a cold from one of you guys... but I'm past it now.]

GE Portables

GE MPA VHF 146-162 full system keypad. Radio is as new and is almost perfect. The only flaw is the grip tape under the PTT button is peeling at the edges. Otherwise perfect. The next feature is, The radio is Key pad programmable. 16 channel scan and front face programmable. Has a like new battery and a good rapid charger. Also a belt clip. $500.00

GE MPA VHF Scan 157 - 174 split. 192 channels. Nice radio 8.5 condition with battery and standard charger. I have it programmed down to 154 MHz with no trouble but will go no lower. $225.00

GE MPA UHF Scan 440 - 470 192 channel scan. Radio works great. A little paint wear on the edges but I have seen worse. With charger and battery. $225.00

GE MPD select model 470.- 488 MHz. 48 channel Alpha-Numeric display. With battery and standard charger. 7-7.5 $85.00

GE MPD scan VHF 150.8 174. 48 channel alphanumeric display. These look good and come with a battery and standard charger. 125.00 each.

MPD Voice Guard VHF system model with full keypad. 48 channel alpha display. With battery and standard charger. $135.00

GE PCS VHF 2 channel. Like new 9.5-10 condition. 150 -170 MHz. With battery, antenna, leather case, and pocket charger. $100.00 each. 2 available.

GE PLS VHF 16 channel. These average an 8 - 8.5 condition. 150 -170 but I have programmed these in the ham band with no trouble. These have battery, antenna, and standard charger. I will program these since it is suitcase programmer only.
$100.00 includes programming. I have several of these.

GE MPS VHF Like new 10 channel. With new battery, new antenna, and a standard charger. $65.00

GE MPS VHF 12 channel. Set of 4 that talk to each other with all new batteries and antennas. All in a rack charger. $225.00

GE Monogram UHF 10 channel portables. 3 radios 2 new batteries and 1 good battery. With 1 dual slot charger. $200.00 all 3 radios.

GE Monogram VHF 10 channel portable. 157-179 split. ex CSX radio. I sold this radio a year ago but have taken it on trade. Condition 8 with belt clip and charger. I had this radio run for stolen from CSX by a local CSX Special Agent when I first bought these in a lot and was told that it had
been sold at salvage. Perfect for a RR Museum or shortline on a budget. This could also be programmed for marine frequencies. Like new tall Battery. $100.00

GE Mobiles

GE Phoenix SX VHF 128 channel scan. With Mic, Has all 8 proms. $100.00

GE MLS UHF 8 channel. With Mic, power cord and hang up box. MLSU240 450. - 470 Looks good. $125.00

GE Mastr exec II VHF 75-watt mobile complete with accessories. $60.00 each

GE Mastr exec II VHF Mobile extender (repeater like Pac rt) for Mastr II or Delta. $20.00 each

GE Mastr exec II VHF Mobile extender for GE Ranger (only Exec II that I have seen marked Ericsson) $65.00

.GE S550 head 16 channel looks good but not tested. $35.00

GE S700 head and complete Motorcycle cable set for Delta or Ranger. 16 channel
model has short cable and some handle bar mounts. Mic included but no speaker.
Not tested yet since I just got it in. $50.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit charges your battery and turns your portable into a mobile radio. (Convert a Com) With mic, speaker, and power cable. $100.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice Guard, MPS, and Ranger. Printer is not working but I tried and it programs radios without the printer. Has manual for the programmer and the computer. Has Phoenix cable and Voice guard cable. All in the original GE case tested and working. (except printer) $850.00

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $30.00. I have seen programming cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5. $4.00 each. I have a large amount of 203.5,186.2, 179.9, 173.8, and 162.2. If you buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50 each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820 heads. And all other heads $40.00 each

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a rapid rack charger with a DB 15 cable and uses a MPD body to attach a battery to. Has LED readout in display area of MPD body to tell discharge rate. Another rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card and power supply / speaker. $300.00

Other Radios and Accessories

Motorola Saber III VHF 146-174 split. 120 channel Alpha-Numeric display with secure - net module. (no out of country sales) des I think. I have been using this all week and talking on the ham band to test this radio.
Battery has lasted all week during drive time so it seems good. With rapid charger and big battery. $500.00 or trade for a VHF MRK II

Icom 3200 a Dual band ham radio. Has box and manual but no mounting bracket. Has tone squelch board installed. $200.00

Icom IC 24-at Dual band Portable. In good shape, Display has no scratches and only 1 small patch of the paint is peeled off of the back of this radio. With manual and wall charger. $165.00

ADI AT 201. 2 meter portable nice like new and in the box with the manual. Has 5 watt battery and wall charger. $90.00

Yaesu ft 2400 2 meter mobile. Has Mounting Bracket and manual. Nice 2 meter Radio. $125.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery charger but I will split up the pair if someone wants 1 radio only. 6 channels programmed for 10 meter ham band on 2 repeater pair and 4 simplex frequencies. 2 radios and 1 charger $195.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by Midland.
$75.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$75.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition and charger I had to re-list due to a deadbeat buyer. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of crystals for each radio. Also have a working battery and charger for each. I have 4 of these. $50.00 all

Uniden SMS 825 ts, 800 MHz Dash mount radio. $55.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work with the sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know

"Motorola" They are good people and I will pass along any trades you may wish to make.

Motorola X9000 VHF 50 watt, Alpha-Numeric head, Siren complete.
$425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

Motorola HT1000 UHF Intrinsically safe, Re-cased looks new. 16 channel scan with charger. $425.00

Motorola P200 UHF high power. 6 channel. $150.00

EF Johnson Challenger UHF 80 watt trunk mount, 99 channel Alpha-
Numeric head.$225.00

Want List not FS

Title: 74th Annual Atlanta Hamfest!
Event Type: Hamfest
Description: Welcome to the 2002 Atlanta Hamfest, sponsored by the
Atlanta Radio Club, W4DOC, and the American Radio Relay League.
Now in it's seventy-fourth successful year, the Atlanta Hamfest is the
"must visit" amateur radio event for everone. This is one of the longest
running gatherings of radio amateurs for buying, selling, demonstrating,
exhibiting, swapping of equipment and swapping stories.

We will offer:

Large tailgate area
Plenty of free parking
20,000 square foot air-conditioned Indoor Market
37,000 square foot covered Outdoor Flea Market
Campsites, including full RV Hookup, for 44 hams
Educational forums and guest speakers
Displays and exibits
DXCC card checking
VEC license exams
Prizes
Food

See http://www.atlantahamfest.com for details!
Starting Date: 06/01/02
Ending Date: 06/01/02
City: Marietta
State: GA

Hey there NG "shoppers" (*puts down Kmart intercom*)

I have a couple of MCX1000 in VHF units for sale. If you don't know much about them go to Batlabs and read up:
http://www.batlabs.com/mcx1000.html

This particular version is a remote mount and unfortunately I do NOT have the head or the cables. (drop me a line if you have either or know of a good source)

Specs:
-MCX-1000 VHF Mobile Transceiver
-56 Channels in 8 different "zones" (banks)
-Model number M99UR
- about 40 Watts output

Send offers to:
nukingcats (at) cox.net (do not hit RE, it won't get to me)

Thanks,
Adam / KC7LJQ

828. OLDER RIGS FOR SALE

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-25 13:09:43 UTC
From: Sidevalve <Sabbatai_zvi@hotmail.com>
Message-ID: <o80veu4d04ar11vv6954vsa3ikoon3dodc@4ax.com>
Source record: 3381
Cross-posted to: alt.ham-radio.marketplace,rec.radio.swap,rec.radio.amateur.swap

FOR SALE:

Heathkit HW-17 classic 2m AM transceiver with microphone.
Dial glass is missing but otherwise very clean.
Pictures available on request.
Selling for $45.00 plus shipping.

Harvey Wells Bandmaster Senior TBS-50C all band AM-CW transmitter
In very good condition. Reported to be working when last used.
Front panel shows really nicely. Comes with a repro manual.
E-mail me for photos. Will sell for $135.00

CLASSIC 1940s-50s HOMEBREW TUNER.
What a beauty! Like a Johnson only better. You should see the
components and
the dials. This jewel has all heavy duty components including a
dandy of a roller inductor with turns counter, The variable capacitors
are
pretty large and looks like it would handle a kilowatt with ease.
The versatile circuit is configurable for either series or parallel
'T'
configuration. Has jumpers in front to change set-up easily.
Has built-in SWR bridge utilizing an E.F. Johnson meter with
controls for FWD, REV and gain. Case is made of hammertone finish
steel
with a removable lid. There is a small chip out of one of the knobs.
Otherwise it's excellent. E-mail me for photos.
Will sell this gem for $175.00 firm plus shipping

Heath HW-202
Classic Heath 2m FM mobile transceiver with plenty of chrome.
Comes with the microphone. Comes with the ORIGINAL (thick!) manual,
original Heath microphone, cables etc.
Has crystals in it for:
146.07 / 146.67
146.16 / 146.76
146.22 / 146.82
146.34 / 146.94
146.94 Simplex
Pictures available on request.
Untested - selling for $39.00 plus shipping

Heath HD-15 Phone Patch. Unit is in top condition
with all original knobs etc. Pictures available on request.
Reduced to $19.00

Yaesu SP-901P Phone patch / Speaker Accessory
Perfect to round out your FT-901 line.
Unit is in excellent shape but needs two small scratches touched up on the top. Front looks great, including the original knobs, meter etc.
Pictures available on request.
Will sell for $45.00 plus shipping

Homebrew AM transmitter with 1625 final plate modulated by a pair of 5881 tubes. Good iron inside.
Made from a nicely modified ARC-5 transmitter conversion job.
Has an older style 4-pin mic input, gain control etc. etc.
Appears to be made for 40m band and it has final tank of 17 turns silver plated copper 16-18 gauge wire on a 2" diameter ceramic form.
Pictures available on request.
Available for $25.00 without the two 5881 tubes or for $35.00 with them.
Shipping additional.

I have a 220mhz Icom IC-37A forsale.

Includes Handmic.

There has been some mods done.

Pigtail has been converted to BNC panel mount,
Audio section improved, power cord is now the
ARES/RACES/ACS standard Molex connector.

The channel knob is missing... you can probably get one
at ratshack or might have one laying around.. it still
works without one.

Email me for pics

I am asking $175/shipped (conus) via Paypal

Email me:
w4-hatespam-yyz@tampabay.rr.com
(remove the -hatespam- part)

Hello,

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1354873878

Closes soon!....

The Model 3022 Instant Recall Recorder is a modular, solid state audio recorder designed for use in Public Safety communications centers. It records and stores recent telephone calls or radio transactions from an operator s position. This allows the operator to retrieve stored calls easily without leaving their position to go to the logging recorder.

Thanks for the pixs - next best thing to actually being there. My last
Dayton trip was 1982 when I still lived in Toledo, but I'm already
planning for the trio back east next year

Regards,
Bill Bowen

FOR SALE:

Chrome finished desk communications mic with locking PTT bar.
Has the great reputation for smo-o-o-o-oth sound. This one is in nice
shape and comes with a 4-pin connector attached to the coil cord which
is also in good shape.
Will sell for $39.00 plus shipping

Shure 202 Mobile microphone
Gray, sharp appearance with PTT, excellent condition.
Great for use with any mobile station.
Will sell for $35.00 plus shipping

Icom mobile microphone, low impedance, smaller black rounded mic.
Picture available on request. No model number on it.
Will sell for $15.00 plus shipping

Heathkit mobile microphone, low impedance, black - Picture available
on request. Amazing low price (!)
Will sell for $15.00 plus shipping

Heathkit mobile microphone, low impedance, white - Picture available
on request. Unbeatable price...
Will sell for $15.00 plus shipping

Excellent low impedance dynamic BALL microphone - 600 ohms.
Recoton DMK-200 pro series dynamic microphone, unidirectional
with ball/screen type end.
Black metal finish. 80 Hz - 10 kHz response - has 10 foot cord.
Ideal for communications or vocalists / Public Address etc.
New In Box.
Will sell for $15.00 plus shipping

**** Bird Coax Switch *******

Model 72-2 DPDT Coax switch w/N connectors complete w/ knob & dial
plate --$50

***** Used Coax Connectors ****

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF F-M-F Tees -- $2 ea

UG-27/U N Right Angle -- $2.50 ea
UG-57B/U N Male-Male connector -- $4 ea
UG-131/U N Female to ?? (maybe a BN?) -- $3 ea
UG-635/U C Female - BNC Male adapter -- $5 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

N Female Chassis Mount connectors with gold (plated/flashed) PC style
center pin (extends about 1/8" back from the insulator) -- $1ea

***** New Coax Connectors *****

UG-59B/U Kings/Amphenol HN Male Cable connector NIB -- $10 ea

UG-560/U HN Female Panel mount connector NIB -- $10 ea

82-843-1050 Amphenol HN Female sealed round panel connector NIB -- $15
ea

Kings KH-39-11 HN Female Cable connector NOS -- $15

Below are all new crimp on connectors, with all hardware, in
individual plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
KC-59-642-M06 BNC Cable Male -- $1 ea
KA-59-385-M06 TNC Cable Male -- $1 ea
KA-19-43 TNC Bulkhead Female -- $1 ea

All of the above plus shipping, if necessary, naturally.

847. WTB: Hygain or Triex Crank Up Tower Stand Off Wanted.

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-28 19:55:23 UTC
From: laborkei <laborkeiNOSPAM@hotmail.com>
Message-ID: <3cf3e4ba$1_7@nopics.sjc>
Source record: 3400
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.swap

I am looking for the stand off that mounts at the top of each tower section
of a Hygain or Triex crankup tower. Stand off is galvanized with 1 U-Bolt
for attachment to tower,
and it is an angle or tubular rod to a V on the end to attach coax.
If you have one in good condition please let me know what you want for it.

I ordered one on the Hygain website this weekend,
to later find out that Hygain or (MFJ, Ameritron, Vectronics, etc..)
does not have these items to sell. They don't even have the
towers, yet they will be glad to process your transaction to your
credit card for something they don't have. There representative
had no idea this was on the internet, and they said it may be a few
years before Hygain will be selling towers again.
I sure saw one at Dayton with antennas on it !

Please send email to laborkei at hotmail dot com

Thanks..
Keith, WD5BJQ

I make my own, it's very easy to do and it also allows to attach a pulley on the opposite side for raising dipoles.

I bought (3) three foot 1" square steel tubing pieces from the local hardware store, along with three 3" "U" bolts, and three 2" bolt mounted pulleys. Drill the tubing for a "U" bolt on one end, and mount a pulley on the other. Then center the tubing against the top flat strap on each tower section and drill two holes through the tubing and the section top strap. Bolt it down, and you're done.

If you attach the coax only at the top standoff, and let it float in the "U" bolts on the other standoffs and it will go up and down with the tower and coil up nicely at the bottom of the tower, rather than having big loops of coax at each section when the tower is lowered. Also, you have 3 easy attachment points for wire antennas on the other ends.

Total cost was about $20.00 and 1/2 an hour to put them together...

855. FS: complete satellite station incl. Yaesu FT-736R and much more...

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-30 04:15:26 UTC
From: Don Adams <adamsdw@bellsouth.net>
Message-ID: <ni9bfu4ils26lr6mj4jroh5gi6co4smmma@4ax.com>
Source record: 3308
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.amateur.space

Complete amateur satellite station for sale. This collection of gear (with your computer and software) will give you a complete, automated digital/analog satellite station. I (AD4HF, ex-WD4NAE) used this system quite successfully running WiSP (http://www.amsat.org/amsat/ftpsoft.html#win) before dismantling the gear and moving. The antennas have been stored indoors partially assembled. Because the antennas are not shippable, they must be picked up at my home. I live in Albany, Georgia (southwest Georgia). I strongly prefer to sell everything together and will consider any fair offer. "Plan B" is to list items separately on eBay, but I'd rather not have to deal with that.

I purchased all this equipment new. The electronic gear looks as good as new. The antennas show normal outdoor weathering, but work fine.

Included in the system are:

Yaesu FT-736R in immaculate condition with 9600 bps mods professionally done (no permanent mods - connections via a dongle - see photos)

AEA DSP-2232 digital signal processing multi-mode data controller

Kansas City Tracker/Tuner ISA controller card

Yaesu 5400B azimuth/elevation rotor and controller (also have an earlier Kenpro 5400 working rotor/non-working controller for parts)

SSB 2 meter GaAsFET mast mount receive preamp

70 cm mast mount GaAsFET receive preamp

KLM 435-40CX circularly polarized yagi for 435 MHz.

KLM 2M-22C yagi for 144 MHz.

two Down East microwave 1269 loop yagis.

Rohn 25G tilt-base tower section (home-brew hinge welded at base) with 25G top section.

Glen Martin Hazer for 25G tower with thrust bearing and heavy mast. (http://www.glenmartin.com/catalog/page10.html)

Fiberglass cross boom for mounting circularly polarized yagis

Assortment of coax cables for antennas, rotor control cables

Photos of the Yaesu FT-736R on my web site:
http://personal.atl.bellsouth.net/lig/a/d/adamsdw/yaesu_radio.htm

Photos of the AEA DSP-2232 on my web site:

I have the following tube-ish transformers available -
QTY 1 unless otherwise noted.

Power, filament AND output transformers are included...

115V primary to 5 V at 20 A Avco Crosley (no CT) for $32.00

115V primary to 6 V at 4 A (no CT) $11.00

115V primary to 6 V at 8 A (no CT) (QTY 4) at $18.00 each

115V primary to 6.3V CT at 3 A Triad for $11.00

115V primary to 6.3V CT at 6 A Triad for $15.00

115V primary to Two sec.6.4 V at 25A, 6.4 V at 25A $52.00

115 / 230 V primary to 7.5 V CT at 51 A at $95.00

115V primary to 10 V CT at 5 A - QTY 2 at $25.00 each

115V primary to 18 V CT at 2 A for $6.00

115V primary to 350V CT at 70 mA plus 6.3V CT at 3A and 5V at 3A
Merit brand for $18.00

115V primary to 1050V CT at 75mA plus 5V at 20 A
Avco Crosley brand for $32.00

115V primary to 1000V CT at 150 mA plus taps at 800V CT at 150 mA and
three secondaries of 6.3V CT at 4 A each. New Triad brand HSM-212 for
$28.00

115V primary to 1100 V CT at 180 mA for $30.00

Merit A-2930 Output Transformer, new in box. 5 Watts
Primary 5000 ohms, secondary 3.5 Ohms for $15.00

Shipping is additional on all of the above

E-mail me for details or to arrange purchase.

858. want: 4 or 6 pin Maxtrac Ext Speaker Plug

Newsgroup: rec.radio.amateur.swap

re: Want, 2 Channel UHF Maxtrac External Speaker Plug.

Hello there,

Thanks for looking at this post... I have a UHF Maxtrac 2 channel radio which has a 4 or 6 pin external speaker jack on the back. I bought the radio used, so I have no matching plug for said.

(It is not the dual 16 pin header plug as used on the 16 channel radios.)

If you have a spare plug or two that you would consider selling me, please drop me a note using the address below or take the NOSPAMPLEASE out of my Email header above.

If you have the Motorhead (motorola) part number for this plug, that would also work just fine. I can order it direct from them. I'd buy more than one if you have them.

Thanks much and I hope to hear from someone... please no other unrelated spam.

cheers
skipp@pilot.ucdavis.edu

http://sonic.ucdavis.edu some nice amateur radio goodies and more...

********** Air Variable Capacitors ********

Cardwell enclosed 7 section variable capacitor assembly for/from some receiver? -- The sections measure: 210, 210, 105, 105, 105, 100 & 75 pF. The unit is about 12" long and 3" square with a right angle drive mounted in the center and a 30 turn scale. This looks to be NOS (nothing ever soldered to...) but, it is a mite tarnished on the outside from being stored forever. There is also a (Mil?) number on the unit: SC3188A. $30
See at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=cardwell.jpg&.src=ph&.view=t

Johnson T9-5 miniature vertical PC mount trimmers 1.9-15.7 pF, Silver Plated machined plates -- NOS 2/$1

G.I. Corp 70 pF, .080" air spacing, about 3.5"x3.5"x3" overall, ï¿½" shaft $2ea (2 available)

National Type DX 500pF variable capacitors, approx. 3" X 3" x 3" overall fairly good condition. $10 ea. May be seen at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=National.jpg&.src=ph&.view=t&.hires=t

Remler "scissors" variables. Type 630 350pF $25
Type 631 500pF $25

General Instrument type NNC153 3 Section large receiving style capacitor 13-420 pF per section, $15

4 Section capacitor 20-550 pF section large receiving style capacitor, $25

See the previous two units at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=loadcaps.jpg&.src=ph&.view=t&.hires=t

See the next four units at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=aircaps.jpg&.src=ph&.view=t&.hires=t

Johnson 154-1, 12-244pF, .05" air gap, about 3" x 3" x 3" overall. Rear shaft has been cut flush with bushing and the rear mounting tab has been shortened a mite. Otherwise, excellent condition, $25.

Johnson 154-34-3, 20-400pF, looks like .03" air gap, about 3" x 3" x 3" overall not including 1/4" shaft which is about 2-1/2" long. Excellent

condition, $25.

Johnson 500E20 (modern equivalent 154-3), 500pF/2KV, looks like .05" air gap, about 3" x 3" x 4.5" overall not including 1/4" shaft which is about 1-1/2" long. Good condition except the rear mounting tab has been removed and it looks like a couple of the plates arced at one time and were subsequently filed down a mite. $25.

Similar to the part above but, NOT a Johnson, another 500pF/2KV, looks like .05" air gap, about 3" x 3" x 4.5" overall not including 1/4" shaft which is about 1-1/2" long. Good condition except the front mounting tab has been removed. $25.

See the previous four units at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=aircaps.jpg&.src=ph&.view=t&.hires=t

Hammarlund SM-50-X, 7.5-50pF, .064 air gap, Just under 2" x 2" x 2" overall not including 1/4" shaft. Good condition. $10.

National SEU-15, 15pF 270 degree rotation, straight line frequency, variable cap. Shiny and new in beaten-up old box (SNIBOB) $25.

**** Ceramic Doorknob & Disk caps ***

These are used Centralab or similar -- $5 ea or 5/$20

500pF 10KV "TV" style
68pF 5KV 850 series

These are NOS disks by KD & Erie $3ea or 4/$10

1500pF 7.5KV
.01uF 4KV

And a couple NOS Silver Mica caps.

2200 pF 500V CM06 $1 ea
5100 pF 500V CM07 (high current rating) $2 ea

All of the above plus shipping, if necessary, naturally.

********** Old Radio Books & Catalogs **********

JBL professional products binder, late 1980's. Consists of
individual data sheets plus about 20 technical notes in a 3-1/2"
thick,
Orange JBL 3 post binder -- in excellent condition, weighs abt 6 lbs.
$75

Know your Oscilloscope by Middleton, Howard W Sams, 4th ed 1987. 192
pages, good condition. $5

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of
wear at the corners. $10 (2 books)

RF Circuit Design by Bowick, Howard W Sams, 1982 first edition, first
printing. Softbound, good condition, owner's name tag on frontleaf, a
few pencil notes inside. 175 pages. $10

Applied ECM, Vol. 2 by Van Brunt, EW Engineering, cpy 1982, 2nd
printing 1985. Hardbound, excellent condition, 630 pages. $20

Engineer's Notebook 2 by Mims, Archer, First editon, first printing
1982. Softbound large format, good condition $10.

The Practical Handbook of Amateur Radio FM & Repeaters by Pasternak.
Tab books, cpy 1980 2nd prntg 1981. Very good condition, 538 pages.
$10

Handbook of Electronic Communication by Gary Miller, Prentice Hall
1979. Hardbound, very good condition, owner's name written on
frontleaf, 339 pages. $7

Ham Radio Humor by Johnson, Johnson 1977. Very good condtion, 92
pages. $4

Understanding Television by Kennedy, Sams, 1st ed, 1st prnt 1976.
This was a library book and the cover is damaged where a hard jacket
was removed. Insides are very good, 128 pages, $5

RCA COS/MOS Integrated Circuits Manual (CMS-271), 1972. Paperback 224
pages. $5

101 Ways to Use your VOM & VTVM by Middleton -- Howard W Sams 2nd ed,
2nd prntg 1967. Good condition 144 pages. $5

Handbook of Military Infrared Technology by Wolfe, US Navy, 1965.
Hardbound, very good condition, except previous owners name written

large on front edge. 900 pages. $30

Radio Amateur Callbook V41 #2 -- DX listings only, 1963. Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $4

RCA Transistor Manual SC-13, 1967. Paperback. Good condition 540 pages. $10

GE Transistor Manual 7th edition 1964. Paperback. Good condition 650 pages. $10

Having Fun with Transistors by Buckwalter -- Howard W Sams. Good condition 127 pages. $5

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owner's name in ink on p.106. 143 pages. $60

Allied Electronics Data Handbook. Lots of formulas. Water damage on cover and about 1/2" into edges, no pages stuck. 1962. $2

International Crystal Mfg. Catalog 1962 $15

Understanding Transistors by Allied Radio. 1962 First Edition, first printing. Good condition 96 pages. $10

Varactor Applications by Penfield & Rafuse, MIT Press 1962. Hardbound, good condition with original paper jacket under plastic cover, owners name on frontleaf and on two edges, 620 pages. $25

Semiconductor Diode Parametric Amplifiers by Blackwell & Kotzebue, Prentice-Hall 1961. Hardbound, very good condition with original paper jacket under plastic cover, 190 pages. $20

Magneic Amplifier Circuits by Geyger, McGraw Hill, second edition, 1957. Hardbound, cover ripped at spine, previous owner(s) info inside front, insides good. 392 pages. $20

Hycon Crystal Filter Catalog, 1957 $10

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 plus Winter '58, Fall-Winter '62-63, Xmas '89 + Winter, Spring, Summer '90 $120 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $20

Television by Zworykin and Morton, McGraw Hill 1954. Hardbound, some wear at the top and bottom of spine, insides in very good condition, 1037 pages. $75

40 Uses for Germanium Diodes by Sylvania Electric Products. First edition, first printing, 1951. Cover separated, some writing on cover

& frontspiece, otherwise good condition. 47 pages. $7

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $7

Alternating Current Circuits by Kerchner & Corcoran, Wiley 1951. Hardbound, very good condition, owner's name marked out on inside front cover, 600 pages. $10

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $7

Very High Frequency Techniques by Radio Research Lab Harvard University, McGraw Hill, 1947. Hardbound, cover a little worn, insides in very good condition, owner's name on inside front cover & frontspiece, 550 pages. $30

Circuit Analysis of AC Power Systems Vol. 1 by Clarke, Wiley cpy 1943 fourth printing 1950. Hardbound, very good condition, owner's name marked on inside front cover, 540 pages. $10

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $15

Fields & Waves in Modern Radio by Ramo & Whinnery, Wiley 1944. Hardbound, very good condition, owner's name written inside front cover, a few pencil marks in text. 500 pages. $20

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $10

Radio Fundamentals TM11-455 US ARMY Technical manual. 22 May 1944. Good Condition except for owner's sticker inside front cover and a little writing on title page. 333 pages. $20

Hyper and Ultrahigh Frequency Engineering by Sarbacher & Edson, Wiley 1943. Hardbound, cover ripped at spine, insides good. 640 pages. $20

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $7

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio. 240 pages, solid schematics! Like new, $15

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $15

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $10

ARRL Pacific & Southwestern Division convention program, San Francisco, CA, September 1939. Water damaged but, no pages stuck & quite readable otherwise. 16 pages. $10

Amphenol Bulletin No. 59-J, September 1939. Good condition, 6 pages, $10.

Hadley Transformer catalog No. T6, no date but, looks pre-WW2. Good condition, 15 pages. $20

Kenyon Transformer catalog 1939. Good condition, 15 pages. $20

Cornell-Dubilier Capacitor catalog #161, 1938-39. Very good condition, 39 pages. $30

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $20

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $10

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $15

Television by RCA, Vol. 1, RCA Institutes, 1936. A collection of papers concerning the genesis of television. Softbound, a couple small tears at the bottom of the cover, insides in very good condition, 452 pages. $250

Advanced Laboratory Practice in Electricity and Magnetism by Terry & Wahlin, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $7

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles)
-- a little smudging on the back cover and two middle pages torn on the
edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are
receiving and transmitter tube data from the era. $15

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $4

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment,

tools, machinery, and construction projects.
128 pages $4

Inca (Phelps-Dodge) Transformer catalog No. L-31 (1931?). Good condition, 8 pages. $25

Radio Amateur's Handbook Ninth Edition by the ARRL, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $7

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $15

Radio Amateur's Handbook Sixth Edition by the ARRL, November 1929. Cover a little worn at edges and on spine otherwise excellent, no writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $4

All of the above plus shipping, if necessary, naturally.

865. Re: 4 or 6 pin Maxtrac Ext Speaker Plug

Newsgroup: rec.radio.amateur.swap
Date: 2002-05-31 18:56:46 UTC
From: "Bob M." <xxxxx@yyyy.zzz>
Message-ID: <OHPJ8.74066$%y.7744052@bin4.nnrp.aus1.giganews.com>
Source record: 3318

The 2ch Maxtrac radio I have has a 5-pin male connector on the back. The older units came with this; the newer ones use a 16-pin dual-row connector. Pin 1 is towards the outer edge of the radio and is ground. Pin 4 is the speaker audio pin. You could probably fashion a couple of connectors, or wire-wrap something on them and do away with the connector. I'd even consider soldering a pair of wires to the pins and using a 1/8 inch jack and plug arrangement for your external speaker.

There are usually half a dozen 5-pin accessory connector kits for sale on eBay, usually with sufficient female pins and jumper wires to connect an external speaker. Look for Motorola Maxtrac and you'll find both varieties. One deficiency with this connector is that you can't disconnect the internal speaker when you attach an external one; you need the 16-pin model radios to accomplish that task.

Having said that, My Maxtrac service manual lists the 5-pin plastic HOUSING (no female connector parts) as p/n15-80076M01, but since you need the female socket pieces, you'd still need more information. I don't know if such a small order is worth bothering Motorola for. You could probably buy the contact pins at Jameco - this is a standard Molex connector.

Hope this helps.
Bob M.

Please if you have questions or want to make a trade contact me off list at my e-mail address. gundoc@i... Some of these lists are not swap lists and only tolerate my post because it is only once a week. To the group owners thank you for letting me continue to post to the group.
Dean

GE Portables

GE MPA VHF 146-162 full system keypad. Radio is as new and is almost perfect. The only flaw is the grip tape under the PTT button is peeling at the edges. Otherwise perfect. The next feature is, The radio is Key pad programmable. 16 channel scan and front face programmable. Has a like new battery and a good rapid charger. Also a belt clip. $500.00

GE MPA VHF Scan 157 - 174 split. 192 channels. Nice radio 8.5 condition with battery and standard charger. I have it programmed down to 154 MHz with no trouble but will go no lower. $225.00

GE MPA UHF Scan 440 - 470 192 channel scan. Radio works great. A little paint wear on the edges but I have seen worse. With charger and battery. $225.00

GE MPD select model 470.- 488 MHz. 48 channel Alpha-Numeric display. With battery and standard charger. 7-7.5 $85.00

GE MPD scan VHF 150.8 174. 48 channel alphanumeric display. These look good and come with a battery and standard charger. 125.00 each.

MPD Voice Guard VHF system model with full keypad. 48 channel alpha display. With battery and standard charger. $135.00

GE PCS VHF 2 channel. Like new 9.5-10 condition. 150 -170 MHz. With battery, antenna, leather case, and pocket charger. $100.00 each. 2 available.

GE PLS VHF 16 channel. These average an 8 - 8.5 condition. 150 -170 but I have programmed these in the ham band with no trouble. These have battery, antenna, and standard charger. I will program these since it is suitcase programmer only. $100.00 includes programming. I have several of these.

GE PLS UHF 16 Channel. 8 to 8.5 also. 450 - 470 split but I can program

these to the ham band. With battery, Antenna, and Charger. Includes Programming all for $100.00 each.

GE MPS VHF Like new 10 channel. With new battery, new antenna, and a standard charger. $65.00

GE MPS VHF 12 channel. Set of 4 that talk to each other with all new batteries and antennas. All in a rack charger. $225.00

GE Monogram UHF 10 channel portables. 3 radios 2 new batteries and 1 good battery. With 1 dual slot charger. $200.00 all 3 radios.

GE Monogram VHF 10 channel portable. 157-179 split. ex CSX radio. I sold this radio a year ago but have taken it on trade. Condition 8 with belt clip and charger. I had this radio run for stolen from CSX by
a local CSX Special Agent when I first bought these in a lot and was told
that it had been sold at salvage. Perfect for a RR Museum or shortline on a
budget. This could also be programmed for marine frequencies. Like new tall
Battery. $100.00

GE Mobiles

GE Phoenix SX VHF 128 channel scan. With Mic, Has all 8 proms. $100.00

GE MVS VHF 128 channel scan. 136.-153. Split but I have programmed these as 150. - 174 split and they work fine. This radio has 8 modes of
16 channels. Includes Mic but no power cord or bracket. $175.00

GE MVS 800 conventional 2 channel. With mic tested OK $95.00

GE MLS UHF 8 channel. With Mic, power cord and hang up box. MLSU240 450. - 470 Looks good. $125.00

GE Mastr exec II VHF 75-watt mobile complete with accessories. $60.00 each

GE Mastr exec II VHF Mobile extender (repeater like Pac rt) for Mastr II or Delta. $20.00 each

GE Mastr exec II VHF Mobile extender for GE Ranger (only Exec II that I have seen marked Ericsson) $65.00

.GE S550 head 16 channel looks good but not tested. $35.00

GE S700 head and complete Motorcycle cable set for Delta or Ranger. 16 channel model has short cable and some handle bar mounts. Mic included but no speaker. Not tested yet since I just got it in. $50.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit charges your battery and turns your portable into a mobile radio. (Convert a Com) With mic, speaker, and power cable. $100.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice Guard, MPS, and Ranger. Printer is not working but I tried and it programs radios without the printer. Has manual for the programmer and the
computer. Has Phoenix cable and Voice guard cable. All in the original GE case
tested and working. (except printer) $850.00 (I found a printer and will test
it this week)

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $30.00. I have seen programming cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5. $4.00 each. I have a large amount of 203.5,186.2, 179.9, 173.8, and 162.2. If you buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50 each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820 heads. And all other heads $40.00 each

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a rapid rack charger with a DB 15 cable and uses a MPD body to attach a battery to. Has LED readout in display area of MPD body to tell discharge rate. Another rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card and power supply / speaker. $300.00

Other Radios and Accessories

Motorola Saber III VHF 146-174 split. 120 channel Alpha-Numeric display with secure - net module. (no out of country sales) des I think. I have been using this all week and talking on the ham band to test this radio. Battery has lasted all week during drive time so it seems good. With rapidcharger and big battery. $500.00 or trade for a VHF MRK II

Icom 3200 a Dual band ham radio. Has box and manual but no mounting bracket. Has tone squelch board installed. $200.00

Icom IC 24-at Dual band Portable. In good shape, Display has no scratches and only 1 small patch of the paint is peeled off of the back of this radio. With manual and wall charger. $165.00

ADI AT 201. 2 meter portable nice like new and in the box with the manual. Has 5 watt battery and wall charger. $90.00

Yaesu ft 2400 2 meter mobile. Has Mounting Bracket and manual. Nice 2 meter Radio. $125.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery charger but I will split up the pair if someone wants 1 radio only. 6 channels programmed for 10 meter ham band on 2 repeater pair and 4 simplex frequencies. 2 radios and 1 charger $195.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by Midland. $75.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$75.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition and charger. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of crystals for each radio. Also have a working battery and charger for each. I have 4 of these. $50.00 all

Uniden SMS 825 TS, 800 MHz Dash mount radio. $55.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work with the sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know "Motorola" They are good people and I will pass along any trades you may wish to make.

MOTOROLA X9000 VHF 50 watts, alphanumeric head, Siren complete. $425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

Motorola HT1000 UHF Intrinsically safe Re-cased looks new. 16 channel scan with charger. $425.00

Motorola P200 UHF high power. 6 channel. $150.00

EF Johnson Challenger UHF 80 watt trunk mount, 99 channel Alpha-Numeric head. $225.00

Want List not FS
Extra parts for suitcase programmers. Data modules, Printers, cables, proms, Anything you have extra. MPA or MPD portables what do you have and what do you want for them? Johnson scorpion program cable.

Terms
All prices are plus shipping from 40201. All items are used unless noted and only have a no DOA warranty if I say it works. If I say not tested your on your own. If I think it may be bad I will not list it.
I take cash, Postal Money Orders, Paypal, and checks but I hold them for up to
two weeks to clear before I ship. If you have a question E-mail me.

I am QSL manager for UU1A and Ken sent me a bunch of IRCs to sell for him. I have 128 properly stamped IRCs and 42 without any stamps (that I'm told are good). All are the recent small size for airmail response (with postmark dates of 2000 and 2001 mostly). These are still valid for an indefinite period (unlike the news ones that expire in 5 years). Ken is asking $1 each for stamped ones and 80 cents each for unstamped ones (plus my postage to mail them to you).

******** Microphones, Mike connectors & cables **********

Astatic Dynamic Mike -- This is either a Cardioid or noise cancelling as it has some small holes in one side. It is black about 5-1/2" long with a Cannon connector (M) in the bottom end. The model number is either invisible or rubbed off. The finish is well worn but, I plugged it into a Shure mixer and it seems to work fine. $20

University Model 70 Omnidirectional Dynamic mikes. They are black & light gray finish, have seen a lot of use and there are a pair of these. One has a Cannon connector (F) on the end of a cable and the other is missing its cable so I couldn't easily test either one. Asking $20 for the pair.

Motorola 4-pin Microphone connectors 28-16730 (similar to Amphenol MC4M) -- NIB $5ea

Motorola 0180700T14, 4-wire coily cord mike cable assembly with a mike connector as above on one end and a spring strain relief on the other. There are some flat pins on the free wire ends -- NIB $15

NOS coily cable for a Yaesu MH-27 mike (may fit others). Later version with the RJ connector at the radio end. $10.

All of the above plus shipping, if necessary, naturally.

*** Homebrew Radio things ***

Many hams build things with a large investment in time & parts that are worth far less... later. Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $4

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $4

HF Harmonic Filter built in a 5" x 2.25" x 2.25" LMB Aluminum box. UHF connectors. Probably good for 100W. $5

60dB Sampling Tap -- HN female connectors for the main line and a BNC for the tap. 1KW in the line puts 1mW to the tap. -- $10

435 MHz power splitter with (3) N connectors. This is made out of brass
sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 432. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. $10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x 4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered by a single 9 volt battery. - $10

Two Meter to 24-28 MHz converter (I think!) -- 5" x 4" x 1.75" -- $10

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $10

NTSC Frequency reference -- I think this was a QST project in the early 1980's. PCB in 4"x5"x8" metal case (top missing) w/feet, AC line powered. -- $15

All of the above plus shipping, if necessary, naturally.

I plan to bring the following Collins Equipment to Arlington HamCom next week end. I will be located at E9-10.

1) 75S3B late serial number (85XXX), with t-9, round emblem. Nice condition with someone's SS# engraved on the back. Also has extra RCA plug installed on rear, but nicely done. No extra filters.

2) 75S2 wide brow, nice condition, recently aliened by Bud Whitney.

3) 75A4 good condition, with 4to1 driven, extra NOS 1500 filter, sold separately or with unit.

4) 516F2 power supply, no cabinet, recently solid stated by Bud Whitney. Very nice condition.

I may bring a KWM 380 and a nice KWM-2 also. The 380 was purchased from Wayne Spring a couple of years ago, but not used. The KWM-2a was recently repaired and aliened by Bud Whitney.

If you have an interest, you can contact me there or call 281-291-9226

MOTOROLA GP300 VHF W/ EXTRAS - NO RESERVE -- LAST DAY!!!!

You are bidding on one, Motorola, GP300, 8 channel, 5 Watt, VHF portable radio. It is model # P93YPC20D2AA. The radio is used, but has been re-housed and checked by a local Motorola Authorized Service Center to meet all factory specs. Included in the auction is one Motorola Speaker Mic, HMN9030A, in perfect condition. Also included, but not pictured, is one, single-unit charger - BRAND-NEW IN THE BOX!!! The battery is Intrinsically Safe, in excellent condition (according to the Alexander Battery Analyzer), with a year 2000 date code. I prefer PayPal, but will accept Billpoint, Money Orders, and Cashiers Checks. NO Personal Checks. Please feel free to e-mail me with any questions. Winner must contact me within 24 hours of auction close. Good luck and thanks for looking!

GE Portables

GE MPA VHF 146-162 full system keypad. Radio is as new and is almost perfect. The only flaw is the grip tape under the PTT button is peeling at the edges. Otherwise perfect. The next feature is, The radio is Key pad programmable. 16 channel scan and front face programmable. Has a like new battery and a good rapid charger. Also a belt clip. $500.00

GE MPA VHF Scan 157 - 174 split. 192 channels. Nice radio 8.5 condition with battery and standard charger. I have it programmed down to 154 MHz with no trouble but will go no lower. $225.00

GE MPA UHF Scan 440 - 470 192 channel scan. Radio works great. A little paint wear on the edges but I have seen worse. With charger and battery. $225.00

GE MPD select model 470.- 488 MHz. 48 channel Alpha-Numeric display. With battery and standard charger. 7-7.5 $85.00

GE MPD scan VHF 150.8 174. 48 channel alphanumeric display. These look good and come with a battery and standard charger. 125.00 each.

MPD Voice Guard VHF system model with full keypad. 48 channel alpha display. With battery and standard charger. $135.00

GE PCS VHF 2 channel. Like new 9.5-10 condition. 150 -170 MHz. With battery, antenna, leather case, and pocket charger. $100.00 each. 2 available.

GE PLS VHF 16 channel. These average an 8 - 8.5 condition. 150 -170 but I have programmed these in the ham band with no trouble. These have battery, antenna, and standard charger. $90.00 each
I have 7 of these.

GE PLS UHF 16 Channel. 8 to 8.5 also. 450 - 470 split but I can program these to the ham band. With battery, Antenna, and Charger.

$90.00 each. Have 3 of these.

GE MPS VHF Like new 12 channel. With new battery, new antenna, and a standard charger. $70.00

GE MPS VHF 12 channel. 8.5 condition. New antennas and NOS batteries

Standard charger. $65.00 each have 2.

GE MPS UHF 48 channel. 8 = 8.5 condition, These have NOS batteries

And have 4 banks of 12 channels. These can go to the ham band. I have been

Using one of these on my ham repeater and it works great. $75.00 each

I have 8 of these.

GE UHF MPS 8 channel with 8 different tones. 8 different tones can be

Selected for each different channel. Battery and antenna. $65.00

GE Monogram UHF 10 channel portables. 3 radios 2 new batteries and 1 good battery. With 1 dual slot charger. $200.00 all 3 radios.

GE Monogram VHF 10 channel portable. 157-179 split. ex CSX radio. I sold this radio a year ago but have taken it on trade. Condition 8 with belt clip and charger. I had this radio run for stolen from CSX by a local CSX Special Agent when I first bought these in a lot and was told that it had been sold at salvage. Perfect for a RR Museum or shortline on a budget. This could also be programmed for marine frequencies.

Like new tall Battery. $100.00

GE Mobiles

GE Phoenix SX VHF 128 channel scan. With Mic, Has all 8 proms. $100.00

GE MVS VHF 128 channel scan. 136.-153. Split but I have programmed these as 150. - 174 split and they work fine. This radio has 8 modes of 16 channels. Includes Mic but no power cord or bracket. $175.00

GE MVS 800 conventional 2 channel. With mic tested OK $75.00

GE MLS UHF 8 channel. With Mic, power cord and hang up box. MLSU240 450. - 470 Looks good. $125.00

GE Mastr exec II VHF 75-watt mobile complete with accessories. $60.00 each

GE Mastr exec II VHF Mobile extender (repeater like Pac rt) for Mastr II or Delta. $20.00 each

GE Mastr exec II VHF Mobile extender for GE Ranger (only Exec II that I have seen marked Ericsson) $65.00

.GE S550 head 16 channel looks good but not tested. $35.00

GE S700 head and complete Motorcycle cable set for Delta or Ranger. 16 channel model has short cable and some handle bar mounts. Mic

included but no speaker. Not tested yet since I just got it in. $50.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit charges your battery and turns your portable into a mobile radio. (Convert a Com) With mic, speaker, and power cable. $100.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice Guard, MPS, and Ranger. Printer is working Has manual for the programmer and the computer. Has Phoenix cable and Voice guard cable. All in the original GE case tested and working. $850.00

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $30.00. I have seen programming cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5. $4.00 each. I have a large amount of 203.5,186.2, 179.9, 173.8, and 162.2. If you buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50 each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820 heads. And all other heads $40.00 each

GE delta Cables that have been cut to 2 foot long. Radio end with

power cables $5.00 each only have a few of these

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

Power plugs for S500, S550, C500 etc heads. Good pulls $5.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a rapid rack charger with a DB 15 cable and uses a MPD body to attach a battery to. Has LED readout in display area of MPD body to tell discharge rate. Another rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card and power supply / speaker. $300.00

Other Radios and Accessories

Motorola Saber III VHF 146-174 split. 120 channel Alpha-Numeric display with secure - net module. (no out of country sales) des I think. I have been using this all week and talking on the ham band to test this radio. Battery has lasted all week during drive time so it seems good. With rapid charger and big battery. $475.00 or trade for a VHF MRK II

Icom 3200 a Dual band ham radio. Has box and manual but no mounting bracket. Has tone squelch board installed. $200.00

Icom IC 24-at Dual band Portable. In good shape, Display has no scratches and only 1 small patch of the paint is peeled off of the back of this radio. With manual and wall charger. $165.00

ADI AT 201. 2 meter portable nice like new and in the box with the manual. Has 5 watt battery and wall charger. $90.00

Yaesu ft 2400 2 meter mobile. Has Mounting Bracket and manual. Nice 2 meter Radio. $125.00

Radio Shack HTX 212 2 meter Mobile. 30 memories, Scan. Works great.

This was in my van before I added another MVS so I know it works.

$100.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery charger but I will split up the pair if someone wants 1 radio only. 6 channels programmed for 10 meter ham band on 2 repeater pair and 4 simplex frequencies. 2 radios and 1 charger $185.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by Midland. $75.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$75.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition and charger. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of crystals for each radio. Also have a working battery and charger for each. I have 4 of these. $50.00 all

Uniden SMS 825 TS, 800 MHz Dash mount radio. $55.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work with the sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know "Motorola" They are good people and I will pass along any trades you may wish to make.

MOTOROLA X9000 VHF 50 watts, alphanumeric head, Siren complete. $425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

Motorola HT1000 UHF Intrinsically safe Re-cased looks new. 16 channel scan with charger. $425.00

Motorola P200 UHF high power. 6 channel. $150.00

EF Johnson Challenger UHF 80 watt trunk mount, 99 channel Alpha-Numeric head. $225.00

Want List not FS
Extra parts for suitcase programmers. Data modules, Printers, cables, proms, Anything you have extra. MPA or MPD portables what do you have and what do you want for them? Johnson scorpion program cable.

Hello-
For Sale, prefer pick-up near Houston, Texas area :
IC-451A with original box, manual and mic. In very good cond. Has some upgrades such as a transistor switch neatly installed for keying an external amp, plus an external coaxial relay which is doing the TX-RX changeover and feeding thru a GaASFET preamp. All neatly done and easily removable. Quality relay and preamp. This rig really hears well. 375.00 for all.
TS-700A in good condition with manual copy and hand mic. Has ARR GaASFET preamp neatly installed. Really hears well. 325.00 for all. Also have some spare modules { all of the internals from a nice TS-700A that the front panel was destoyed in car wreck}, boards and a complete parts unit TS-700A { I say parts unit, my intentions were to repair it} will sell all for 125.00
Several KLM 144-16-LBX antennas { used} and two of the M2 18XXX conversion kits { NIB}.
Trylon T-600-64 never used, assembled with extra heavy rotor, bearing plates { 3 each}
7213 { RCA 1500 watt UHF tetrode} cavities and tubes, several styles, for 144, 220 mhz.
Contact Byron WA5THJ at 281-331-1899. Thank you.

900. Hallicrafters SX-88 Bezels FS

Newsgroup: rec.radio.amateur.swap
Date: 2002-06-08 13:22:13 UTC
From: Gary Harmon <gharmon@idworld.net>
Message-ID: <9ynM8.14292$vt6.1688519777@newssvr11.news.prodigy.com>
Source record: 3253

New replacement bezels for the rarest of the rare Hallicrafters SX-88 receiver are now available. Perhaps twenty percent of the known SX-88s have the warped bezel syndrome. There is no way to repair a bad bezel and this newly manufactured bezel solves the problem. They are machined out a solid piece of aircraft aluminum on a CNC machine. All the threaded holes, retaining tabs, openings, tapered faces, and openings are true to the original. They are finished in a wrinkled black satin powdered finish. NOTE: I am not making the bezels. I'm just acting as a facilitator. Bezel will be securely packed and shipped from California. A certain number of bezels must be sold before the second run of 20 can be authorized. Money orders and Pay Pal will get priority shipping when the bezels are available. Personal checks will clear before shipping. If a sufficient number is not ordered then payments will be returned. For questions or pictures contact me directly at gharmon@idworld.net. Seller will pay CONUS shipping. Out of country buyers will pay the difference.

Thanks and 73,
==========

I am selling an AMD K6-2 500mhz CPU and fan. I bought these recently on the internet because I had a problem with my old computer. After buying them, I decided to just upgrade completely, so now I don't need them. I am selling them for $40 or willing to trade for ham radio gear. Please email me directly if interested.

Message-ID: <YL0N8.19734$fT5.5466003@typhoon.ne.ipsvc.net>
Source record: 3259

I know this isn't really the correct newsgroup to be asking this, but:

"provide relief to amateurs prevented by private deed covenants, conditions
and restrictions--CC&Rs--from installing outdoor antennas."

What exactly is a CC&R? I don't own a house, or any land for that matter,
so I imagine this wouldn't apply to me.
If I did own a house, what benefit would I get from this bill? Can anyone
shed some light for me?

Thanks
KB1EJW

CC&R are covenants and restricts on what you may do at or with
your house. Most new home subdivisions now impose CC&R's on
homebuyers. You agree to them when you sign the papers to buy
the house. Most of the CC&R's are pretty straight forward.
They limit how many animals, parking of RV's and boats, Color
scheme (must be similar to original or aproval of Homeowners
association to make change). One of the more common
restrictions that have been placed in CC&R is a ban on outside
antenna's. This has been decided by the courts to mean all
types of antenna's i.e. TV, CB. Amateur Radio etc. Recently
the 18" TV dish antennas were exempted by a court decision I
believe. Basically the developer can put anything in a CC&R
that he wants. The idea to to make the homes more marketable.
However some of the terms of CC&R's have recently been struck
down by court decisions.

I hope this helps a bit.

It's where YOUR neighbors tell you what you can and can not do with your property. If the grass is over 2" high you must mow or they mow and send you the bill. You must cable or rabbit ears to watch YOUR tv in YOUR home. NO antennas of any kind permitted. That will be the day when someone tells me what "I" can do with my property.

While not being sure, I believe that this is contrary to Federal law.
The FCC foresaw a problem where Cable Companies could mandate through
CC&R's a monopoly. Because of this, the FCC put forth documentation
allowing you to erect antennae for television reception. This also
allowed for the numerous mini satellite dishes to be put up.

Unfortunately this does nothing to address Amateur radio issues .

No, it is where YOU signed a binding legal contract about how you would use the property you were buying -- and now you want to go back on your word like a lying two-faced slime -- but since your neighbors who relied on the false assumption you were an honest person don't like you being two-faced scum, you have to try to con congress into passing a law specifically allowing you to ignore the contract you signed no matter what impact it may have on others who made the mistake of believing your word.

I still have a very clean, very nice, working to spec Collins 30L-1 amplifier. I'm selling this unit for the widow of a friend who put very little time on the 4 811As. I may have a set of brand new or nearly new 572Bs. This is the Rolls Royce of radio equipment. Even the Air Force used S-Line equipment! Better then Mil-Spec!

The unit is a desktop amp with built in power supply that can be set up for 117AC (as it is now) or can be wired easily for 220VAC.

Will work on any ham band and can be driven with 60 watts to about 500 to 550 watts output on all bands from 80 to 10 meters.

It can be used with the Collins S-Line, the KWM-2 or with any modern rig with a relay on the keying circuit. (Ameriton and MFJ sell one ready to go)

Asking $600 plus shipping from 22310 (Alexandria, VA.)

Offering a like new, Yaesu FT-840 160-10M transceiver, with FM-747 option installed. This is a great backup rig or "right-sized" mobile rig. New manufacture, with 1Jxxxxxx serial number (Aug '01) date. Extremely little use, but all functions verified to be 100%. Original plans were to use in SUV as a 'park and play' station, but plans changed. Asking $400 + shipping. Terms: USPS MO or Cashier's Check. I also accept PayPal. Email lstolz@columbus.rr.com or n8aj@arrl.net.

Lynn, N8AJ

I imagine they are getting few and far between, but in one of the last 2M rigs they made, FM2030
had an optional touch tone pad microphone.
Does anyone have one?
I need to find out if the PTT pins are fully open when unkeyed, or some resistance.
I know its a long shot, but got my fingers crossed someone still has one around.
Regards...Dave

***** Power Supplies, Inverter, UPS *****

Open (L-shaped) frame linear power supplies 6" x 3" x 2" with attached
2 wire polarized line cord, 120V 60 Hz AC input; internal 1A line
fuse. There is a relay that switches the 3 voltage outputs. They
have a six-pin SIL output connector and come with a matching cable to
pigtails. The wires are: GND, +5V switched, -5V switched, relay
(gnd to operate), +12 switched, and +12 constant (for the relay).
Just guessing from the 780X series regulators, I would think that the
+12 and +5 outputs are good for about an amp. and the -5, which
regulator is unheatsinked, perhaps a couple hundred mA.
$12 ea. (5 units available)

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense
terminals, screwdriver voltage adjust, 5"x3"x7" -- used $25

Power General

*** MISCELLANEOUS ***

NOS fan that fits some Japanese radio...marked: 57 10.01 100V
The wires from the motor are about 4' long and are terminated in a 2
pin JST connector.
The impeller has 8 blades and is 7 cm in diameter.
It is mounted to a U shaped metal frame with four mounting holes
spaced 5cm by 9cm
$10

Filter Cap Assemblies: Eight CDE 80 uF/450V axial electrolytics
mounted to a 5"x8" fiberglass PCB -- these are currently wired sort of
series-parallel but, could be reconfigured by cutting & jumping a
couple PC traces. $20 ea. (2 available)

Large (uncased) display unit. 256, T-1 3/4, red LED's arranged in a
16 x 16 pattern that is about 5" square. There is a 6" x 6" mother
board plus 16 daughter boards holding the LED's. The LED's are
driven by latches so any/all of them can be lit. There is a 14 pin
DIP interface connector -- pin out provided. $75. May be seen at:
http://photos.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Display.jpg&.s
rc=ph&.view=t&.hires=t

DPDT Crystal Can relays with 600ohm 28V coils and 2A 28V contacts
made by Leach, Datron and other manufacturers. They have small solder
hook pins for connection and a pair of ears on the sides to mount the
relay. These are old but, as they are hermetically sealed, they
should be like new inside! NOS $3 ea (a dozen or so available)

Carter Radio 500K ohm rheostat with 2" diameter skirted knob,
calibrated 0-100 over 270 degrees -- $15

ICOM BC-25U wall warts 12V 50mA -- $5ea (2 available)

Motorola TLN6824A Vibrasender -- Freq. 1B, 107.2 Hz $2

Motorola TLN1361A Timeout Timer $3

Beckman model 901 Duodial for a 10 turn potentiometer NIB -- $15

National Type A Velvet Vernier dials-style 2 (marked 0-100 over 180
degrees) 3-3/8" or 4" diameter -- $20 ea

200W (or so -- 10" long) 1.5K ohm 10 tap (every 150 ohms) power
resistors -- used good, $10 ea (2 available)

Dale 1.5K, 225 Watt power resistors used -- $5 ea (3 available)

Ohmite 2K, 225 Watt power resistors used w/mounting clips -- $5 ea (10 available)

Ohmite 3K, 225 Watt power resistors used w/mounting clips -- $5 ea (8 available)

Four 37.5K 78W power resistors used w/mounting clips -- $12 all.

Powerstat
10B 120V 2.25 A variable transformer (variac) used, with dial & knob -- $25
10B 120V 2.25 A variable transformer (variac) NOS, with dial & knob -- $30

GE 9T91A1 120V 2.5 A variable transformer (variac) used, no dial nor knob -- $25

Microtran T1104 600ohm-600ohm, +7dBm, audio transformers, pc mount, NOS -- $1ea

Triad HS-331 Choke 4Hy 40mA DC 375 Ohms NIB -- $10

UTC CG-131 Interstage Transformer 15K-135K, +28dBm max. used -- $15

10V 10A Filament transformer -- Vertical enclosed style 3.5"x3"x4" hi, used -- $25

Vibrafork 4 channel resonant reed relay. A real relic. NOS! $10

All of the above plus shipping, if necessary, naturally.

MOTOROLA VHF HT750 - BRAND NEW!

You are bidding on one, NEW, Motorola VHF HT-750 portable radio. Model # AAH25KDC9AA3AN, 5 watt, 16 channels, 136 - 174 MHz with a brand new battery with a 2002 date code. The radio has never even been programmed. It is new out of the box. Sadly, the box got tossed out... but I promise you, it is brand new. Included in this auction is a brand new speaker mic, HMN9052B. A charger is not included in this auction. This radio lists for $800 new, -$20 to delete the charger option. The mic lists for $66. Winning bidder to pay actual shipping cost (UPS Ground or better). I will ship to the Continental US only. If you use the BUY IT NOW feature, I will ship it UPS Ground for FREE. For an additional, $35 I will program the radio for you to your specifications. (Buyer must provide all frequency and setting preferences.) If you have any questions, please do not hesitate to email me.

Thanks for looking!!!

939. FOR SALE: HALLICRAFTERS HA-1 "T.O. KEYER"

Newsgroup: rec.radio.amateur.swap
Date: 2002-06-15 13:31:05 UTC
From: Sidevalve <Sabbatai_zvi@hotmail.com>
Message-ID: <3cgmgu0r0amcg825c7hfca8v9fiv5ddb5n@4ax.com>
Source record: 3292
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.swap,rec.radio.amateur.swap

FOR SALE:

Hallicrafters TO Keyer in excellent condition.
Excellent for cathode-keying older rigs, or for homebrew stations.

I would say that this is a 9.5 out of 10. All original knobs. Cabinet
is immaculate. Interior looks like new above and below chassis.

Operates on 105 to 125V AC. 10-65 wpm. Adjustable sidetone and
internal speaker for monitoring your sending. Uses six tubes.

Pictures available on request.

The Hallicrafters HA-1 "TO Keyer" - will work just great with those
older rigs that need direct cathode keying. Most of today's solid
state keyers will not do the job.

The Hallicrafters TO-Keyer was the first commerial digital keyer to be
widely marked. The TO has self-completing dits and dahs, adjustable
weighting and speed controls and a monitor speaker.
The TO-Keyer was manufactured in the early 1960s.

This one is in mint condition and comes with a copy of the manual.
Will sell for $85.00 plus shipping

940. WTT: need Motorola MTS2000, will trade with 2 Motorola Saber III

From: martin <oz6agj@ofir.dk>
Message-ID: <3d0b4746$0$71656$edfadb0f@dspool01.news.tele.dk>
Source record: 3293

If you have a MTS2000 VHF model 3.. I will gladly trade my 2 saberIII :

1 UHF, 9+/10, rx/tx perfect. I think its a wide band UHF (but has red dot antenna)

1 VHF, 9,5+/10 rx/tx perfect.

I have a charger for them, 2 batteries,stubby antenna for the uhf, normal antenna for the vhf, and 1 speaker/mic.

I tried to sell/swap in an earlier post, but lack of respons now means that I will trade the 2 sabers for a MTS 2000... There is nothing wrong with these radioes, Im just getting desperate

I have no RIB, so I cant read the radioes. That means that I dont have much info on these radioes. But you can of course mail me some questions and I will try my best to answar them..

Best regards

Date: 2002-06-16 12:56:26 UTC
From: Apostolos Bourousis <mak@compulink.gr>
Message-ID: <aei1va$1tk2$1@ulysses.noc.ntua.gr>
Source record: 3295

http://cgi.ebay.co.uk/ws/eBayISAPI.dll?ViewItem&item=1360490426&ssPageName=ADME:B:LC:UK:1

Transmitter RT-3. Tunes 3-22 MC, crystal controlled, accepts crystals with 3/4" pin-spacing (i.e. FT-243), or 1" pin-spacing. Requires 450 volts DC, and 6.3 volts AC or DC power.

The RT-3 could be considered the 'flagship' of cold-war U.S. clandestine transmitters. It's development started in 1948; and it was used by the Agency for 12-15 years, and by the Army for several additional years. The RT-3 was valued long afterward for being functional and reliable.

Weight 9 lbs

Dimensions 8-5/8" X 5-1/2" X 5-7/16"

Tubes 6AC7 oscillator 2E26 final

Frequency Bands 3-5.5, 6-9, 10-16,17-22 MC
Pwr Out 3-15 Mhz 12-15 W 15-22 Mhz 10-12 W

I have this Transmitter in my collection but i don't have a way to test it . The unit require 450 VDC and 6,3 VDC. Inside is like Brand New and seems never used.

I found this unit in a local surplus store and i think this is the ultimate QRP Transmitter or a must for any Spy items Collector.

Please Visit http://www.qsl.net/sv1edy/rt/rt.htm
for more info about this radio and more photos and also please contact me direct on my email mak@compulink.gr

I will send this transmitter in any country and i be glad to reply in any questions about it .

I accept payment via PAYPAL or cash inside registered letter .
Both ways are OK for me and i be glad to sell this radio to any friend who may need it .
As i say i don't have a way to test it but looks new.
Please see photos and if you wish ask me for any more info.

I think for an experienced QRP constructor the power supply for 450 V and 6,3 Volt is something that need about 1 hour of work and then will have the ultimate rig !.

I have a 100% positive feedback and i am also Radio Amateur . My call is SV1EDY and my home page is http://www.qsl.net/sv1edy/

Please Visit for more infos .

Also please Note that inside the box of transmitter is the Schematic so all will be easy !.

I leave in Athens Greece and i post in Ebay UK because i have here my account from the Early Ebay days.

The Greek post offices have very good and reliable services and if your country accept Valeur Letters i can send it also Valeur packet and so super extra safe !

Best 73s
Apostolos

946. FS: Alinco DJ-195T, SWR Meter, Antenna Package!

Newsgroup: rec.radio.amateur.swap
Date: 2002-06-18 14:46:30 UTC
From: Nobody <Nobody@nowhere.com>
Message-ID: <Xns923165E7E439BNobodynowherecom@209.25.157.130>
Source record: 3299

I am selling the following package of equipment on Ebay. This is a wonderful package to give to a new ham. Please see the item description at:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1360996178

From the Description:

Alinco DJ-195T Handheld 2Meter Transceiver, 5watts
MFJ Black Magnet Mount 2M/440 Antenna w/15 feet coax
MFJ 812B SWR Analyzer / Field Strength Meter for 144mhz and 220mhz
Radio Shack Handheld clip-on Speaker-MIC
Black External Speaker (2inch) with mini-plug
Wall-Charger AND RF Filtered Car-Charger for Alinco DJ-195T
Jumper Cable for SWR Meter and radio
259 to BNC adapter for antenna
Manuals for Radio and SWR Meter.

* The Alinco DJ-195T has been modified for MARS/CAP operation outside of the 2M 144mhz band. This modification is completely reversible and is quite easy. The radio is missing the little rubber cover that goes over the power plug hole. It broke off at some point. This in no way affects operation however, in fact, I didn't like the rubber thing to begin with. It never fit right.

954. FA: ANTENEX 800 Low Profile Phantom Antenna - NIB - No Reserve - BIN - Motorola Mount

Newsgroup: rec.radio.amateur.swap
Date: 2002-06-19 14:15:13 UTC
From: werdnuts@sbcglobal.net
Message-ID: <d49cf50c.0206190615.38a1ca53@posting.google.com>
Source record: 3207

You are bidding on ONE, NEW, ANTENEX brand, Phantom model, 3db gain, 806-866 MHz, "Transit" style, low visibility, 800 MHz Antenna. Antenex part number TRA8063. It is NEW in the bag. This antenna mounts to a standard MOTOROLA style mount (NOT INCLUDED IN THIS AUCTION). I have been using this style antenna for my personal equipment and I am very happy with the results. Great for low-profile or unmarked vehicles! Buyer to pay fixed shipping amount of $6.

Thanks for Looking!!!!

I have a DJ-120T/E HT its dead. Comes with battery and instruction manual. I do not have a antenna or charger. The retainer that holds the nicad on the radio is also broken. Otherwise the radio is in nice clean shape. It does have PL and there is some wear around the dip switches on the back.

$30 + $5 shipping CONUS

GE Portables

GE MPA VHF Scan 136 - 150.8 split 192 channels nice 9.0
Condition. With battery and charger. I have this programmed for
Ham and up to 152 MHz before it will not lock on frequency.
$225.00

GE MPA VHF Scan 157 - 174 split. 192 channels. Nice radio 8.5
condition with battery and standard charger. I have it programmed
down to 154 MHz with no trouble but will go no lower. $225.00

GE MPA UHF Scan 440 - 470 192 channel scan. Radio works great. A
little paint wear on the edges but I have seen worse. With charger
and battery. $225.00

GE MPD select model 470.- 488 MHz. 48 channel Alpha-Numeric display.
With battery and standard charger. 7-7.5 $85.00

GE MPD scan VHF 150.8 174. 48 channel alphanumeric display. These
look good and come with a battery and standard charger. $100.00 each.

MPD Voice Guard VHF system model with full keypad. 48 channel alpha
display. With battery and standard charger. $115.00

GE KPC 300 VHF 16 channel scan. Nice radio with battery and
antenna. No charger with this one. $100.00

GE KPC 400 UHF 16 channel scan. Full DTMF pad on this radio.
This one has a charger. $195.00

GE PCS VHF 2 channel. Like new 9.5-10 condition. 150 -170 MHz.
With battery, antenna, leather case, and pocket charger. $100.00
each. 2 available.

SALE!!
GE PLS VHF 16 channel. These average an 8 - 8.5 condition. 150 -170
but I have programmed these in the ham band with no trouble. These
have battery, antenna, and standard charger. $75.00 each Programming
Included. I have 7 of these.

Sale!!
GE PLS UHF 16 Channel. 8 to 8.5 also. 450 - 470 split but I can program these to the ham band. With battery, Antenna, and Charger. $90.00 each. Programming included. Have 3 of these.

GE MPS VHF Like new 12 channel. With new battery, new antenna, and a standard charger. $70.00

GE MPS VHF 12 channel. 8.5 condition. New antennas and NOS batteries Standard charger. $60.00 each have 2.

GE MPS UHF 48 channel. 8 = 8.5 condition, These have NOS batteries And have 4 banks of 12 channels. These can go to the ham band. I have been Using one of these on my ham repeater and it works great. $70.00 each I have 8 of these.

GE UHF MPS 8 channel with 8 different tones. 8 different tones can be Selected for each different channel. Battery and antenna. $60.00

GE Monogram UHF 10 channel portables. 3 radios 2 new batteries and 1 good battery. With 1 dual slot charger. $200.00 all 3 radios.

GE Monogram VHF 10 channel portable. 157-179 split. ex CSX radio. I sold this radio a year ago but have taken it on trade. Condition 8 with belt clip and charger. I had this radio run for stolen from CSX by a local CSX Special Agent when I first bought these in a lot and was told that it had been sold at salvage. Perfect for a RR Museum or shortline on a budget. This could also be programmed for marine frequencies. Like new tall Battery. $100.00

GE Mobiles

GE Phoenix SX VHF 128 channel scan. With Mic, Has all 8 proms. $100.00

GE MVS 800 conventional 2 channel. With mic tested OK $75.00

GE MLS UHF 8 channel. With Mic, power cord and hang up box. MLSU240 450. - 470 Looks good. $125.00

GE Mastr exec II VHF 75-watt mobile complete with accessories. $60.00 each

GE Mastr exec II VHF Mobile extender (repeater like Pac rt) for Mastr II or Delta. $20.00 each

GE Mastr exec II VHF Mobile extender for GE Ranger (only Exec II that I have seen marked Ericsson) $65.00

GE S990 head 128 channel scan. Just in not tested. $70.00

GE S550 head 16 channel looks good but not tested. $35.00

GE S700 head and complete Motorcycle cable set for Delta or Ranger. 16 channel model has short cable and some handle bar mounts. Mic included but no speaker. Not tested yet since I just got it in.

$50.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit charges your battery and turns your portable into a mobile radio. (Convert a Com) With mic, speaker, and power cable. $100.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice Guard, MPS, and Ranger. Printer is working Has manual for the programmer and the computer. Has Phoenix cable and Voice guard cable. All in the original GE case tested and working. $850.00

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $20.00. I have seen programming cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5. $4.00 each. I have a large amount of 203.5,186.2, 179.9, 173.8, and 162.2. If you buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50 each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820 heads. And all other heads $40.00 each

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

Power plugs for S500, S550, C500 etc heads. Good pulls $5.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a rapid rack charger with a DB 15 cable and uses a MPD body to attach a battery to. Has LED readout in display area of MPD body to tell discharge rate. Another rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card and power supply / speaker. $300.00

Other Radios and Accessories

ADI AT 201. 2 meter portable nice like new and in the box with the manual. Has 5 watt battery and wall charger. $90.00

Yaesu ft 2400 2 meter mobile. Has Mounting Bracket and manual. Nice 2 meter Radio. $125.00

Radio Shack HTX 212 2 meter Mobile. 30 memories, Scan. Works great. This was in my van before I added another MVS so I know it works. $100.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery charger but I will split up the pair if someone wants 1 radio only. 6 channels programmed for 10 meter ham band on 2 repeater pair and 4 simplex frequencies. 2 radios and 1 charger $185.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by Midland. $75.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$75.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition and charger. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of crystals for each radio. Also have a working battery and charger for each. I have 4 of these. $50.00 all

Uniden SMS 825 TS, 800 MHz Dash mount radio. $55.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work with the sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know "Motorola" They are good people and I will pass along any trades you may wish to make.

MOTOROLA X9000 VHF 50 watts, alphanumeric head, Siren complete. $425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

Hi there,

I've got a Kenwood 900 Mhz Mobile Radio for sale. This unit does Conventional and LTR, the model is the TK-931 or 941 (I cant remember at the time of this posting). I'll add a follow up from home with the exact model number. It is a true 900 Mhz rig, not an 800 unit... No mods have been done, this is a bare and stock Kenwood 900 Mhz Radio.

I bought it used, had it on and tested that it works as expected (nice).

Like all the other Kenwood TK series radios, this one has mucho capacity and simply programs through the mic plug. If you buy my radio, I'll tell you a free ftp site for the software and I'll provide a picture of the easy to build programing interface. (uses a common serial port).

Nice LCD display... ready to reprogram and go... I'm asking $90 or best practical offer. Buyer pays actual shipping (and inssurance as desired).

Cut the NOSPAMPLEASE out of my Email header to reply or do the same with the one listed below.

I can field questions about the radio.

cheers and thanks

skipp@pilotNOSPAMPLEASE.ucdavis.edu

(take the NOSPAMPLEASE out to reply.)

966. WTB: KENWOOD TS-940SAT

Hi there,
-
In regards to the Kenwood 900 Mhz radio I listed for sale. I
have confirmed the model number as the TK-941. I have powered
it up and confirmed the software can read and loaded.
-
Please let me know asap if you are interested, I've had six
Emails today asking for the model number. This is a working
bare radio, software not included.
-
My Email address is also my Ebay ID, if you need a reference...
OK, thanks for asking... first come, first serve.
-
cheers
skipp

GE S700 head and complete Motorcycle cable set for Delta or Ranger.

16 channel model has short cable and some handle bar mounts. Mic

included but no speaker. Not tested yet since I just got it in.

$50.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit

charges your battery and turns your portable into a mobile radio.

(Convert a Com) With mic, speaker, and power cable. $100.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice

Guard, MPS, and Ranger. Printer is working Has manual for the

programmer and the computer. Has Phoenix cable and Voice guard cable.

All in the original GE case tested and working. $850.00

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $20.00. I have seen programming cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5. $4.00 each. I have a large amount of 203.5,186.2, 179.9, 173.8, and 162.2. If you buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50 each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820 heads. And all other heads $40.00 each

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

Power plugs for S500, S550, C500 etc heads. Good pulls $5.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a rapid rack charger with a DB 15 cable and uses a MPD body to attach a battery to. Has LED readout in display area of MPD body to tell discharge rate. Another rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card and power supply / speaker. $300.00

Other Radios and Accessories

Motorola Saber III Secure VHF 146 split 120 channel radio. Alphanumeric

Display. Has Battery Smart charger and speaker mic. I have been using this on the VHF ham band. Has a new case that was installed at the Motorola Rockford, IL Depot

So it also has a new model sticker that they put on as well. Nice 9.5 or better radio.

$475.00

ADI AT 201. 2 meter portable nice like new and in the box with the

manual. Has 5 watt battery and wall charger. $90.00

Yaesu ft 2400 2 meter mobile. Has Mounting Bracket and manual. Nice

2 meter Radio. $125.00

Radio Shack HTX 212 2 meter Mobile. 30 memories, Scan. Works great.

This was in my van before I added another MVS so I know it works.

$100.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery

charger but I will split up the pair if someone wants 1 radio only. 6

channels programmed for 10 meter ham band on 2 repeater pair and 4

simplex frequencies. 2 radios and 1 charger $185.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by

Midland. $75.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$75.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition

and charger. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of

crystals for each radio. Also have a working battery and charger for

each. I have 4 of these. $50.00 all

Uniden SMS 825 TS, 800 MHz Dash mount radio. $55.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work

with the sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know

"Motorola" They are good people and I will pass along any trades you may wish to make.

MOTOROLA X9000 VHF 50 watts, alphanumeric head, Siren complete. $425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

Motorola HT1000 UHF Intrinsically safe Re-cased looks new. 16 channel scan with charger. $425.00

Motorola P200 UHF high power. 6 channel. $150.00

EF Johnson Challenger UHF 80 watt trunk mount, 99 channel Alpha-Numeric head. $225.00

Want List not FS

Extra parts for GE suitcase programmers Data modules, Printers, cables, proms, Anything you have extra. MPA or MPD portables what do you have and what do you want for them? Johnson scorpion program cable.

I recently acquired a nice HW-16 and would like to find the matching HG-10 or HG-10B VFO. Will pay cash or will trade my VF-1.

The VF-1 is very nice cosmetically, some discoloration on the wheel that displays frequencies, but otherwise good looking with original knobs. One modification to allow for either cathode or grid-block keying, presently set for grid-block but converts back to cathode by moving a jumper wire (five minute job). If you hate mods and want a 100% original inside, I have saved all the parts. Comes with a photocopy manual and documentation on the mods.

You can find my real e-mail on QRZ under call sign K1ZC. Hate to post it here because of the spam-bots.

984. FA: MOTOROLA VHF HT750 & Spk Mic - BRAND NEW!

Newsgroup: rec.radio.amateur.swap
Date: 2002-07-01 02:03:20 UTC
From: werdnuts@sbcglobal.net
Message-ID: <d49cf50c.0206301803.6ac4ffaf@posting.google.com>
Source record: 3237

MOTOROLA VHF HT750 - BRAND NEW!

You are bidding on one, NEW, Motorola VHF HT-750 portable radio. Model # AAH25KDC9AA3AN, 5 watt, 16 channels, 136 - 174 MHz with a brand new battery with a 2002 date code. The radio has never even been programmed. It is new out of the box. Sadly, the box got tossed out... but I promise you, it is brand new. Included in this auction is a brand new speaker mic, HMN9052B. A charger is not included in this auction. This radio lists for $800 new, -$20 to delete the charger option. The mic lists for $66. Winning bidder to pay actual shipping cost (UPS Ground or better). I will ship to the Continental US only. If you use the BUY IT NOW feature, I will ship it UPS Ground for FREE. For an additional, $35 I will program the radio for you to your specifications. (Buyer must provide all frequency and setting preferences.) If you have any questions, please do not hesitate to email me.

Thanks for Looking!!!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1744329172

985. FA: ANTENEX UHF Low Profile Phantom Antenna - NIB - No Reserve

Newsgroup: rec.radio.amateur.swap
Date: 2002-07-01 02:05:28 UTC
From: werdnuts@sbcglobal.net
Message-ID: <d49cf50c.0206301805.4284a8a@posting.google.com>
Source record: 3238

ONE, NEW, ANTENEX brand, Phantom model, 3db gain, 450-470 MHz, "Transit" style, UHF Antenna. Antenex part number TRA4503. It is NEW in the bag. This antenna mounts to a standard MOTOROLA style mount (NOT INCLUDED IN THIS AUCTION). I have been using this style antenna for my personal equipment and I am very happy with the results. Great for low-profile or unmarked vehicles! Buyer to pay fixed shipping amount of $6. I prefer PayPal, but will accept Billpoint, Money Orders, and Cashiers Checks. NO Personal Checks. Please feel free to e-mail me with any questions. Winner must contact me within 24 hours of auction close. Good luck and thanks for looking!

Howdy,

2 auctions closing today for MCX-1000's One UHF, one VHF.

VHF remote mountable
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1744176645

UHF (comes w/ head)
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1362439528

Because some of you asked, you do not need to worry about "converting" these to do conventional. Yes they are capable of encryption, but were used conventional. They could be used for digital encryption, but the module would be needed.

I may have mics for these, email and ask if you are the winner.

Thanks,

Adam / kc7ljq

Excellent condition and in perfect working order. Here's you chance to own one. Comes complete with the manual, optional keypad and whip aerial/preamp. FM and AM sync as standard. Email me for jpegs. Price including shipping from the UK to United States is ï¿½350 pounds sterling, which if you've a copy of Ostermanns Shortwave receivers past and present, you see that after coverting to dollar that falls below the bottom range for a used model (even with the postage !!).

Thanks for looking,
73's

Considering that this radios sells for less than $200 USD new, you
better rethink your price if you want it to go quick.

Durham Radio's sale price is $395 Canadian funds and when you add taxes to their price, it comes to $454.25, not factoring shipping, I'm asking $300 Canadian funds, private sale, so the buyer saves $154.25 if they were to purchase one from Durham Radio (http://www.durhamradio.com/bc895.htm), I really only want to sell to someone in Ontario to save both the buyer and the seller shipping hassles across the border etc. I think my price is fair, but I appreciate the input.

Jason

Kenwood model PS-50 station accessory DC power supply that is used with many of the popular Kenwood ham transceivers.This one was used with my TS440SAT. It has the extra DC output terminal strip on the rear to power other station accessories, like a 2 meter rig....Fitted with the industry standard 6 pin molex power connector so it will work with nearly all the rigs on the market today. Output is 13.8 VDC at 20 amps. Complete with ac power cord. $249.00 CDN / $160 USD

Hello All-
Here is a tip for someone looking for a RE 312B-4. There is one on Ebay
that is hidden within a Drake package. It is Ebay # 1362320358 " TR4-C Drake
Station". It ends in 2 hours 20 min.
If someone commits to it I would like to buy the Drake stuff out of the
lot.
Thank you, Byron.

I have a few of these and I'm looking to dump them,

-GE Master Exec II 800Mhz
-Comb # is ST55AAS92B

Let me know if you need these for repeaters or whatever. Make an offer. I might just sell the icoms if that's what you need as well.

I will also be at the Tuthill (Flagstaff, AZ) Hamfest July 27th as well.

Thanks,

Please if you have questions or want to make a trade contact me off

list at my e-mail address. gundoc@insightbb.com Some of these

lists are not swap lists and only tolerate my post because it is only

once a week. To the group owners thank you for letting me continue

to post to the group.

Dean

I will be at the Indy Hamfest Saturday July 6 so if you are going and

Want me to bring anything in specific e-mail me and I will try to bring

It along.

GE Portables

GE MPA VHF Scan 136 - 150.8 split 192 channels nice 9.0

Condition. With battery and charger. I have this programmed for

Ham and up to 152 MHz before it will not lock on frequency.

$225.00

GE MPA VHF Scan 157 - 174 split. 192 channels. Nice radio 8.5

condition with battery and standard charger. I have it programmed

down to 154 MHz with no trouble but will go no lower. $225.00

GE MPD select model 470.- 488 MHz. 48 channel Alpha-Numeric display.

With battery and standard charger. 7-7.5 $85.00

GE MPD scan VHF 150.8 174. 48 channel alphanumeric display. These

look good and come with a battery and standard charger. $100.00 each.

MPD Voice Guard VHF system model with full keypad. 48 channel alpha

display. With battery and standard charger. $115.00

GE KPC 300 VHF 16 channel scan. Nice radio with battery and

antenna. No charger with this one. $100.00

GE KPC 400 UHF 16 channel scan. Full DTMF pad on this radio.

This one has a charger. $185.00

GE PCS VHF 2 channel. Like new 9.5-10 condition. 150 -170 MHz.

With battery, antenna, leather case, and pocket charger. $100.00

each. 2 available.

GE PLS VHF 16 channel. These average an 8 - 8.5 condition. 150 -170

but I have programmed these in the ham band with no trouble. These

have battery, antenna, and standard charger. $75.00 each

GE PLS UHF 16 Channel. 8 to 8.5 also. 450 - 470 split but I can

program these to the ham band. With battery, Antenna, and Charger.

$85.00 each. Have 3 of these.

GE MPS VHF Like new 12 channel. With new battery, new antenna, and a

standard charger. $70.00

GE MPS VHF 12 channel. 8.5 condition. New antennas and NOS batteries

Standard charger. $60.00 each have 2.

SALE!

GE MPS UHF 48 channel. 8 = 8.5 condition, These have NOS batteries

And have 4 banks of 12 channels. These can go to the ham band. I

have been Using one of these on my ham repeater and it works great.

$60.00 each I have 8 of these. Programming on 12 channels included.

GE UHF MPS 8 channel with 8 different tones. 8 different tones can be

Selected for each different channel. Battery and antenna. $50.00

GE Monogram UHF 10 channel portables. 3 radios 2 new batteries and 1

good battery. With 1 dual slot charger. $200.00 all 3 radios.

GE Monogram VHF 10 channel portable. 157-179 split. ex CSX radio. I

sold this radio a year ago but have taken it on trade. Condition 8

with belt clip and charger. I had this radio run for stolen from CSX

by a local CSX Special Agent when I first bought these in a lot and

was told that it had been sold at salvage. Perfect for a RR Museum or

shortline on a budget. This could also be programmed for marine

frequencies. Like new tall Battery. $100.00

GE Mobiles

GE Phoenix SX VHF 128 channel scan. With Mic, Has all 8 proms.

$100.00

GE MVS 800 conventional 2 channel. Without mic tested OK $45.00

GE MLS UHF 8 channel. With Mic, power cord and hang up box. MLSU240

450. - 470 Looks good. $125.00

GE Mastr II UHF 75 watt with preamp. No Icoms drawer only.

MC65KKG88B $90.00 each only 2 left

GE Mastr II Lowband 42-50 slit 110 watt. MC74KCN33A

With 1 set of Icoms $45.00 each I have many.

GE Mastr Pro Low band 110 watt 42 50 split. MT74TCS33

With 2 sets of Icoms. $10,00 each. I have many.

GE Mastr Pro 110 watt lowband 42-50 split in a wall mount cabinet

With a power supply for a base. $35.00

GE Mastr exec II VHF 75-watt mobile complete with accessories. $60.00

each

GE Mastr exec II VHF Mobile extender (repeater like Pac rt) for Mastr

II or Delta. $20.00 each

GE Mastr exec II VHF Mobile extender for GE Ranger (only Exec II that

I have seen marked Ericsson) $65.00

GE S990 head 128 channel scan. Just in not tested. $60.00

GE S550 head 16 channel looks good but not tested. $35.00

GE S700 head and complete Motorcycle cable set for Delta or Ranger.

16 channel model has short cable and some handle bar mounts. Mic

included but no speaker. Not tested yet since I just got it in.

$50.00

GE Mobile Vehicle Adapter for MPA, MTL, MPD, and TPX. This unit

charges your battery and turns your portable into a mobile radio.

(Convert a Com) With mic, speaker, and power cable. $90.00

GE Accessories

GE TQ 2310 suitcase programmer. Has PLS, Phoenix, Delta s/sx, Voice

Guard, MPS, and Ranger. Printer is working Has manual for the

programmer and the computer. Has Phoenix cable and Voice guard cable.

All in the original GE case tested and working. $850.00

Mastr II control cable. $8.00 each

Mastr II head for mobile repeater operation. $5.00

Mastr II Mic. $5.00

Mastr II 8 channel tone boards. $5.00

Mastr Exec II VHF receive section. $20.00

Mastr Exec II VHF Exciter. $18.00

Mobile Repeater cable for Mastr II. $10.00

Mobile Repeater cable for Delta or Ranger. $20.00. I have seen

programming cables made from these.

GE white Versatones, 103.5, 162.2, 173.8, 179.9, 186.2, and 203.5.

$4.00 each. I have a large amount of 203.5,186.2, 179.9, 173.8, and

162.2. If you buy 10 = $3.00 each. Buy 15 =$2.50 each. Buy 50 = $1.50

each.

GE Mastr II Icoms. EC = $5.00 each, 5C = $10.00 each.

GE Delta cables. These are the downloading type used with the S820

heads. And all other heads $40.00 each

Delta mounting plates. $10.00 each

Ranger mounting plate. $15.00

Power plugs for S500, S550, C500 etc heads. Good pulls $5.00

GE S-550 / 500 and others mounting brackets. $5.00 each

GE MPA, MPD, MTL standard Speaker mic. $25.00

GE PCS Universal charger. With wall transformer $20.00 each

GE MPA standard chargers. $20.00 each

GE MPA Rapid chargers. $30.00 each

GE MPI desk charger with wall transformer. $10.00

GE MPI Rack charger, 8 position. 25.00

GE MPI Mobile battery charger, Rare. $20.00

GE Battery discharge analyzer. For MPA, MPD batteries. Attaches to a

rapid rack charger with a DB 15 cable and uses a MPD body to attach a

battery to. Has LED readout in display area of MPD body to tell

discharge rate. Another rare GE goodie. $45.00

GE shoulder strap like new, attaches where belt clip is. $15.00

GE Belt clips. $10.00 each

GE Voter. Has 9 total rec. cards and 2 TX cards. With extender card

and power supply / speaker. $300.00

Other Radios and Accessories

Motorola Saber III Secure VHF 146 split 120 channel radio. Alphanumeric

Display. Has Battery Smart charger and speaker mic. I have been using this on the VHF ham band. Has a new case that was installed at the Motorola Rockford, IL Depot

So it also has a new model sticker that they put on as well. Nice 9.5 or better radio.

$450.00

ADI AT 201. 2 meter portable nice like new and in the box with the

manual. Has 5 watt battery and wall charger. $85.00

Yaesu ft 2400 2 meter mobile. Has Mounting Bracket and manual. Nice

2 meter Radio. $115.00

Radio Shack HTX 212 2 meter Mobile. 30 memories, Scan. Works great.

This was in my van before I added another MVS so I know it works.

$95.00

Uniden SPU480K UHF 8 channel portable. Has two good batteries drop

In charger and speaker mic. $80.00

Maxon 5050a Low band portable pair. Like new condition with 1 battery

charger but I will split up the pair if someone wants 1 radio only. 6

channels programmed for 10 meter ham band on 2 repeater pair and 4

simplex frequencies. 2 radios and 1 charger $185.00

Marconi UHF portable. 16 channel scan with NOS battery. Made by

Midland. $65.00

Midland 70-336B VHF Mobile radio. 8 channel scan. with mic.$65.00

Motorola GP300 VHF 2 channel. on ham band. Has battery OK condition

and charger. $150.00

Motorola Mitrek VHF high 110 watt drawer only. $50.00

Motorola MT500 VHF nice shape. Crystals removed but I have 1 set of crystals for each radio. Also have a working battery and charger for each. I have 4 of these. $50.00 all

Uniden SMS 825 TS, 800 MHz Dash mount radio. $45.00

Voter from IMTS phone system. 2 rec. and 2 TX cards. $40.00

Maxon Rapid Rack charger for 0510/0520 radios. Think they will work with the sp2000 as well.$35.00

Consignment section

This area is for a few friends who like those other radios you know "Motorola" They are good people and I will pass along any trades you may wish to make.

MOTOROLA X9000 VHF 50 watts, alphanumeric head, Siren complete. $425.00

Motorola single rapid chargers for HT600, MT1000, P200. $25.00 each

1013. Looking for info on an Ebay seller

Newsgroup: rec.radio.amateur.swap
Date: 2002-07-06 04:05:37 UTC
From: tyeatman@aei.ca
Message-ID: <adabcac0.0207052005.3ee8ccf4@posting.google.com>
Source record: 3166

I purchased a Bird 1000H slug from an Ebay seller who describes his location as
RF Black Hole of PA. It is defective. Cover had been (badly) pried off which led me to have it checked. On a 600 w linear it reads 300w on both a friends and my Bird 43. We then tried another 1000H and it read the correct power output. Over several emails he started off by stating that I should have realized that I was probably going to receive something not necessarily good because his 'very detailed photo' showed the damaged cover. It was not described as being damaged nor 'as is'. To me the damage in the image was not obvious. He eventually ended up offering to take it back but only if I ate all shipping, Ebay, and canadian tax charges which I had paid. It is item # 1358140457
He ended up telling me he had tested it on a 10w 440 rig and it tested ok. He has an advanced ticket.
Anybody else out there had problems with this character?

FOR SALE:

Collins 516E2 Power Supply for KWM-2 transceiver - runs on 28V DC.
Needs capacitors replaced inside. Otherwise appears to be complete
and ready to restore.
See picture on web page below...
Will sell for $49.00 plus shipping

WW2 British Mark 2 straight key. Contacts are still in very good
shape.
A few imperfections as you can see - not perfect,
but will polish up and restore nicely.
Missing two screws, but otherwise clean and in nice shape.
Picture available on the web page listed below...
Will sell it for $35.00 plus shipping

James Millen Company SWR Bridge Type 90671
Beautiful black crackle finish. No scratches or dents.
Serial Number 812. Has SO-239 connectors.
Has phono type output for 0-1mA meter.
Picture available at the web page listed below...
Will sell for $35.00 plus shipping

MFJ Keyer model MFJ-401 - non-working, but case is perfect and all
parts are there. Looks great.
This is the basic keyer with no memories. Has speed and weight
controls.
Operates on 9V battery. May just have a loose connection.
No time to troubleshoot, hence low price.
Picture available on request.
Will sell for $9.00 plus shipping

MFJ-1224 RTTY and CW interface with manual and cables.
Great for getting your computer to send and receive CW and digital
modes.
Built in radio modem, decoder and many refinements.
From the leader in affordable digital radio interfaces, MFJ.
Excellent condition. Looks just like new.
Will sell for $35.00 plus shipping

Hallicrafters S-108 Receiver in near-mint condition.
All original and in excellent working condition. Has the original
Hallicrafters tubes in it and looks imaculate inside and out.
Very clean, no scratches, no dents, no rust. Has obviously been kept
VERY well buy someone who appreciated fine radios.

Picture available on web page below...
Will sell for $225.00 plus shipping costs.

Ebay is getting really crappy these days...
I dont know what is wrong with people, but its just getting worse..
I sold a videophone that stated No International Shipping, yet a Canadian
bid and won.(I am in the U.S.)..
He then tells me I sold him crap and it didnt work.
I refunded the money when he returned it and it worked just fine.
Put it back up for auction and once again put No International Shipping, and
again a Canadian won the auction. (no offense to you) :)
I would send it back to him.
I did not refund shipping charges on my auction because I knew I sold a
working 100% unit.
Its typical not to get refunded shipping, because shipping is a service, and
the service was perfomed.
Good Luck

I'm trying to raise some money to buy a SSB filter for my Kenwood TS-140S...

I have some laptop batteries, I have two Li-Ion 14.4V 2500mAh Dell batteries, $8 a piece plus shipping or 2 for $12 plus shipping. Never could figure out a charging circuit...

I also have a new IBM 9.6V 2.8Ah Ni-MH, $15 plus shipping (this is for an IBM TP365 and is $85 new). I have a 3.5" floppy drive for a IBM TP365 with the external cable/box for $10 plus shipping. I could make a deal on both ($20 plus shipping?)!

I have a Baycom type packet modem, N3PRT assembled from a kit but never wired up and tested, $12 shipped. I have a Ramsey 2 meter power amp with the sensing relay in a nice little alum. box. Worked but would never put out rated power, $15 - box connectors everything (no manual) plus shipping.

Analog devices AD9835 with a breadboard for experimenting (a little board with traces on it made by one of the genius qrp-l members), $10 shipped and includes two SMD Maxim chips (could've swore they were charge pumps...) mystery.

Original Neophyte receiver, assembled, with connectors pot vernier drive air variable, speaker w/headphone jack. Works FB. Mounted on a piece of plywood with a wood front panel, $25 plus shipping.

Speedex key, black wrinkle base, no shorting bar, $15 shipped.

Now to the oldies but goodies. I have a BC221 Frequency Meter, 125 - 20000 KC, Bendix Radio. In fair to good shape with calibration manual. I started a power supply and will include that also. Worked five years ago hasn't been touched since. This is not a museum piece but it did work and includes the calibration manual which is kinda rare (if you want to see one http://www.qsl.net/ab0cw/ral7.htm). Price is negotiable - plus shipping. It is heavy and I'd want to pack it really well. I don't need this one as I have a "brand new" one in storage.

I also have an Arc-5 shell with the roller inductor and variable capacitor. Best offer plus shipping. Sorry for the length of this post. And thanks.

Please reply off the list... Dan Reynolds KB9JLO

I have a BC221 Frequency Meter, 125 - 20000 KC, made by Bendix Radio. In fair to good shape with calibration manual. I started a power supply and will include that also. Worked five years ago hasn't been touched since. This is not a museum piece but it did work and includes the calibration manual which is kinda rare (if you want to see one http://www.qsl.net/ab0cw/ral7.htm). Price is negotiable - plus shipping. It is heavy and I'd want to pack it really well. I don't need this one as I have a "brand new" one in storage.

I also have an Arc-5 shell - case - with the roller inductor and variable capacitor and dials. Best offer plus shipping.

Source record: 3191

I am QSL manager for UU1A and Ken sent me a bunch of IRCs to sell for him. I have 128 properly stamped IRCs and 42 without any stamps (that I'm told are good). All are the recent small size for airmail response (with postmark dates of 2000 and 2001 mostly). These are still valid for an indefinite period (unlike the news ones that expire in 5 years). Ken is asking $1 each for stamped ones and 80 cents each for unstamped ones (plus my postage to mail them to you).

ebay will not allow these on the site because they could be misused to
transmit on CB freqs. Of course most ham rigs can do that too...

1. You can't sleaze your way out of it. It's the law.

2. eBay has an FCC liason assigned to it to look at the auctions.
Don't think they're not smart enough to look in the ham radio
category.

3. They know the difference betwenn a ham radio and a phney cb export.
Just saying a radio is something other than what it is won't work.

FCC ISSUES REMINDER ABOUT HF TRANSCEIVERS
ï¿½
The FCC has issued a friendly reminder about those HF transceivers
ostensibly marketed for "amateur" use, but actually designed and
intended specifically for the so-called "freeband" radio operators,
who operate primarily in the 26 to 28 MHz frequency range.
ï¿½
In a May 13 Public Notice, the FCC points out that it's a violation of
FCC regulations to import or market a transmitter designed or intended
to operate outside the amateur bands unless the equipment has been
issued a grant of equipment authorization for the radio services it's
capable of operating. The FCC says it wanted to clarify its rules on
equipment that's "intended to operate in various radio services in the
high frequency radio spectrum, including '10-meter' Amateur Radio
Service (ARS) equipment." The notice--directed to "manufacturers,
importers, vendors and users of these transceivers"--emphasizes that
transmitters intended for use by FCC-authorized radio services except
the Amateur Radio Service must be type-accepted.
ï¿½
In the words of the Public Notice: "The Commission considers that the
transceivers discussed above are intended to be operated on
frequencies where the use of type-accepted equipment is required,
because of the simplicity of modifying them to extend their operating
frequency range."
ï¿½
The FCC also noted that it's illegal to import, market or operate a
transmitter that requires a grant of equipment authorization but for
which no grant has been issued, and that it's a violation to transmit
on frequencies allocated to a licensed radio service "without the
appropriate Commission-issued station license." Violators could be

subject to fines or imprisonment as well as equipment seizure and forfeiture.--FCC

Smokescreen snipped

Aaron, they wont cancel it there, and you know it. You're just trying to
bluff your way through this one because you know how impotent you are.

ILLEGAL CB TRANSCEIVER LIST

The FCC's Office of Engineer and Technology (OET) has evaluated the devices listed below and has concluded that these devices are not only amateur transceivers but can easily be altered for use as Citizens Band (CB) transceivers as well. As such, OET has further concluded that these devices cannot legally be imported or marketed within the United States for the reasons discussed below. Further, the FCC General Council has issued a decision in a specific case involving one manufacturer and has concluded that dual use CB and amateur radios of the kind at issue may not be approved under the Commission's rules and are in violation of several rules including the RF power level limits of 47 CFR 95.639. (letter from Christopher J. Wright, FCC-OGC to John F. Atwood, US Customs Service, dated May 17, 1999).

Transceivers used in the Amateur Radio Service below 30 MHz do not require FCC authorization prior to being imported into or marketed within the United States, but transceivers for other services, including the CB Radio Service (CB), do require Commission approval. The transceivers listed herein and other similar models operate in the amateur "10-meter band" and are often referred to as "10-meter" radios or "export" radios. The amateur 10-meter band uses frequencies that are very close to the channels set aside for use in the CB service. Some of the transceivers that manufacturers call "10-meter" radios either operate on CB frequencies as manufactured and imported or are designed such that internal circuits can readily be activated by a user, a service technician or a dealer to operate on CB frequencies. According to Section 95.603(c) of the Commission's rules, a CB transmitter is a transmitter that operates or is intended to operate at a station authorized for the CB service. 47C.F.R. ï¿½ 95.603(c). The Commission's equipment authorization experts in the FCC Laboratory have determined that the transceivers listed herein and other similar models at issue here are intended for use on the CB frequencies as well as those in the amateur service because they have built-in capability to operate on CB frequencies. This capability can be readily activated by moving or removing a jumper plug, cutting or splicing a wire, plugging in a connector, or other simple means. Thus, all the transceivers listed herein and similar models fall within the definition of a CB transmitter. See 47C.F.R. ï¿½ 95.603(c). A CB transmitter must be certificated by the FCC prior to marketing or importation. 47 C.F.R. ï¿½ï¿½ 95.603(c); 2.803.

Moreover, the dual use CB and amateur radios of the kind at issue here may not be certified under the Commission's rules. Section 95.655(a)

states: "ï¿½.([CB] Transmitters with frequency capability for the Amateur Radio Services ï¿½ will not be certificated.)" See also Amendment of Part 95, Subpart E, Technical Regulations in the Personal Radio Services Rules, FCC 88-256, 1888 WL 488084 (August 17, 1988). This clarification was added to explicitly foreclose the possibility of certification of dual use CB and amateur radios, see id, and thereby deter use by CB operators of frequencies allocated for amateur radio use.

In addition, the Commission's equipment authorization experts have determined that these devices violate or appear to violate a number of the rules governing CB devices. For example, they may use emission types not permitted, or emit RF power at a level in excess of the levels permitted in the CB radio service. See 47 C.F.R. ï¿½ 95.639.

In view of the foregoing, the following "10-meter" transceivers are not acceptable for importation or marketing into/within the United States. Importation and marketing of these units is illegal pursuant to Section 302(b) of the Communications Act and Section 2.803 of the rules. Willful violations of the Rules and the Act may subject the violator to a monetary forfeiture of not more than $11,000 for each violation or each day of a continuing violation. The Commission continues to review this type of equipment, and additional makes and models may be added to this list in the future.

LIST OF TRANSCEIVERS
ILLEGAL TO IMPORT OR MARKET

GALAXY - models: DX33HML, DX 44V, DX55V, DX66V, DX 73V, DX 77HML, DX 88HL, DX99V and Saturn Turbo

CONNEX - models: 3300, 3300HP-ZX, 3300 PLUS and CX-3800

MIRAGE - models: 44, Galaxy 88, 9900 and 2950EX

NORTH STAR - models: NS-3000 and NS-9000

PRESIDENT - models: Grant, J.F.K., Jackson and Lincoln

PRO STAR - model: 240

RANGER - models: AR-3500 and RCI-2950

TEK - model: HR-3950

UNIDEN - models: HR-2510 and HR-2600

SUPER STAR - model: 121

For further information concerning the listed transceivers or similar models, contact Ray LaForge or Gary Hendrickson at the FCC Laboratory, 7435 Oakland Mills Road, Columbia, MD 21046, (301) 362-3041 or (301) 362-3043 respectively, or E-mail: rlaforge@fcc.gov and ghendric@fcc.gov

1058. FS/FT: Yaesu FT-840 HF Transceiver

Newsgroup: rec.radio.amateur.swap

For Sale or Trade:

Like new YAESU model FT-840 HF Transceiver with FM-747 FM option installed. Less than one year old. Full output. Looks and works as new. Will consider trading for a decent oscilloscope of equal value. If you are looking for a neat second rig or mobile rig this maybe what you need. Don't miss this one. It is my personal radio--not a resale. Rig was purchased new this past spring. $375.00 shipped UPS ground in the continental US. Terms: Money Order or Bank Cashier's check. I also accept PayPal payments. Manual, Microphone and DC cable included.

Lynn, N8AJ - lstolz@columbus.rr.com or n8aj@arrl.net

Be advised, we're working on that issue. Note the Yahoo Auctions TOS
clause (below). Since sale of illegal CB amplifiers and "export
radios" violates FCC law, Yahoo will eventualy have to follow eBay's
lead in banning the sale of these items.

If anybody complains to ebay about ANY item someone is selling the just pull the auction. Then you receive a
"canned" message vaguely stating why it was pulled. They don't want to deal with any nonsense that might cut in
on their
zillion dollar profit. The loss of a few messily $$$ by dumping an auction or 2 is no biggie to them. There will
always be these chuckle heads (that plague many newsgroups) that think they are ebay and newsgroup police.
It's a shame because 99% of the stuff pulled is OK and does have the right to be on ebay.

Hey, I was just on Yahoo auctions. Bet it really pisses you off that they are selling 360 channel CB's and amps
there. And there is nothing you can do.
Seems the patrolman in you has no teeth there.

We're working on that issue?? Who is we?
It must be killing you that Yahoo auctions are selling amps and 360 channel CB's.
There is nothing wrong to sell a 2510 to a valid ham radio operator. If you picked one up at a garage sale it would be up to YOU to use it legal by having a ham ticket.
If you mod it for CB then you would be the one who is illegal. The equipment has little to do with it.
If you purchased a used car, and I'm sure you have. If you drove that car home with plates other than
registered to that car, you would be illegal.
Haven't you wasted enough bandwidth on many newsgroups with your type of intimidation??
By responding, I too am wasting time and space. I apologize to the groups.

To connect the Palisade that is mounted on the roof of your building to the communications gear that is mounted somewhere else in the building, probably the basement.

The Palisade isn't really an antenna, it's a complete GPS receiver including an antenna in a single housing. It is primarily intended to provide precise time information, not position. By putting the entire receiver on the roof, the 1.5 GHz RF path is only a few inches long. The cable that runs from the Palisade to wherever the signal is used carries only power and digital signals (serial data, 1 PPS timing).

1078. FS: Eico signal generator model 315

Newsgroup: rec.radio.amateur.swap
Date: 2002-07-17 02:06:25 UTC
From: RaOuL <russ@bit-net.nospam.com>
Message-ID: <tj4Z8.1145$_T4.85113@news.bit-net.com>
Source record: 3130
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.swap

Eico Model 315 Signal Generator

I have for sale an Eico Model 315 Signal Generator. This comes with the signal generator, 2 probes and the original instruction manual. The description from the manual is as follows:

"1 - Description
The Eico Model 315 Signal Generator consists of a highly stable electron coupled RF oscillator calibrated in seven bands, covering a frequency of 75 kc to 150 m with overlap on each band. The RF oscillator is electron coupled to of 7F7 buffer stage for isolation. The second half of the 7F7 is used as an inductive type audio oscillator, which produces a 400 cycle pure sine wave with less than 5% distortion. The AF oscillator modulated the RF in the buffer stage. A four step ladder type altennator and a variable control in the cathode circuit of the buffer stage control the output without loading the oscillator stage."

This unit was part of the estate of an engineer friend of the family, and its operational condition is unknown. I had every intent of powering it up slowly with a variac but never got around to it. Now I must clean out my shack and here is your chance to get a piece of classic test equipment at a bargain price!

This unit is complete and the only damage to it that I can see is a broken toggle switch on the front panel, which can be easily replaced. The probes are complete but the wires are starting to get brittle. The manual is complete and in good condition and includes a schematic and parts list on the back page.

There is a picture of the unit available to view at: http://www.bit-net.com/~russ/eico315.jpg Please pardon the poor image quality, if I can answer any questions just email me...

My asking price is $35 but I will entertain the idea of a swap. Some items I'm currently looking for include a 5/8 wave mobile magnet mount antenna for 2 meters, a small amp for 2 meters, a desktop microphone or any other small items of a similar value that might be useful or interesting in my 2 meters station.

Buyer agrees to pay actual shipping charges or arrange to meet me in Southern NH to pick up. This unit weighs 17 lbs. and might be expensive to ship. You should visit www.usps.gov or www.ups.com to get a quote on shipping charges from my location in Nashua, NH, 03061 to your shipping address.

I prefer payment by PayPal or US Postal Money Order. I will accept personal checks but I won't ship the item until after the check clears.

Thanks for looking!

If the sale of what a Canadian resident is attempting to sell in the
US (e.g. illegal CB amps, illegal export CB radios, etc) is prohibited
by US law (and has been for a number of years) how do you figure that
our freedom is being impinged upon?

It certainly has been - by our own government. Which is why Aaron H.
Voobner is THE Dumb@$$ TROLL. Try using your brain for a change.

It's probably not illegal in Canada or other countries. Why should it
be banned from eBay?

Hey Murray,

You know I always thought you were a pretty decent guy. Until now. That is just crap about our government letting terrorists in and you obviously don't have the knowledge to back up your statement. Where are your facts? Two non-Canadian citizens are caught with explosives trying to cross into your country. Sure, I doubt they were going over for a fireworks celebration, but that is really no need to blame the rest of Canada. Do you have any idea how many US based truckers are caught trying to cross into Canada with firearms in the cabs of their rigs? And why do you think that is? Because it isn't safe to drive the streets of America, that's why. Canada is known world wide as a warm and peaceful country. That is why we get so many immigrants coming here. I personally don't agree with that, but that's the way it is. How many illegal (Middle Eastern, Asian, Mexican, Puerto Rican) do you have in your country? Hell your INS doesn't even know where 90% of the LEGAL immigrants are. If you plan on being the most powerful country in the world you might as well put a target on your back. Me, I'd just rather be welcome.

Don't bother replying, you're already in the kill file.

Don't like the government? Elect officials that'll change it to your
likeing. Don't like the laws? Follow democratic process and change
'em.

>Which is why Aaron H.
>Voobner is THE Dumb@$$ TROLL.

How is it my fault that YOU don't like the laws?

>Try using your brain for a change.

I see you are using yours to bitch about laws you don't like but are
too lazy to change. That's a fine "use" for it.

>It's probably not illegal in Canada or other countries. Why should it
>be banned from eBay?

Good question. Ask eBay why it refuses to provide a vehicle for
foreign nationals to sell contraband to US citizens.

Max, I agree to most of what you said, Murray was way out of line dishing on
Canada, On 9-11 My father was on his way back from Nova Scotia, the Boarder
Crossings were all closed, they waited near 8 hours to get back into the US,
the residents of the town at the crossing were offering food and water to

everyone who got caught on the Canadian side, I don't know for sure, but I would be willing to bet that didn't happen on the US side. there is no other Nation in the world I would rather have as a Neighbor, as far as the guns, people who try to take guns across the boarder to a country that does not allow them is just plain Numb, but I also believe that an unarmed Victim (People) is an easy target for criminals. If a criminal knows I am armed he will be less apt to break into my house. and surly would never walk out. If you disarm the public the only one with guns will be the criminals. Our hats are off to our good neighbor CANADA.

I may be catching this thread late, so correct me if I am wrong, these items are not illegal to own in the US, just Illegal to use therefore Ebay should not Ban them ever, Same with Sirens and Blue Lights, not illegal to own just illegal to operate with out a permit. but Ebay Banned them too, Maybe Ebay wants to be the FCC Enforcement Division, or better yet worldwide Police for what is good or bad for you, but they will allow you to sell the nastiest Porno in the world. uh ???? where are their Ethics ???

Yeah I guess if Murray had of read the news after 9-11, he would have found out how many Canadians went out of their way to accomodate those trapped on our side of the border. Too bad one rotten apple has to spoil the whole barrel. I appreciate all your kind words.

Now fellows, lets knock it off. We're the best of friends and although we may not always agree on our philosophies on different issues, we must stick together and back each other up no matter what. Basically we're all family. I will always respect the constructive comments from any of my Canadian brothers and think that we should both remain strong in our mutual support of each other. 73's Fred... PS If you have seen it all in the USA, go visit Canada for a real treat!! Oh, bring your mobil HF for some fun.

You and all Canadians are VERY WELCOME down here in my book!!!

Ebay is just anal (and paranoid) about things, just like some of the folks on this board and in this country. That's why I bought my Yupi scanner in Canada, it's not sold here due to the restrictive stupid, now very irrelevant scanner laws.

I for one, am very happy to have such a fine country next to us as Canada. You are great friends and I for one am glad to have you "up north".

Note: The planes did take off from US airports, fooled our so called security systems, the terrorists were trained in the required flying skills in our schools, they lived here for several months in our cities and used our banking system. Canada was just one of the many stops on the way for them. I see no blame on your part...

Terrorism is a world problem and it takes INTERNATIONAL teamwork to minimize it and it's effects. Pointing fingers at one another isn't gonna help anything.

Geez, after all you gave us John Candy, Shania Twain, Neil Young, Bob / Doug McKenzie, Kids in the Hall and SCTV. (also North of 60, a favorite of mine) Even one of my favorite guitars is Canadian made (Seagull). Just for that I'm forever indebted.

OK, I'll overlook Anne Murray for now...

TNX,
-bc
Your neighbor down south from the "real" city of Vancouver in Washington... :)

P.S. Sorry for the acid rain guys... Blame the greedy ones down here...

OFF TOPIC, but a thorn in my ass. I couldn't help but reply.

Why blame Canada????

On a house, locks on windows and doors keep the "honest" out. A REAL thief will get in. Same with terrorists. If the sneaky bastards want in the US or any other country, they'll get here/there by hook or by crook. BUT, some of you may not be so ready to admit, welcomed by our own government.......government sponsored programs with their own hidden agendas. And their crimes if committed? Covered by Diplomatic Immunity.....

I was in the Air Force many years ago. An AMERICAN service woman was raped by a foreigner - ON BASE. The guys wanted to go kick this guy's ass and make him pay.The Commander simply told them, he had diplomatic immunity and if they touched him, THEY would be the ones to end up in prison. Now if that were US, we would be in prison in hours OR worse, especially in another country.

No, don't blame Canada..... BLAME THE TRUE culprits. OUR ELECTED OFFICIALS......The same ones who keep dolling out millions and billions in aid to those who wish us harm when our own people can't even afford health care. SCREW THEM.... Take care of our own who have paid into this system for how many years... CHARITY begins at home. Further more, start treating the criminals and terrorists as such instead of this they have more rights than we do CRAP, and we'll all be better off.

I'm sick of this Civil Rights CRAP of they have "rights". Yeah, what about all the people these scum bags killed innocently? What happened to theirs? I say wipe em all out like the disease they are........The terrorists who are in "jail" are getting a free meal, medical and a roof over their heads. More than a lot of our HARD WORKING citizens can afford in a lot of cases. Especially the seniors who have paid into our system and have to choose between medicine to live and food or housing. They keep saying how BROKE our Social Security system is.. WELL GEE!!!!!!!!!!! Instead of a few billion TO Afghanistan or some other God forbidden country, how about INTO SOCIAL SECURITY!!!!!!!!!

No people, don't go blaming Canada..Instead focus the energy where it is really needed.... STRENGTHENING OUR USA against all the CRAP......Starting in WASHINGTON.

This country started with a struggle, basically with nothing more than the clothes these people had on their backs. IF this country can do it, so can they. THEY are the worst case scenarios when it comes to WELFARE! The leaders get it, the people are lucky to see it. Let those countries struggle

like we did. IF we did it - so can they. You have to let the lazy bastards get up off their asses to do some thing first!

You know, it amazes me.....THINK ABOUT IT. When a Earthquake hits anywhere or hurricane, whatever....we are so quick to send food, money (BILLIONS) to them. And NOT one word is said about "LOANS" OR PAY BACK. When WE get hit, we get shit for asking for it from our own, let alone others. AND to rebuild "our" homes and businesses? LOW INTEREST LOANS!!!!!!!!! How fair is that?

Want to fight terrorism????????

STOP THE FOREIGN AID AND OPEN INVITATIONS! START LOOKING OUT FOR U.S. {US}.

The point is... It's easier to say you are doing something good by searching well behaved people and stealing their right to self-defense than it is to catch terrorists bent on the destruction of your freedom.

I don't want to even get into America vs. Canada. The policy of killing freedoms is bad-wrong no matter where you go. Also, it seems you get our news (propaganda) but all we ever hear is hockey scores. Is censorship at the top of the list? If so, then we understand that you may be under duress as a policy spokesman. You have our sympathy.

Jim.

There is nothing illegal or invalid about a Uniden HR2510 offered for
sale (or auction) in an amateur radio group. Too bad you don't have
any sense, Anal Aaron.

My Uniden HR-2510 is not junk. With the keyer, filters, chipswitch mod it's one of the most affordable and versatile portable mobile rigs I own (10/12/15). 43 countries, and 32 states on 10 meters alone during the last sunspot cycle. It's been on many a backpacking and canoe trip with a gel cell, solar panel and a dipole. When my dad was alive he used his HR-2600 for our daily NC - TX sched. Sure wish I hadn't sold his. Its also a great rig for local AM/FM use simplex and repeater use too. I've used it for a downlink on RS satellites with much success also.

Sure I could use my "big" HF rigs (Collins, TS-520, Drake "C" line and TS-2000) but my baby is my modified (filters, keyer, tuner, etc.) Uniden. Until I get one of those Yaesu QRP HF rigs that is.

Take your so called FCC policing BS somewhere else and get a life. Bet you look for folks with "illegal" scanners too? I have 3 myself...

Must be voobs son.
My HR-2510 served me very well in the mobile.
NOTHING wrong with it as a 10 METER RADIO as it was sold for when new.
Completely legal as it was designed for. Many if not all HF ham rigs might be able to go on 11 meters. It's up to the operator of the equipment to keep his own station legal.
Wish I had not sold my old 2510 3 years ago, it was a great 10 METER radio.
Hey, ya know, how come nobody's bitching about converting a 11meter CB rig to 10 meters??

1 Sinclair model Q202GC 132/174 mhz.
1 Sinclair model Q301GC 406-512 Mhz.

Read spec. here http://www.wiscointl.com/sinclair/BaseStation/q201-202g.htm

Price $550 Ea. Unit ,both are NEW units in their cabinet.
This units weight about 135 lbs. so i will prefer kinda local buyer
in the Baltimore,MD area,or can deliver within 50 miles of Silver
Spring for $25 extra.

Thank you for reading.

Sure is interesting to read what upsets some of the ham radio ops on this list.

I have had several HF rigs that are modified for CAP/MARS that work 3 - 30 megs all bands all modes. Yes, I was active with both organizations.

There have been a great deal of articles on converting CB to 10 and it may be that its too much work for too little return. Many 10 meter rigs are gray in that they are sold to the CB types at truck stops, but as long as they meet spec and folks are licensed for use, better they be on 10 then CB.

Funny, There are no licenses issued for the CB band but there is still a great deal of operation on those frequencies. Either the FCC has given up or ....

I recently picked up an ICOM 706 and ite hears 11 meters well, but nothing there worth listening to.

Because it's not illegal to do so: Hams can use anything on the ham
bands. It's going the other way that brings Anal Aaron out of the
woodwork.

> Haven't you wasted enough bandwidth on many newsgroups with your type of intimidation??

Very thoughtful. But the larger question is why an astonishingly
sizable group of people continue to devote large amounts of time and
personal resources to stop me from posting pro-legal CB opinions.

If illegal CB were such a "trivial issue" in the larger scheme of
things, you would think one man's protests against it would be pretty
much ignored, right? Wrong. Instead, dozens of pro-illegal activists
pop out of the woodwork with innumerable threats, bizzare defenses, and
vows to "shut me up".

Can I take credit for the result? No, in all honesty, the staunch
"defenders of illegal CB" are the folks that deserve the credit for
transforming this newsgroup into what you see today.

Sincerely,
-Aaron-

Guess I hit the nail on the head ! Look at how you respond ! But I
still maintain that any good ham knows that the " roger beep " junk
being made is not intended for ham radio , but for illegal CB use
and out of band use. As radios go , the stuff is JUNK . Out of band
operation causes problems to legal operation . Any CONCERNED amateur
radio operator , which your not , should be pleased with any FCC
response to the use and sale of this " roger beep " JUNK.

CB's use to need a FCC licenses way back in the 1960, 70's.
11 meters use to be part of the ham bands and was taken way. And yes, the FCC gave up on the CB band many years ago. Unless somebody is really messing things up big time.

Funny, There are no licenses issued for the CB band but there is still a great deal of operation on those frequencies. Either the FCC has given up or ....

I recently picked up an ICOM 706 and ite hears 11 meters well, but nothing there worth listening to.

The "roger beep" button on my Uniden HR-2510 is used to select a 500 hz CW filter since I didn't need it and I like a nice narrow IF for CW. My "pa" switch limits the output power to 500 mw for QRP and transverter use. Again, a much better use of the switch.

Although the use of "roger beep" is questionable for amateur use (say lid...), it is used by NASA during space communications on occasion and more than one repeater that I know of, I guess they are using junk too...

10 Meter rigs made by companies such as the Ranger, Uniden and Radio Shack have been some of most affordable mobile 10 meter options for many hams. Much better than the converted 11 meter Diamond (CB) AM/SSB rig which I used in the '70's in my car for 10 meters as a ham while in college.

With mods (filters, alignment, etc.) some of these "roger beep" rigs perform as well as many "ham rigs" besides being useful (and affordable) for more specialized uses (transverter, QRP, RTTY, narrow BW digital modes, remote control via UHF, etc.).

As a youth I modified WWII surplus / commercial VHF equipment that was designed for non-ham frequencies for amateur freqs. in the '60's. Should access and sales of that equipment been outlawed too? Should we outlaw just about every modern amateur rig and HT made in the past 20 years since about every one has OOB capability with minor modifications?

BTW, The first mod I do on a rig is make it OOB RX/TX capable (if possible), you never know when you might need OOB capability for transverter or emergency use (allowed under FCC regulations in certain cases to protect life or property). Lock me up...

I bet you are real fun at swap meets and hamfests enforcing your way from tailgate to tailgate... Scenario at next Dayton, "Is that a Uniden HR-2510 on your table? I'm confiscating it and calling the FCC, wait here and don't move..."

You want a real mission, go after the E-Bay sellers and sporting goods dealers that sell GMRS equipment for "higher power" FRS use without informing the user that they need a license. Now that sucks...

CUL,
-b

Legit use of 10 meter radios such as the ones you name above is acknowledged. But for a real eye-opener go to www.copper.com and see what kind of radios are being pushed on CBers. They are calling them "10 meter radios" these days, complete with 40 channel selectors, 15 kHz channelization, talkbackm and roger beep.

Do you recall the cause of restrictions placed on RF amps covering 10 meters? Well, hams again have to suffer with more restrictions, this time on legit 10 meter transceivers, thanks to the abuses of outlaw CBers.

Don't take my word for it. Below is an excerpt from the FCC CALL CENTER script dealing with this issue.

-Aaron-

---

2. NON-APPROVED C.B. RADIOS

Q. What is a legal C.B. radio?
A. All radio transmitters and receivers which are intended to operate on the 27 MHz Citizen's Band (C.B.) channels must be approved by the F.C.C. before they can be imported, advertised, sold or used. The manufacturer must be issued an F.C.C. grant of equipment authorization, called "certification", as indicated by an FCC ID on each unit. If the radio has a label showing an FCC ID, and the ID can be verified by checking the Equipment Authorization database on the F.C.C./OET Web page, then the radio is legal.

Q. What kind of radios are illegal to use on the C.B. radio channels?
A. Any radio transmitter, receiver, or transceiver which is designed by the manufacturer to operate on the C.B. radio channels, but which has not been granted an F.C.C. equipment authorization is illegal. These non-approved radios may appear in several different forms:
1. "10-Meter Amateur" radios, which have been designed so as to be readily alterable to operate on the C.B. radio channels, and/or on other non-amateur frequencies in the frequency range from about 24 to about 32 MHz;
2. "Export" or "full channel" radios, which are designed to operate

over all, or a portion of, the radio spectrum from about 24 to about 32 MHz, including the 27 MHz C.B. radio channels; or
3. F.C.C.-approved C.B. radios which are designed so as to be readily alterable to operate on frequencies in the range from about 24 to about 32 MHz, which are not assigned to the 27 MHz C.B. Radio Service.

Q. What do you mean by "readily alterable"?
A. This means that the user of the radio can add, or change, its operating frequencies by simply flipping an internal switch, by clipping the leads of, or installing, a simple component such as a diode, resistor or jumper wire, by installing, moving, or removing, a jumper plug, by connecting or disconnecting a connector, by replacing a plug-in semiconductor chip, or by programming a semiconductor chip using special access codes or an external device, such as a personal computer.

Q. What are these other frequencies between 24 and 32 MHz used for?
A. These frequencies are assigned to many different licensed radio services, both in the United States, as well as in other countries. Authorized users include Maritime and Aeronautical radio stations, standard time and frequency stations, international broadcasting stations, amateur radio, and government stations. A portion of this spectrum is also allocated to radioastronomy, where scientists are attempting to listen to very weak radio signals coming from distant stars and galaxies. No radio transmitters of any kind are permitted within these radioastronomy bands, so any earth-bound transmitted signals can completely disrupt radioastronomy observations.

Q. I don't hear any other stations on "my" frequency, which is not one of the 40 allocated C.B. radio channels. So what is wrong with operating my radio station here?
A. You may unknowingly cause interference to legitimate communications. Many of these frequencies may appear, to the casual listener, to be unused. Some of the authorized users may be using emission types which can not be plainly detected. Or, their transmissions may be intermittent. You will not hear any legitimate signals within the designated radioastronomy bands. However, just because a frequency sounds clear, that does not mean that it can be used without proper authorization.

Q. Why do some people operate illegally on these frequencies?
A. Many of these frequencies may appear to be "free" of any legitimate users, so some people think they are "free for the taking". The illegal radio operators are commonly referred to as "freebanders", and use their radios as a form of hobby, similar to Amateur Radio. But for many reasons, these people choose not to obtain an amateur radio license. They operate on these frequencies because under certain weather and radio propagation conditions, their signals can extend all the way around the world, enabling them to communicate with other similar unlicensed stations.

Q. What can happen if the F.C.C. catches me operating on an unauthorized frequency?
A. You are subject to severe penalties, including monetary forfeitures, confiscation of your radio equipment, and possibly even jail time.

Q. I've heard that some of the "big name" amateur radio equipment can also be altered to operate on non-amateur frequencies, including the C.B. radio channels. So why are these radios not considered to be "non-approved C.B. equipment"?
A. First, it must be emphasized that use of this type of amateur equipment on unauthorized frequencies, including using it on the C.B. radio channels or other non-amateur frequencies in the 24 to 32 MHz range, is illegal, and doing so will subject the user to the same penalties as mentioned above.
That being said, there are legitimate reasons for some amateur equipment to be used on certain non-amateur frequencies, such as on military M.A.R.S. (Military Affiliate Radio System) and C.A.P. (Civil Air Patrol) frequencies. MARS and CAP radio stations are only authorized to operate on specific assigned (non-amateur) frequencies. With just a few exceptions, most of the assigned MARS and CAP frequencies do not fall within the 24 to 32 MHz frequency range. Although some models of amateur equipment (manufactured by companies such as Alinco, Icom, Kenwood, Ten-Tec, Yaesu, etc.) may be capable of operating on the C.B. radio channels, they do not display the assigned C.B. channel number, nor are they designed to deliberately facilitate operation on the C.B. channels.

FOR SALE:

7025 / 12AX7A new in box Hewlett Packard branded, Made In England.
Extra high-quality, black plate tubes. QTY 4 at $8.00 each

ECC82 / 12AU7 new in box Hewlett Packard branded, Made In England.
Extra high-quality, black plate tubes. QTY 4 at $8.00 each

6CB6A Tubes, new in box Hewlett Packard branded, USA.
Highest quality. QTY 15 available for $2.00 each

6146B QTY 2 - National Brand. Will sell for $16.00 the pair

807 QTY 2 - One marked Westinghouse, One JAN.
Both similar though. Will sell for $12.00 the pair

U.S. Army-Navy NOS 829B Tubes. Still in the boxes from WW2.
Equivalent to 3E29. Dual tetrode VHF transmitting final amplifier.
QTY 4 - will sell for $8.00 each

EL34 / 6CA7 audio power tubes - QTY 4 RCA new in boxes.
Will sell all four for $39.00 (List $15.00 - $25.00 each)

VF14 mic tube. New In Original Box - Telefunken VF14 Tube
As used in the world famous Neumann Microphones.
QTY 1 only - for $250.00 (List $1250.00 - $1750.00 each)

ITT type 5C22/8613 Hydrogen Thryatron tube, used - capable of
switching 4MW (that mega-watts!) very quickly.
Used but in good condition
QTY 1 only for $25.00 (List $275.00)

Hi,

I have the complete chassis and speaker (8") for an RCA Victor Model 9-X-572 Superhet AM radio for sale or trade. The chassis includes the antenna coil, the tuning indicator, and the original knobs. The whole thing works very well, but just doesn't have a cabinet. Please note that the tubes are *not* included in this offer (it's a standard AA5 setup). If interested, please send me your offer at msenecal1@juno.com. Buyer to pay shipping.

If you're wondering what the original radio looked like, go to:

http://www.radiotiques.com/collection.html

and click on "9X572".

Thanks!

---Matt

1141. FS/FT: Heathkit GR-38 solid state AM clock radio with manual - works!

I have a Heathkit GR-38 solid state AM clock radio with the manual for sale or trade. Orange in color. The whole thing is in good shape and works well, although there is a slight hum, making me think that some of the caps are getting a tad dry. There are no cracks anywhere, but the case does have some scratches on the top and bottom.

If interested, please send your offer to msenecal1@juno.com (buyer to pay shipping).

Thanks!

What crisis? I don't see no stinkin' crisis. Or do you mean the one
conjured up by the current Republican regime to scare hell out of the
citizens and take away our constitutional freedoms?

And if I'm not mistaken, he was using that SIG long before 9/11/01.

Believe it. Many enjoy a ham & cheese on rye, even (also un-kosher).
Many young people have "the other white meat" for their bar-mitzvah
dinners, even in Israel. Only so-called "orthodox" Jews don't consume
pig products.

BTW, did you know that Muslims don't eat pork, either? Maybe they're
closer than they like to think?

And for the record, with the advances in refridgeration there's no
reason to avoid pork anymore.

They did have the "pork riots" in Isreal during the 80's.
The othodox tried and almost did pass a law banning the sale of pork in Isreal.
The merchants(many reformed and arab) started giving away free ham sandwiches pork chops etc. Of course the ulta othodox went beserk and riots ensued.
Must have been fun:)
Sincerely
Ken

Ermmm... "FCC law?" You truly exaggerate. They're called "Rules and
Regulations" and they are not "law", Aanal Aaron.

And I doubt the veracity of your closing statement; there's no reason
for Yahoo to follow eBay's lead. eBay exclusively makes money from
auctions; Yahoo does not.

Again, it's not "law". And buying or selling is not a violation of
anything. Only certain *use* may be a violation.

no no no, voobner is the banana on this group and other groups.
He thinks he is the rules and Regulations man for the FCCl. He complains
about selling not legal items.
Example, HR-2510 10 meter radios. Nothing illegal about this but Golly,
that can be modified for CB, that's illegal, you can't sell that, etc.
Your scanner can receive cell so it's not legal. It is however since
it was built and sold before that law was passed. However, he will
argue the point and cause more wasted bandwidth here. If you look at
this group under the subject "Aaron's trolling ILLEGAL LIST", well,
that's him.
good luck with the 2004

HF 160-10 meter ham bands plus general coverage (100KHz-30 MHz). Solid state, multimode. The transmitter power has 10-100 watts output, 16 memories, dual VFO and operates from 12 VDC. Great radio for this vintage, great starter rig. I purchased this used 2 years ago, and had it officially checked out by ICOM service last summer. I recently bought a new ICOM and that is why I would like to sell.

From: tomg@fullnet.com
Message-ID: <11915d6.0208012001.ae31566@posting.google.com>
Source record: 3039

I need ONE page from IFR FM/AM-1000S manual:

I need one page from the service manual for the IFR FM/AM-1000S Radio Test Set (also known as the AN/GRM-114, with manual TM 11-6625-3016-14, which is the manual that I have.):

I have a scan of the military version of the manual. But page 5-114 is missing, with a copy of page 5-113 in its place.

The missing page should contain steps 11 through 14 of the "VCO Tuner A1A11 Alignment" procedure.

I also have a page, containing Fig 5-45, the "MM-100 Assembly A2A1A1", that has only the left half of the circuit board pictured. Assuming that it should show the whole board, I need that page, or at least the right-half of the diagram.

If anyone has this material, I will very-gladly pay for it. (Or, maybe we can work out a trade for something on my website, at http://www.fullnet.com/u/tomg/gooteesu.htm .)

If it can be scanned and converted to a jpg file and emailed to me, that would be really wonderful, as would a copy sent by mail (or even fax).

If you have it, PLEASE email me, at tomg@fullnet.com !

Thanks!

Tom Gootee

I have forsale a Kenwood TH-G71A dualband handheld. The radio is about 3 or so years old. I have a speaker mic for and a bnc/sma connector and speaker mic and the aa batery pack for it. The battery that comes with the radio is broken due to someone bumping into it, but it still ok, just cant carry the on the belt with the clip, if you have a pouch it's fine. I am asking $175.00 , but I am willing to listen to offers. Thanks

FOR SALE:

Crystal sockets for HC-6/U crystals.
If anyone would like some, I have about 10 or 20 of these available
for $2.00 each plus shipping

These are new parts. They are teflon and anodized metal.
They have two hole side mounting, with a clip that nicely holds the
crystal in place.

Great for repairing older rigs, or for homebrewing tube transmitters &
receivers.

This is NOT the same as FT243. These are for the similar sized
crystals that have thinner pins.

E-mail me if you would like some.

This is one new case of never used ferrite split beads with snap sleeves.
Made by the FAIR-RITE PRODUCTS, CORP. Part number 0443164151. Total of 126
in individual sealed plastic bags. These ferrite beads are used to suppress
RFI, EMI, and unwanted signals. They have an approx. inner diameter of 1/2",
an outer 1 1/4" square and 1 1/4" long.

Not really. I'm pretty easy going.

I am just tired of all the linking one is asked to do (I refuse). It's like a bait-and-switch.

If someone wants me to read something about what they have to sell, they should put it in that original e-mail notice and not linked to some other entity.

Basic law of sales: make as easy as possible for the potential customer to hand over his money.

73,
dale

Source record: 2851

New condition Yaesu VX7, includes original documentation and box. Warantee
card still blank. Unit is about a month old.
Price $340 shipped, Paypal or Money Order only.

Below is from the Yaesu website.

50/144/430 MHz: 5w Power
Dual Receive: V-V/U-U/V-U/GEN-HAM
Continuous AM/FM reception coverage of 500 kHz to 999 MHz (cellular
frequencies are blocked and non-restorable)

450 "Main" Memories
10 One-Touch (OTM) memories
Store your most-used frequencies in the quickaccess OTM bank!

40 Programmable Memory Scan (PMS)
Band-Limit Memories Use the PMS memories for setting upper and lower
scanning/operating limits in the Amateur bands.

12 Home Channel Memories
The "Home" channels may be set to a "favorite" operating frequency, or a
central operating frequency that may be used as a starting point for
operation. The 430 MHz Home Channel is also used for the "Emergency" beacon.

10 Weather Band Memories (U.S. Version)
Ideal for quick access to the Weather Band broadcasts, these memories may
be scanned in search of the loudest Weather station in your area.

89 Shortwave Broadcast Station Memories
The most popular HF Shortwave Broadcast stations are pre-stored at the
factory, for instant selection of your favorite station and program.

280 Marine Channels
The huge 280-channel Marine Bank allows full access to the excitement of
monitoring the world of Marine operation.

10 "Hyper" Memories
The Hyper memories may be used to store and recall a complete set of
transceiver configuration data, such as Dual Receive status, Spectrum Scope
configuration, scanning features, etc

Mine had severe parasitic problems that developed about 6 months after I got it. Burned up the bandswitch. Allan Measures helped me quench the demons. Otherwise, a great amp.

OK, slashing price on this to the "disposal level."
Next step will be to send it to the dreaded eBray.
At this low price you can't afford NOT to buy it!

CLASSIC 1940s-50s Differential 'T' ANTENNA TUNER
Large roller inductor type with turns counter.

Heavy duty large components Two variable capacitors,
looks like it would handle a kilowatt with ease.

The versatile circuit is configurable for either series or
parallel 'T' configuration. Has jumpers in front to change
set-up easily.

Has built-in SWR bridge featuring an E.F. Johnson meter with
controls for FWD, REV and gain.
Case is metal with hammertone gray finish,
and has a removable lid.

Final reduction to $75.00 plus shipping

E-mail me to purchase

The VX-5R is a tri-band radio with coverage on 6M, 2M, and 440 MHz as well as wide band receive. The radio is in excellent condition both electrically and aesthetically - no scratches to crystal, great sound quality. In addition to the basic wall charger, there is a speaker-mike, a Comet SMA-24 2M/70cm antenna, the CD-15 rapid charger (charges the battery in about 2 hours instead of 4-5), a "pouch" soft case, the barometer/altitude sensor (installed), and the ADMS-1E Windows software and cable for progamming. $250 + shipping.

I have a working Heathkit C-3 that I don't need, and want to sell. It is gray in color, in good shape with the usual use/storage wear, but a couple of the knobs have hairline cracks that could probably be fixed with cement (or just replaced). It is also missing the 1629 eye tube, although if an offer was good, I might be convinced to part with one of mine. I pulled a 1629 from another radio and tested it with the tube installed, and it correctly read all the capacitors and resistors I tested. I've also got a non-orignal manual (printed off of the BAMA) that goes with it.

I don't really know what this is worth, so I'll entertain all genuine offers. If interested, please e-mail me directly.

1240. Wanted: TV-7 Tube Tester Meter

I didn't know the asking price of $300 was too high. So, down to $275

have my Uniden BC780XLT for sale. I am going on a trip and need to sell
it ASAP
. Paypal preferred. my ebay feedback can vouch for my reputation
(over 250) The unit is in 9/10 cosmetic shape, some very small paint drops
on it from remodel (they will be gone upon shipping) 10/10 electronic
condition. I will include manual, power supply, 2 antennas and
original box. I leave wednesday late, so today is the last day available. I
will sacrifice for $275 shipped conus (lower 48). Photos upon request.

Picked this up at a hamfest several years ago but never used it. The previous owner claimed he'd just had it tuned up. Handsome looking rig but with a few dings, marks and scratches from being about 40 years old. Comes with matching power supply and instruction manual (operation, alignment, schematics, parts list). Pics availabe on request.

Original specs: 80/40/20 coverage, 200W CW/SSB - 100W AM, VOX

$100 plus shipping. With the power supply, the whole affair is about 50# so I figure between $25 and $35 to ship to either US coast. I take PayPal or money orders only. If you need to check my rep, I can provide my eBay ID.

FOR SALE:

Crystal sockets for HC-6/U crystals.
If anyone would like some, I have about 10 or 20 of these available
for $2.00
each plus shipping

These are new parts. They are teflon and anodized metal.
They have two hole side mounting, with a clip that nicely holds the
crystal in place.

Great for repairing older rigs, or for homebrewing tube transmitters &
receivers.

These are NOT the same as FT243. These are for the similar sized
crystals that have thinner pins.

TERMINAL BOARDS
New first quality terminal boards.

For those who build, repair or service antique amateur
radio equipment and/or audio equipment etc.
the following will be very useful.

Top quality fiberglass and phenolic terminal boards
in several sizes.
These have 2 rows of turrets for mounting components
and making wiring connections, and four mounting holes in the corners.

A) Measuring 8-3/4" X 1-5/8" with 21 pairs of terminals for mounting
parts etc.
QTY 3 available at $4.00 each.

B) Measuring 2-5/8" X 1-1/2" with 5 pairs of terminals for mounting
parts etc.
QTY 10 available at $1.50 each.

C) Measuring 2-1/2" X 2" with 5 pairs of terminals for mounting
parts etc.
QTY 1 available $1.50

D) Measuring 2-5/8" X 2-1/2" with 5 pairs of terminals for mounting
parts etc.
QTY 3 available at $1.50 each

E) Measuring 2-5/8" X 3" with 5 pairs of terminals for mounting
parts etc.
QTY 1 available $1.50

E-mail me to arrange purchase

re: Convertacom HT to mobile vehicle adapter (Motorola)

Hello there,

I'm pulling my MT-1000, HT-600 & P-200 Portable Covertacom out of service today. It's the drop in power supply, battery charger (dual rate... fast and slow), external amplified speaker (high power version) included and the mounting brackets.

I bought and have been using this unit for some time now for both UHF & VHF Motorola Portables... works very well with all the above models. We are going to trunking...

Paid almost $400 for it some years back... I'm asking $65 or best offer now. Drop me a direct Email if your interested... Please no spam or junk Email...

I'll also be listing a number of used HT-600, P-200 and one or two MT-1000 radios here in the next week. Watch for my listing... check my all positive Ebay feedback (my Ebay ID is my Email address you see here) for references.

thanks
73's
skipp

skipp@pilotNOSPAMPLEASE.ucdavis.edu

I have an absolutely mint Alinco DJ-X2000E handheld receiver for sale. I am the original owner and have only used this radio approximately 1 hour total. I am including 2 extra Alinco EPB-37N Ni-Cd battery packs. There is a total of 3 with the one that was included with the radio, Alinco EDH-16 AA dry cell battery case, Alinco ESC-39 soft case. I have the boxes and manuals. This radio comes from a non smoking environment. The frequency coverage is 0.1 MHz to 2149.999950 MHz no gaps. This radio is all mode WFM, NFM, AM, USB, LSB and CW. There are no dents, scratches or scuffs. I am asking $575.00 plus shipping from 48026.

I have three MV11C's for sale. These are the motorola spirit small VHF handhelds. Each one is new in box...all have been opened and tested/used for approx 1 hour. C/W rech. batt, belt clip, ante, and wall charger. All are on the Low Power Industrial freq's for BC (canada). Prgramable to one of two low power industrial VHF freq's. Asking 100$ each or best offer...shipping extra. Prefer to sell to someone in BC Canada as they are setup for freq's in that province...

Hi..

I have a McMurdo Silver receiver / transmitter combo made in
1947, these are the VHF receiver and VHF transmitter pair.

Does anyone know how I can determine what the fair market
value of this equipment is?

regards

Peter

1284. FS: GAP EAGLE DX Vertical Antenna

Newsgroup: rec.radio.amateur.swap
Date: 2002-09-01 13:04:19 UTC
From: Sidevalve <Sabbatai_zvi@hotmail.com>
Message-ID: <u334nu8b97o3ukji5bmjcshoa8t155qitt@4ax.com>
Source record: 2937
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

FOR SALE:

Gap Eagle DX HF Vertical Antenna - Mounts on 1.25" Pole
Covers 40, 20, 17, 15, 12 and 10 Meters - 21 ft. tall
No tuning to set it up.
All aluminum, Weighs only 11 pounds.
Three 80" Rigid counterpoises (supplied)
Supplied with the instructions.
It has no traps, transformers or matching coils to rob transmitted or
received power.

Manufactured locally by GAP in Florida.

Eagle DX - 6 Band Multiband DX Antenna
The Eagle is the smallest antenna in the GAP product line.
Its development was the result of your requests for a low profile,
high efficiency GAP antenna.

The Eagle DX-VI weighs just 11 pounds and can be installed almost
anywhere - at ground level, on a pole, on your roof or atop a tower.
It is essentially a set of vertical dipoles - the optimum singular
DX antenna. No traps, coils or transformers are used to achieve
multiband operation in this antenna either.
Why is that significanat? Traps are the "weak link in the chain"
of a multiband antenna.
Critical to the design of the GAP Eagle was the requirement to permit
operation anywhere on all of its designed frequencies.
The Eagle provides full coverage with a VSWR less than 2:1 on 40m,
20m, 17m, 15m and 12m, and approximately 500 KHz on 10m
without readjusting. 10m operation is further optimized with a
supplied extender. Compare that performance to any
other low profile vertical. With the Eagle, as with all GAP
antennas, you will not need to buy a tuner.

If a rare DX station appears on 7.050, but, you normally work the
SSB nets around 7.250, just slide the VFO and key the rig!

If the band is wide open, you might work a LU6 with a coat hanger,
but when conditions are less than perfect you want the highest
S meter reading an antenna can provide. Efficiency is critical.
The efficiency of the GAP Eagle is without equal.
It has no traps, transformers or matching coils to rob
transmitted or received power.
For the highest S meter, choose a GAP Eagle.

TUNING - Tuning can be a nasty task particularly if you mounted the antenna on your roof. In fact, it can become dangerous as trip after trip to readjust the antenna raises your frustration level and you lose your "cool". A GAP Eagle , like all GAP antennas, comes completely electronically pretuned from the factory. There is absolutely nothing for you to tune.
If you're looking for a reliable, efficient, broad band low profile antenna that will serve you well and dig out the DX, the GAP Eagle is for you.

Antenna is in my garage - no disassembly needed!
Clean condition.

New cost $299.00 - will sell for $125.00

I didn't miss it.

Drove over Friday night, spent the night about 20 miles away, got to the boneyard just after 0600 and started setting up in a light mist. Had a stack of old Heath gear for sale. Set up my table, started unloading boxes, and had most of it sold before 0630. Sat around under my umbrella with plastic covering the rest of the stuff until around 0930 when a guy came up and bought the rest of it.

Is this a great place or what? Went there with a stack of boat anchors and junk, came home with a wad of $20.00 bills and a couple of hundreds. Closet is cleaned out, wife is happy.

Someone said it rained all day.

If I was trying to fix this, assuming this is just a 7-segment
readout and not one of those readouts with decoder+latch+counter,
would be to find out what it is. Find out the size, whether it's
common cathode or common anode, what side the decimal point is on,
and perhaps even current consumption. Find the data sheet, and
you'll get this information.

Then, find some available readout that matches the necessary requirements,
and buy those. Buy a full set, and replace them all, to avoid
differences between types.

I just checked my ECG replacement guide, and it wasn't listed
in there. That would have made it really easy to check.

It seems a tad odd that 7 out of 8 have gone bad. If the one
that still works is the right most readout (ie the least significant
digit), you might look elsewhere assuming you have verified bad
readouts. The circuit might have blanking on unused readouts,
and the LSD is on simply to show that things are working; when you
apply a signal, the needed digits will light up. Or, the circuit
may multiplex, and the portion that does the multiplexing isn't
working properly.

> Someone said it rained all day.

And they were right!
We got there Friday morning about 10:30 and it was already
rocking.
Ralph W4ZO and I spent most of the day walking around looking
for goodies while he wife Jen watched our stuff in the tent.
Made my best sales Firday.
Went home Friday afternoon and got back about 06:05 Saturday AM.
It's only about 1 1/2 hours from Wesley Chapel to Shelby.
Mostly misty in the early morning, then about 10:30 it started
really raining. I sold my Heath SB-110A station about 11:30
and decided to pack up.
It rained all the way home, we had almost 3 inches in the
rain gauge at the house.

Does anyone know who it was that was set up in the over flow
flea market area just outside the back gate, that was selling
a bunch of military gear? He had several PRC-6's that I was
interested in, but the guy that was watching the stuff didn't
know how much anything priced for.
I checked back several time and he was still there without the
owner. Must not have wanted to sell it very bad... huh?

I've been going to Shelby since 1970 and this was my frist
Friday. I will be there on Friday every year from now on.

FOR SALE:
Crystal sockets for HC-6/U crystals.
If anyone would like some, I have about 10 or 20 of these
available for $2.00 each plus shipping
These are new parts. They are teflon and anodized metal.
They have two hole side mounting, with a clip that nicely
holds the crystal in place.

Great for repairing older rigs, or for homebrewing tube transmitters
& receivers.
This is NOT the same as FT243.
These are for the similar sized crystals that have thinner pins.

E-mail me if you would like some.

Just a word of advice; the digital display parts are getting rather hard
to find if the FT301D display unit goes bad. I'd recommend getting the
Analog display unit only, if you have a choice.

Ed (FT-301S)

1320. Help finding a manual for a Standard 528a,, 628a, or 228a HT please

Newsgroup: rec.radio.amateur.swap
Date: 2002-09-04 04:18:19 UTC
From: n0jam@excite.com
Message-ID: <b6447889.0209032018.28e6a777@posting.google.com>
Source record: 2823

Hello,
Lost the manual for this HT and it has quite a few moves on it. Some
I just can't remember. I've searched just about everywhere I can think
of for it.

Does anyone happen to have one for sale, or know where I can find one
online? A copy or anything. I have the 528, but any of the 3 will do.

Thanks in advance.

Yaesu FT-100 w/ TCXO, 6khz AM filter, CAT and Packet cables

This is a great rig that I have been very happy with. My main use has been 6M, 2M and 70CM SSB/FM and shortwave listening. It has also been used 160M - 10M by other HAMs during field day. I have never had a problem with it, the built in DSP filters are great for pulling in the weak DX stations. After purchase I added the TCXO and the 6khz AM filter, it also comes with a packet interface cable, computer interface cable and the original XO module. I really like the FT-100 and have enjoyed hundreds 6M SSB contacts, the *only* reason I am parting with it is a 3000 mile move. I will not have the space or time for much more than using my HT.

Receive: 100 kHz - 961 MHz (Cellular blocked)
Transmit: 160 - 6 Meters 100watts, 2 Meters 50watts, 70 Centimeters 20watts
Emission Modes: A1 (CW), A3 (AM), A3J (LSB/USB), F1 (9600 bps Packet), F2 (1200 bps Packet), F3 (FM)

This item is listed with Ebay at

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1379212230

Hi everyone, this is your chance to purchase a table at the Clear Lake ARC HAMFEST 2002 on Sept 7th 2002

www.clarc.org/ereg.htm to order tables (you'll have to pay at the door) but please use this for sign up

www.clarc.org/hamfest.htm IF you have an older netscape you won't see this page.. why?? Don't know

Directions to Hamfest

Get on I45 and go to NASA Road 1 - travel EAST - cross Tx 3, cross El Camino, nearing Clear Lake you'll see the HILTON HOTEL.. the next road is SATURN.. go past Saturn, then TURN LEFT at the NEXT SIGNAL LIGHT into the NON-WATER side of Clear Lake Park. Follow the road.. the building with the BLUE roof is the Bay Area community center.

73 and hope to see you at HAMFEST 2002

BOB KA5GLX

Your prices are a little high my friend.
Try looking at: http://www.allelectronics.com/index.html

Example: 1/2 inch with plastic snap is $1.50 each.

I just purchased a bunch, and they work great !

for sale:

NEW in box, pro 93 trunktracking scanner with all accessories that
come with it.

this is version 1.0 and i have found no bugs with this radio. It is
more stable than the 245xlt i use to have, and the pro 92b that i
do have.

it comes with winscan software and computer cable for programming.

199.00US includes the express insured shipping with a tracking number

thanks
shyguy@cogeco.ca

How do you know all this if the radio is "NEW in box"???
Let me guess. The ever popular "I bought the radio, and only took it out of the box to see if it worked." This is a strange phenomenon found most often on eBay. People buy radios only to take them home and test them, and then sell them for a loss.

....And there are no version 1.0's without the text bug.

The one where the 1.00 firmware uses an 8 bit counter - which goes from 0 to 255 - to keep track of the text tags in 300 channels.

I can't do modulus 30 arithmetic in my head, but in decimal terms the text tags for the first 44 channels and the last 44 channels share the same address space and will overwrite each other.

This bug has been thoroughly documented (see discussions at the Yahoo! PRO-93 group) and recognized by Radio Shack as a manufacturing defect. All version 1.00 radios have it. Later versions do not.

But I'm kind of wondering...since your radio is "new in box" when would you have had the opportunity to see this bug in action?

Here are a few details of interest those not familiar with this radio:

1. It lists for $249.99, and has a history of going on sale for under $200.

2. If you have a Version 1.00 that is under warranty, Radio Shack will fix the text bug for free.

3. RS does not make an interface cable for the PRO-93, but it's the same as for the PRO-92, now discontinued. All interface cables for this radio are third party or home made. There are some excellent varieties of both: see http://www.pro-92.com/pcifcable.htm for a rundown. When buying a cable from someone, you have to check whether it's a full two-way cable or just one-way. One-way cables are definitely inferior.

4. The preferred software - by a huge margin over any of the others - is a free download from http://www.starrsoft.com/freeware/Win93/

So it's not new...it was used for a week.

When you programmed it, did you put text tags into channels in all the banks?

"New" = new.
"Used it for a week" (which probably really means 8 months since it's
a Version 1) = used.

yes with no problem. if i hit func and trunk during a transmission i
can toggle between banks displayed and alpha tag, Not sure
what the problem people are having with this radio?

Well, since the text tag bug has nothing to do with trunking, you're
resorting to gibberish.

Next time try a henweigh.

I recently got a pro-93 ver 1.00. Never noticed the text tag bug until recently. Apparently, in my experience, it only happens when cloning from another scanner or uploading from a computer. If you never do this, you won't see the bug.

>won't see the bug.

It happens when you've entered text tags in both the first and last 44
channels. The pointer to the text memory wraps after it gets past
255. You can work out which channels overlay each other.

There are two memories for the text tags. One is fixed ROM, where the
default bank#, channel# tags are stored. That's fine. The second is
programmable memory, where tags you enter are stored. There are 300
locations for those, but the 8 bit pointer can only access 256 of them
before it wraps.

If you never change the factory default in one channel, then the ROM
is referenced for that tag and there will not be a conflict between
that channel and its conterpart. If you enter a tag with text
identical to the default, then the radio references that instead of
the ROM and there will be a conflict.

Since manually entering text tags is a real chore, you're not likely
to get to the last couple of banks unless you're using software.
Interestingly enough, the tags in the overlapping channels are in the
scanner and do not conflict internally: it's just the ability of the
1.00 radio to display them. Clone a 1.00 to a later model and they
work as expected.

There is a huge discussion of this at the Yahoo! PRO-93 group.
Probably the second biggest topic. I think the biggest topic is the
subsequent discussion correlating date codes with version 1.00 vs the
later fixed ones.

FWIW, whether or not this bug is a problem depends very much on how
you use the radio.

Source record: 2962

I purchased a hand help 2 meter ham radio awhile back (maybe 2 1/2 to 3 years ago). I had intentions of taking the Tech. test but I don't think it will be happening as I don't have the time left. It is a Radio Shack HTX 202 (I think that is the correct model # as it is packed away and I can't get to it right now). If you are interested I will verify the model #. Obviously it is brand new and has never been used and I would guess the rechargable battery pack is no good anymore. I am selling the radio along with the latest study book and also the one before that. if anyone is interested. I will have to find out what it's value is. I believe I paid a bit over $200 for it. Thank you, Teddy in central Vermont.

There is a new Ham Radio Portal online at

http://www.hamradio-portal.com

This Portal contains news, Information and

special topics like Echolink software and many more.

It has a Weblink and download database.

A new Webboard to discuss topics is also there.

You can also submit news and topics what

comes available on the top of the page!

It should not to be in compete with other Portals.

Just a new one with a new look and nice features.

We hope to see you there!

Andre

1365. FS: New Military RTTY Teletype Keyboard/Terminal

I have (2) Model # AN/UGC-74B(V)3 brand new military communications keyboard/terminals. Very heavy duty (100 lbs. each). Rubber booted keys and switches. These come with the (2) handle military style aluminum cases with pressure locks. Designed for use with most Harris military radio's for Baudot applications. One unit has an unopened roll of teletype paper and new ribbon included. I would suggest that these be pickup only here in RI.

$50 each

Thanks and 73.

Allot of different parts for the builder. Turns counter, Verinier
Dial, National RF 175A plate choke, 3 blowers, several potentiometers,
several PJ-068B mic plugs for collins and drake, dow key relay,
several other relays for your amp or radio project. 2 coil forms, 8 HV
caps, ! filament transformer 5v@20 amps, a HV diode board, 2 pill
transistor amp with a 13.8 volt power supply built in to run a mobile
in the house unit runs off 110 volts. A nice collection of different
sized coils. A couple more small transformers. More items you will get
everything in the pic

I am looking for a good condition cabinet for my Racal 6790 receiver;
5.25" front panel, 18.5" deep. I have a fair-good condition black steel
cabinet that will fit an R-390-/51J size radio for trade. Anyone???

I have for sale crystals for the following frequencies for the Drake R-4
line:
Each is $15.00, postage paid to continental US or $110.00 for all.

1.5 - 2.0 MHz
3.0 - 3.5 MHz
4.5 - 5.0 MHz
9.5 - 10.0 MHz
11.5 - 12.0 Mhz
15.0 - 15.5 Mhz
15.5 - 16.0 MHz
28.0 - 28.5 MHz
29.0 - 29.5 MHz
29.5 - 30.0 MHz

1385. FS: Drake R-4B Receiver

Newsgroup: rec.radio.amateur.swap

I have for sale a Drake R-4B receiver in very nice condition with
good condition copper. This receiver is sensitive and works well
with no modifications.
Asking $200.00 plus shipping from Zip 76001. Shipment to continental
USA only.

1387. FS: Yaesu FT-8100R w/ Remote Separation Kit

Newsgroup: rec.radio.amateur.swap
Date: 2002-09-17 03:25:10 UTC
From: Jeremy <n6mot@protas.org>
Message-ID: <qgxh9.9799$yt3.4725361@newssrv26.news.prodigy.com>
Source record: 2990

I'm selling my FT-8100R WITH the separation kit. The radio was rarely used. It was installed in the vehicle I'm selling, so I obviously have no more need for the unit.

The radio is in great shape. I've never had any problems with it and loved using it on road trips.

I'm looking to get $500, but try making me a reasonable offer!

73,
Jeremy
N6MOT

re: wtb: Zetron DAPT 1000b manual please

Hi there,

Pretty much says it all... I'm looking for the Zetron (paging terminal), model 1000b manual. If you have or know of a source for said animal, please drop me an Email to the address below.

Please no spam, sincere on topic replies only please reply to my listed Email address (remove the NOSPAMPLEASE).

I'm willing to pay any fair price...

thanks

skipp@pilotNOSPAMPLEASE.ucdavis.edu

remember to take the NOSPAMPLEASE out to reply to me.

Hi there,

I've got a nice working Motorola GP-300 two channel UHF hand held for sale. Basic radio with a battery and antenna... sell for $85 or best offer after one week.

This unit works well, you will need to buy a charger as I never received one when I bought the HT a year ago. I've been using my GTX charger on it with great results.

Currently on a 461.xxx repeater with talk around, does PL and DPL, very good working condition and the cosmetics are good.

All positive Ebay feedback (over 500) for references and you can pick up in person, should you be around the greater Sacramento, CA area. if your close by. Buyer pays actual shipping. Repeater service available in the Greater Sacramento - Northern SF Bay Area should you want to use this unit on one of my machines.

Please remove the NOSPAMPLEASE from my Email address to contact me. Serious inquiries only and please.. no spam.

thanks

skipp

: Hi there,

: I've got a nice working Motorola GP-300 two channel UHF hand held for
: sale. Basic radio with a battery and antenna... sell for $85 or best
: offer after one week.

: This unit works well, you will need to buy a charger as I never received
: one when I bought the HT a year ago. I've been using my GTX charger on it
: with great results.

: Currently on a 461.xxx repeater with talk around, does PL and DPL, very
: good working condition and the cosmetics are good.

: All positive Ebay feedback (over 500) for references and you can pick up
: in person, should you be around the greater Sacramento, CA area. if your
: close by. Buyer pays actual shipping. Repeater service available in the
: Greater Sacramento - Northern SF Bay Area should you want to use this unit
: on one of my machines.

: Please remove the NOSPAMPLEASE from my Email address to contact me.
: Serious inquiries only and please.. no spam.

: thanks

: skipp

1407. fs: Kenwood UHF TK-373 portable latest/greatest model!

Newsgroup: rec.radio.amateur.swap
Date: 2002-09-19 23:29:25 UTC
From: Skipp <skipp@pilotNOSPAMPLEASE.ucdavis.edu>
Message-ID: <amdmklncj1@woodrow.ucdavis.edu>

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

re: Kenwood tk-373

Yep, I've got the model number right. Kenwood has a new series of Portable radios out, the tk-373 in UHF. It's so new, I can't even find a picture of it on the web yet. ... but I'll find one or snap a picture of it shortly.

Let me tell you about them... smaller than a tk-380 with the same type bells and whistles plus. Does both conventional and trunking modes and various combinations of both at the same time. It's standard commercial range is 450 to 470Mhz, but I've also used it (same time) down on my Amateur Repeater (ham) with great results. It also goes above 470Mhz.

So here's the story... I bought a quanity of these radios new and the customer changed their mind and went to VHF. So I'm going to sell these radios below regular dealer cost.

I had to buy the batteries, smart chargers and antennas for these units. All have been checked, most all have no or little use time (other than a couple of daily demos and tryouts for a few of the batch).

If your serious about buying a tk-373 package at a price, drop me a reply Email to the address below. For less than the regular retail cost, I'll sell the radio, battery, antenna and smart charger!

I want to sell each radio with its new battery, antenna and charger complete in any number of said packages. The package price will be below dealer cost... yes I wrote dealer cost.

Full factory warranty and free programming. Please contact me if you have serious questions or are honestly interested in buying some radios. I've got 500 plus all positive ebay feedback, references and available repeater service in Northern California (Sacramento and North SF Bay Areas).

Should you be a local, I'll even give you 6 months free repeater service (not bad..!), trunking or conventional operation.

The TK-373 is a well built radio, full power... I think 5 watts (its been more than enough for regular repeater operation). The display is alpha numeric and programed to say anything. The really cool thing about the radio is that any of the front panel buttons can be made to do almost any function (channel/mode/system up and down, monitor mode, squelch on/off, scan, priority scan, add/remove channel from scan, light the display). I really like the button assignment feature, does great things for conventional and trunking mode operation.

All the standard accessories are available. I can order anything you want from Kenwood. Or you can get them yourself off the web at higher prices.

Drop me a note if you have questions, please no spam or smoke blowing...

cheers and thanks for reading this...

The receiver described below is available for sale on EBAY

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1382802762

TRANSIT NAVIGITATION SATELLITE RECEIVER

This receiver was manufactured by Westinghouse for the US Navy.

Was used with the Transit Navigation Satellite System in operation form the early 60's - 1996.

The Transit Navigation System is the precursor of todays GPS System.

This system was removed from a Polaris Submarine.□ (Possibly the HMS Resolution)

A version of this system was on all Polaris Subs and was used to target the missles and position the sub.

Contition is Mint but I am unable to tell if it is operational as I do not have manuals, cables or other devices that may have been originally included.

What you are bidding on is the main reciever unit.

System is very heavy (1700Lbs) and will require road shipping.

I believe that this in the most hard to find of any military receiver.

Thanks for the visit.

I have a very nice Heathkit SB-221 2 KW amplifier that covers 80 through 15 meters. The pair of 3-500Z tubes will put out the legal limit.

Pictures are available at
www.iscdata.com/ebay/sb221.jpg
www.iscdata.com/ebay/sb221_1.jpg
www.iscdata.com/ebay/sb221_2.jpg
www.iscdata.com/ebay/sb221_3.jpg
www.iscdata.com/ebay/sb221_4.jpg

I would prefer to trade it for something along the lines of a Kenwood TS-50 or Alinco DX-70 type rig instead of putting it up for sale or putting it on eBay.

I am located in the Dallas, TX area and will deliver locally.

If interested email me at k5hj@qsl.net and lets see if we can deal.

1425. FS: IC-2000H & Astron RS-20A; surge damaged

Source record: 2778

Make me an offer!

I've got an Icom IC-2000H 2-meter mobile rig that I was using in the shack until a power surge (from lightning that came into our house on our ground line)zapped it. Cosmetically it's in mint condition, and inside no damage is visually apparent. But it doesn't power up. It could be dead as a doornail, or one component could be zapped and 50 cents will put it back in service. I haven't had it looked at and don't care to since it's been replaced. It's just taking up space in my shack. Manual, box, mike, everything included. All offers will be considered.

I also have an Astron RS-20A PS that suffered the same consequences. You can see a burn inside, right near where the power cord enters the power supply. Again, one cheap component may put it back in service or the entire thing may be gone. Again, cosmetically it's in excellent condition.

In the very least, both are salvageable for their cabinets and accessories. The mike on the IC-2000H is a DTMF mike with up/dn switches and a lock switch -- it also has a telephone-style 8-pin modular plug.

Buy at your own risk, and any price, no matter how low, will be considered! I'll be happy to e-mail you photos of both, inside and out, at your request. Let me know if you're interested.

"Max power, no amateur staion should be able to harm this, vacuum variable capacitors, intrisically safe cabinet, turns counters, 0-5 amp rms output meter, 5kV rf vacuum components thruout. Smallest package of this brute tuner, photos show rugged aluminum and stainless steel cabinet, double shielded rf area and shielded directional coupler and optional (built in) vacuum relay/cpu stuff for selecting two pre-sets. Setup with optional feet for desk top use, or put wings on it and rack mount. Has pressure reliefe valve on the bottom for air transport."Also has the Rubber gaskets to seal up the unit. This piece is in Excellent condition.1.6-30mhz I DO HAVE SCHEMATIC FOR IT.
Has SO-239 radio/antenna connections on the back.
350.00+shipping Or might be interested in a trade on something.

1430. FS: Multi-Elmac Receivers

Newsgroup: rec.radio.amateur.swap
Date: 2002-09-27 21:39:49 UTC
From: Sidevalve <Sabbatai_zvi@hotmail.com>
Message-ID: <cvj9pusivtlejkh6ib6kjsnl4mp74mf3c9@4ax.com>
Source record: 2783
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment

FOR SALE:

Multi-Elmac mobile HF tube type receivers. These are pretty hard to find.

1) PMR-7 receiver has ten tubes, double conversion superheterodyne covering
the 160, 80, 40, 20, 15, and 10 meter amateur bands, plus the standard broadcast
band. Designed primarily as an efficient communications receiver for mobile use,
it is also especially suitable, because of its small size, for (1) marine and aircraft
installations; (2) portable operation; and (3) as a fixed station or monitoring
receiver. It is not intended as a converter to accessory to another unit, but a
complete receiver, employing a separate power supply and speaker as described
in the manual. Every effort has been made to furnish the user with an extremely
stable receiver of rugged construction, compact layout, and high sensitivity.

Very collectable...requires a power supply (See below)
Unit is in good condition. All original knobs - looks to be complete.
I have not fired it up as I do not have a way to do that easily.

The external dimensions of the PMR-7 receiver, including the control knobs are:
height 4 5/8", width, 7", and depth, 11 1/2". The depth behind the panel is 9 7/8".

Available for $75.00 plus shipping

2) Model PMR-6A covers 160-10m ham bands.
Very collectable...requires a power supply (See below)
Unit is in good condition. All original knobs - looks to be complete.
I have not fired it up as I do not have a way to do that easily.
This is the matching receiver for the Elmac A54 and AF-67 transmitters.
Covers 160-10 meters on AM and CW.

Available for $50.00 plus shipping

3) Multi-Elmac 6V DC power supply - presumably will work with either
of the receivers.
Available for $30.00 or for $25.00 with either radio receiver above.

See N9BOR's site for pictures that will give you an idea of what these
radios look like if you are not familiar with them.

```
i'm looking for a sb-220 or 221 with good tubes and
a good power supply for conversion to 6 meters...
any similar amp using 3-500's would also be considered...
i need a starter with two 3-500s, as i want to run full power on 6!

thanks
mitch, w4oa

Source record: 2787

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1384590020

MFJ-921 Dual Band VHF tuner covers 2 Meters and 220 MHz. Built-in SWR/Watt-meter measures SWR in 2 power ranges 300 or 30 Watts. Meter is usable for both 144 MHz and 220 MHz bands. Low SWR with practically any antenna. Handles 200 Watts. Designed to match a wide range of impedances for both mobile/base operation. SO-239 input/output connectors, wing nut post ground. Eggshell white and black aluminum cabinet. Fits just about anywhere.
Unit is in good condition. Some discoloration on top of chassis, and some slight wearing of "Model" letters on front of unit (just under MFJ logo), but unit is completely functional.

Source record: 2789

I just picked up a RELM RSP-400 with programmer for short money (I know, I know RELM....but the price was right and the radio was taken care of), and I'm looking for a SM45 Speaker mic, or any suggestions on a compatible alternative (without making one).

Any help is greatly appreciated. Pleas erespond via e-mail at edburke@firegroundphotos.net, as I don't get to the NG often.

FOR SALE:

Two James Millen adjustable coils on ceramic forms.
Type 69045 Dimensions 2-1/8" long X 1/2" diameter.
Single hole mounting, solder terminals.
QTY 2 available for $4.00 each
http://home.cfl.rr.com/happysurfer/imag/two_james.jpg

3 turn link with two tube plate caps attached.
Ideal for homebrewing.
Bakelite swinging arm for coupler. Pivot goes to ceramic "BVL" Jack
bar
with 4
metal jack sockets, and pivot brackets that are wired to two large
plate
caps made
for tubes with 1/2" diameter plate cap. Part of a BVL tank system.
Has enameled copper wire and some very useful hardware attached.
Link coil dimensions 2-1/2" diameter. Enamelled 18 gauge copper wire.
QTY 1 only at $5.00
http://home.cfl.rr.com/happysurfer/imag/3turn_link.jpg

6 turn air wound coil - airdux style. Dimensions 3/4" long X
2" diameter. Inductance 2.2 uH.
One only - available for $3.00
http://home.cfl.rr.com/happysurfer/imag/6turn_air_wound_coil.jpg

18 turn coil. Airdux style. 1.75" long and 2" diameter. 10 TPI.
12.2 uH. Will sell for $5.00
Similar to above coil only longer. Picture available.

30 turn air core coil. Dimensions are 4" long and 2" in diameter.
Inductance is 18 uH. QTY 1 only at $6.00
http://home.cfl.rr.com/happysurfer/imag/30turn_air_core.jpg

48 turn air core coil - airdux style. Has Dimensions 7" long X 2"
diameter.
Inductance is 29 uH. QTY 1 only available for $10.00
http://home.cfl.rr.com/happysurfer/imag/48_turn_air_core.jpg

91 turn air core coil - Measures 6.5" in length and 1.5" diameter. 14
turns per inch.
65 uH inductance. Excellent with plexiglas support and four mounting
holes. QTY 1 only for $12.00
http://home.cfl.rr.com/happysurfer/imag/91turn_air_core_coil.jpg

Ceramic coil, split off-center. Has total of 20 turns with a
tap at 13 turns.
On white ceramic form - former dimensions 3" long X 1.5" diameter.
Coil length is 2". Inductance is 8.56 uH.
Qty 1 only for $3.00
http://home.cfl.rr.com/happysurfer/imag/ceramic_coil_split.jpg

Ceramic coil with approx 110 turns of green cotton covered wire.
White ceramic form has dimensions - 2" long X 1.5" diameter.
Inductance is around 330 uH. Suitable for AM band or LF applications.
Has screw terminals and solder lugs for connection.
New old stock. QTY 1 only for $4.00
http://home.cfl.rr.com/happysurfer/imag/ceramic_coil_with.jpg

Coil form, ribbed white ceramic. Dimensions are 5" long and
2" diameter.
Ribbed style with slots for wire. Designed to hold 26 turns and
would have about 20 uH. Has 4 mounting holes on each end.
Has been repaired; looks fine, hence low price.
Qty 1 only at $1.00
http://home.cfl.rr.com/happysurfer/imag/coil_form_ribbed.jpg

Coil form - odd design ribbed ceramic former with 6 terminals on
base and three nice threaded holes for mounting screws.
Dimensions are 2-1/2" tall X 1-1/8" diameter.
Inner coupling coil is 7/8" diameter with tapped coil of enamelled
wire brought out to three terminals.
Qty 1 available for $3.00
http://home.cfl.rr.com/happysurfer/imag/coil_form_odd.jpg

Multi-tapped coil. Unique design attached to a PC board with a tap
for every turn.
Airdux type air core form. Coil has a total of 32 turns and dimensions
of
4" long X
1.5" diameter. Approx 12.5 uH.
QTY 1 available for $6.00
http://home.cfl.rr.com/happysurfer/imag/Multi-tapped_coil.jpg

14 MHz plug-in tank coil with link coupling. 20m coil on 5-pin base.
Marked as model 2420. Medium size. Airdux style coil has 11 turns
and the link outside it has 3 turns. QTY 1 only for $5.00
http://home.cfl.rr.com/happysurfer/imag/plug_in_coil_with_link.jpg

More soon.

I dug out my original Collins 516F2 power supply speaker. Great condition, used with my original kwm-2a which I sold circa 1995 with the PM-1 power supply on the back. When parked, this unit worked great...

So what is one worth now'a days..? I see some ads in various mags by guys buying them direct, but I've no idea what to ask...

your thoughts...?

thanks
skipp

Why is it that we must feel like we need to screw someone out of every penny that we can get for something?? Is that what this hobby and country have gone to?? I have given away parts to various rigs because I didn't have much invested. In fact there were times I gave someone a part to get their rig going just to keep another boatanchor on the air even though I had $$ invested in it. I belive for the most part everyone is not a gold digger. Keep asking an ignore the "freds" that want as much as they can squeeze the turnip for. 73 Larry WA9VRH

He can't find what its worth, so he probably will keep it.

BTW, there is a link somewhere on the Almost All Digital
Electronic's website that gives eBay auction price spreads
for various pieces of ham gear, that's where I would start
for some ideas of value.

1448. FS Yaesu FC-20 Antenna Tuner

Newsgroup: rec.radio.amateur.swap
Date: 2002-10-05 15:41:17 UTC
From: Richard Miller <k1rdm@attbi.com>
Message-ID: <xKDn9.48127$Pz.38142@rwcrnsc51.ops.asp.att.net>
Source record: 2701
Cross-posted to: rec.ham-radio.swap,alt.ham-radio.marketplace,rec.radio.amateur.swap

For Sale: Yaesu FC-20 Antenna Tuner. Works fine, like new condition with box and manual. Also have switch which disconnects tuner from FT-847 to allow use of CAT interface (can't use both at the same time, and requires power to be recycled).

Reason for selling: switched to SGC237 AT and random wire.

Asking $190 plus shipping

Rick

According to the following link, the average price on eBay runs around $336.
Definitely worth trying to sell.
http://www.aade.com/hampedia/collinsp.htm

Nice working condition. Hard to find 6-meter all-mode portable,
with built-in whip (or SO-239 for external). Runs on 6 C Cells
(alkaline or Ni-Cad) or external source. Works well. Great for
camping or mountaintopping.

Thanks for the look.

Thank you everyone for your replies, even those which seemed a little jadded. Yeah, I've seen the ebay hype and could easily find some auctions that have closed. But I like the opinions people give out here better.

It doesn't matter to me if I sell it today or never, just thought to ask. The ideal thing would be to buy another KWM-2a, but after seeing a station sell at the Livermore, CA. flea market (last sunday) for $800, I don't think I'll invest in another Collins HF Station.

So back to the closet for now, put it on top of my still in the box unbuilt Heathkit SB-1000 HF amplifier.

chow for now

Ha, I'll bet you could get a grand or better for that unbuilt SB-1000 amplifier. I think that you already know that. Why put the 516f-2 back into the closet when you are not going to invest in another Collins? Nothing jaded about my reply, seems as if you are a very good at fishing though. Chow for now. 73 de Fred.... Oh, PS, I have a very nice looking/working Hallicrafter SX-115. I wonder how much its worth? Any ideas??? Lets see, also an excellent KWM-2/with good 516f-2/664 electrovoice mic/w clamshell base. Hummmm, I wonder. So, how much for your 516F-2???????????

Collins 51S-1 for sale.

It comes with an excellent full copy of the manual, SSB/CW filter, and power cord. As always with older gear sold as is.

Very fine inside and outside. Has the NATO-MIL- modification with an extra BFO switch on the front , where the emblem should be, for extra bandwith on SSB signals. I do not have the emblem. Email me for pictures.

World wide shipping.

Selling for highest bid over $1000,- USD + shipping.

From: Mark Rehorst <rehorstmark@netscape.net>
Message-ID: <1u37qu0nlk6589hclvuoia70c87tjakgfr@4ax.com>
Source record: 2713

New and updated as of 10/7/02!

You can download a ton of Allied SX/AX-190 receiver information
in a single, 2.2 MB .pdf file here:

http://home.attbi.com/~akikoi/wsb/Allied-SX-190-Info-Oct02.pdf

The file includes:
Allied Radio Shack Service Manual
Allied Radio Shack Owner's Manual
Ad from CQ magazine, May 1972
Ad from Radio Shack catalog
Review from 73 magazine
NASWA review by Ed Shaw
QST magazine modifications
CQ magazine mods, March 1973, by Bruce Mackey
Bandswitch mods by John Kolb
NASWA-FRENDX mods by Ed Shaw, May 1974
Comprehensive Technical Manual by Ed Shaw
Getting Reacquainted with the SX-190 by Ed Shaw, 4/77
Allied SX-190 Revisited, by Ed Shaw, 6/82

Thanks to Bob Bachus for converting everything to .pdf format!

If anyone has cleaner copies or additional info, I'd like to add
it to my collection. Please email.

Thanks!

Hello everyone

While looking at the list of Callsign Trustees with 2 or more calls at:
http://www.ah0a.org/FCC/Clubs5.htm
I put a number of the calls in the Repeater search engine at:
http://www.artscipub.com/repeaters/showrepeaters.asp

I noticed that a number of the clubs listed in the top 10% of the list
do not have a repeater listed even though they are listed as
networked clubs, repeater groups, systems and associations.
I found that to be really strange.. Dont you?
Then I looked at some of the club names and calls
This is what I found.
1) A number of different clubs have the same prefix's.
I find that confusing as it must be hard in that area
that quite a number of groups have the same suffix calls..
2) Some of the names of the clubs just scream out "Question Me"
These clubs that are named after sports heroes, the trustee or
their qth address, or other names such as the Jammers for Jesus
or the Richard Burton ARC (both who are finally being questioned
by Riley).
3) A number of different clubs that have the same issuance date
for the callsigns.. Is that strange that the boards and members
of these clubs can all agree on their calls at the same time?
4) If some of these trustees are supposed to monitor the repeaters
and other transmissions of these clubs, it must be hell to monitor
5 different repeaters at once to police the frequencies.

Ham Radio is supposed to take care of itself.. It seems that the only times
Riley
and others have anything s after pressure has been applied by many
individuals or threats of government intervention by political officals
has been used as a last result.

I know of a few cases where Riley has questioned calls and clubs in this
matter and has taken action.. That has to be applauded.
Of course there are the clubs that have provided the correct information
of the groups existance and even though these clubs have constitutions,
membership lists, participated in contests and other social events,
and even issued nice membership certificates, these clubs were
not viewed as offical due to public misguided pressures.

Riley has alot to do to clean up this hobby and he needs our help.
Some of the things that need to be done is
1) The clean up of the repeaters and airways of Jammers and

action taken when such offenders have been identified.
(In South Florida a number of offenders have been identified, taped
claiming that they were the jammer, and have been verified
but credible folks such as offical observers, ect but nothing has been
done by the FCC. And We are not talking about Flippo.)
2) Actions taken by League Officals and other Amateurs who conduct
VEC exams, Emergency Coordinators ect, that violate laws, the amateur
code and even normal decency standards that nothing is done by the
amateur Supervisory folks (ARRL, Riley ect) until threats of
legal intervention are involved.
3) The groups on the airwaves who believe that they own their
frequency because the repeater is there or that their net happens
there daily (10-10 anyone?) who do nothing when their members
openly jam QSO's on such frequency in a malicious manner..
I have been in a number of QSO's and have listened to them also.
Then these folks have the audacity to claim that the stations in the
QSO are openly Jamming them because of being on their frequency.
4) These clubs that have to be questioned.. I have written to Riley
about a few clubs that are very suspicious due to content (some on
a personal family level) and even one that on Usenet posted the true
nature of their club.. Some of these clubs have a smearing nature to
destroy certain hams and have posted that.. even using previous calls
of that ham to ensure that.

Perhaps all of this is too much for Riley to handle?
I am not here to bash Riley but if it takes public pressure to get
things to happen, perhaps we should let Riley know of this concern
so we can get action taken before this hobby gets an even blacker eye.
Some of these actions and officals belong back on CB.

You can write Riley at rhollings@fcc.gov

Im not out to start a flame war or anything which is why I didnt name
names or clubs but you can search on groups.google.com of such
occurances of what I listed above.. One such example is
"Something Smells in West Palm Beach" about a VEC exam about 4 years ago
where a handicapped VE was intimidated by the Head VE and others in the
hopes of chasing the ham from the hobby.
Riley does a good job and is not to be bashed by this letter but this
is written with the hopes that Riley will realize what the ham community
is concerned about and will focus his efforts.

If you have any questions, email me and we can discuss.. there is no need
to get into name callings or anything else.

1474. Antenna MADE for AO-40!

Newsgroup: rec.radio.amateur.swap
Date: 2002-10-12 13:26:14 UTC
From: G Rollins <address@mysite.com>
Message-ID: <4l8gqu4fv2io2bkams43gfn6ae7imgoc8r@4ax.com>
Source record: 2727

I got tired of straining to hear signals from AO-40 with my barbecue grill dish and developed a circular polarized antenna that WORKS! I talked a manufacturer into producing small quantities of these specialized AO-40 antennas, and I am now making this antenna available to the amateur radio community. It is an offset parabolic and there is NO aperture blockage of the incoming signal. Plus, you can connect your downconverter directly to the feed with no signal line loss. Extremely efficient, this antennas design includes many advantages over other dishes. I have current stock and most orders ship the same or next business day. The 3' N3IYR dish outperforms any other commercially available AO-40 antenna. Please visit my web site and look my antenna over. Leave me a comment if you like, or ask any questions you might have.

New and updated as of 10/7/02!

You can download a ton of Allied SX/AX-190 receiver information
in a single, 2.2 MB .pdf file here:

http://home.attbi.com/~akikoi/wsb/Allied-SX-190-Info-Oct02.pdf

The file includes:
Allied Radio Shack Service Manual
Allied Radio Shack Owner's Manual
Ad from CQ magazine, May 1972
Ad from Radio Shack catalog
Review from 73 magazine
NASWA review by Ed Shaw
QST magazine modifications
CQ magazine mods, March 1973, by Bruce Mackey
Bandswitch mods by John Kolb
NASWA-FRENDX mods by Ed Shaw, May 1974
Comprehensive Technical Manual by Ed Shaw
Getting Reacquainted with the SX-190 by Ed Shaw, 4/77
Allied SX-190 Revisited, by Ed Shaw, 6/82

Thanks to Bob Bachus for converting everything to .pdf format!

If anyone has cleaner copies or additional info, I'd like to add
it to my collection. Please email.

Thanks!

I collect old radios. I put in shelves, and filled them with wood
tombstone
radios. There are soooo many in here, that I can sneak in more and
the wife never notices.... Heee!

Peter

This is channel is about radios.
That doesn't mean everyone talking about and playing with their knobs
and tweaking their dials, it means anything from antennas to radio broadcast content.
If you think there is a whole newsgroup dedicated to your knob, then you wish.

FS: MINT MFJ 9406 six meter transceiver. This rig is a blast! Get it
now while the winter DX season is just beginning! I've got a new
FT-847 with 6 meters on that, so I might as well get rid of this one.
GREAT transmit audio! I worked the world with this and a little three
element Cushcraft Yagi. 12 watts PEP. Has CW module installed, too.
(Almost forgot I had done that!)

Comes with manual, original box, stock hand mic and DC cord.

$175 and I'll pay for shipping and insurance by U.S. Priority Mail. If
you're short on cash, we can use your "plastic" through my ham radio
business. (This will get the rig to you quicker, too.)

First e-mail to wa8mea@hotmail.com gets it!

For Sale: BEAUTIFUL Icom IC-718. 100 watts PEP. 160 through 10 meters. Never mobile. Barebones. No DSP/filters. GREAT transmit and receive audio! Nice back-up rig, beginners rig or a VERY user friendly rig for those who don't want a ton of bells and whistles like the high-end rigs have. Original box, instructions, DC cord, stock hand mic and I'll even throw in one of my world famous YO-YO-TENNA Deluxes FREE to help you get on the air with it quickly! (See recent CQ and/or WorldRadio for more details on antenna...or my website URL below.)

$395 plus $14.95 towards Priority Mail shipping and insurance. If you're short on cash, we could use your "plastic" through my little ham radio business.

Hi all, the FT-51R has 2 LEDs on the upper front of the radio.
One side is for VHF, the other is for UHF. They glow red on transmit
and green on receive.
Now the question. A while ago I was playing with the radio and was able
to turn OFF the GREEN LED (receive) on the VHF side. If I remember
correctly by doing this saves the LED draw on the battery. I only did
the one side. I can't find the manual and I'll like to put it on
again. ANY CLUES??????????????????
Please e-mail me direct at:
mrrusso@optonline.net

THANKS, Mark

I'm selling BA1404 chips for $5/ea ppd. These chips are the heart of many low-powered FM transmitter kits. There are a number of plans available online, as well as on the data sheet, to build your own low-power radio station. It'd be great for a weekend project or science-fair/Boy Scout-type project. I built a transmitter and use it to send MP3s and "internet radio" from my PC to the radios in the living room and bedroom (MP3s and foreign stations on a clock radio -- nice!).

Please visit: http://www.radiochips.com for details and ordering information.

Thanks!
Jeff

1539. FS: Ten-Tec Argonaut 509 QRP Radio with Ten-Tec 208 cw filter.

Newsgroup: rec.radio.amateur.swap
Date: 2002-10-28 00:51:59 UTC

Frequency range: 10-80m
Mode: SSB/CW
RF Power output: 5W
Voltage: 13.8 VDC
Current drain: RX: max 150mA, TX: 1A
Impedance: 50 ohms
Dimensions (W*H*D): 330*115*180mm

Works and looks good, an easy 8 on looks, can't see anything wrong with it, and have used it to work stations on all bands. Comes with Manual and power cord, no mic. This is the best classic QRP Radio. If you're wanting to get into qrp you can't go wrong with a TT-509.

Price $225.00,

1540. FS: Ten-Tec Argosy 525

Icom IC-706MKIIG rig. Looks and works great. Comes with the separation kit, power cable, mic, manual and box. Asking $700.00

AEA EconoTuner ET-1. Minor scratches on side and top. Works perfectly and never abused. Asking $75.00

Astron Power Supply. RS-35A. Minor Scratches on top but in perfect working order. Asking $100.00

Mirage UHF Amp. D 1010. Covers 430-450 Mhz with 10W in and 100W out. SSB or FM operation. Near perfect condition. Comes with power cable. Asking $150.00

Regency XL156. Old Scanner-Non 800 Mhz. Works great. Dusty but trusty. $20

Uniden Bearcat BC9000XLT. Near mint condition. Comes with ant, power cord, manual and shop manual. Asking: $150.00

Zenith Laptop. Z-Star 433VL. Old! has a card slot. Completely clean hard drive. only has a 3.5 drive unless you can find a CD ROM that connects via a card. Works OK with a stripped down version of Win 95 but would probably work better with Win 3.x. **There is no operating system on this computer. No windows, no DOS, no nothing!** Battery was replaced about 5 years ago but seems to have problems holding a charge. Unit comes with the power cord. 200 MB hard drive, 8 MB RAM, 33 Mhz. Asking: $150

Bencher YA-1 Low Pass Filter. 1.5 kw continuous power. $40. normal exterior wear. never abused

I can have digital pics sent out to you upon request. Please contact me if you have any questions or require any further info. All prices are without shipping. We can work something out. Items will be shipped from Detroit, MI 48209. Please make offers.

Would like to get one of these MFJ 941C or maybe even the B, I want
the one with wood looking sides and tan colored metal, to match my
station(also to tune antennas of course.)

Have a nice Emetech QRP Tuner would trade or how much?

Email me with details.

Hey Ken,

The value of any item is what someone is willing to pay. You opinion of $50
is just that. Opinion, you do not set value unless you buy.

I have for sale an as new FT-817 all mode portable transceiver. This radio is a QRP 5 watt HF/50/144 and 430MHz multimode transceiver. I bough this radio and all of the included options new in August of this year. I am a non smoker. This equipment has only been powered up for no more than 1 hour. I have all of the boxes, paperwork with warranty cards and all standard included accessories including the hand microphone. All equipment is absolutely flawless and has only been set up in the family room of my home. I would like to sell this as a system package. The package I am offering consists of the following:

Yaesu Ft-817 serial # 1K440086
W4RT 1 Touch Tune Option. This enables you to auto tune with the LDG Z11 while you are in the SSB mode.
Collins 2.5 KHz SSB Mechanical Filter
Astron RS5A Power Supply with 3 socket cigarette plug module installed
LDG Z11 Automatic Antenna Tuner. Covers 1.8-30 MHz
Joey Outbacker Antenna. This antenna covers HF/VHF range from 80 thru 2M, including 30, 17 and 12 meter
Alpha Delta Micro Mount for the Joey
Maha FNB-72 1700mAh NiMH Battery
W4RT 817 Mini Pack-It Reference Manual 2nd Edition
Laminated color 8 &#65533; X 11 Quick Reference Chart for operation of the FT-817
Yaesu NC-72B Battery Charger
12 ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the Joey Antenna
1ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the FT-817

If you are seriously interested I can take digital pictures of part or all equipment as requested.
I have over $1,400 invested in this system
I am asking $1,100 shipped CONUS ground UPS to your door.

Source record: 2562

I have the following items for sale:

1- MFJ 949-e Versa Tuner II - Slight scratches on top, otherwise in excellent condition. Asking $75.00, I ship.

2- Ameco PT-2 preamp. Excellent condition. Asking $50.00, I ship.

3- Yaesu FT-470 HT. Very good physical condition, however there is a problem in that the squelch does not always open on received PL. Also included is a Yaesu NC-29 battery charger and W&W 7.2 volt 1200 mAh battery which seems to hold a charge forever. The charger works great but is missing one of the push button rubber covers. The charger has had the trickle charge mod and, other than the missing push button cover is in great shape. This radio would be excellent for packet. Asking $100, I ship.

Pictures of all and additional information is available upon request.

Thank you....

John Schneider, KB2COP

I have for sale an as new FT-817 all mode portable transceiver. This radio is a QRP 5 watt HF/50/144 and 430MHz multimode transceiver. I bough this radio and all of the included options new in August of this year. I am a non smoker. This equipment has only been powered up for no more than 1 hour. I have all of the boxes, paperwork with warranty cards and all standard included accessories including the hand microphone. All equipment is absolutely flawless and has only been set up in the family room of my home. I would like to sell this as a system package. The package I am offering consists of the following:

Yaesu Ft-817 serial # 1K440086
W4RT 1 Touch Tune Option. This enables you to auto tune with the LDG Z11 while you are in the SSB mode.
Collins 2.5 KHz SSB Mechanical Filter
Astron RS5A Power Supply with 3 socket cigarette plug module installed
LDG Z11 Automatic Antenna Tuner. Covers 1.8-30 MHz
Joey Outbacker Antenna. This antenna covers HF/VHF range from 80 thru 2M, including 30, 17 and 12 meter
Alpha Delta Micro Mount for the Joey
Maha FNB-72 1700mAh NiMH Battery
W4RT 817 Mini Pack-It Reference Manual 2nd Edition
Laminated color 8 &#65533; X 11 Quick Reference Chart for operation of the FT-817
Yaesu NC-72B Battery Charger
12 ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the Joey Antenna
1ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the FT-817

If you are seriously interested I can take digital pictures of part or all equipment as requested.
I have over $1,400 invested in this system
I am asking $1,100 shipped CONUS ground UPS to your door.

For Sale: MINT MFJ-9406 six Meter transceiver. These little rigs are a blast! This is the third different model/band I've owned. Talked all over the U.S. and the world with just a three element yagi only 20 feet off the ground. GREAT transmit audio. Also has CW module installed.

Comes with manual, original box, stock hand mic and DC power cord.

$169 and I will be glad to pay for the shipping and insurance by Priority Mail. If you're short on cash, we can run the transaction through my little ham/swl business using your Visa or Mastercard.

The guy who wanted this has evidently backed out of his agreement to purchase. I haven't heard hide nor hair from him in over ten days. So.....we will put it back out there. However, this time I think instead of waiting for a money order in the mail, it's best we just put the transaction through my ham/swl antenna business using a Visa or Mastercard. This will protect BOTH of us. (Plus...it will get the rig to you quicker.)

FOR SALE: Radio Shack HTX-252 two meter FM rig. MINT condition. Only used for a few months. Never mobile. Used it here at the base for a back-up during severe weather. So not many hours of operation on it. 25 watts high power...10 watts low. Rcvr goes up into the PSB and NOAA weather portions. (I use to listen to our sheriff on it.)

Original manual, box, DC cord and stock hand mic.

$95 and I'll pay for shipping and insurance.

First e-mail gets it!

Yo should really be sure of your facts before you post.
I have two Corsairs - they certainly do have the WARC bands.

Even Ten-Tec's earlier rig, the Omni-C had all WARC bands but did have
some trouble on 18Mhz.

hi there i am thinking of buying a pro 94, i am not sure if it is
an old edition or new.

I was wondering if it is as good as the bc 245 ?

i really don't care about alpha tags.

does the pro 94 have ctcss tones?

does the pro 94 allow you to search edacs trunks to find all
the active ids?

can you monitor icalls on the pro 94?

and is it overly about the same for noise rejection and trunking
basics ?

thanks

1595. FS: Mackay radio TMR-90 SSB transceiver (current series)

Newsgroup: rec.radio.amateur.swap
Date: 2002-11-07 05:18:02 UTC
From: Tom Sharples <tsharples@qorvus.com>
Message-ID: <elmy9.42103$Lu1.44986@sccrnsc01>
Source record: 2598

This is a complete Thales Mackay computer-controlled SSB 19" rackmount radio set. It includes the TMR-8090 transceiver, the TMR-6490 control head, the TMR-1095 125 watt linear brick amp, the TMR-4095 remote automatic antenna tuner (missing interface cable which is available from Mackay), and the CSW 1290 Windows software remote control package (which can be used instead or in addition to the TMR-6490). This package looks good and works great, and has every imaginable feature and function. New in 1998, still the current model from Thales Mackay:

http://thalesmackayradio.com/products.htm

This equipment is for sale at best offer over $5K. New cost is ridiculous.

For sale or trade, a complete HF station (just add feedline & antenna):

Kenwood TS-520 (80-10m SSB/CW, no WARC, cw break in, vox, noise blanker, fast/slow AGC, etc.,etc.) with MC-50 desk mic, fine condition, currently used daily on several nets, full rated output (100w +) on all bands, looks 9 out of 10, works great, no deficiencies that I am aware of. Includes copy of operators manual & service manual, AC & DC power cords. This is a workhorse rig that will withstand a lot of abuse. They don't make 'em like this any more! No microprocessor or display noise from this one!

Along with it, an MFJ-949D Versa Tuner II, 300w capacity, 2 coax inputs with tuner bypass selections, balanced line input, random wire input, internal dummy load, crossed dual SWR/PWR meters.

If desired, will also throw in a Nye Speed-X straight key with black crinkle base.

Will sell complete station for $350 + shipping or trade for handheld all mode wideband receiver (a la DX-J10, VR-500 or R-10) or tabletop general coverage receiver (R-70, R-2000, etc.). My equipment is in fine condition, so no junk please.

Currently in use so I can arrange an on-the-air contact if desired.

Please contact via email at sporter at up-link dot net

Thanks for looking.

Steve

I have for sale an as new FT-817 all mode portable transceiver. This radio is a QRP 5 watt HF/50/144 and 430MHz multimode transceiver. I bough this radio and all of the included options new in August of this year. I am a non smoker. This equipment has only been powered up for no more than 1 hour. I have all of the boxes, paperwork with warranty cards and all standard included accessories including the hand microphone. All equipment is absolutely flawless and has only been set up in the family room of my home. I would like to sell this as a system package. The package I am offering consists of the following:

Yaesu Ft-817 serial # 1K440086
W4RT 1 Touch Tune Option. This enables you to auto tune with the LDG Z11 while you are in the SSB mode.
Collins 2.5 KHz SSB Mechanical Filter
Astron RS5A Power Supply with 3 socket cigarette plug module installed
LDG Z11 Automatic Antenna Tuner. Covers 1.8-30 MHz
Joey Outbacker Antenna. This antenna covers HF/VHF range from 80 thru 2M, including 30, 17 and 12 meter
Alpha Delta Micro Mount for the Joey
Maha FNB-72 1700mAh NiMH Battery
W4RT 817 Mini Pack-It Reference Manual 2nd Edition
Laminated color 8 &#65533; X 11 Quick Reference Chart for operation of the FT-817
Yaesu NC-72B Battery Charger
12 ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the Joey Antenna
1ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the FT-817

If you are seriously interested I can take digital pictures of part or all equipment as requested.
I have over $1,400 invested in this system
I am asking $1,100 shipped CONUS ground UPS to your door.

1602. FS: HV Diode Modules for large Amp

Newsgroup: rec.radio.amateur.swap
Date: 2002-11-08 14:38:20 UTC
From: GaryH <garyh@bellsouth.net>
Message-ID: <TXPy9.4864$ds6.1241@news.bellsouth.net>
Source record: 2505

I have 4 diode blocks for a HV power supply for a large
HF amp. I don't have the rating but believe they are
10 KV modules based on the size. I took them out of
a Large amp that I restored to stock diode configuration that
used three 3-500z tubes and a 3500 volt plus power supply.

I suspect they are 1 Amp rated. They are 3 3/4" long, 1" deep
and at the highest point, 2" high with screw terminal on each end
and polarity marking on the bottom. They are ideal for a homebrew
project or upgrade the diode bridge on an existing amp. I can
send you a picture if you are interested. These are quite expensive
if purchased from RF parts etc but all I am asking is a reasonable
offer for the 4 modules.

I have been posting such items on Ebay but have been asked to list
items on newsgroup first. If no reasonable offers are made I will
place them on Ebay. Check my ebay feedback for proof that I
only do up fron deals. Ebay id is garyh@bellsouth.net.

Thanks

Gary K4MT

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

I am not too far from Ken and have another such Telrex. It is on the ground, assembled, and on saw-horses. The rear two elements do not have traps. They are 20 meter and 15 meter reflectors. Those two elements broke in the middle (in a LOT of wind). I have the pieces. If you buy Ken's antennas, consider buying my antenna too. You could then have two working antennas and a lot of high quality parts. (Or three antennas, one without 15 meters)
The beam is a real good performer. I worked a lot of DX with it.

7B53A Dual Time Base $59.00
7B53AN Dual Time Base $109.00
7B70 Time Base $59.00
7B71 Delaying Time Base $49.00
7B80 Time Base $89.00
7D15 Counter/Timer 225MHz $129.00

Other manufacturers:
Tested & functional, unless otherwise noted.
Not calibrated.

AIL Type 32 Attenuator $145.00

Ballantine 3056A AC Voltmeter - near new $155.00

Communications Technology Systems Davar D8020C Cable Analysis System $1,085.00
W/ shipping case, oper. manual. Not tested. Near new condition

Cushman CE-24A Frequency Selective Meter $240.00
Works, but seriously out of frequency calibration

Demornay Bonardi DBF-X-187 Variable Attenuator 0-50db $290.00

Fluke 760A Meter Calibrator $589.00
Fluke 893A AC/DC Differential Voltmeter $190.00
Fluke 895A DC Differential Voltmeter $319.00
Fluke 2190A w/ Y2001 Digital Thermometer & Interface $279.00
No probes. Fair condition: minor plastic chips

Fluke 5200 AC Calibrator $425.00
Fluke 5200A AC Calibrator $765.00
Fluke 6039A w/ Opts. 2,4,9 Frequency Synthesizer $549.00
Fluke 8505A Digital Multimeter $240.00
DC Volts only: no other option boards available

General Radio 1390B Random Noise Generator $199.00

Gigatronics 16936 Power Sensor $449.00
Looks new. Not tested

Kodak Colorado Aerial Film Printer $5,500.00
w/ MacBeth Comparator. 64 Hrs use. Not tested crating $250

Kikusui PAB18-3A Power Supply 18V 3A $149.00
Kikusui PAB32-2A Power Supply 32V 2A $220.00

Nicolet 660B FFT Analyzer $425.00
Channel A works. Channel B does not work

Panasonic AG-6200 VHS Editor $155.00
Panasonic NV-8200 VHS duplicator ea $125.00
Good condition. W/ carrying case - 2 avail.
Panasonic NV-8200 VHS duplicator $75.00

Poor condition. Needs repairs

Philips PM 6670 Timer / Counter 120MHz $299.00
Philips PM 6676 Universal Counter 1.5GHz $389.00
Both above models in very good condition

PRD Electronics 559-B Frequency Meter $147.00

Wavetek 271 Function Generator $179.00
Fair condition. Works, but keypad hard to operate

Weinschel 2692 RF Attenuator 30db $159.00
SMA type connecters

Misc. Electronic & Industrial Surplus:

Untested unless otherwise noted. Sold as-is.

Amarillo Gear Model 175 100HP Right-angle Fan Drive $650.00
crating $50

Ampex 456 1/4 inch audio tape Used 50 for $199.00
On 10 1/2 inch metal or plastic reels w/ NAB hubs
Condition & contents of tape unknown

Biddle "Meg Type" Megger - works $105.00

Bliley CY-2924/U Pt#833B Crystals $99.00
In weatherproof case. Good condition
406MC to 549MC in 1MC increments
Missing 408,417,430MC
W/ 2 Type TCO-2F temperature stabilizers

CAE Alpheus SDI-5 Mini-Blast Co2 Cleaner $2,449.00
Carbon Dioxide Blaster
Gun not included crating $100

Challenge EH-3A Paper Drill, 3 Hole $1,900.00
crating $100

Data I/O 29B w/ UniPak 2B Universal Programmer $169.00
Powers up. Not tested further

Delta Sonics VT1530 Ultrasonic Vapor Degreaser $2,550.00
crating $100

Duniway Stockroom I-164-K Ion Gauge Tube - new $99.00

Dynaport TS-1060B/GG Teletypewriter Test Set $99.00
Powers up. CRT has trace. Not tested further

Erdco 01579 CAL Flammable Gas & Vapor Detector $2,350.00
crating $50

General Electric GE Spectra Series Deadfront Switchboard $590.00
Section 1 Only (meter section). Near new condition crating $100
1200A 480Y / 277 Volt 3 phase 4 wire

Hewlett Packard 5100A Frequency Synthesizer $99.99
Hewlett Packard 5105A Frequency Synthesizer $99.99
Both decent physical condition. Not tested

Howe 758 Platform Scale 6000 lbs. capacity $549.00
crating $100

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

I have for sale an as new FT-817 all mode portable transceiver. This radio is a QRP 5 watt HF/50/144 and 430MHz multimode transceiver. I bough this radio and all of the included options new in August of this year. I am a non smoker. This equipment has only been powered up for no more than 1 hour. I have all of the boxes, paperwork with warranty cards and all standard included accessories including the hand microphone. All equipment is absolutely flawless and has only been set up in the family room of my home. I would like to sell this as a system package. The package I am offering consists of the following:

Yaesu Ft-817 serial # 1K440086
W4RT 1 Touch Tune Option. This enables you to auto tune with the LDG Z11 while you are in the SSB mode.
Collins 2.5 KHz SSB Mechanical Filter
Astron RS5A Power Supply with 3 socket cigarette plug module installed
LDG Z11 Automatic Antenna Tuner. Covers 1.8-30 MHz
Joey Outbacker Antenna. This antenna covers HF/VHF range from 80 thru 2M, including 30, 17 and 12 meter
Alpha Delta Micro Mount for the Joey
Maha FNB-72 1700mAh NiMH Battery
W4RT 817 Mini Pack-It Reference Manual 2nd Edition
Laminated color 8 &#65533; X 11 Quick Reference Chart for operation of the FT-817
Yaesu NC-72B Battery Charger
12 ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the Joey Antenna
1ft Mini 8U Coax Jumper with silver PL-259's to go from the LDG Z11 Tuner to the FT-817

If you are seriously interested I can take digital pictures of part or all equipment as requested.
I have over $1,400 invested in this system
I am asking $1,000 shipped CONUS ground UPS to your door.

1660. FS/FT: Heath HW-104, Alinco DR1200T, MFJ-1270C, Yaesu 5400 AZ-EL Rotor

Newsgroup: rec.radio.amateur.swap
Date: 2002-11-17 18:06:13 UTC
From: Jeff C <jcamp2@cox.net>
Message-ID: <pUQB9.35418$hb.33101@news1.central.cox.net>
Source record: 2663
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have for sale or trade a Heathkit HW-104 in excellent condition.
This is an HF transceiver (80-10m, no WARC). Unit is all solid state
and is like the SB-104 except with an analog frequency display.
Includes speaker, power supply, and original construction and
operating manuals. The Heathkit RCA antenna connector has been
changed to a BNC connector for convenience. Asking $275 plus half of
shipping.

I also have an Alinco DR-1200T data radio and manual in excellent condition
for $85 + shipping, an MFJ-1270C tnc with original box, manuals, cables for
$75 plus shipping, an AEA PK-232MBX with original box, manuals, cables for
$75 plus shipping, and a Yaesu FT1500M 2 meter radio with original manuals,
box, cables for $100 plus shipping. The Yaesu has a total of about 30
minutes total usage. I purchased it new from AES about a year ago.

In addition to the above items, I have a Yaesu 5400 AZ-EL antenna rotor with
control box, cable, and a copy of the manual. I'm told that it works, but
have never hooked it up. It was from the estate of another ham. Will test
before shipping. $350 plus half of shipping.

Will consider a swap or swap+ cash for the following
items:

Swan 700
MFJ 784B DSP unit
JPS NIR-12 DSP
Kenwood SM-220 + BS-8
Heathkit SB-230
Kenwood TS-520S
Drake TR4C and AC-4/MS-4
Drake C-Line twins
whatever else of equal value you'd like to unload

Please contact me via email at jcamp2@cox.net

Thanks and 73,
Jeff

FOR SALE:

TERMINAL BOARDS - Tube type building parts:

Brand new terminal boards with turrets - 13.1" X 1.5"
Two rows of five turrets on each section. Five sections.
NOTE: The longer boards can easily be broken down into single
sections. QTY 42 of these 5-way units at $5.00 each

QTY 10 Brand new terminal boards with turrets - 10.5" X 1.5"
Two rows of five turrets with mounting holes.
Available for $5.00 each

QTY 2 - Brand new terminal boards with turrets - 2.6" X 1.5"
Two rows of five turrets.
Will sell for $1.00 each

QTY 19 - Brand new terminal boards with turrets - 2.6" X 2.5"
Two rows of five turrets on each.
Available for $1.50 each

Most are bakelite/phenolic, and a few are fibreglass.
These are perfect for building guitar amps, tube receivers
and transmitters, or for repairing/building amplifiers and
hi-fi audio amplifiers.

Shipping to domestic USA $5.00 for any quantity.

Group,

Hey there, if you would like to add a voter system to your repeater, this will do the job for you. It will select the best audio and pass the best signal to your repeater input.

CLOSES TODAY

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=801983649

For technical stuff and a manual in adobe .pdf click the following link: http://www.nollmeyer.net/gemanual.pdf

Good luck!

From: "J. Levantino" <jlevantino@hotmail.com>
Message-ID: <arevcbnat1@news.monmouth.com>
Source record: 2681

I have a couple of brand new multimeters that I don't need and would like to sell. Before I go to ebay, I thought I'd try here first (I really don't like ebay too much!). I have a Fluke model 73 III, a Fluke model 79 III, and an HP 971A. If you're interested in any of these, please send me an email and I"ll send you the complete specs on them. I'm sure that you can find pics of them on ebay. I'll have to investigate the pricing, but I guarantee a good deal AND that the equipment will be brand new.

Thanks,

--

Actually, I stuffed all the smoke back into those little black flat things soldered to the funny green board with silver wiggly lines.

Cause you know, when you let that smoke out of the black thingies, the box don't work no more!

For Sale: MINT MFJ-9406 six meter SSB transceiver. This little rig is a blast! Hate to part with it, but I've got a new Yaesu FT-847 that has six meters. FANTASTIC transmit audio! I worked the world with this and a little 3 element yagi. 12 watts PEP. Purchased and installed CW module.

Comes with manual, original box, stock hand mic and DC power cord.

$169 and I'll pay for the shipping and insurance by U.S. Priority Mail. If you're short on cash this holiday season, we can run your "plastic" through my little ham/swl business. (This will get the rig to you faster, too!)

Winter sporadic E season coming up, meteor showers, aurora...ALL modes of operating DX on 6 meters.

First e-mail gets it!

'Radio Amateur Callbook' Spring 1949
$15.00

In addition to all the US ham callsigns, this callbook includes a lot of old advertisments from the good old days of ham radio.

You can view a scan of the callbook at
<http://www.pbase.com/timrichardson>
Just click on the 'ham_radio' gallery

The callbook is complete but NOT in pristine condition. It is yellowed, has some water stains, edges and corners are worn, some tears, bent corners, musty smelling and the covers are in pretty bad shape and about to fall off as you can see from the pictures.

U.S Shipping & Handling:

$5.25 (Priority Mail)

I accept money orders, cashier's checks, personal checks (allow up to ten days to clear)

Contact Tim Richardson <ter@bellsouth.net>

'Radio' Magazine

Enjoy the bygone days of amateur radio from the late 1930's and early 1940's. Chock full of technical articles, construction projects, and advertisements showing some of the great radio equipment and components of the day.

$5.00 each unless otherwise noted

Magazines available:

1936 December (front & rear covers detached) $3.00
1937 March
1937 March
1937 June
1937 December
1938 January
1938 February
1939 May
1939 October
1939 October (rear cover detached, no spine) $3.00
1939 November (front cover detached) $3.00
1939 December
1941 July
1941 October
1941 November
1941 December
1942 January
1942 January (front & rear covers detached) $3.00
1942 February

You can view scans of each magazine cover at
<http://www.pbase.com/timrichardson>
Just click on the 'ham_radio' gallery

$5.00 each unless noted

If purchasing more than one magazine, take $1.00 off each additional magazine.

All magazines are complete but are NOT in pristine condition. All are yellowed, some have water stains, edges and corners are worn, some tears, bent corners, spines are very worn on most, musty smelling.

U.S Shipping & Handling:
$2.75 1 magazines (1st class)

$4.50 2 or 3 magazines (Priority Mail)
$5.25 4 or 5 magazines (Priority Mail)
e-mail for other rates

I accept money orders, cashier's checks, personal checks (allow up to ten days to clear) or PayPal for amounts of $20 or more.

Hi all, I am in need of a dead FT-50R battery pack, number FNB-41.
This is the 9.6 volt @ 600ma battery.
I dropped mine from a rather high place and broke the case pretty badly.
My batteries are good and the radio still works!!
If you have one that you would like to part with please let me know what you
want for it.
Of course I'll pay for shipping.
PLEASE e-mail me direct at:

mrrusso@optonline.net

THANKS and 73, Mark N2FLF

1715. FA: Robyn mobile CB with base "docking station"

Currently selling at $51! It's a steal!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=1501&item=1941085308&rd=1

This auction is for a truely unique radio from the 1970's! It is a Robyn DG-1300 40 channel AM CB with a Robyn SX-7 base module. This allows the CB to be used as a base radio simply by sliding it into the "docking station" and plugging in the speaker and power plugs in the back and attaching an antenna! The power supply and speaker are in the base module!

This radio is COLLECTORS QUALITY! It is PRISTINE. I would give it a 9.9 on a scale of 1-10 only because it isn't brand new in the box.

I got this CB not too long ago with the intention of using it at home, but I never did. It's been kept in the original box. Included is the microphone and some of the original literature that came with the radio.

This radio works 100% and I received great audio reports when tested. It does the full 4 watts legal limit as indicated by the internal power meter and 2 different external power meters.

First is a Pro-2036 (BC-890XLT). I got it in rough shape, and have repaired most of the problems. Has an intermittent that causes a hiss in the audio, plus doesn't want to scan in turbo mode all the time. I replaced the battery with a battery holder, and 3.3 Volt disk battery that can be changed without soldering. I'm sure whatever is causing the problems is realitivly minor. Have the large telescoping antenna.
Second is a 2 month old Pro-2017. It's mint. Have the original box, and manual, plus power cube, and antenna. I would like $100 o.b.o. for the 2036, and $50 for the 2017. I'll package it for $125, if someone wants both.

For sale - rather rare Globe HG-303 novice transmitter. Mint
condition.

6146 final for 75 watts on 80, 40, 20, 15 and 10m bands. CW only.
Has metering for plate and grid current.
Standby-Operate-Tune switching etc.

Comes in the original box with manual.

Looks just like new and operating fine with full output.

Picture at:

http://home.cfl.rr.com/happysurfer/imag/globe_hg303.jpg

Will sell for $135.00 plus shipping

This auction is for a Radio Shack Pro-70 handheld scanner. This scanner is in good shape, rated at a 7.5 on a scale of 1 - 10. There are minor scratches around the scanner, but the keypad markings are perfect. The display and light work fine and the scanner functions 100%. I am selling this because I just bought a Pro-93 and no longer need the Pro-70. Included with the Pro-70 is the stock antenna, carrying case, Radio Shack 9v 300mA power supply (wallwart) (part #273-1665) and Radio Shack nickle-cadium rechargable battery (part #23-288-b) with external charger (part #23-288-c). The battery can either be charged in the scanner with the included power supply or in the external charger.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4673&item=1943083935&rd=1

This auction is for an Icom IC-202 2m SSB/CW portable radio . This radio works off of 9 "C" cell batteries or a power supply. It covers 144.000 - 144.400 and includes crystals for 145.000 - 145.200, 145.800 - 146.000. The radio is in fair shape, showing obvious wear, but it works flawlessly. I recently bought this to use is as part of a project that I've since abandoned, so I do not need it. I tested it in the mobile and talked to a station about 10 miles away with a mobile antenna on the roof. He reported audio and signal was good. Output power is about 2 - 3 watts depending on how you power it. It has a telescoping antenna, or you can use a regular antenna by way of a rear PL-259 connector. Included is a hand microphone. Please note: This is NOT the IC-202E or the IC-202S. I am not sure what the internal differences are between these models, but the front panel does look a little different from these other models, but I think they have all the same functions.

I'm posting this for N5BDR, who's isp is currently having probs with usenet
access.
So please email him directly at n5bdr@arrl.net.

Looks brand-new. It's sat in the box unused for nearly 2yrs, except for the
few times I played with it at the start. I just never got around to buying
the needed antennas. Asking $450 + shipping for it and all original parts.
Thanks.
N5BDR

Spare Battery BP-200 by Maha

IC-T81A Specifications
This information is taken directly from the IC-T81A/E brochure

General
Frequency coverage (Unit: MHz)
50 MHz 144 MHz 440 MHz 1.2 GHz WFM (not guaranteed)
Rx/Tx:
50 - 53.995 Rx:118-173.995*1
Tx:144-148 Rx:400-469.995*2
Tx:430-450 Rx/Tx:
1240 - 1300 Rx:76 - 107.995

*1 Guaranteed 144-148 MHz only; *2 Guaranteed 440-450 MHz only;
Mode: FM, WFM (Rx only), AM (Rx only)
Number of memory channels: 124 (100 regular, 20 scan edges, 4 call)
Frequency stability: 3 ppm (-10C to +60C;)
Useable temperature range: -10C to +60C;, +14F to +140F
Power supply : 4.5 to 16 V DC or specified battery pack
Current drain (at 13.5 V DC):
Tx: maximum power: 1.4 A (0.8 A at 1200 MHz)
Rx: rated audio: 220 mA (typical)
power saved: 40 mA
standby: 70 mA (90 mA at 1200 MHz)
Tuning steps (kHz): 5*, 10, 12.5, 15*, 20, 25, 30, 50, 100 (*not available
for 1200 MHz band)
Antenna connector: SMA (50 ohm)
Dimensions (projections not included):
58(W) x 106(H) x 28.5(D)mm
2-9/32(W) x 4-3/16(H) x 1-1/8(D)in
Weight (approximate, with antenna):
290g; 10.2 oz (with BP-197)
270g; 9.5 oz (with BP-199)
280g; 9.9 oz (with BP-200)

Transmitter
Output power (at 13.5 V DC):
High: 5.0 W (1.0 W at 1200 MHz)

Low: 0.5 W (0.1 W at 1200 MHz)
Modulation system: variable reactance frequency modulation
Max. frequency deviation : ± 5 kHz
Spurious emissions : Less than -60 dB (-50 dB for Europe version at 1200
MHz; -40 dB for others at 1200 MHz)
External mic connector : 3-conductor, 2.5(d) mm (1/8")/ 2 k ohm

Receiver
Receive system: Double conversion superheterodyne
Intermediate frequencies:
1st: 69.45 MHz (13.35 MHz: WFM)
2nd: 450 kHz
Sensitivity (except spurious points):
FM 50 MHz=0.18 µV, 144 MHz=0.18 µV, 440 MHz=0.18 µV, 1.2 GHz=0.25 µV
AM 50 MHz=0.56 µV
WFM 91.5 MHz=2.0 µV
Squelch sensitivity (threshold):
0.18µV (FM; 0.25 µV at 1200MHz)
5.6µV (WFM)
0.56µV (AM)
Selectivity (except WFM):
More than 15 kHz/-9 dB
Less than 30 kHz/-60 dB
Spurious and image rejection ratio:
50, 144 MHz: Less than -60 dB
440 MHz: Less than -50 dB
1200 MHz: Less than -50 dB
(Except half IF, 2nd image, 50 MHz band IF and WFM)
Audio output power (at 13.5 V DC): 250 mW typical at 10% distortion w/ 8 ohm
load (at 13.5 V DC)

Supplied Accessories
Battery pack
Wall charger
Antenna
Belt clip

I'm selling a Kenwood TM-251A 2m 50watt mobile transceiver

This is a Kenwood TM-251A 2m 50watt mobile transceiver. Receives on 440Mhz and well outside 2m ham bands.

Capable of 9600 bps packet using rear
connector and external TNC. Includes touchpad mic, mobile mounting hardware, instruction manual, and block diagram.

Good condition in original box. .....

Buyers, please use eBay's Billpoint or Paypal; my Paypal ID is CFMenterprises@hotmail.com ..... Buyer pays shipping & handling and insurance of $12.49 via 8-day USPS Parcel Post.

Current bid: $69

I am selling a Motorola Radius P50. I really hate having to part with this one......but i have to make room, and after i got my Saber i dont use it much anymore. It is in excellent condition, it's one of my personal radios, and ive taken very good care of it. It does have some scratches on the front of the case, nothing major. Works flawlessly, VHF, 5 watts out, 2 channels (currently on 154.570 and 154.600) also equipped with PL (tone 6B). Comes with a lightly used battery (bought in 2001), standard charger, and speaker mic. Also have a photocopy of the manual available (i lost the original, the photocopy is complete though) Asking $125 for radio and all accessories.

1750. FS: PAIR OF MOTOROLA MT500's

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap,alt.ham-radio.marketplace

FOR SALE: 2 (1 pair) of MOTOROLA MT500's w/MDC600. They are
both OMNI radios on the VHF High Split (Model # H33BBU3144A SP259).
They are high power (5 watts), have 4 Channels, 3 PL's, and, are
equipped with the MDC600 backs. Both are in good, working condition
and come with 2 BRAND NEW batteries and two used batteries (one is
still good, the other is questionable. The radios also come with
channel elements (already installed, 173.275 simplex). Both radios are
complete and in good working condition, they have some minor scratches
and both have numbers painted on the front of them (the one looks
almost brand new). One antenna has been repared with electrical tape
at the base where the protective coating has split.
$70 for the pair ($90 with charger)
$35 for a single radio ($55 with charger)
$20 for rapid charger (NLN4569B)

Also for sale are 2 speaker mics for the MT500 series radios. The
first one is a standard speaker mic with coiled cord. The other is a
public safety speaker mic with straight cord and antenna. Both are in
good working condition.
$20 for standard speaker mic (NMN6082A)
$25 for Public Safety Mic w/Antenna (NMN6803A)

1752. The real deal on K8CPA, BKA "Chukkee Sukkee"

Newsgroup: rec.radio.amateur.swap
Date: 2002-12-06 15:28:55 UTC
From: chukkeedacriminal@yahoo.com

First things first...
Happy Holidays to Keyclowns and Anti-Keyclowns alike.

There was a hamfest in the Detroit area which a few of us
Anti-Keyclowns attended last Sunday. Who did we see, with about a 3
day beard, homeless shelter type clothes and a glazed expression on
his goofy face????? None other than Chukkee Sukkee herself!

Chukkee was so goofed up in the head he didn't even recognize us
Anti-Boys, although he had met one of us under very bad <for him>
circumstances in September. He called one of us "Mike", a name which
none of us carry, and mumbled incoherently at our table of antique
radios, variacs, antennas, modern transceivers, etc...and departed the
scene hastily.

Chukkee Sukkee can say things like "puff a root, dickhead", etc. , but
has absolutely no power or credibility. This lying toad of a human
being has said the following things on the NG's, all proven false:

1. He works for Jeff Roush racing
2. He has a concealed weapon permit<he ADMITTED THIS WAS A LIE IN
SEPTEMBER>
3. He is affiliated with a gang called the Latin Counts
4. He is affilaited with a bike gang called the Iron Coffins
5. He owns a .45 caliber pistol
6. He owns a 9 MM pistol
7. He has faced down police officers over his pistol. <he calls police
officers "pigs" in his posts>
8. When accused of selling illegal radio equipment Chukkee Sukkee
vehemently denied doing so. That is, until an enterprising amateur
looked up his advertising for sale of illegal amplifiers on
various
amateur radio and CB forums. This documentation drove him back
into the woodwork a while.

Chukkee Sukkee says these things to make himself appear to be some
sort of a formidable human being. When confronted in person he wilts
like a dandelion hit with weed killer. For example, Chukkee Sukkee
threatened in rec.radio.cb to shoot people with a 9mm pistol at the
Findlay, Ohio hamfest in September, 2002. The persons he threatened
walked up to his table and asked him if he wanted "to settle the hash
now", and he could not have been faster to stretch out a hand to shake
if he had a spring loaded elbow.

In late 1999, he lost an ISP because he threatened another amateur with raping his wife and daughter, killing his dog, and doing a drive by shooting on his home. The local police and the Toledo office of the FBI became interested in Chukkee Sukkee recently because of his long record of violent threats to people in newsgroups. The Lincoln Park, MI Police dept. paid Chukkee Sukkee a visit in September, 2002 because of these threats. After the cops were done with him, Chukkee Sukkee whined like the cowardly person he is, and posted to rec.radio.cb a long and lying denial of making any violent threats, and specifically admitted he had never owned a hangun or had a CCW permit. This admission ran counter to the fact that he had stated many times he owned either a .45 caliber or a 9 MM pistol, and had a CCW permit. This exposed the lies, of course.

There is now an outstanding warrant for Chukkee Sukkee's arrest in Lucas county, Ohio for meancing as a result of his violent threats. The Anti-Keyclowns have a copy of the police report in our posession. This will be made available to anyone who wants it, as it is public information. Email us for details.

Chukkee Sukkee should be considered a fat mouthed idiot, and very desperate to belong to some group or organization. He has been rejected by most rational persons, and will continue to be until he moves somewhere that has a population that has never been exposed to his moronic actions. <the planet Neptune, maybe?>

In summary, we have among us a lying idiot who has obvious psychological issues. He is prone to violent threats against people, even women, children and pets. When confronted, though, he shows a spineless, yellow, cowardly nature.

If Chukkee Sukkee is smart he will stay in Michigan. If he gets confronted by any LEO in Ohio he may be on a road he does not wish to travel. Chukkee Sukkee makes a big blatting issue of the fact that he was at the Toledo hamfest last year and that his truck and his carcass emerged unscathed. Fact is, no one threatened either. It is Chukkee Sukkes's mentality, however, that most intriguingly emerged in the dust up over this situation last March... Why would anyone be concerned about their auto being damaged unless: A> They are in the habit of damaging autos and have that mid set, or B> They are guilty of doing something bad and expect retribution?

Laugh if you will folks, but Chukkee Sukkee is a sick puppy.

1753. Siltronix & Swan 1011 Radio Web Page

Newsgroup: rec.radio.amateur.swap
Date: 2002-12-06 16:58:00 UTC

Hello there,
Just a cheap and shameless plug for the Siltronix and Swan 1011 radio web page found at:

http://sonic.ucdavis.edu/siltronix

The same server also has a generic amateur radio page which can be found at: http://sonic.ucdavis.edu

Have a look when you can... some history about the radio plus trivia....

cheers
skipp

1754. FA: Icom IC-202 2m SSB/CW portable radio

Newsgroup: rec.radio.amateur.swap
Date: 2002-12-06 18:28:08 UTC
From: vhfradiobuff@yahoo.com

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4673&item=1943083935&rd=1

This auction is for an Icom IC-202 2m SSB/CW portable radio . This radio works off of 9 "C" cell batteries or a power supply. It covers 144.000 - 144.400 and includes crystals for 145.000 - 145.200, 145.800 - 146.000. The radio is in fair shape, showing obvious wear, but it works flawlessly. I recently bought this to use is as part of a project that I've since abandoned, so I do not need it. I tested it in the mobile and talked to a station about 10 miles away with a mobile antenna on the roof. He reported audio and signal was good. Output power is about 2 - 3 watts depending on how you power it. It has a telescoping antenna, or you can use a regular antenna by way of a rear PL-259 connector. Included is a hand microphone. Please note: This is NOT the IC-202E or the IC-202S. I am not sure what the internal differences are between these models, but the front panel does look a little different from these other models, but I think they have all the same functions.

...
...

You too Dougie

...There was a hamfest in the Detroit area which a few of us
...Anti-Keyclowns attended last Sunday. Who did we see, with about a 3
...day beard, homeless shelter type clothes and a glazed expression on
...his goofy face????? None other than Chukkee Sukkee herself!
...

Goofy face??? you ain't miss america either dude! yes, I have a beard.. at least I can grow one...Homeless shelter???HAHAHA...what an idiot.

...Chukkee was so goofed up in the head he didn't even recognize us
...Anti-Boys, although he had met one of us under very bad <for him>
...circumstances in September. He called one of us "Mike", a name which
...none of us carry, and mumbled incoherently at our table of antique
...radios, variacs, antennas, modern transceivers, etc...and departed the
...scene hastily.
...

I walked around twice....was looking for the guy I came with James Keller W8WW....(whom I have a feeling might have authored this...)

and I might have called you Mike...sheesh...cut a guy some slack...

and for the record....you didn't do jack shit, Dougie...and you fucking know it....

...Chukkee Sukkee can say things like "puff a root, dickhead", etc. , but
...has absolutely no power or credibility. This lying toad of a human
...being has said the following things on the NG's, all proven false:
...
...1. He works for Jeff Roush racing

Jeff Roush....???? I never said that...I worked for Jack Rouch...as in
Rouch Industries Inc. . a job I HATED...Because of the fucking MORONIC
management...you know Morons....like your dumb fucking ass?

...2. He has a concealed weapon permit<he ADMITTED THIS WAS A LIE IN
...SEPTEMBER>

I never admitted anything...

I know what I got, and who said it's registered?

...3. He is affiliated with a gang called the Latin Counts

Again, dougie...you TWIST the truth! I never said I was " affiliated"
with them! I said I know a few of them....and a few owe me a few
favors..

Can't you do anything more original????

...4. He is affilaited with a bike gang called the Iron Coffins

Again, dougie...you TWIST the truth! I never said I was " affiliated"
with them! I said I know a few of them....and a few owe me a few
favors.....

...5. He owns a .45 caliber pistol

Like I said...you don't know what I got...

...6. He owns a 9 MM pistol

see above.....

...7. He has faced down police officers over his pistol. <he calls
police
... officers "pigs" in his posts>

again.....you twist and make up shit....I never said this....period.

...8. When accused of selling illegal radio equipment Chukkee Sukkee
... vehemently denied doing so. That is, until an enterprising
amateur
... looked up his advertising for sale of illegal amplifiers on
...various
... amateur radio and CB forums. This documentation drove him back
... into the woodwork a while.
...

I never DENIED selling them in the past....I don't sell them now....

...Chukkee Sukkee says these things to make himself appear to be some
...sort of a formidable human being. When confronted in person he
wilts
...like a dandelion hit with weed killer. For example, Chukkee Sukkee
...threatened in rec.radio.cb to shoot people with a 9mm pistol at the

...

MORE BULLSHIT TO COVER THE FACT THAT YOU'RE AN IDIOT DOUG...

...Laugh if you will folks, but Chukkee Sukkee is a sick puppy.

SO IS DOUGIE AND A NO-CODE, 2 FUCKING METER PENCIL-NECKED GEEK!!!!
WITH NO CLASS, NO LIFE AND NO FUCKING JOB....AND HAS TO BUILD 2 METER
ANTENNAS FOR A LIVING...

TELL ME DOUG, WHY DID YOU CLOSE THE RENTAL SHIP IN COLDWATER? PROLLY
BECAUSE YOU WERE SELLING DRUGS OUT THE BACK DOOR AND COLDWATER SHUT
YOU DOWN! YOU SEE, i HAVE FAMILY THERE AND i HEARD ALL ABOUT
IT!!

AND THEN YOU COWARDLY RAN TO CHICAGO!

LATER DOUG...

P.S.....the shit never stops

'Radio Amateur Callbook' Spring 1949
$5.00

In addition to all the US ham callsigns, this callbook includes a lot of old advertisments from the good old days of ham radio.

You can view a scan of the callbook at
<http://www.pbase.com/timrichardson>
Just click on the 'ham_radio' gallery

The callbook is complete but NOT in pristine condition. It is yellowed, has some water stains, edges and corners are worn, some tears, bent corners, musty smelling and the covers are in pretty bad shape and about to fall off as you can see from the pictures.

U.S Shipping & Handling:

$3. (USPS Media Mail)

I accept money orders, cashier's checks, personal checks (allow up to ten days to clear)

Tim Richardson W4IOU <ter@bellsouth.net>
http://home.bellsouth.net/p/PWP-timr

'Radio' Magazine

Enjoy the bygone days of amateur radio from the late 1930's and early 1940's. Chock full of technical articles, construction projects, and advertisements showing some of the great radio equipment and components of the day.

$2.00 each unless otherwise noted

Magazines available:

.1936 December (front & rear covers detached) $1.00
.1937 March
.1937 March
.1937 June
.1937 December
.1938 February
.1939 May
.1939 October
.1939 October (rear cover detached, no spine) $1.00
.1939 November (front cover detached) $1.00
.1939 December
.1941 July
.1941 October
.1941 November
.1941 December
.1942 January
.1942 January (front & rear covers detached) $1.00
.1942 February

You can view scans of each magazine cover at
<http://www.pbase.com/timrichardson>
Just click on the 'ham_radio' gallery

$2.00 each unless noted

All magazines are complete but are NOT in pristine condition. All are yellowed, some have water stains, edges and corners are worn, some tears, bent corners, spines are very worn on most, musty smelling.

U.S Shipping & Handling (USPS Media Mail):
$2.00 for first magazine
$0.50 per additional magazine

I accept money orders, cashier's checks, personal checks (allow up to ten days to clear) or PayPal for amounts of $20 or more.

ONLY 12 HOURS LEFT!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4673&item=1943083935&rd=1

This auction is for an Icom IC-202 2m SSB/CW portable radio . This
radio works off of 9 "C" cell batteries or a power supply. It covers
144.000 - 144.400 and includes crystals for 145.000 - 145.200, 145.800
- 146.000. The radio is in fair shape, showing obvious wear, but it
works flawlessly. I recently bought this to use is as part of a
project that I've since abandoned, so I do not need it. I tested it in
the mobile and talked to a station about 10 miles away with a mobile
antenna on the roof. He reported audio and signal was good. Output
power is about 2 - 3 watts depending on how you power it. It has a
telescoping antenna, or you can use a regular antenna by way of a rear
PL-259 connector. Included is a hand microphone. Please note: This is
NOT the IC-202E or the IC-202S. I am not sure what the internal
differences are between these models, but the front panel does look a
little different from these other models, but I think they have all
the same functions.

I have for sale an Optoelectronics Optocom receiver. Specific details of the Optocom can be found at:

http://www.optoelectronics.com/optocom

This Optocom contains the latest firmware, version 1.5. It also has the Bitbanger addition. Unit is in excellent condition and has been used exclusively in an indoor environment.

Includes AC90 power adapter, telescoping whip antenna, serial cable, Trakkstar software disc and license, instruction manual, and Optoelectronics Utility disc.

Asking $400.00 shipped UPS ground US only. Payment via Paypal or PREPAID WITH US POSTAL MONEY ORDER ONLY!

Reason for selling: I have two of them, and this one is seeing very little use. Liquidating for purchase of other equipment.

Please E-Mail me at kc1ua@scancapecod.net if interested. Thanks for reading.

Message-ID: <361c16bf.0212080605.6cf4e5fa@posting.google.com>
Source record: 2376

We're Mike and Trudi Ratican. I'm an active ham, and do alot of "shopping" for gear. We both collect a lot of things, including Fenton, Hofbauer, Vintage Radios, and many other things. We have fun buying and selling at online auctions, but no fun paying the fees!

We've started an auction for us "working class" people that's easy to use, and with the features you expect from an auction, but without all the fees, and without a commission if you sell. No pop-ups, no nonsense.

As an example, you can post a single-picture auction, and if you sell your item you pay nothing else. If your item doesn't sell, you can re-post it for free. You get up to 15 days to sell your item for only 20 cents. Auctions without a photo are ï¿½ that price!

You're invited take a look, and celebrate the holidays with all free auctions through the end of the year.

Thanks & 73,
Mike W9RAT & Trudi Ratican
Owners

Because of inappropriate cross-posting. Obviously someone thought it was important enough to disregard common netiquette. Thing is, it's only freakin' FICTION...not real ham radio.

Dimensions (projections not included):
58(W) x 106(H) x 28.5(D)mm
2-9/32(W) x 4-3/16(H) x 1-1/8(D)in
Weight (approximate, with antenna):
290g; 10.2 oz (with BP-197)
270g; 9.5 oz (with BP-199)
280g; 9.9 oz (with BP-200)

Transmitter
Output power (at 13.5 V DC):
High: 5.0 W (1.0 W at 1200 MHz)
Low: 0.5 W (0.1 W at 1200 MHz)
Modulation system: variable reactance frequency modulation
Max. frequency deviation : ± 5 kHz
Spurious emissions : Less than -60 dB (-50 dB for Europe version at 1200 MHz; -40 dB for others at 1200 MHz)
External mic connector : 3-conductor, 2.5(d) mm (1/8")/ 2 k ohm

Receiver
Receive system: Double conversion superheterodyne
Intermediate frequencies:
1st: 69.45 MHz (13.35 MHz: WFM)
2nd: 450 kHz
Sensitivity (except spurious points):
FM 50 MHz=0.18 µV, 144 MHz=0.18 µV, 440 MHz=0.18 µV, 1.2 GHz=0.25 µV
AM 50 MHz=0.56 µV
WFM 91.5 MHz=2.0 µV
Squelch sensitivity (threshold):
0.18µV (FM; 0.25 µV at 1200MHz)
5.6µV (WFM)
0.56µV (AM)
Selectivity (except WFM):
More than 15 kHz/-9 dB
Less than 30 kHz/-60 dB
Spurious and image rejection ratio:
50, 144 MHz: Less than -60 dB
440 MHz: Less than -50 dB
1200 MHz: Less than -50 dB
(Except half IF, 2nd image, 50 MHz band IF and WFM)
Audio output power (at 13.5 V DC): 250 mW typical at 10% distortion w/ 8 ohm load (at 13.5 V DC)

with a million people looking here I just figured it would be faster and
cheaper
than putting stamps on an envelope and snail mailing the entire ham
community.
And besides, if somebody recorded it they could sell it here, after all,
that show was about ham radio, silly as it was.

For Sale: MINT MFJ-9406 six meter transceiver. This rig is a blast! Hate to unload it, but I've got a new FT-847 with 6 meters. GREAT transmit audio! Worked locally and lots of DX using only a three element yagi. CW module installed. Comes with manual, original box, stock hand mic and DC cord. $169 and I will pay for shipping and insurance. If you're short on cash, we can run the transaction through my little Ham/SWL business using your "plastic". First e-mail or phone call gets it. 73 from Bill - WA8MEA, 1.517.563.2613 - http://qth.com/dwm

re: want to buy/locate a used Universal SCPC-200 Receiver.

Hello there,

I'm hoping to find a used "Universal" SCPC-200 satelite receiver, or equivalent for sale on the used market. These receivers were common in broadcast stations.

The scpc 200 has been around long enough that I would hope some of you might have an unused unit left over from your old C-Band satelite days... and would consider parting with it for a fair price.

I plan to donate the receiver to a real public service application near Sacramento, CA. I can buy the unit from you or trade some type of "anchor" or part you might be looking for.

I can also trade broadcast and electronics work if practical... as I also do that sort of thing.

I figure with the migration to digital satelite feeds, one of you out there has one of these things just begging to be placed back in service. So maybe we can work something practical out...

Thanks for reading this... to reply to me, please take the NOSPAM4MEPLEASE out of my Email address and drop me a note. You can also contact me using one of the Email Icons off the sonic web server http://sonic.ucdavis.edu

cheers
skipp

For Sale: A VERY nice Heathkit HW-100. Works great, looks great. Comes with HP-23 power supply, two hand mics (one is the original Heath mic, the other a Turner mic that looks just like the Heath mic.), a NEW W7FG Vintage Manual, spare 6146's and 6CL6 driver. No dents, no rust, original paint, original knobs. Great rig for a Heathkit collector, to have as a spare rig, or even an inexpensive first rig. $295 for ALL this, and I will pay for the shipping and insurance. If you're short on cash for the holidays, we can run the transaction through my little Ham/SWL business using your "plastic". Message-ID: <V6dJ9.307082$WL3.100099@rwcrnsc54>
Source record: 2387

This is the Yaesu FT-990 HF Transceiver that rates a 5 out 5 on the eham.net reviews! See http://www.eham.net/reviews/detail/402 for details. This is a single owner radio that has been very well cared for, hardly used and kept in a non-smoking environment. The radio works great and has never needed any repair. It is in very good physical condition with a few minor scuff marks around the corners that are so small they don't even show up in the pictures, which can be viewed at http://www.qsl.net/k5vx/ . Included are the 500 Hz and 2400 Hz filters, built-in AC power supply and antenna tuner, Yaesu hand microphone, plus the Yaesu FIF-232C CAT to EIA-232 adapter and cable for computer control, and the manual. Asking $925.00 which includes ground shipping (CONUS). Contact Jonathan at k5vx_AT_arrl.net or 972 685 5169. Thanks & 73!

Has anyone here ever dealt with K1MAF? He has a NIB TS570 that I am thinking about buying.

Thanks.

JT

1797. 3 - PacComm WA4DSY 56K RF Modems for sale

On Mon, 9 Dec 2002 01:40:01 -0500 (Eastern Standard Time) "skyhawk",
after having his auction ratted out, <sky444@abs.adelphia.net> whined
like the impotent sissy boy he is...:

yea whatever dipshit....you just money away from my kids
Christmas,,,,,the only reason I was selling this as a package and
cheap I might add so it would sell fast and I could have that cash for
Christmas.....Happy Now asshole.....let me guess now your gonna call
the FBI....we went from Narcing on eBay to Adelphia......wow aren't
you just to special.....please refrain from sending me anymore
email as you are doing nothing but pissing me off more and
more.....and you might think that's funny but you know what it
really isn't....now I'm gonna have to figure out how to sell that
somewhere else quickly to get my damn money for Christmas for my kids
stuff.....this is how the not so rich live....pretty isn't
it...someone like you comes along playing God and they fuck it all
up.....thank you so much ,it really is appreciated

My usual type of totally accurate and completely moral reply"

Hey,
Have fun yourself. You can tell anyone and everyone...They already
know...Anti-Boys been rattin out scumbags like you a long time.
You were just another notch on my holster. As far as being an asshole
goes, I consider it a compliment to see you call me that. If a
criminal hates me I am likely doing something right.

You are really stupid. You think I CARE if you TELL ABOUT ME? On the
contrary. If I did I would not have emailed you to letya know.

Do your worst, buttlick...

I think I will report your illegal business transaction to adelphia.
Since you like to call names so much you can go there and call them
names after your access gets pulled.

You are an impotent shitball and a little boy in a man's world. Take a
hike, sonny.

I have a TS-130S that a friend asked me to sell. It works fine on all bands on a dummy load and 80 & 40 meters when I switch to an antenna -but when I go to 15 and above the needles on a dual meter ping to the top and no adjusting of an antenna tuner will get it down.

I took the rig to a friend's shack near me and tried it using his antennas...same deal.

Anyone run into this and have any suggestions?

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working Viking Valant and SX 300 or Hamuland HQ 110. I'm looking for a good AM Han station
with at least 200 watts out. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop,(It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA. Happy Holidays
73 and thanks for reading

I have for sale or trade the following items (prices don't include shipping, but I'll split actual shipping costs with you):

Yaesu 5400 AZ-EL antenna rotor w/control box, about 50' of cable, copy of manual. Asking $300.

Heathkit HW-104 solid state HF transceiver w/HP-1144 power supply, HP-1661 speaker, original construction and operating manuals. Does about 100 watts out on 80-10 meters, no WARC. Excellent condition. Original RCA antenna jack has been replaced with a BNC. Asking $275.

Kenwood TS-830S 160-10M HF transceiver. Built-in AC supply, hand mic, copy of manual. Good condition. Asking $345.

MFJ 1270C TNC (2 of them). Original manuals, boxes, accessories. I'm the original owner on these. Both in excellent condition. $80 each.

AEA PK-232 TNC (2 of them). One is the MBX version and includes manuals and cables for $80. The other is a plain 232 and comes with one radio cable for $65.

Alinco DR-1200 2 meter data radio. 25 watts out on 2m packet. You can put a microphone on it if you want. Includes manual. $80.

I'm looking for the following items:
Swan 700, 700cx
Drake TR4C w/MS-4/AC-4
Drake C-Line twins
Drake TR-7 and PS
Swan 400
Heathkit SB-220
Heathkit SB-230
Legal limit HF amplifiers
Kenwood TS-950SDX
Yaesu FT-101EE

If you'd like to work out a trade, please email me at jcamp2@cox.net. Cash is always welcome, too.

Thanks and 73,
Jeff

Hi All !

I've got an old Hallicrafters SX-96 Shortwave receiver for auction
on ebay, and thought i'd post the link here if anyones interested.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4673&item=1945980255&rd=1

I'm not a ham/shortwave person, and I've put all the details I know in
the auction description. If you have a question for me, please don't
hesitate to email me and I will do my best to answer it.

Thanks and happy holidays.

Mike.
isomeone (at) yahoo.com

ps. I also have a Horizon Eclipse marine radio up for auction which you
can view by clicking on the link above and viewing my other auctions.

900MHz Duplexer
for sale on eBay # 1946564789

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1946564789

Sinclair Radio Laboratories RES-LOK C4220B Duplexer

High-quality unit in great condition.

Perfect for UHF repeater.

Can be tuned by an experienced ham/engineer,
but I'm not sure if it can be tuned to cover the entire 902-928 ISM band.

Beware of this jerk, John Carter AA6JC. I sold him a great working
TS-440S/AT that has scratches on the exterior case and he flamed me on EBay
feedback. Didn't ask for his money back, just the flame.

What a knucklehead, the radio worked great, so what it has scratches from
one too many field day events.

DO NOT BUY OR SELL ANYTHING TO THIS GUY.

You've been warned.

The listing did state that there were scratches on the exterior, but I also said it does not effect the operation of the radio. And it does not. If he wanted a museum piece then this was not it, even the photos show the radio has wear and tear on it. But it does work like a champ.

I'm sorry you find my posting of a useful piece of radio equipment to
ham equipment and swap newsgroups to be crap. At your warm and
friendly suggestion I have looked up the meaning of FA and will use it
in future postings of this nature. If I may offer some unsolicited
advice, I think you'll find that people respond better to help and
guidance than judgement and negativity. This has worked for me for
many years in many different types of discussion forums, on usenet and
bulletin board systems, since before the web.
Best,
Nicholas

I'm looking for a pair of Swan twins -- 600T/600R, a Swan 400, and a nice 700cx. I'm also looking for a working Drake TR4C or a pair of Drake C-Line twins. If you have any of these and would like to part with it, please email me at jcamp2@cox.net. I can offer cash or a swap for a combination of the following items:

Heathkit HW-104 80-10M solid state transceiver with speaker, PS, operating and
construction manuals, excellent condition.

Kenwood TS-830S 160-10M transceiver in good condition (includes WARC bands) and hand mic, copy of manual.

MFJ 1270C TNC with original box, cables, manuals (I'm the original owner).

Alinco DR-1200T 2 meter data radio with cable and manual. Cable is for the MFJ 1270C.

AEA PK-232 TNC. Original box, manual, tons of cables.

1831. FA: BRAND NEW!!! DX-394.

> TS-440S/AT that has scratches on the exterior case.

Thats not to descriptive
Scratches on the top cabinet shell, completely "gouged" up face panel or
"both".
I seen many guys let gear tango in a box with some boatanchors for a couple
hundred before putting it on Ebay.
A scratched cabinet shell is no big deal on a TS-440 but a scuffed up
faceplate is.

> > What a knucklehead, the radio worked great, so what it has scratches
from
> > one too many field day events.
A TS-440 can strap inside a $20 15 inch Laptop Case (Micro Center)....were
you to cheap to buy one for all them field events. Are you one of them
slob's who treats your radios like lug wrenches and ash trays ?
You should have used those exact words in the post.

Please the pic of this radio, item number and we will see
BTW your webpage is down

The pics in the link you posted do NOT show "the radio has wear
and tear on it." In these blurry pics, the radio looks great!
Upfront pics of the scratches would've probably prevented this from
happening. It's probably wise to take pics of all the WORST features
of something you're selling so there is no ambiguity.
It looks to me like you weren't clear enough about what you were
selling and he didn't clarify or ask for scratch pics (which should've
been supplied anyway). Looks like BOTH of you blew it on this
transaction.
He should've returned it to you for his money back and you each
should've paid shipping one way - equally dividing the shipping "loss"
(shipping cost). No harm, no foul, nobody pissed off. Him keeping
the rig and whining... then you whining here makes you BOTH look
pretty purile, IMHO!

I am not saying you did anything wrong and feel your buyer overeacted,
especially since you did mention scratches and if you would have taken it
back. However I just started selling on Ebay and try to be very descriptive
in my auctions and use a lot of pictures. I feel the six picture pack with
supersize is money well spent on a lot of items. I take probably 30 digital
pictures and pick the six best and keep the rest or can take more for a
prospective buyer. Here is a link to one of my completed auctions. Good
luck. --- Steve

A word to the wise. I don't post feedback until the whole transaction is a done deal. I.E., both parties have received what they want and are happy. You can negotiate in the event of a problem and post equally negative feedback if the other party doesn't want to work out any perceived problems. Some here don't agree with that, but I really don't care. They are free to do it the way they want to and so will I.

LOL, thanks for all the posts. Even the critical ones, made me laugh and helps put things in perspective. I own ALOT of radios, most of them I bought used and didn't expect the exterior to be anything but USED.

Functionality and reliability is what counts with electronics. If I had the time, I would have taken the two covers off and repainted them myself. But I personally didn't think it mattered, the radio works great with or without repainted covers. ;-)

I was ticked off because I have been a buying and selling on Ebay for 4
years now and have never had a negative feedback. If he would have asked
for his money back then I would have given it back with no hard feelings, no
negative feedback either, but he didn't ask anything.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1943720516&ssPageName=ADM
E:B:EOAS:US:3

BTW, after he had posted the negative feedack, I sent an email asking if he
wanted his money back because he obviously was not happy. I still have not
received a reply.

Not everyone's perspective is the same. What are scratches to you, maybe be
the Grand Canyon to someone else.
Since you did mention scratches on the radio, pictures of the scratches
should have been shown so that the buyer could make a better informed
decision.

HOWEVER, the buyer could have emailed and discussed the problem with you
first as feedback is impossible to have removed.

Good lessons to be learned from this deal.

_____

Looking at it from the other perspective, if it was THAT
important to the buyer, he should have insisted on pictures
before bidding. No pictures, no bid.

The phrase "buyer beware" or its equivalent is probably as old as
the human race, and for good reason. I simply refuse to make an
offer an anything that is not described to my satisfaction, and
guaranteed to be as described.

Just forget it. If this is your first negative in 4 years and you're fairly active on Ebay, then move on. That negative isn't going away no matter what you do, but I know how it feels to be honest and get your first. Best thing to do is make up for it by earning a boatload of positives. There's always a few a-holes out there who want to complain about anything and everything and do nothing to resolve the problem. They live in a world of gloom and doom and get their "kicks" off of leaving negative feedback.

My only negative is from a guy who bought a $5 signal tracer clearly noted as being untested and "as-is". He gave me a negative because it didn't work and didn't bother to even E-mail me to discuss the problem! I would have cheerfully given him a full refund including all shipping charges and wouldn't even asked for the unit back. Some people are true jerks...

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is
100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic.
In the deal you will get the technical supplement too (AKA Service
manual), as well as the owners manual. I also Have the 3 kW Roller
Inductor Antenna Tuner. They are in good shape I will trade both for a
FT 990 or a FT 1000. I have been using the FT 920 as a backup rig.
Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a
working DX 100 and SX 300 or Hamuland HQ 110. I'm looking for a good
AM Ham station. I will trade this Receiver for a good working AM
station. I want both transmitterwith at least 100 watts out and
receiver. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate
amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I
will trade for a Globe King or full legal output Ham band AM
transmitter. this is a pickup trade only. I will be willing to travel
100 miles from Athens GA.
I also have a Hallicrafters S 38 C Shortwave receiver. It's
in great shape. It works but I have no idea what its worth. It is a
old old receiver. (Make Offer)
I have a MFJ Versa Tuner II and a Roadtalker 40-channel
sideband CB radio that somebody converted to 10 meters. It works quite
well. I talked to a guy in South America on it. (Make Offer)
I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In
10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX
300 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.
I have a Kenwood TM-2530A that I used as a 2 meter packet
station. It needs a Mic and the light that lights up the liquid quartz
dial. The radio works fine and is in good shape. I looking for a good
AM transmitter.
I have a Kenwood TR 7850 This radio I used as the BBS access on 2
meters. It needs a Mic and needs a new lithium battery backup. I turn
the radio off and back on it forgets where it was and defaults to
144.000Mhz. Other than that the radio works fine. I want a working AM
transmitter.
I have a Kenwood TM 201a. I used this 2 meter radio as sat
transmitter. I worked Mirror before it came down. It Needs allot of
work. It needs a dial. The Freq. read out is all screwed up. This is a
fixerupper. It receives fine and transmits fine. It needs a mic too I
will though this in too with either one of the above 2 meter rigs
I have a Versa Tuner II 949c and a Palomar PT 340 tuner tuner that
I would through in too with either one of the above 2 meter rigs. I

also Have a Kenwood KDC 1011 mobile CD player that has the plugs set up for a the older fords. I will through it in too with either one of the above 2 meter rigs.
I also have a Behringer Ultra Graph Pro GEQ 3102 31 band equalizer that I will through it in too with either one of the above 2 meter rigs.
Hey thanks for reading
Happy Holidays
73

1851. FS: Heathkit HW-100 & HP-23 power supply

Newsgroup: rec.radio.amateur.swap
Date: 2002-12-27 02:34:40 UTC
From: wa8mea@hotmail.com
Message-ID: <8a260fb2.0212261834.6ec2cf59@posting.google.com>
Source record: 2304
Cross-posted to: alt.ham-radio.marketplace,rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap

For Sale:

VERY, very nice Heathkit HW-100 with new finals & driver. Original paint, original knobs, no dents, no rust. Works great, looks great. Two hand mics. (One is the original Heath, the other a Turner mic that looks like the Heathkit mic.) Price: $149 and I will pay for the shipping & insurance.

Also FOR SALE: A Heathkit HP-23 power supply in good condition with power cord that connects to the HW-100. Price: $95 and I will pay for the shipping & insurance.

I would like these to go out as a set, since they were purchased as a set. However, if the first two e-mails contain one message from a ham who wants the rig ONLY, and the other message from a ham who wants the power supply ONLY...I will split them up. But...the very first e-mail that wants the set will get the set.

If you're short on cash, we can run the transaction through my little ham/swl business using your Visa or Mastercard.

BTW, I do have a W7FG Vintage Manual for the HW-100 if you're interested. Price for that is $29 shipped.

For Sale: MINT MFJ-9406 six meter transceiver. This rig is an absolute blast! Hate to get rid of it, but have a new FT-847 with six meters on it. Great transmit audio! 12 watts PEP or CW. Worked a lot of stations locally, statewide & DX using a little three element Yagi and a TV rotor. CW module installed. Comes with original box, manual, hand mic and DC cord. $169 and I will pay for shipping via PRIORITY MAIL and insurance. If you're short on cash, we can run the transaction through my little ham/swl business using your Visa or Mastercard. First e-mail gets it!

I have three of these radios, with good batteries and original rubber duck antennas.

One includes a BC-72 drop-in charger, CP-12 DC car adaptor, BP-84H 7.2V 1700mAh pack and BP-90 pack for 6 AA cells $125 for this one.

One includes a BC-72 drop-in charger, CP-12 DC car adaptor, MAHA MH-BP-83 7.2V 1700mAh pack and W&W 7.2V 850mAh pack. $125 for this one.

The third includes a BC-74A wall charger, Periphex BP-84 7.2V 1700mAh pack and a BP-85 pack. I don't have a DC charger or adaptor for this one. $105 for this one.

All batteries are good, several are recently purchased. All prices include USPS Priority mail shipping. Insurance of $2.20 is optional.

I will probably have more ham equipment for sale in the near future, so keep an eye out.

The e-mail is good.

Also open to trades for ?? One thing I am looking for is a Yaesu VR-500.

Heath kit HM_102 meter and a Wawasee 2000 watt meter. Asking 40.oo for the heathkit and 35 for the wawasee. They are both in good shape. They are used so they will be sold as is. I would also trade them toward a good 35 amp power supply or something in that range. Please send emails to kc8qr@neo.rr.com.
Buyer pays shipping.
Tnx

Zenith Laptop. Z-Star 433VL. Completely clean hard drive. **There is no operating system on this computer. No windows, no DOS, no nothing!** Only has a 3.5 drive (no CD ROM) Works OK with a stripped down version of Win 95 but would probably work better with Win 3.x. Has a PCMIA card slot. Battery was replaced about 5 years ago but seems to have problems holding a charge. Unit comes with the power cord. 200 MB hard drive, 8 MB RAM, 33 Mhz.
Asking: $100

Amen! Hell will freeze over before I buy or sell ANYTHING out of
e-bay. Simply is not worth the risks or hassles in either direction.
Fortunately I live near Philly and have the luxury to be able to buy
and sell eyeball-to-eyeball based on the huge NE corridor population
density. 'Tis the only way.

Hello radio land,

Looking for a very clean 75A-1 receiver.

Would prefer local pickup, I am in New England, but would ship or travel for the right unit.

Photos are a plus, clean, original units only please.

Also interested in other black crackle Collins or quality homebrew gear, working or not!

Thanks!
